And I thought Kansas City was bad. I was absolutely amazed that there
wasn't even a modern-leaning CHR in the Raleigh-Durham market.

Radio and Records in L.A. puts out an annual guide to programming.

Also, their semi-annual "Ratings Report and Directory" lists program syndicators, equipment manufacturers, consultants, etc. It's a pretty handy guide.

I'm looking for some information about the Tucson, AZ radio market. I'm specifically interested in:

1. What are the total radio ad revenues in Tucson?
2. What station is the top biller?
3. How much does a spot generally go for in Tucson?

Any information you can provide, or any information about where I can get that information, would be much appreciated. Feel free to e-mail me.

Thanks --

Vince Maffeo

1501. The WBLI Wake Up Crew

Hope everyone is well at the end of the Winter Book.

The WBLI Wake Up Crew has had a great time! In the past 5 months, we have done over 85 interviews. We have had guests that include: Mariah Carey, Jon Secada, Amy Grant, Marilu Henner, Katey Sagal, Dr. Joyce Brothers, Kevin Costner, Dave Nemeth from EXTRA, Jack Ford from NBC, Mrs. New York America, and a whole bunch more.

If you are able to get a hold of this past Sundays New York Daily News, you would have seen the WBLI Wake Up Crew on the cover of the Long Island section.

If you are in the New York area, you can see Steve Harper from the Wake Up Crew hosting Segway, the nations first radio/tv interactive countdown show on WLIG-TV55 and stereo simulcasted on 106.1 WBLI.

Best Of Luck to everyone.

Sincerely,

Bill Fisher, Producer
WBLI Wake Up Crew

>generate a signal strength contour map.
>

We have already developed such a FM signal strength survey system using
a GPS receiver and computer controlled signal strength meter.

The system will allow multiple FM stations to be measured, allowing
a comparison between the stations. After sampling the signal strength
data and GPS location over a geographic area, the data can be
stastically analyzed to determine coverage trends.

This is a signal strength (in voltage) and not field intensity (mV/m)
data which is collected, however. A calibrated antenna would have
to be employed to determine field intensity.

>several times when news stories for Monitor originated from here on the
>West Coast and AT&T or somebody had to physically unplug patches and
>replug them, lots of clicking and about 5-7 seconds of silence.

It took even longer, depending on the circumstances. Back in the late 50's, Monitor featured great jazz late at night, hosted by Al "Jazzbo" Collins who was, at that time, in New York. There were lots of remotes...Marian McPartland from The Hickory House, Dorothy Donegan from I can't remember where, stuff from Birland, etc. There were always pickups from the Los Angeles area, too, and Collins would warn us over there air that it would take about fifteen seconds from the time of his cue until the west coast remote would come in. NBC used not a "round robin" circuit but a "reversible"
circuit (as David stated), and while the telco folks in the switching centers all across the country didn't have to actually use patch cords to switch amplifier inpts to outputs and outputs to inputs (figuratively speaking), even when a lot of it was done by relays at the puch of the button, it still took a fair amount of time. In the course of a switch from a New York origination to a Hollywood origination during a station break, the listener didn't notice the switch because the local break covered it. But, as David says, it was sure evident when they did "hot siwitches" on Monitor.

Anyway, the late night Monitor segments were super...lots of good natured and erudite banter between Jazzbo and the newscaster on the shift, Leon Pearson, an older fellow and the brother of columnist and commentator Drew Pearson.

It's hard to believe that the *real* NBC, the original NBC hasn't been in the radio business for years.

Cheers.

I'm just glad to see Al Bandiero back on the radio ANYWHERE!! He really knows his stuff in a big way and deserves to be on a first-class station that seems to really respect where he's coming from and what he does. Now I can't believe that Fast Freddie Colon, another holdout from the golden days of 70's radio (WXLO, WKTU) has had to take a job at Metro Traffic. I can't believe, that with the "musical formats" game that seems to be going on in NYC radio today, that there is not one station who could use a man of Freddie's considerable talents and experience. (I mean, if Ray Rossi can end up on CBS-FM, anything is possible. BTW, I happen to like Ray; I hope PD Joe McCoy does the smart thing and keep him on in a huge way).

Probably was. There were a bunch of Real Don Steele's in quite a few markets. In the late 70's there was one on WKXW out of Trenton, NJ. He did a Mon-Fri noon time show and a Sunday night oldies show as well.

I first heard him when the station increased it's power and changed calls from WBUJ-FM, He had rejoined the station that week. From the on air banter with the P.D., I got the impression he had been in the market for quite a number of years, but had either left it, or was on a competing station in the Philly/So. Jersey market.

Unfortunately he passed away in a light plane crash in the early 80's. I'm told he was the pilot, but that's 3rd hand info.

The Real Don Steele that is with KRTH IS the original.

This is in response to the articles from Sean Caldwell and Chris Bessert about WVIC's format change (especially Chris's quite 'emotional' message :))...

Well, it seems like a pretty sad week in radio in Michigan. What I'd like to say is - Chris, fear not!! I'll be willing to bet that *someone* at *some* station out there is going to see the "hole" left by the exit of 'VIC from reality (notice I don't stifle my hate for country music :) :))....and fill it -- REAL QUICK!

Here in Philadelphia, when our mainstream CHR Eagle 106 WEGX went out of business 1 year, 11 months, and 3 weeks ago...it was replaced - LESS THAN 3 DAYS LATER! - by Kiss 100 WKSZ, which flipped from light AC to Adult CHR, and the name changed to Y100 WPLY. 3 DAYS!!! I was in shock! ...Not to mention, I "predicted" the flip -- I was sitting, listening the brand-new 'Smooth Jazz 106.1 WJJZ' while also flipping around, and saying to myself, "Hey! Kiss 100 isn't doing too well in the ratings...why don't they become the new "Eagle 100", or something?? So, there it was, Monday morning.

Another example here was the flip of WIOQ from Urban CHR to mainstream CHR (though they STILL can't seem to shake off the ten-year-olds :))...and then, about a month later AC Star 104 yanked artists like U2 and Bruce Springsteen from their playlist, and started doing what I call "Rhythm/AC"..it seems to be a 'dance hits of the 70s, 80s, & 90s' type of format now - everything from James Brown to 2 Unlimited, from Donna Summer to Real McCoy. So, in effect, they sort of filled the dance 'hole' left by the switch of 'IOQ (I did hear Toni Braxton's "Love Shoulda Brought You Home" 4 times in one day on Star, so the jury's still out on Winter ratings predictions).

What scares me now is that Philly only has ONE COUNTRY STATION!! I'm scared FOR MY LIFE of who's going to flip next!!! Although, I wouldn't mind seeing classical station 95.7 WFLN or talk station 96.5 WWDB flip :)

One last thing -- I finally saw it! Call me naive, but I think I can now safely say that I've SEEN IT ALL! ...I saw a plain billboard on I-95 last night for country station 92.5 WXTU which read, "Do *NOT* listen to 92.5fm". Sure enough, I swung on over to 92.5 to find, much to my disappointment, that they were still doing country. I thought that, maybe, they were performing a format change and they didn't want anybody listening until it was complete...Oh well, so much for getting my hopes up!

* Z-Rock Signs Off
As rumored, there will be a format change at KZRX(100.3). Program Director Carla Foxx, who arrived 3 weeks ago after 6 1/2 years at crosstown AC KESZ(99.9), has called a news conference for Monday(3/6) at 7:15 AM Phoenix time. The early hour may be an indication that rumors of KZRX going young talk with Howard Stern in mornings are true. No goodbyes for the hard rock format...it was on the air late last night, but early this afternoon, KZRX is simulcasting modern rock sister station KEDJ(106.3-The Edge). Foxx will not give details on the content of Monday's news conference...only that "it's big"...and has asked the two Phoenix TV stations with live morning shows at that hour(KTVK Channel 3 and KSAZ Channel 10) to consider airing the announcement live.

Speaking of KEDJ, morning man Willobee is leaving on March 16 or 17. The Arizona Republic reported Friday that Willobee is going to work for Q management in Los Angeles, whose clients include Material Issue and Phunk Junkeez.

Veteran Phoenix GMs Lloyd Melton(ex-KUPD) and Jim Seemiller(ex-KOOL AM/FM and KUKQ) are teaming up with Jay Brentlinger to bring Brentlinger's KAZR(103.9) into the Phoenix radio battle. KAZR is currently licensed to Coolidge, about 45 miles southeast of Phoenix. Within the month, the trio reportedly will drop the station's satellite classic rock format, go mainstream CHR, move the studios to Scottsdale and begin work to upgrade the station's signal in metro Phoenix. Expect a live morning show, with some, if not all other dayparts satellite. Currently, only KKFR(92.3-Power 92) is CHR(with a heavy urban influence), and has been alone in the format since Y95 became Coyote(95.5) Labor Day 1993.

John Gallagher,sports reporter at Toronto's CILQ(107.1,album rock;Q107) left that job on Friday. However,he'll still be with CITY-TV(ch.57)where he's a reporter there as well. The Toronto Star on Saturday reported on the matter Saturday,quoting Gallagher as saying,"They made me an offer I could refuse." He also isn't happy with Q107's shifting format(beginning to emphasize classic rock more),saying that the Q Morning Zoo has turned more into a petting zoo.

Also,WKSE(Kiss 98.5)is said to have made a decision on a new PD,which was apparently made last Friday. Including the nominees mentioned(including the one from Keymarket's station in Lima,Ohio-who,as it turned out,wasn't that much interested in the job),another one was added into the mix-a PD working in Providence,R.I. Interesting:could Paul "Boom Boom" Cannon be the one? He's working there at last report.

Source record: 34175

As rumored for weeks, KZRX(100.3)FM has changed call letters and format...
and is the latest affiliate for Howard Stern.
The new calls are KHOT. The format is a young-demo talk.
Stern signed on at 7:15 AM Arizona time Monday(3/6), with much of his
nationally syndicated show devoted to answering questions from Phoenix
media.
KHOT's Schedule(programs syndicated satellite except where noted):
4AM-10AM: Howard Stern
10AM-1PM: Carla Foxx(Local)
1PM-4PM: Susan Loggins on Law
4PM-8PM: Tom Leykis
8PM-10PM: Mike Walker-National Enquirer Gossip Columnist
10PM-1AM: Dr. Joy Browne
1AM-4AM: Tom Snyder

To compensate for KHOT's signal limitations(the transmitter is in Globe,
80 miles outside Phoenix), Stern will be simulcast on sister sportstalk
station KGME(1360) from 6am-10am.
While Stern stayed in New York for the launch, Tom Leykis is in the Phoenix
area all week, doing his show from Tempe Diablo Stadium. He guested on
Karla Foxx's show yesterday...with some of the conversation centering on
Leykis' time in Phoenix at KFYI(910).

1518. Sacramento RadioWatch

Newsgroup: rec.radio.broadcasting
Date: 1995-03-08 04:41:36 UTC

Hello Bill... I've been having periodic difficulty posting through my nres reader program (Nuntius 1.2 for the Macintosh)> I'm snending an e-mail request for help from the University of Michigan, which developed that program. Until I get that straightened out, I hope you don't mind me sending you this posting by e-mail. Thanks! (Material to post follows):

For those who would like to follow OJ all day but are unable to remain glued to the tube--presumably they have to go to work, for example--Sacramento talker KST (KSTE, 650 kHz, 25 kw D, 1 kw N) has obliged, running gavel-to-gavel coverage of the OJ trial fed by ABC News. Local afternoon talk show host Enid Goldstein still stays on watch in the studio, ready to take over at trial recess. During lapses in dialog, she provides descriptive accounts of what's happening in the courtroom (presumably by describing what she sees on OJ-TV).

Remember AM? Here's how the AM spectrum in Sacto looks these days. Of 12 local signals, the three powerhouses in town-the aforementioned KSTE, plus KHTK (1140 kHz, 50 kw fulltime) and KFBK (1530 kHz, 50 kw fulltime) are all news/talk. Two other AMs have Christian talk. Of the remaining seven stations, three are Spanish, one is oldies, one is nostalgia/big bands, one is R&B oldies, and one airs just about everything that's left over (foreign languages, old-time religion, hip-hop and a chamber of commerce talk show or two).

A previous Sacramento RadioWatch posting noted that Joey Mitchell had joined the air staff of KHYL, Cool 101 (101.1 mHz, 50kw). When the station added Mitchell, the guy left standing when the music stopped was Mark Lennartz, who had been with KHYL for seven years. Lennartz let me know he was fired to make room for Mitchell after scoring the highest KHYL morning show numbers in years. Mark says he helped bring Cool 101 to the number 3 position in Sacramento, completing Chancellor Communications' unprecedented 1-2-3 sweep of the market with their three properties (KHYL, KFBK and KGBY, 92.5 mHz, 50 kw AC).
As programmer, Lennartz had been responsible for returning KHYL to an oldies format in 1987 following a period when a station had drifted from its oldies orientation to contemporary pop. Lennartz hosted KHYL's morning show 6 out of the 7 years he was there. Mark says he was fired against the programming department's wishes. Lennartz says Mitchell had been told by station management that Mark would be moving to another shift.
Lennartz added that the day after he was fired, the Fall 1994 numbers were released, showing Lennartz at #4 in adults and total listeners, #3 35+.

With replacement baseball a reality, I'm curious how stations around the country are handling the spring training broadcasts. In NYC, WFAN and WABC refused to carry last Saturday's Yankees/Mets game, WFAN opting out at the last minute on Friday.
According to the newspapers, both stations are supposed to carry 10 games during the spring, but have said they might not with replacements on the field. The Mets have even agreed to let WFAN tape delay their spring games to carry the Knicks or Rangers live. Ironically, both stations are in the last year of their current contracts.
Anybody else with a comment?

Source record: 34180

umar@tiac.net (Rob Landry) writes:

>I can think of some companies that have bought out many stations, fired
>lots of employees and demoralized quite a few of those that are left,
>treating them like dirt.

This is irrelevant. Radio does not exist to make employees happy and contented. It does not exist to provide busy work for people who cannot do anything else. And for any number of examples you could provide showing such things, an equal number of counter examples could be provided where the new owners raised pay and improved conditions.

>There was even a rumor that one large broadcasting company was forming a
>contract engineering subsidiary that would drive the local independent
>contract engineers out of business by deliberately operating at a loss for
>a year or so, by which time the independents would have given up the ghost.

More power to them. If they could actually provide superior engineering and customer satisfaction for less money than independents, why should you object? If they then raised prices later, the independents would be back. That is how the market works. No one is immune from its effects.

>The marketplace is not always as benevolent as its defenders try to paint it.

The marketplace is neither cruel nor benevolent. It is like the force of gravity--it just is. Like gravity, you can make it work to your advantage, or you can be miserable trying to work against it or by trying to ignore it.

>I have read recent posts of yours, John, in which you've complained that
>broadcasters don't respect employees any more, that radio's no fun any more,
>and broadcasting as a career has no future.

Alas, an opinion shared by many. But neither I nor anyone else can expect to have the right to be guaranteed an unlimited amount of satisfaction in an industry. Rather than sit back and moan about where radio is going, I have gone into supplementary fields. What gives me the right to expect and demand satisfaction in a radio career?

>I understand and respect your
>faith in the power of the free market to enrich all our lives, but I do not
>share that faith.

My only faith in the marketplace is that it is exists and it is real. Other than that, it will only do what it does. It is up to me to either use that force to my advantage or not. My only right is to have the opportunity to present my value to the marketplace. Beyond that, no one is compelled to

use my talents, pay any specified price for them, or assure me that those talents will always be in demand. Those who expect otherwise will be very disappointed.

>Do not mistake me for someone who blindly advocates the intervention of big
>government in economic matters. Government is irrelevant.

Absolutely.

>The marketplace
>is equally irrelevant.

Unless we are going to make slaves of those with talent and compel those capable of generating wealth into arbitrarily distributing it to those who are not, the marketplace will always be the singularly unavoidable principle.

>The only thing that matters is that people's liveli-
>hoods be protected.

This is nonsense. No industry exists for the purpose of providing "livelihoods". If a person has something of value, he can sell it to another. If a broadcaster can operate without someone, he has every right to do so. Broadcasting is not an extension of the welfare system.

>If someone can convince me that industry consolidation
>will mean more good paying jobs and a higher standard of living, then I'll
>applaud it.

I guess I won't convince you then. Good paying jobs are created when there is a demand for scarce talent. That is what makes the pay good. It makes no difference whether the employer is Ma and Pa or the Really Big Corporation, no one can afford to employ people who are not necessary. Your observations concerning the assurance of jobs makes me envision a picket line of blacksmiths in front of a Lexus dealership.

If the duopoly owners cut too many people, it will show up, ultimately, in their profits. Even THEY do not what this to happen. The equalibrium may not occur as quickly as you would like, but the end result will be more natural and enduring.

I received this from Bernie Wagenblast (I95BernieW@aol.com)

Tripp,

I read your posting on helicopter crashes and I thought I'd give you some further details on the WOR crash. My source is Fred Feldman who works with me at TRANSCOM.

Frank McDermott (sp?) was the name of the pilot who was killed in January 1969. The ship went down in Astoria, Queens, with part of the copter on top of a garden apartment and the rest in a courtyard. Frank normally did Friday nights, while Fred did morning drive on "Rambling with Gambling."

George Meade, who was one of several pilots flying for WCBS at the time, was later hired to work with Fred at WOR.

Frank was the back-up pilot and normally flew weekends during the summer and one Friday p.m. drive a month in the winter months. Fred flew most a.m. and p.m. drive shifts. Frank was scheduled to fly the previous Friday afternoon, but due to a poor weather forecast and Fred's longer experience, Fred took that Friday and switched with Frank on the Friday of the crash.

1525. DAT Machine Automation: Does It Exist?

Newsgroup: rec.radio.broadcasting
Date: 1995-03-08 04:41:52 UTC
From: robert573@dallas.relay.ucm.org
Message-ID: <3jjcig$bam@vixen.cso.uiuc.edu>
Source record: 34183

I am posting this article in Airwaves for a friend.

He wants to know if there is a DAT machine system that stations can use, which will start playing a song/recording then after that event ends, it will automatically stop and be standing by for the next song/event from the same tape. For instance... let's say there's a DAT tape in the machine with 15 songs on it. After song 1 plays, will the tape cue to song 2 then stop and be in standbye mode until the jock starts it?

If there is such a system, who makes it, and what is the estimated cost?

thanks!

Rob

Broadcasters,

I'm hoping to locate an old and dear friend/former coworker named Domino Rippey. Real name: William R. Matthews.

I lost track of him in Minneapolis in 1982. He was with KLOL and WCCO-FM there. He has also worked in the following markets: Jacksonville, Dallas, San Diego, San Antonio, Lubbock and El Paso.

Any leads as to his present whereabouts would be greatly appreciated!

1528. HCJB--Special Upcoming Programs

Newsgroup: rec.radio.broadcasting
Date: 1995-03-08 04:41:57 UTC
From: "MacHarg, Ken" <kmacharg@mhs.hcjb.com.ec>
Message-ID: <3jjcil$bau@vixen.cso.uiuc.edu>
Source record: 34186

HCJB, The Voice of the Andes, is pleased to present several special programs over the next two months. Tune in and enjoy them, and let us know your comments. --English Language Service, HCJB.

Monday, Tuesday, Wednesday; March 20, 21, 22. Billy Graham Global Mission Crusade from Puerto Rico. These special broadcasts will feature the Billy Graham crusade held the previous weekend. This will be one of the largest world-wide media events in history. It will be available globally via television and HCJB radio. Listen to this world-renowned evangelist as he addresses today's world from a Biblical perspective. Broadcast times: 07:30 UTC to Europe, 09:00 UTC to South Pacific, 17:00 UTC to Europe and the Andean Region, 01:00 and 05:00 UTC to the Americas.

Saturday, March 25. DX Party Line Special. Rich McVicar and HCJB Working Visitor David Yetman take you on an audio adventure to several of Quito's radio stations. Colonial Quito will make its way into your home through your shortwave radio. 07:30 UTC to Europe, 09:00 UTC to South Pacific, 17:00 UTC to Europe and the Andean Region, 01:00 and 05:00 UTC Sunday to the Americas.

Monday, March 27. The Silent Cry--Latin America's Street Children. A repeat of an exploration of the causes and some of the solutions for this pressing social problem. This documentary features specialists from UNICEF, CARE, Compassion International and other Ecuadorian sociologists. 08:00 UTC to Europe, 09:30 UTC to South Pacific, 17:30 UTC to Europe and the Andean Region, 01:30 and 05:30 UTC Tuesday to the Americas.

Wednesday, March 29. Ralph Carmichael Big Band Radio Special. The famed composer-conductor plays some of his biggest music refashioned in the Big Band style. Ralph says he's been hearing them in his head since the day he wrote them. "As I did these songs in their original forms I would always think, wouldn't it be great if I could only lay into this with eight brass and five saxes," he says. "This project has been a dream come true for me." 7:30 UTC to Europe, 09:00 UTC to South Pacific, 17:00 UTC to Europe and the Andean Region, 01:00 and 05:00 UTC Thursday to the Americas.

Good Friday, April 14. Good Friday News Special. With all of the urgency of today's all-news stations or CNN, this special takes you back to the first Good Friday as news reporters cover the trial and death of Jesus Christ. Join on-the-spot

correspondents as you sense the mood of that day. 07:30 UTC to Europe, 09:00 UTC to South Pacific, 17:00 UTC to Europe and the Andean Region, 01:00 and 5:00 UTC Saturday to the Americas.

HCJB - THE VOICE OF THE ANDES - QUITO, ECUADOR

I am not familiar with "Dalet", although the name rings some bells. I am not sure what you are looking for, but I am working on a piece of sharware from the Macintosh, intended for collage station here in the US, which will replace cart systems with a Mac and large hard drive, or networked hard drives. Is this the sort of thing you need?

: was, at that time, in New York. There were lots of remotes...

Gosh, I was just too little to remember this part of Monitor. But I do remember the fabulous New Year's Eve shows NBC did from places all around the country. I seem to remember them continuing to do this until the 70s. I miss that kind of radio. There are great live performers out there, there is a potential audience spread around the country, certainly not Letterman numbers, but heck, we're not talking about a high budget show either. It just seems a shame something like this can't still be done.

Locally, for decades KNBR/KNBC used to do "76 Party Time" on Saturday nights, with live music from 3 venues, as I recall, the Fairmont, Top of the Mark (Hopkins) and another hotel. It was sponsored by Union Oil (now Unocal), and obviously must have drawn *some* listeners considering it was on for so long.

Steve I Am wrote:

: While I'm not sure of the past life of the old KYA San Francisco <One Nob
: Hill Circle...below the Mark Hopkins Hotel>

WOW! THE Steve Mitchell from the good old KYA days! I'm impressed!
Anyhow, my mom was once a local soap opera actress and hung around many of
the stations. She said KYA for years was in the basement of the Hotel
Whitcomb, aka the San Franciscan, now the Ramada) at 1231 Market. Later
that place was home to KPEN (now KIOI) and KSAN (aka KSOL and KEST today).
KYA has been owned by everybody under the sun, including the Hearst
Corporation during the 1940s when it was the key station in the Hearst
radio network. But from the late 1940s until just a few years ago it
always tried to appeal to a youthful audience, having one of the first
"record hop" programs on local radio.

: song "Do You Wanna Dance" by Bobby Freeman was recorded in a record closet
: that opened onto the underground parking garage of the Mark Hopkins ...

Gosh, gotta dig out that old record and give it a listen. I always
thought the 1 Nob Hill Circle location (it's actually a fictitious
address) was one of the classiest in local broadcasting, what with all
the celebs coming and going from the Mark Hopkins.

My stations, WSYR AM, WYYY FM and WBBS FM are located in what used to be a gear factory for Chrysler. Before we moved in, the building had been abandoned for some time, looking like a bombed out remnant from a war. The city and a developer renovated the building, and now it is premier office space for some very high profile businesses in Syracuse.

Update on the PD situation -- B101.1's just hired Jim Ryan to replace Mark Hamlin. Ryan programmed KXYQ in Portland -- the one-time "Van Halen station", since Jim was instrumental in getting his friends from the band (and their management) involved in own
ership. They just cashed out for a tidy profit, and Jim's literally just back from the beach (Hawaii, I think) to take on his first gig since then.

> x1
>

Not so! 97.7 HTZ-FM, broadcasting from St. Catharines, puts a good signal into most of metro Toronto, and plays all the harder-edged and current rock that Q-107 has just abandoned. Believe me, we couldn't be happier with "The Mighty Q"'s new format!

Other rock stations receivable in Toronto include Q's own sister station, Y-95 from Hamilton, which runs a classic rock format. Buffalo, NY and Barrie, Ont. signals can be received by those with high-end equipment and an outdoor antenna, but their impact is negligible. HTZ is a bit choppy downtown, and on some cheaper radios, but we're also carried on cable throughout metro. We do plenty of Toronto club nights, are the presenting station of many of the harder rock shows in Toronto, and have strong ratings throughout the area. Ian's comments that Toronto has no "real rock station" makes me wonder if the posting was perhaps made on behalf of some of his friends over at Q.

By the way, we heard today that long-time Q morning sports guy, John Gallagher, is gone. One source says he was dusted after commenting on air that the Q morning zoo has become "the Q morning petting zoo". Another version has Gallagher quitting over a salary dispute. Maybe someone close to that action can fill us in?

Kevin,
Scala makes the Paraflector, it is a 3' x 6' parabolic grid. They are around $ 500 and are available on any UHF tv channel. They are pricy, but if you are looking at commercial-type antennas, they are the least expensive.

Message-ID: <3jjck5$bj0@vixen.cso.uiuc.edu>
Source record: 34201

I would offer the following caveats:
1. Research is like fire. It's a good servant, but a bad master.
2. Research can tell you what the audience wanted yesterday, maybe what they want today, but rarely what they want tomorrow.
3. A lot of research companies are consultants in disguise.
4. A lot of consultants are Program Directors in disguise.

Research is a great tool, but a lousy predictor. Trust your gut and then use the research to back up (or challenge) your decision-making. It works!

Source record: 34203

You're right on a few counts regarding the old XEROK. It was 150,000 watts in those days, maybe still is, I don't know. The CKLW plans would have backed the daytime power off to 50,000. And I kind of recall the nighttime power being increased to 250,000 under that proposal.

As to the taping of the programming, that was a common feature of many Mexican border stations aimed at the US market in that era. I think, however, you are unfairly blaming the Mexican government. If I remember correctly, the prohibition on program lines crossing the border was the child of our own FCC. The Mexicans certaionly had no problem with the proposed satellite feed from Canada.

And...you weren't the only one who had to sign off your local 800kHz facility because of CKLW and XEROK. My hometown also had a daytimer on 800. It would go down with the sun and we would listen to that distant giant as it rolled in out of Canada. I didn't suspect in my wildest dreams that I would eventually spend a lot of years of my life in that plant. A truly marvelous place to work in spite of the idiotic Canadian regulations.

Later.

POST
X-Newsreader: Trumpet for Windows [Version 1.0 Rev B final beta #1]

JOB DESCRIPTIONS/IMMEDIATE HIRE

SALES ASSISTANT

Westwood One Companies has an opening for a Sales Assistant, start date March 13, 1995. Job involves working with three account executives who call on Advertising Agencies in the Media Planning Department. Candidate must have interest in communications, advertising, and marketing industries. Responsibilities include word processing, answering phones, creating proposals, processing sales orders, and daily correspondence. Must be able to handle deadlines and prioritize work loads. A Communications, Marketing, or English major is preferred. Wordperfect and Lotus required.

Salary: $17,500

Please send resume to: Westwood One
1675 Broadway
17th Floor
New York, NY 10019
Attn.: Human Resources
Fax#: 212-641-2189

RESEARCH ANALYST

The Research Analyst provides listening estimate information to all departments of the company including Sales, Affiliate Relations, Programming, Finance, and Management. The major emphasis is on the Sales Department. Position reports to Senior VP of Research and Research Manager. Responsibilities include generating quantitatvie and qualitative data to fulfill requests using vendors such as Arbitron, RADAR, and Simmons, as well as maintaining affiliate lists and listening estimates. Candidate needs to be computer literate.

Please send resume to: Westwood One
1675 Broadway
17th Floor
New York, NY 10019
Attn.: Arthur Salisch
Fax #: 212-247-0393

Westwood One is the largest syndicator of radio programming in the United States. Westwood One's talk programs are among the most popular and best known in the nation, including such personalities as Don Imus, G. Gordon Liddy, David Brenner, Tom Leykis, Larry King, and Mike Walker. Special event

programming includes The Rolling Stones Voodoo Lounge Tour, U2 Live from Dublin, Madonna, the Who's 25th Anniversary "Tommy" Concert, and the Paul McCartney New World Tour. The work enviroment is music oriented and fast paced.

Westwood One is an equal opportunity employer.

IT>and will probably soon go off the air, having declared he will
IT>once again run for President, so Mutual/Westwood One has
IT>an early afternoon national slot opening soon...I can't believe
IT>Ollie isn't interested...

Bob,
The problem with politicians/felons doing talk shows is that it isn't their day job. Spending three hours a day holed up in a radio studio isn't their idea of a rip-roarin' time. They often spend much of their time away from the show doing speaking engagements.

He also probably realizes that doing a conservative network talk show against Limbaugh doesn't have much of a future. Compared to Limbaugh, Ollie North is breathtakingly dull stuff. There's a limit to how long the super-patriot personna can remain fresh.

The Mutual folks tell me Buchanan is already off the air.

I wonder if anyone's familiar with the implications of the latest RADAR book (out 3/7/95) and it's effect on Westwood One. The restructuring of Westwood One with the new Infinity element has been on the books for the past two, but, as everyone knows, effects from change take longer than that to show. Any word on what this latest outcome could mean on the decision to restructure, and where that might take one of the industry's foremost figure (MelK) in front of the press, as well as his contemporaries?

I'm a radio observer who wonders what this could mean for one of the industry's barometers.

Australian Radio Broadcast,
Women Out Loud

Special programs for IWD On Saturday 11 March, the Women Out Loud program on Radio National will be celebrating 20 years of the Coming Out Show. The first program went to air on 8 March 1975 - on International Women's Day in the International Women's Year. In 1995, the Women Out Loud team will be broadcasting live across Australia from the Sydney IWD march and rally between 1330 and 1430.

The show will feature lots of famous women from then and now talking about the program and what's happening where thet are for IWD - including Carmen Lawrence in Perth, Dale Spender in Brisbane and Pat O'Shane in Sydney as well as live moments from the Sydney concert. AT 5pm on the same day, 11 March, the second in a series of retro programs looking back at the 20 years goes to air.

Produced by past co-ordinator Nicola Joseph it takes a look at women and work as presented by the Coming Out Show over two decades and includes updated interviews with women today about the gains that have been made. It features archival material about the early Jobs for Women campaign and the landmark discrimination case between BHP and former female employees.

Looking at what's happening now, Nicola reports on the launch of Working Women's Centres in most states and talks to women who work in challenging and difficult working environments. You can contact the Women Out Loud Kath Duncan and Jackie May by phone (02) 333 1429, (02) 333 1426

1554. New England Radio Watcher: WHAV goes spanish

Newsgroup: rec.radio.broadcasting
Date: 1995-03-09 04:55:54 UTC
From: fybush@world.std.com
Message-ID: <3jm1oq$sq5@vixen.cso.uiuc.edu>
Source record: 34224

On Monday, WHAV (1490 AM, 1 kw ND) in Haverhill MA, some 30 miles north of Boston, flipped from an oldies/talk format to Spanish, LMA'd by WNNW 1110 in nearby Salem NH.

WHAV's sister FM, 92.5 WLYT, keeps its AC format, which serves the Merrimack Valley, southern NH, and rimshots Boston.

This leaves just 3 English-language AMs in the Merrimack Valley: Lowell's WCAP 980 and WLLH 1400, and Lawrence's WCCM 800. WLLH goes Spanish after 6pm daily, earlier on weekends. WCAP's ownership situation is uncertain after the death last fall of longtime co-owner Israel "Ike" Cohen.

Over in Leominster (40 miles or so NW of Boston), WCMX 1000 could come back on soon as religion, more than 3 years after going dark.

Back in Beantown proper, WBZ radio has added a new affiliation. Effective Monday, 3/6, we've added CBS Radio and ABC Business Week radio to our current AP and ABC Information webs. CNN and CNBC were dropped in the shuffle. 'BZ keeps ABC-I for the hourly news 7pm-4am. Half-hourly newscasts overnight are dropped.

And lest you think nothing's happening at WBMA 890 Dedham-Boston, they finally moved their legal ID from :13 past the hour to the top hour. Still no sign of the much-discussed call change to WBPS (although a recent article in the Globe managed to refer to the station as WBMA the first time, then WBPS in the next paragraph!)

And on a TV-ish note: WPRI-TV Providence is being sold to CBS, pending FCC approval. WPRI has been an ABC affiliate since the late 70s, when they swapped affiliation with WTEV-6 New Bedford MA (now WLNE). WLNE loses its CBS affiliation now...they're likely to go ABC, but say they'll talk with Fox also. If WLNE goes Fox, that will put Fox affil WNAC 64 into play as well.

We've had a great deal of success with good old 8-bit 22 kHz stereo System 7 soundfiles. We tend to do some of the post work on the spots, and we always ask for approval before airing. We record them into Audioshop ($99), save the AIFF file as a System 7 snd, then upload them to the client on AOL. They download them and double click. We tell them to either listen with headphones or with good external speakers (or if they're primarily buying AM, nothing special). We can easily accomplish the same thing by converting to .wav's for Windows users, but that rarely comes up. At 14.4, we can deliver a :29 in about 12 minutes (6 minutes up and 6 minutes down), about 24 minutes for a :60.

In fact, since you're on AOL, download the 'AOL/The List' file in our area's Mac Software Library (keyword: OLT). That's a great example of both our production values and our approval method. :)

Ping me via e-mail, and we can chat about it. BTW...we're on KEX on Sunday nights from 6 to 7p.

In a previous article, pgeorge@sallie.wellesley.edu (PETER Q. GEORGE) says:

>
>The Blackout of 1977 was a very memorable night for me. I was 17 years old
>at the time living in Berkshire County of Massachusetts and was watching
>WPIX "11Alive !" from New York on cable. It was almost time for "Channel 11
>Action News" with Pat Harper and Steve Bosh. It never made it to the air,
>Channel 11 was gone. All New York City stations including WNEW-TV (5) and
>WOR-TV (9) were gone also. So, time for the radio and naturally I turned
to

I remember this quite well too, living in Long Island at the time...I
believe we were watching WTNH-TV8 out of New Haven (being in Long Island,
we could easily get NYC and Connecticut stations equally well and in fact 2
& 3 were CBS, and 7 & 8 were ABC) - suddenly 8 went blank, soon replaced by
a card, "network difficulties", showing a cartoon of a bunch of beefeaters
or something in a line, and the last was upside down...we started tuning
around, but soon WCBS2 was back on with their TV movie, but a local
announcer broke in right over the movie to explain what had happened. It
was wild for us even though we still had power. But again, as you stated,
the stalwarts kept it up and kept the city going...

>last minute on Friday.

Tripp, from what I've heard (but have been unable to confirm independently), WBAL in Baltimore has decided not to air *any* Major League Baseball games that include replacements. This apparently includes any games that might be offered by CBS Radio. The decision, if true, is consistent with (but not necessarily related to) the decision by Baltimore Orioles owner Peter Angelos not to field a team this Spring with replacement players.

Elsewhere, I've read a story about the play-by-play team that has gone to Spring training with the replacement/wanna-be teams, and the announcers were struggling for something to say about players they knew absolutely nothing about! I'm wondering...with as few people showing up at the games at spring training camps in Florida, etc...what does this say about the loud collective yawn we're likely to hear from our listeners, for stations that choose to air replacement team games?

Cheers, Max

Unfortunately, localizing is VERY expensive for radio. The problem lies with the term we all have come to know and love.. "broadcasting," which involves serving the largest amount of people possible. While the issues of last night's town council meeting in East Armpit Township might be of extreme importance to its inhabitants, two miles down the road in West Armpit, they're saying "Who gives a damn?" and are changing the station. Same for obituaries.
Newspapers have it a little easier. (emphasis on little). If a paper prints a story or feature that doesn't interest a reader, he/she will skip over it...and still view reading that edition of the paper as a positive or neutral experience. On the other hand, if a radio station is doing too much town council and school board stuff, the listener will have a negative response to the station and will tune in a competitor. Is this the "genericizing" of radio? Especially for younger demographics, yes!

I've worked at stations that try to be all things to all people- a Buffalo market station during the daytime and, due to a restrictive night pattern, one that superserves our (suburban) city of license at night. The results? 0.6 in the fall Arbitron. Listeners listen for consistency, not block programming.

Very small correction...it's Christopher Michael. He was an afternoon
anchor at WMAQ until last year when the infamous Westinghouse folks canned
their most experienced (highest paid) anchors and Chris was one of the
unlucky ones... I hope to hell that Westinghouse doesn't start playing
Lizzie Borden at WXRT...this would be the greatest tragedy I could
imagine happening in Chicago radio.

Great report, Joe... I really enjoy your updates on Chi radio.

>Those who got
into trouble were not so much from the large number of stations put on in
>the '80s - the so-called 80/90 stations - but more from those in the earl
'80s who overpaid for their acquisitions. They accepted absurdly high
>multiples on valuations and got balloon payment notes that came due when
>cash flows were not significantly better than at purchase time.

I know all about this. I worked for a heritage station in the '80s that wound up in this situation. And it got worse when the co-owners decided to sue each other alleging financial improprioritities. It was tough staying focused on my programming duties, and keeping my staff motivated. But we pulled through, and the station continues to be extremely successful.

I still contend that the 80/90 stations caused most of the problem. Let's take the Atlantic City/Cape May NJ market for example. When I worked there in the late '70s, there were a total of 5 AM and 5 FM stations, and at least half of them weren't making money. Now, there are *26* stations there... 7AM and 19 FM. Even with casino gambling, the market can't support all of those signals. Most of the class A FM's are now in LMA/dupoply situations, or carrying satellite programming.

Expansion and consolidation is a natural cycle for any business. Hit scan on your car radio, and you will come to the realization that there are simply too many radio stations in most markets. Something has to give.

In a recent posting, Bob Simth wrote:
"The station with probably the unluckiest track record
has got to be WGR in Buffalo. First, back about 10 years
ago, their chopper lost power and had to make an emer-
gency landing in Delaware Park. (Their traffic reporter at
the time, Tom Bauerle, survived to become their morning
drive host, which he is today...no one was hurt but a lot of
joggers and picnickers got a real scare.)
Then, just about 3 years ago, tragedy struck, when
the chopper hit a power line and crashed into the Niagara
River seconds after a broadcast, killing traffic reporter
Mike Roszman and his pilot.
Just recently, WGR changed to a fixed wing aircraft,
and it flipped over and crashed on takeoff. Fortunately it
wasn't very far off the ground when it lost power. Traffic
reporter Bob Massie and his pilot were just shaken up
a little. But it's got to make everyone wonder..."

Just a minor correction -- it was Tom Langmeyer, not Tom Bauerle, who was in the WGR Traffic Plane in late 1987 or early 1988 when it made an emergency landing in Delaware Park. Langmeyer was the station's music director at the time. I believe that he is now at KMOX in St. Louis and actually worked with Bauerle before the latter returned to Buffalo as WGR's morning host.

There is also a fourth incident involving a WGR aircraft. It occurred in January 1994 when Bob Massey was forced to make an emergency landing during a winter storm. This leads me to say that airborne traffic reports are not necessary in a city the size of Buffalo. The same delays occur day after day in the same spots. If there is a major accident disrupting traffic, it can be covered just as easily from the ground.

I knew Mike Roszman. He was a veteran Buffalo broadcaster who performed just about every function there is, from music host to newscaster. To this day, I am saddened we lost such a talent just so 'GR can be the first to tell us of the delay on the Inbound Kensington.

Perhaps airborne traffic coverage is a necessity in major cities, but no one can convince me that's true in Buffalo.

I likewise cannot remember the name of the pilot/report but yes Fearless Fred Feldman did split the duties. The chopper that went down was giving a report and indicated that they would be right back because they were expericing trouble. The pilot was able to fly away from storage tanks and the roadway below but crashed and he was killed. It was not without some excitement that the WOR on air talent was trying to find out if a report of a chopper that crashed was his own. I lived in the next town up from the place where WCBS's chopper was headquartered. I remember when it had it's first mishap and the maintenance crew was blamed for lousy work!

It is a risky business but someone gets paid to do it...

A company called Radio Systems modified DAT players to make them much more broadcast-friendly. I belive they would act just as you're asking.

I can't possibly imagine, however, actually using DAT machines in a reliable, broadcast automation system. Recordable CD's would be about the same $$$ and would be much more reliable. Anyway, putting all audio on hard drives is the best way to go now since mass storage on hard drives is getting so cheap. A DAT-based automation will be nothing but grief, mechanically speaking.

>(no, not Alice 106, but Alice at 106) and their PERSONALITY Line-Up ...

Yea, there is no stability here. On Thursday last week Big Dog 92.5
(KZDG Country) changed format to Z-Country. They have adopted some
major attitude with liners like "We played 40 minutes of music this
hour, why they (refering to 98.5 KYGO-FM) only played 25 minutes..."
They have also changed almost every word to begin with Z, like it's 30
Z-Degrees. Sounds like they have the same manangement, but rumors are
they have been sold and are now owned by Shamrock Broadcasting (who also
own KXKL "Kool" 105 -- Oldies).

>since then, Night Dude - Dino .. has been blown out ... I know NO details

I was listening that day on WGBB 1240AM (actually, I was listening the next day on tape). If you were to ask anyone in Don & Mike's camp, they would tell you that they (Don & Mike) pulled the show from WNDE because they were not happy with the way the station was airing the show and because WNDE refused to take their call on or off the air.

I remember that I felt connected to the world, even though I was a child, miles from the nearest gas station, telephone, or human being, adrift in a Ford Fairlane offroad from a Route 66 that was two lanes of cracking pavement. We were on sand somewhere amidst shimmering heat.

********** End of Forwarded Message **********
Interesting thread. Does anybody remember the weeknight program which NBC Radio began a year or two later? It was sort of a weekday Monitor, similar format. Everynight the host had a live conversation with Irving R. Levine who was the NBC man in Moscow. I can't remember the name of this program, but it was also quite good. --Ken MacHarg

I'd heard that Salem Broadcasting, the right-wingers who own WAVA, were going to syndicate Ollie, and that WWRC would just be the local affiliate. This may still be the case.....The station is running comments from it's "listener line," where various callers weigh in with views on Ollie pro and con. I assume that means Ollie is still in the station's plans..... Otherwise, it's a pretty odd strategy promoting a talk show host likely to land at one of your competitors.

'Course, it's not like they're promotional geniuses over there at WWRC. They dump their very competent morning host who had generally improved the station's a.m. ratings in favor of a series of politicos (Bob Dornan, Paul Begalia) whose mix of incompetent broadcasting and blatant propaganda is virtually unlistenable. Why didn't WWRC hang on to Cuthbert until a real replacement was available? I've read the station is still on the hook for his contract until May.

Maybe this explain the station's continuing inability to outdraw weak Christian AM stations......

I've been wondering for a long time whatever happened to a disc jockey named Ron Diamond. Ron was on in the Philadephia Area in the late 1960's on WIFI-FM, 92.5 in Norristown (now WXTU-FM) and on WTTM, 920AM in Trenton. He played a lot of what is now called "doo-wopp" as well as the soul and Motown records that were new at the time. He had a rather outgoing style (as opposed to "laid back") and was a lot of fun to listen to. He left WTTM around 1969 or 1970 and I never heard of him again. If anyone has any information about what, if any, stations he was on after that, I'd appreciate it. Thanks.

>

Close. It was the "Clear Track" Polka ("Bahnfrei" in the orginal German). As I understand it,
Strauss originally intended it to be about a train rather than a horserace. But since the trumpet solo at the beginning has been used as a racetrack call "to the post" for so long, the thing has become identified with horses rather than trains.

1581. Q: What to sharge for a 60 second spot?

Newsgroup: rec.radio.broadcasting

I apologize if this isn't the most appropriate forum for this question, but I couldn't find any advertising related groups. My partner and I have gotten a gig doing a jingle for a chain of clothing stores. This is only the second non-spec jingle deal we've gotten. Could someone give me some insight into what we should charge for a 60 second spot with original music and a voice-over? What about getting residuals whenever it airs? I know these are very general questions, but if someone could let me know what some standard practices are I would greatly appreciate any help. I will need to let the client know today or tomorrow.

Thanks very much,
Larry

Subtitle; Don't Leave Your Resume in the Copy Machine!
What always worked for people I know: sneak into the Sales Manager's office and page through an enormous catalog titled SDRS, Standard Rate & Data. It lists commercial stations, their technical attributes, primary management names, formats, and top rates charged. Everybody puts in their "national" rate, which tends to be inflated; it's what they would charge IBM if it made a buy direct from Madison Avenue. It can give a peek into a market if read carefully.
Do not rip off the sales manager's book. It's too big to hide in your car trunk (we're talking big) and costs a bundle.

"There's a limit to how long the super-patriot persona
can remain fresh."

One other question remains about this flip-flop (he's
coming, he's not coming, he's coming) on Ollie...
and that's whether the guy's style is suited to RADIO.
Ollie, love him or hate him, is not a bad stump speaker.
But oratory isn't what works on radio, at least not now.
All of us who have to do it day by day for a living know
that to get an audience, you don't talk to folks like you're
addressing them in a convention hall or at a campaign
rally. You relate, one on one, to each person in your
audience as if you're a friend and lunch companion.
(If you work the midday trick that's just what you are.)
You establish a personal bond. If you're doing interview
segments you make the listener feel like he's the third
person at the table (along with you and the guest) and
you're speaking for that listener and including the
listener in the conversation. If it's open phone, it's
a straight one-on-one chat.
I just don't know if Ollie can shift gears to do what we
all do naturally (or at least have enough practice at it so
it's second nature by now). If he can, it'll be a hell of a
tribute to his PD's talent development skills. If he can't
(and I suspect he won't) then it's a sign that he's just too
stubborn and set in his ways to adapt to our medium,
and he's going to fall flat on his ass. People in DC political
circles think this is going to be just a parking place and
moneymaking stop on the way to a Congressional run
in Virginia at the earliest opportunity. Time will tell...

I've been listening to Bruce, Harry and the whole crew at 101 for the longest time. I seemed to have misplaced my Reunion tapes, but found one from 1989 and have a lead on replacing some of my masters. Nothing like that "Old time radio" to get the blood stirring!

Anyone have a copy of broadcast when New York had the powerr outage? Anyone remember what song was playing on 77WABC when the power brownout occured?

(just in case you don't remember, it was "Everyone's gone to the Moon" - I think that's the title). I heard Bob Shannon do the yearly "Recreation" of that day some months back.

dj912 makes some interesting points regarding vic's flip to hot country, although I'm not sure I agree with the following viewpoint.

>I suspect the operating expenses as a CHR were quite high...however, >taking on the WITL machine (country since 1969 or so) is going to be a >real challenge...and an expensive one.

WITL changed internally when Chuck Mefford and Mid-West Family Broadcasting sold the station in the late 80's. Since then, the changes that have taken place might not be visible to the naked ear, but they possibly have opened a door -- to let a big cat in.
Time and ratings will tell.

88 YD YP YP Y8888D' Y888888P `Y88P'

======================================================================

Yes, before the advent of television, there was still a source of
moving pictures. It was called RADIO. But unlike television, the
pictures we all saw in our minds were different for each "viewer". That
was the magic - the magic of imagination. We created our own pictures,
we invented the color, the sights, the scenery... all from the sound
that came over the big box.

We laughed at Fibber McGee and Molly, sat breathless on the edge of our
chairs with "The Shadow" and marveled at the sound effects of "The
Green Hornet".
```

Well, radio may have changed since those golden years, much of it for the worse, but thankfully the programs still live on; the magic is still around. This mailing list was created to help foster the enjoyment of those nostalgic radio shows for both the folks who remember listening to the originals, and those who would like to experience programming much different than today's musical and talk radio formats.

OTR is dedicated to discussions of those wonderful radio days and the preservation of those great shows. In addition we can discuss modern day attempts at radio drama, comedy and mysteries that air in various places.

Please feel encouraged to discuss anything and everything pertaining to the "golden days of radio" in this forum. Critiques, biographies, remembrances, availability of tapes and transcriptions; the forum is open and available to all who cherish the great history of the great medium, radio.

To Subscribe to OTR Digest, Send email EXACTLY as follows....

To: otr-request@airwaves.com
Subject: SUBSCRIBE

- THE BODY OF YOUR REQUEST IS IGNORED -

You will receive a file similar to this one, but with much more information contained in it, including UNSUB instructions etc.
Please read that file, even though it resembles this one.

Enjoy the list, it is very active and a lot of fun.

The Arbitrends are in. As usual, it's country WFMS and rock WFBQ way out in the lead. 70s WNAP is pulling down some impressive numbers, though. Also, for the first time since I started reporting on Indy radio, modern rock WRZX is off the map.

The top ten stations (12+) and their share of listeners are:

12+
WFMS-FM (Country) 12.8
WFBQ-FM (AOR) 11.7
WIBC-AM (News/Talk) 8.6
WTLC-FM (Urban) 7.0
WNAP-FM (70s) 6.6
WENS-FM (AC) 6.3
WTPI-FM (EZ) 5.8
WZPL-FM (CHR) 4.9
WHHH-FM (CHR) 4.5
WGRL-FM (Young Country) 3.8

1596. O.J. Computer Game

Newsgroup: rec.radio.broadcasting
Date: 1995-03-10 08:39:06 UTC
From: deitz@richmond.infi.net
Message-ID: <3jp37a$b8q@vixen.cso.uiuc.edu>
Source record: 34104

Release date: March 8, 1995
Contact: Corey Deitz (804) 227-3390

Richmond, Virginia -

It was bound to happen: The O.J. Simpson murder trial is now the subject of a computer
game thanks to a Richmond, Virginia radio personality.. "Trial Of The Century" is an arcade-style game for Windows (tm) which features a mixture of parody, satire and humor.

For instance, the first level's backdrop is one of the actual evidence graphics from the trial
depicting the O.J. Simpson home. In that level, the player scores points by helping O.J. knock
an Orange ball against floating knives. But, if a roving police car touches you, you lose a life.

On the other hand, a player who scores well is offered a trip to a bonus level called
"Shootout At the O.J. Corral". Here, against the backdrop of the Old West, the player gets a
little target practice as he attempts to fire a weapon and hit roving blobs of DNA.

Other levels include a dash through the Rockinghan Tennis Court where DNA chases O.J. as
he tries to grab money to pay off the lawyers. Another level features Kato with golf club in hand,
chipping burgers from "McAlibis". The player scores points by grabbing the flying food in a set
of chattering teeth!

When the player advances to a new level, Judge Ito pops up to advise them on their good
fortune. But, if you make the wrong moves and lose your lives or let your score go too low,
Marcia Clark will come on the computer screen and send the player back to try again.

During the course of "Trial Of The Century", the player is also offered a chance to answer
questions. For instance:

"What is the role of the News Media in a Trial"

1. Accurate reporting when there's no good gossip.
2. Talk about how NBC newsguy gave judge a wedgie
3. Mooch lunch off Jim Moret at CNN

(correct answer is 1.)

or

"If Oliver Stone directs the movie, what do you expect?"

1. A comparison of Nicole Simpson to a Vietnamese refugee."
2. Speculation that there was a grassy knoll by Nicole's condo."
3. A conspiracy between O.J., A.C. and CNN

(correct answer is 1)

"Trial of The Century" was designed by Corey Deitz, a morning radio personality at
WRVQ-FM in Richmond, Virginia. The game is absolutely free. It has been uploaded to
America Online and Compuserve and should appear later this week.

(Note: If any radio station is interested in getting a copy of the game on disk to make copies as a giveaway to listeners, I don't mind sending it.....but you gotta' pick up the postage and handling. email me with request. Also: I've already done a couple of interviews....if anyone wants me for
that purpose, gimme a call at 804-227-3390 voice mail or email me at deitz@richmond.infi.net. - Corey)

I get it, Sid, I get it. But actually, and certainly not to take anything away from Tom Marchitto, I think that the 'VBR-ABC "endless summer" job may have been "invented" back in the mid-60's by myself (owner of Media/Scan, an advertising/marketing PR agency which has a number of broadcast equipment manufacturer clients) and Richard Factor (head of Eventide, and a long-time Media/Scan client) It all started when we invited WABC's late, great Bob-a-loo (Bob Lewis) up to address the VBR annual dinner in about 1963...

According to the _Cincinnati Enquirer_, WLW is contractually bound to broadcast all weekend Reds' spring training games. Beginning with the third week of spring training, WLW is required to broadcast all Reds' spring training and regular season games. I'd have to think that the folks at Jacor hope the baseball dispute will be settled soon, because from the looks of things, replacement baseball is going to attract only a small fraction of the usual number of fans. WLW is currently in a tight ratings race with country station WUBE-FM 105.1, "B-105".

I'm the host of KID'S CORNER, a daily, live interactive radio show for kids which airs on WXPN (88.5 in Philadelphia; 104.9 in Lehigh Valley) and WKHS (90.5 Worton, Md). After 7 years of post-it notes between my producer letting me know who's on the air, what school s/he goes to, and where s/he lives, we've decided to try to enter the computer age.
I'm looking at different systems in use at talk radio stations. Does anyone have any suggestions? The difference between our show and others is that we call kids back to use them on the air, rather than keeping them on hold.
Any ideas? Please respond personally to: oconnell@a1.relay.upenn.edu

: Perhaps airborne traffic coverage is a necessity in major cities, but no one
: can convince me that's true in Buffalo.

Much as I like some of the traffic people I've met in the SF Bay Area,
this, the #4 metro market (including Oakland and San Jose) does not need
airborne traffic reporters either. The same jam-ups happen in the same
places. There's always a "jack-knifed big rig on the Nimitz" and there
are always the same bottlenecks. Whether it be from a plain, copter, or
from the ground, I don't think traffic reporting serves any useful
purpose whatever, *except* for complete road closures such as the recent
slides in the Santa Cruz mountains, Devil's Slide, etc -- and those can
be covered once or twice and that's all that's needed.

1603. Dallas Radio/We Deserve Better!

Newsgroup: rec.radio.broadcasting
Date: 1995-03-10 08:39:13 UTC
From: Marq Kaplan <marqkpln@connect.net>
Message-ID: <3jp37h$b9a@vixen.cso.uiuc.edu>
Source record: 34111

Currently, Dallas is the number 8 market in the U.S., So why don't
we have the variety and quality that our market position should
reflect? My trip to Mardi Gras prompted this posting. New Orleans'
radio dial was full of variety/talent/and less repetition. In Dallas,
if you like country music - YOU WILL BE THRILLED! In Dallas, if you
like Classic Rock - Dallas radio will rock you hard! In between is
where we fall apart. I'm talking FM for the time being. We have a
(70/80/90)'mix' station that is currently doing a great job - Mix 102.9.
We have one MOR, a few Christian, one classical, 3 or 4 Spanish/Tejano,
2 Urban, 1 Jazz, 1 oldies (KLUV/98.7 - repetitious & mired in 50s/60s.)
We have The Eagle 97.1 with Howard Stern in the morning, and who cares,
the rest of the day. They call it pure rock - their blend shifts and
is currently trying to bite a little off the EDGE. I truly wish that
they would regain their market leading position with a revamped format
consisting of CHR/ALTERNATIVE/DANCE. For CHR we have the old "NEW"
KISS-FM - 106.1. For the most part, their sound quality is lower than
a badly used cassette. In the next dictionary to be published, they
will include a reference to this Kiss under REPETITION. They have
some good quality air staff, but their sound and format bring them
down - certainly not the overall sound of the #8 market. Just one
example - "GOOD VIBRATION" by Mucky Mark is not current and shouldn't
be played EVERY DAY, EVERY couple hours or so! KISS plays so many
slow songs and Mariah Carey, that you would think that they were
trying to grab listeners from MOR KVIL 103.7! And now to the EDGE>
In much of Dallas city limits, The Edge is half static, and half MTV.
Their transmitter is 60 miles north in Gainesville, their format is
very MTV. The best of the EDGE is EDGE club on Saturday nights, but
the fun of it is taken away by a signal that is barely STEREO near
downtown or south. The listeners on the NE side of Dallas occasionally
get treated to a country station from somewhere that competes for
the frequency - 94.1 There you have it! STATIC,REPETITION or COUNTRY.
Wont someone please grab a frequency and give us something to brag
about! Dallas radio can be so much better! Listen to KRBE 104.1 -
Houston, or B97 New Orleans, or Chicago FMs - IT CAN BE DONE!
Someone should jump out of that huge COUNTRY/CLASSIC ROCK pie and
give people that want current music something to listen to.
Sorry this is so long....I get passionate about radio!
Until next time, this is RON IN DALLAS :-} Scanning for better radio!

1604. Re: DAT Machine Automation: Does It Exist?

>getting so cheap. A DAT-based automation will be nothing but grief,
>mechanically speaking.

VLOH-FM, a local radio station here (non-commercial, subsidised -> low-budget)
uses just such a system for its non-stop music programming (which on weekdays
fills 20 to 22 hours of the airtime). A central computer drives several CD
and DAT players. One custom CD has been recorded with jingles, and some
jingles are on DAT tape. Occasionally the system hiccups, but not very badly.

The system has operated for a few years now, and i suppose recordable CD's
were too expensive then. It's not a standard system. I think they had some
support from the nearby Sony importer.

1609. Kenny Everett - Radio Superstar

Newsgroup: rec.radio.broadcasting
Date: 1995-03-10 08:39:19 UTC
From: rockwood@morgan.ucs.mun.ca
Message-ID: <3jp37n$b9h@vixen.cso.uiuc.edu>
Source record: 34117

I was saddened when I read in a recent posting that Kenny Everett was afflicted with AIDS and that he had run into some financial difficulties. Many of you have never heard of Kenny Everett, but if you can find an aircheck of his work at Radio One or Capitol Radio put it on your tape machine and let me guarantee you'll be listening one of the most entertaining and inspiring radio personalities ever to speak into a microphone or spin a disc.

I know little of his bio, I just know that I first heard of Kenny when I heard him on an issue of Programmer's Digest in 1972, and I couldn't believe that this disc jockey could be so good. This was a fluke. This was one of those shows that just works all the way trough, but if I heard another aircheck it wouldn't be as good. Then I met Tom Konard, and Tom and I became close friends, even though we've never met physically. Tom ran an aircheck business out of Chicago (since moved to Wild Rose,Wisconsin) and was a big Kenny Everett fan. He sent me more Kenny Everett tapes, and it was amazing. In the many many hours of Kenny Everett airchecks I listened to, I couldn't find a single bad one. NOT ONE. He was brilliant. Witty, Highly produced, a great ad-libber and always up.

Since then I have listened to those tapes over and over and over. Whenever I'm feeling a bit dragged out and begin to question what I'm doing right, I take out those Kenny Everett tapes and I listen to them again. It's the most inspirational tape a radio personality could ever hope for.

If someone in England knows Kenny, could they wish him well on my behalf, and let him know that even here in North America he had a wide circle of fans, admirers, and people who respected and admired his talent and ability. Very best wishes, Kenny Everett.

Message-ID: <3jp37n$b9l@vixen.cso.uiuc.edu>
Source record: 34118

I just finished reading Radio World Magazine's (March '95) profile of
Max Kinkel, 2am-530am on WCBS-FM. A terrific article...but one thing
kept me wondering: is ths the *same* Max Kinkel who used to do evenings
at the old CKLW / Windsor as "Super Max"? The article makes vague references
to Kinkel coming "from a proud radio fraternity that formed years ago in what's
called the Drake era"...and Max goes on to say "I was a Drake jock". And the
author *never* said where Max had worked before WCBS-FM.

Oh, yeah...I loved the fact that he's still clinging to his Koss Pro 4AAs!
(Its been some time since I last worked with jocks extensively...what do most
folks use these days in lieu of the Pro 4AA?)

Cheers,
Max

======================================================================

Yes, before the advent of television, there was still a source of
moving pictures. It was called RADIO. But unlike television, the
pictures we all saw in our minds were different for each "viewer". That
was the magic - the magic of imagination. We created our own pictures,
we invented the color, the sights, the scenery... all from the sound
that came over the big box.

We laughed at Fibber McGee and Molly, sat breathless on the edge of our
chairs with "The Shadow" and marveled at the sound effects of "The
Green Hornet".
```

Well, radio may have changed since those golden years, much of it for the worse, but thankfully the programs still live on; the magic is still around. This mailing list was created to help foster the enjoyment of those nostalgic radio shows for both the folks who remember listening to the originals, and those who would like to experience programming much different than today's musical and talk radio formats.

OTR is dedicated to discussions of those wonderful radio days and the preservation of those great shows. In addition we can discuss modern day attempts at radio drama, comedy and mysteries that air in various places.

Please feel encouraged to discuss anything and everything pertaining to the "golden days of radio" in this forum. Critiques, biographies, remembrances, availability of tapes and transcriptions; the forum is open and available to all who cherish the great history of the great medium, radio.

To Subscribe to OTR Digest, Send email EXACTLY as follows....

To: otr-request@airwaves.com
Subject: SUBSCRIBE

- THE BODY OF YOUR REQUEST IS IGNORED -

You will receive a file similar to this one, but with much more information contained in it, including UNSUB instructions etc.
Please read that file, even though it resembles this one.

Enjoy the list, it is very active and a lot of fun.

I used to work for KCOP-TV in Los Angeles. The building started life as a beer brewery, then became the Monument (?) studios, home to early TV shows like Sky King and Death Valley Days. The first KCOP engineering vehicle was the Chrysler station wagon driven by Sky King in the series.

When I was there in the 1970s, the old wagon wheel that Ronald Reagan used to lean against during his intros to Death Valley Days was still in storage under one of the control rooms.

IL>I wonder if anyone's familiar with the implications of the latest RADAR
IL>book (out 3/7/95) and it's effect on Westwood One. The restructuring of
IL>Westwood One with the new Infinity element has been on the books for the
IL>past two, but, as everyone knows, effects from change take longer than
IL>that to show. Any word on what this latest outcome could mean on the
IL>decision to restructure, and where that might take one of the industry's
IL>foremost figure (MelK) in front of the press, as well as his contemporaries?

IL>I'm a radio observer who wonders what this could mean for one of the
IL>industry's barometers.

Laura,
It probably means that if the barometer drops it'll rain.

In the past 10 years we've had so many networks "restructure" that
it's very old hat. Mel is one of our business' most successful
businessmen and I suspect he'll weather the storm very well.

As large as Westwood/Infinity is, it's hardly a large enough factor to
have much impact on the industry as a whole. In fact, the larger a
company gets, the slower it generally responds. Very large animals dance
very slowly.

Rich

Source record: 34129

Not so much a comment, but a followup question. We know
WABC's management has declared it wants to break the con-
tract to carry THIS year's Yankee games unless the regular
rosters (now on strike) suit up and show up. We also know
Steinbrenner wants to enforce the contract and force WABC to
air the games and pay full price. Has that little dispute resolved
itself...especially in light of the fact that technically, the contract
has already been broken with the refusal to air replacement
(scab) spring training games?
Also...nobody seems to be airing scab games on TV, either
broadcast or cable...is it possible that baseball will literally be
completely off the air in most major league markets this year,
other than those few where the team and a broadcast outlet are
under common ownership (Chicago Cubs and Atlanta Braves)?
ESPN has enquired already about substituting Triple-A games,
which by universal acknowledgement will be much better in
quality than the so-called major-league product this year. (I have
this directly from the GM of our local AAA club.) It's ironic that
cities like Buffalo, Rochester, Charlotte and Las Vegas (and
24 other almost-but-not-quite-major-league towns) will have
much better baseball, at lower prices for everything from tickets
to concessions to radio/TV rights, than the product that will be
inflicted on "major league" cities. Even the ticket price rebates
and discounts offered by 27 of the 28 major league clubs will
not change that. It looks like the media have figured it out too.

Wow! He conveyed in two paragraphs what I have been trying to say for two weeks!

I have seen two stations die because of consultants and research. It's really neat to look at on paper but the second you try to run the station by it you will be amazed by the way it SOUNDS.

Top 40 radio began by ordinary people playing the biggest and best songs. I think it's time we came down off our ladders and ran our own stations.

loudeagle1@aol.com (Loudeagle1) wrote:
>
> RE: The :60 vs. :30 controversy...

:60 are good if you want to portray an image. :30s are better for quick announcements. The arguement that if you can't say what you need in :30 seconds, then you've got too much to say, is relavent. But, use that :30 seconds of material and go beyond it to grab at the listeners desires. Advertising is all about getting response. If the spot doesn't make or give a reason for the listener to act, then it's a waste of advertising dollars. Sometimes there isn't even enough to fill a :30 second spot, so there's ample time to fill with image stuff there. how much does the client have to say? That's really the question.

Surfing the 'Net, eh, guys? Well, I said a LOT of research companies are really consultants in disguise...and a LOT of consultants are really Program Directors in disguise... not ALL!

I am very fortunate to work with Steve Rivers and Broadcast Architecture. They are among the best and brightest in this business, not to mention that they're on the cutting edge of such technology, as with the MixMaster (tm) music testing.

On the other hand, I've worked with some research firms and consultants who were more interested in their own opinions than anyone else's (read: AGENDA) and who thought it was their God-given right to order the Program Director to do their bidding, usually with the blessing of the GM or even the corporate types.

Believe me, I don't nearly have all the answers and I welcome anyone's opinions. My only problem comes when consultants stop consulting and start DIRECTING. That's the Program Director's job and he/she should be allowed to do it. And if they're no good at it...hire someone else!

Most of this boils down to ego and politics and I've always tried to stay away from that, which is probably why my tolerance for it is so low. But I have been known to firmly stand my ground as a Program Director, even when it isn't the politically correct thing to do.

Hey...just my opinion. Yours?

Clarke Ingram

I'm not in the business, but I listen to Tom Leykis daily on WJNO 1330/1230 AM out of West Palm. I concur that Leykis could give Limbaugh a run for his money any day of the week. You point out that Leykis often screams, but you failed to note that Limbaugh can be just as outrageous. Hearing them debate could be quite a show.

Eesh, before I go too much futher with this, I want to make clear I don't admire Oliver North, his past exploits or his kooky politics. The following is for clarification purposes only:

> One other question remains about this flip-flop (he's
>coming, he's not coming, he's coming) on Ollie...
>and that's whether the guy's style is suited to RADIO.

I've heard him as a sub host here in Washington and, doggone it, he was pretty good. Certainly has a better radio voice than GGLiddy, and he comes off as being more intelligent and better prepared.

> If he can, it'll be a hell of a
>tribute to his PD's talent development skills.

Gee, I don't know, signing a right-winger with a national following to host a talk show doesn't seem like going out on too much of a limb.

>People in DC political
>circles think this is going to be just a parking place and
>moneymaking stop on the way to a Congressional run
>in Virginia at the earliest opportunity. Time will tell...

He's already declined to run for the Senate in '96, which would be the "earliest opportunity." And he professes no interest in the House. If this move is positioning himself for a run at elective office, I fear it would be (eek!) the presidency.

But, I think the fact that he couldn't beat an incumbent with as much baggage as Chuck Robb in a conservative state like Va. means he can't win anywhere. And, since he's a smart guy, Ollie probably knows that. A nationally syndicated show provides him with a better forum to present his views, and he won't be uncumbered by things like ethics, responsibility, etc.

Recutting a single line in a spot is one of the great frustrations of running a production department. But when you have a DSE 7000, working from a DAT 2-track master to do it is not the trauma Brian suggests.

Thanks to the range of splices available and the audio manipulation abilities of this digital workstation, I find that punching in a different phone number or a change of date is no harder than redoing the original mix.

This amazes me to no end. I remember Dale Dorman from KFRC in SF in the 1960s, which means he was only in his 20s at the time. It's so weird turning on the TV once in awhile and seeing the DJs doing begathons for a local PBS station here. They look not at all the way I imagined -- most of them just look too old for their voices. Of course, I've shocked people who think I'm a lot younger than my own voice. But Dorman and Casey Kasem and some others probably had these great voices when they were in high school!

Source record: 34141

Here in Beantown, the Replacement Red Sox have had some games aired on Sportsradio 850 WEEI, the duopoly partner of Sox flagship station WRKO 680. WEEI has taken the "Rep Sox" when it's been convenient, blowing them off for more interesting fare such as Celtics games, and today for reaction to yesterday's Reggie Lewis article in the Wall Street Journal.

Still up in the air is where the Sox, replacement or real, will land when the season starts. The contract says the Sox will stay on WRKO, where they've been the last few years...but local media reports say WEEI/WRKO owner American Radio Systems is pushing hard to put them on WEEI instead. Both stations have comparable 50kw signals, directional nulled to the west.

The big issue, it seems, is what happens on the two or three nights (more in the very unlikely event the Celts make the playoffs) that the Sox and Celts' schedules conflict. Neither team wants to be bumped to WRKO...hence the fight.

As for me, I shall have the Superradio tuned to 990 as I listen to WCMF(AM) Rochester for the games of my hometown, AAA International League, Rochester Red Wings. No strike in the minors...:-)

1634. New England Radio Watcher: WICE sold

Newsgroup: rec.radio.broadcasting
Date: 1995-03-11 04:17:22 UTC
From: fybush@world.std.com
Message-ID: <3jr88i$f6v@vixen.cso.uiuc.edu>
Source record: 34143

Or, a minor Providence radio station to remain minor:

WICE(AM) Pawtucket-Providence RI (550 khz, 1000/500 w, DA, CP for 4600/3400 w, DA) is being sold to Back Bay Broadcasters of Boston for "an undisclosed amount."

Back Bay's only property currently is WBNW 590 Boston, which took over the old WEEI facilities in September 1994. WBNW programs Bloomberg Radio out of New York with local inserts from Metro Networks in morning drive, afternoon drive, and overnight. 9 am - 4 pm they run local financial talk, including the "Money Experts" show that migrated there when WHDH went dark, along with two newer shows. Evenings they run Bruce Williams and other syndicated money talk. They have the Bruins this season, but lose them to WBZ next year.

WICE is currently running miscellaneous satellite sports talk. When the deal closes, WICE will switch to a similar format as WBNW, including simulcasts of the 9am-4pm talk block. Back Bay is promising local news and weather -- does anyone know if there are any Metro-type services providing those in the Providence market, or will WICE have to generate them themselves?

Back Bay is partially owned by Peter Ottmar, who also has interests in WARA(AM) Attleboro MA/WWKX-FM Woonsocket RI. It's not clear yet whether WICE will operate at all in tandem with those two.

So far WBNW has, to put it nicely, failed to burn up the Boston market. To put it not so nicely, they're not breaking a 1.0 rating yet. Against strong locals like WPRO and WHJJ, it's questionable whether WICE will do any better down in Providence...especially considering that anyone wanting the Bloomberg service down there gets a good signal, day or night, from Bloomberg flagship WBBR 1130 New York.

* Arbitrends show :

The first week of March brought Arbitrends -- rolling Arbitron Averages --
for November, December and Janurary. :

In the 12-plus :
Fall'94 Sum'94 Format
1. WBZ AM 1030 8.1 8.0 7.7 Full Service(News/Talk/Sports)
2. WRKO AM 680 6.7 7.5 4.5 All-Talk(Rush)/Red Sox Baseball
3. WXKS 107.9FM 6.6 6.0 7.2 CHR - "KISS 108"
4, WJMN 94.5FM 5.8 5.5 5.9 CHurban - 'Jam'n 94-5'
5. WBCN 104.1FM 5.3 5.4 4.7 Full Service(AOR/Talk/NFL Pats)
6. WODS 103.3FM 4.6 4.7 5.3 All-Oldies - 'Oldies 103'
7. WBMX 98.5FM 4.5 4.6 4.3 'Hot' AC - 'Mix 98.5'
WCRB 102.5FM 4.5 3.5 Classical
WMJX 106.7FM 4.5 4.2 4.9 AC -'Magic 106.7'
10.WZLX 100.7FM 4.0 4.2 4.6 CR -'Boston's Classic Rock'

* Second all-sports signal launched...

In late February, WBMA AM 890 began carrying syndicated
all-sports format courtesy of Prime Radio Sports based in Irving, Texas.
PRS is now in 22 markets across the country. WBMA's position on the
dial is just 40 Khz away from Boston's 50K watt all-sports WEEI AM 850.
WBMA is currently operating at low power but is in the process to
upgrading to 25K during the day and 3K at night...It will shortly
have new calls as well -- WBPS -- 'Boston's Prime Sports'. 890's
management believes that they're the only true all-sports signal in the
city since WEEI carries Don Imus' syndicated show from 5:30a to 10a
weekdays...PRS' format is very similiar to ESPN Radio's -- sports
news/updates and features. On weekends and at night PRS has
call-in shows...WBMA's studios are located on Commonwealth Avenue
in Boston's Brighton neighborhood.

* Play Ball!...

The Red Sox have unofficially moved to ARS' all-sports WEEI AM 850 from
all-talk WRKO 680. This move has apparently doesn't sit well with
the Celtics' management who started their 5-year deal on 850
this past fall. ARS plans to move any Celtics games conflicting with
the Red Sox to WRKO in April and May[considering the Celtics go
anywhere in the playoffs :-(] The Celtics are pondering the thought
of taking ARS to court over this matter (Ed : this will likely get settled
with more green coming the Celtics' way to keep them happy for a
month or two...]

WEEI management also cancelled SF-based Ron Barr's 'Sports By-Line'
which ran from 10p-1a on weeknights and other overnight Chicago-based
sports call-in programming. In their place, syndicated sports call-in
show from LasVegas-based will air...Also, 'Best Of' Pete Rose's Florida-based
show will air on weekend afternoons....

* Special Day :

Despite a very untimely WSJ story on the late Boston Celtic star
Reggie Lewis who died on July 27,1993 the plans for the
All-Sports Radio WEEI AM 850 to dedicate all of its programming
on Wed,March 22 in paying tribute to Lewis will go on as scheduled.
WEEI will also broadcast Celtics-Bulls game starting at 7:30 during
which Reggie's number will be retired...

[Ed : Hopefully, WEEI's resident baffoon Eddie Andelman will have
a very minimal part in station's honoring Reggie's memory. His on-the-air
rantings regarding recent Wall Street Journal story(whether true or
not) on the cause of Lewis' death is what gives WEEI 850 no credibility
whatsoever on the Boston radio scene...]

* WAAF rocks out....

February wasn't a good month for Worcester's AOR WAAF 107.3FM. It
lost its 7-year OD Ron Valeri who skipped to the NYC's AOR WAXQ-FM
and 5-year afternoon jock Liz Wilde who starts an all-talk night-time
gig at Chicago's all-talk WLUP-FM. WAAF's GM Bruce Mittman promises
to fill both slots very shortly...

* It's Award Time...

Recent Gavin Awards produced some big winners among Boston stations :

Hot AC WBMX-98.5(Mix98.5) was named the AC station of year. Its PD
Greg Strassell was name PD of the Year. In addition, MD Amy Doyle
recieved as Major Market MD honors.

AP WFNX-101.7FM was named Alternative STation of the Year.

And, Steve Rivers who was CHR WXKS-FM's PD until he was promoted
within the Pyramid Group earlier this year was named as Major
Market CHR OD/PD of the Year....

* WRKO moves? :

The buzz around town that there will be a new voice heard
during the morning drive on Boston's only all-talk outlet -- WRKO AM 680.

WRKO management is apparently contemplating of moving its very popular
PM-drive personality Howie Carr to mornings. Carr, Boston Herald
columnist, would replace a stagnant duo of Pat Whitley and Marjorie
Clapprood. Rumors have it that Whitley's and Clapprood's contracts
will not be renewed and they'll be let go by WRKO...

In other WRKO news :

A familiar voice is now heard on Saturday afternoons(2-6) :
Andy Moes, former morning personality at WROR(now WBMX), the original morning voice of Boston's first all-sports signal WEEI AM 590(now WBNW) is back doing his silly shtick...

Boston legend, Jerry Williams(10-12pm) has been nominated to the Radio Hall of Fame. Winners will be inducted into the Hall on October 29th.

* WBCN celebrates...

Infinity's AOR powerhouse WBCN 104.1FM will celebrate its 27th birthday on March 15th. An anual event called 'Saturady Night House Party and Fish Fry' hosted by former WBCN jock and frontman for J.Geils Band Peter Wolf will host a 4-hour live show on Saturday, March 11th starting at 8pm.

If you have access to the Web, check out WBCN's Home-Page at http://www.novalink.com/wbcn.html

Speaking of WBCN, The Rock will keep WBZ's Gil Santos and Gino Cappiletti as the radio voices of the NFL's Patriots. The Patriots land on WBCN 104.1 for the next 3 years starting with exhibition games in August. Apparently, Pats' owner Bob Kraft was leaning towards Santos all along.

* Jamn Pebbles :

Pyramid's Chruban WJMN 94.5FM(Jammn 94-5) turned to Urban WILD AM 1090 for some talent. WILD's popular morning co-hostess Pebbles will join Baltazar Ibanez at 94.5 from 6a-10a starting in mid-March. Pebbles will report the news and traffic during Baltazar's show. WJMN's vet Lori Duschene who was the news/traffic person up until now is out.

And, that's your Boston Radio news for now...

-Mark

Source record: 34145

Happenings in the #40 market:

*To correct my report of Sue O'Neil being named the new PD of WKSE (Kiss 98.5):she's still on air,O'Neil just cut back her hours. She's on from noon-2pm. Jeff Hayes is on from 10am-noon. Dr.Maims wired me in regards to this,saying that the decision was made on Monday(and I got the info on Wed., beating the News on this). He added that those following the scenario were surprised,with most thinking WMJQ(Q102)'s Dave Gillen would get it-some believed that a PD in Providence(not Paul Cannon,now at WTIC-FM in Hartford-someone else who recently got blown out of his job)would be the one.

*The changes just keep on coming at WGR(NewsRadio 55). Anthony Violanti's column in today's News reports that sources say that sports reporter Barry Buetel(who anchors the station's Sabres coverage,and IMO one of the few things actually worth listening to there)and part-time sports gabber Rocco Pendola will be going:Barry to Cleveland and Rocco to Miami(alert to r.r.b.ers in those 2 cities;if true,what stations are they going to?). This is on the heels of Rich Michaels' exit last week to Cleveland WWWE-AM,and PD Darryl Parks' exit.

*Could a format change be in the works for WBUF(92.9,AC;B93)? Continuing the message I got from Dr.Maims,Pyramid's group PD-Steve Rivers(who's worked at L.A.'s KIIS-FM and Boston's WXKS(Kiss 108) with great success)was recently spotted in Buffalo listening to the market and considering options for B93. One such option noted here is switching to a rock sound geared to the 18-34 demo,but recent fine-tuning at WUFX(album rock;103.3 the Fox)may have nixed that idea. Maims told me it's possible that a switch to top 40 might also happen,with some people saying it could happen on the 15th(next Wed.)-and those same people saying that Mike McGowan(now nights at WTIC-FM;with weekend work at N.Y.C.'s WPLJ and Boston's Kiss 108-aside to Mark Shneyder & Scott Fybush,how's he doing?)might return as PD,as Pyramid is keen on him. The good Doc adds that there are Kiss staffers who'd defect in a heartbeat if the format switch happens and they get an offer(they wouldn't have far to go-the two stations are within shouting distance of each other-Kiss is at 695 Delaware Ave. and B93 is located at 715 Delaware).

*Recently,Empire Sports Network started up a new series called On The Air-what it does is show sports talk shows across the state,with 2 cameras in the studio(think Scott Ferrall of KNBR(S.F.)and his forays on SportsChannel Pacific nightly).It debuted a few weeks ago with Art Wander of WGR(taking calls after a Sabres loss),then traveled to Syracuse to check in with Dan Polisimo and Trevor Sparks of WHEN(Talkradio 620)in Syracuse. Last night,Pete Hubbell (yes,Ralph's son)was featured-he works at WJTN(1240)in Jamestown. If you've got a satellite dish,Empire's on one of the Anik satellites(you'll still need to subscribe via SSN;or through Primestar if you've got a DBS system).

*The Toronto Star did a piece last Saturday on CKRZ(100.3 FM),a station in Ohsweken-heart of Six Nations territory-that broadcasts news geared to Native Americans to the area,as well as broadascting in a number of dialects (Cree,Onondaga and Oneida among them). It's one of 180 stations on Ontario that do this-33 estimated in Ontario air 15 different languages. CKRZ got assistance thorugh the province's CROP(Community Radio in Ontario Program), and 11% of its $250,000 budget comes from government agencies-35% from ad sales and 45% from bilingual bingo games run on Sundays. CKON(97.3)in Akwesasne,also noted,is a success story-a $275,000 budget for '95 and self-sufficient,plus an agressive ad sales dept.searching for accounts outside of the community. If you're interested,I can point you as to where to get a copy of the article.

*Parting shot to the News' Anthony Violanti:if you're going to rip stuff off,at least admit where you're getting it. Your piece on Charles Banta buying WGRF/WUFX seemed to be a re-write of Jim Fink's piece in Business First a couple of weeks ago. At least I cite where I get my stuff-and,BTW,Jim & I beat you to it.

C.K.G.

Hello Everybody!

I need to know, from where our company could buy CD-jukebox for
PC-type of computer.

The CD-changer woould be used in a BBS - so this way we could put
lots of stuff online at once.

I know there are two approaches:
1) like audio-CD-Changer, - (cheap but slow)
2) rack of multiple CD-ROM drives. - (expensive but fast)

Our company would concider both solutions, but we DO need contact
addresses. (Estonia is so small country - nobody sells this stuff
ofer here, so I had to start looking around myself.)

Anyway, sorry for your trouble, and if You can help me, please do.
Send replies to this list or to me directly (I'd appreciate, if I get
mailed directly)

Best regards, Alar.

In a previous article, bfomarks@ubvms.cc.buffalo.edu (Mark Scott) said:

>Just a minor correction -- it was Tom Langmeyer, not Tom Bauerle, who was in
>the WGR Traffic Plane in late 1987 or early 1988 when it made an emergency
>landing in Delaware Park. Langmeyer was the station's music director at the
>time. I believe that he is now at KMOX in St. Louis and actually worked with
>Bauerle before the latter returned to Buffalo as WGR's morning host.

To amplify this a little bit more,it was in 1985-see Brian Meyer's book
"Buffalo-A Bull's Eye View" for this piece. There's also a lot of quotes from
radio people. His note of this said that fuel pressure problems forced it to
land(one observer said,"I thought it was a toy airplane until it got closer."
BTW,Meyer works at WBEN.)

>There is also a fourth incident involving a WGR aircraft. It occurred in
>January 1994 when Bob Massey was forced to make an emergency landing during a
>winter storm. This leads me to say that airborne traffic reports are not
>necessary in a city the size of Buffalo. The same delays occur day after day
>in the same spots. If there is a major accident disrupting traffic, it can be
>covered just as easily from the ground.

And there was what happened just a few weeks ago,when its traffic plane
(which Metro Traffic also uses to supply a number of radio stations with air
traffic,with ground reports as well)hit an icy patch on takeoff and flipped
over. Neither Masse or Mark Webster(with Metro)were injured. That may have been
an impetus for WBEN to go to a Metro-like setup in AM & PM drive(Dave May in
studio;Michelle Maloney airborne). Incidentally,Rochester(roughly the same size
as Buffalo)has no stations that have airborne traffic.

C.K.G. "If you're wondering why your street is not plowed,it's because all
of the plows are at Your Host." -Jack Sharpe,ex-traffic copter
reporter at WEBR,who saw a fleet of plows parked outside a
restaurant during a heavy snow storm.(Within 2 minutes of saying
that,drivers came running out and plows took off in every direction.)

As a long ago broadcaster, I could not agree more with Ron's post about the poor quality of Dallas radio, altho I mostly observe KISS-FM, which IMO began with great music and has gone absolutely down, down, down as they have seemd to try to broaden their appeal. The slow ballad stuff is absolutely absurd. I can hardly listen to more than 2 songs before they turn me off. The personalities have always been weak I think with the exception of Domino who went to bigger and better rather quickly. Valentine is the only one of note it seems to me. The overall question is how can such a large market not attract decent contemporary radio. A real puzzler to me!! It has sent me to DMX. On the AM side, their is hardly anything of worth due to the absolute monopoly that sports has in the market. Losing KAAM was unfortunate and KLIF am has such a poor signal and only daytime coverage that you can't even get decent music from the PAST here.

Try contacting KDFC in San Francisco. They syndicate a classical format on
DAT and there are a number of stations using it. In fact I know of a station
here in Fresno (KFRR) that is selling such a system...Good Luck!

> WENS-FM (AC) 6.3
> WTPI-FM (EZ) 5.8
> WZPL-FM (CHR) 4.9
> WHHH-FM (CHR) 4.5
> WGRL-FM (Young Country) 3.8

Not a whole lot of change in this trend. The big "gainer" was WTPI...up a point over the fall. The one thing that stood out to me was the drop 12+ for WNAP....an 8.0 in the fall book down to a 6.6 in this trend. Any idea Jim on how the 25-54 adult demos shaped up. Perhaps that could be a better qualifier on the real strength of the Buzzard?

Keep in mind that "trends" are just that...a trend of how a station is performing. They really can't be used for much else. It's a composite of three monthly figures...and a great month, or a terrible month can throw a trend. The winter book (which I would guess will be available in about a month) will show a more accurate picture.

As a way of reminder...here is the Fall 1994 Arbitron Top 10 (again 12+):

WFMS FM (COUNTRY) 12.0
WFBQ FM (AOR) 11.8
WIBC AM (N/T) 8.7
WNAP FM (70'S) 8.0
WTLC FM (URBAN) 7.0
WENS FM (A/C) 6.1
WZPL FM (CHR) 5.1
WHHH FM (CHR) 4.7
WTPI FM (A/C) 4.6
WRZX FM (ALT) 4.0

BTW, thanks for the great work Jim! I hadn't come across these numbers yet.

Posted a JPG picture of a very old radio (think it's 1940's vintage)
in the newsgroups alt.binaries.pictures and alt.binaries.pictures.misc

I took the picture, and it's public domain, so feel free to use it
in print radio ads, or whatever. It's similar to a picture I posted
several months ago, except I noticed that the dial was crooked, so
I straightened it out.

Those "Big Band" stations might find this picture useful.

1652. KKCJ begins KFKF simulcast; PRN may be dropped from KBEQ(AM)

Newsgroup: rec.radio.broadcasting
Date: 1995-03-11 04:17:41 UTC
From: transvox@interstate.net
Message-ID: <3jr895$f8c@vixen.cso.uiuc.edu>
Source record: 34009

Written March 10, 1995

"Hot country" station KKCJ(FM) stopped originating its own programming
at 6 pm Friday (Mar. 10), after a farewell statement by afternoon "Cattle
Drive at Five" jock Roger Carson and three commercials.

Carson read a legal ID live, followed by half a minute of dead air.
A simulcast with KFKF began in the middle of a song. After the song,
the stations gave both legal IDs: "This is KFKF Kansas City, welcoming KKCJ
Liberty listeners to continuous country favorites at 94 FM, KFKF."
During the subsequent hour, that was the only time the KKCJ call letters
were mentioned.

KFKF is a country station that had leased KKCJ since February 1992.
The LMA with KKCJ had to end because KFKF owner Sconnix is entering into
an LMA with "young country" KBEQ-FM.

The new LMA is part of the sale of KBEQ-AM/FM to EZ Communications,
which has one year to buy KFKF as well. If EZ does not buy KFKF, Sconnix
has the option to buy KBEQ.

Rather than running a standalone station, owner Ardman Broadcasting
sold KKCJ to KCFX owner Heritage Media.
Under a provision of the KKCJ lease, the new station owner must choose
a format other than country. The new format for the 106.5 frequency
remains a closely-guarded secret.

An article in the Mar. 10 Kansas City Star indicated that
the KBEQ-KFKF LMA was scheduled to begin today.

As hinted in AIRWAVES two months ago, Sconnix is considering a
simulcast on KBEQ(AM), which presently
is a fulltime relay of Chuck Harder's People's Radio Network.
The Star quotes KFKF general manager Dan Wastler as saying
the possibility is under discussion but no decision has been made.

Last weekend, according to the newspaper, the People's Radio Network
discussed rumors that the AM station would begin simulcasting KBEQ-FM.
The following Monday, KBEQ received more than 100 calls protesting
that possibility.

Wastler also told the Star that the AM station might be sold
off, with the newspaper quoting him as saying "it certainly is available."

1653. Louisville Talk Radio Wars: How NOT To Promote Your Station?

Newsgroup: rec.radio.broadcasting
Date: 1995-03-11 04:17:43 UTC
From: David Lee Poland <heydave@iglou.com>
Message-ID: <3jr897$f8k@vixen.cso.uiuc.edu>
Source record: 34011

Here in Louisville, their are now no fewer than four AM stations
in this market programming most or all of their schedule with talk
radio. WRES has been doing this format for only a few months, while the
CNN Radio-formatted station has added Talk over the past year, and AM
market leader WHAS has added more talk over the past few years. WWKY is
the closest to being "all" talk, with ESPN being fed most of the weekend,
in addition to talk.
My concern is with WWKY. They lost Rush Limbaugh to WHAS almost
two years ago, since then they have virtually completely overhauled and
re-overhauled their lineup...Drop Talk Net, Add G. Gordon Liddy, Add
Major Talk/Daynet, Drop Major Talk/Daynet, switch morning and afternoon
drive programming almost quarterly! Enough changes already!
WWKY's erractic "tinkering" with their schedule is bad enough,
but the way they promote themselves strikes me as being even less
professional: they can't do a promo without attacking the more "laid
back" style or picking on the program hosts on major rival WHAS. It
sounds so childish (ie. One WHAS program host is someone with the last name
Meiners (pronounced "Minors"), so WWKY has a promo promising they offer
"no MINOR leaguers in the afternoon!"). Is it me, or is it REALLY TACKY
to have to attack your competition in order to build your own image???
Why, IF the competition is so awful, are they worth almost constant
attention from a competing station?

- Dave Poland

Oogie did mornings in Rochester, NY for a year or so in the mid 1980's at WPXY AM/FM (CHR). Don't know where he went from here.

1660. Still Looking for Jean Shepard

Newsgroup: rec.radio.broadcasting
Date: 1995-03-11 04:17:48 UTC
From: Bill Scheffler <SCHEFFLER@delphi.com>
Message-ID: <3jr89c$f90@vixen.cso.uiuc.edu>
Source record: 34018

Count me as one of the teenagers of the 60's who would switch over from WABC or WMCA to WOR at 10:15 every night to hear Jean Shepard spin stories better than anyone else I've ever heard. And I have been a big Shep fan ever since.

But, for what its worth, I though I would pass along a comment about radio I heard Shepard make a few years back.

One Saturday night every summer he would do a live show under the stars at a small historical museum here in Western New Jersey. And hundreds of faithful fans would bring their lawn chairs and listen intently as the word pictures would were projected in their minds while the great storyteller paced in the spotlight in front of a large rocky cliff.

Before he got into his stories Shepard agreed to take questions from the audience. When one woman asked him if he planned to go back into radio he said...."Radio is nothing more than a sales medium, I do movies now."

He then went on to explain how his movies are seen around the world by millions of people and how they will be seen almost daily for many years to come. He really sounded sour on radio.

Can't say I don't understand how he might feel, his WOR show was 45-minutes and I'd bet that included 15-minutes of commercials. Trying to back-time a story so it ends straight-up must have been hard enough, but then trying to put a number of breaks for a half dozen spots each in the story without losing continuity must have been a challenge.

And a number of people I know who worked with him say he did it all off the top of his head without notes. Talk about a unique talent.

I unexpectedly bumped into some of Shepard's stuff on a quick trip to DisneyWorld last December. In Tomorrowland, there's the old General Electric Pavilion from the 1964 New York World's Fair. The audience rotates around a number of stages that show how new appliances have improved the lives of American Families over the decades, while a chorus sings the haunting "There's a great big beautiful tomorrow." Shepard is the voice of the mechanical narrator, and just in case you doubt it, he mentions his old friend "Schwartz"

Then I expected to nap on the flight home, but heard Shep's voice when they ran the movie preview. So I caught his latest flick about two kids and their battling spinning tops in Indiana. Unfortunately I forgot the title, but the Shepard produced, written and narrated flick was well worth the four bucks and the loss of sleep.

Hi Dan,
Here in Baltimore, many stations have the same rate for 30s as they do for 60s. Since most spot blocks run the 60s first, the conventional wisdom is that the 60s will be heard more frequently than the 30s, because as people tire of the spot break they will tune out (probably after hearing the first few spots).

What's it like where you are?

A couple of correspondents have questioned the need for airborne traffic reporters in Buffalo and San Francisco, in part because they say road backups are always in the same place. I had an experience that tested that theory, although it was 15 years ago, here in Chicago.

Chicago's expressways are wired with sensors that link up with a state-run computer. Every five minutes it spits out backups and continuously updates estimated travel times. One afternoon drive, I was editor in charge at a traffic reporting service. Our plane was grounded by weather, our 94th floor windows were fogged in, and we had only one mobile on the roads when the computer went down for about an hour. We were almost completely "blind."

What could we do but give an educated guess? We were horrified that we'd sound like idiots predicting backups that weren't there. However, knowing the time, the day of the week, the weather, and the patterns those factors produced--and keeping our ears glued to the scanners for accidents--when the computer came back up, we were proven remarkably accurate. In fact, on many of the expressways, we were right on the button.

> (70/80/90)'mix' station that is currently doing a great job - Mix 102.9.

No, they are not. They are BOORRRRIINNGG. Their sister KHMX-96.5 "Mix 96.5"
Houston sounds better. KHMX doesn't sound as good as they did a couple
of years ago, but they still are better than KDMX.

> We have one MOR, a few Christian, one classical, 3 or 4 Spanish/Tejano,

We have no MORs. We will get one back when KWFT-620 Wichita Falls completes
its move to Plano this month or next and signs on with the format.

> 2 Urban, 1 Jazz, 1 oldies (KLUV/98.7 - repetitious & mired in 50s/60s.)

> they would regain their market leading position with a revamped format
> consisting of CHR/ALTERNATIVE/DANCE. For CHR we have the old "NEW"

I don't want KEGL returning to that pathetic dance-driven top 40 format
it has at the beginning of the 90s. KEGL was never more dominant and
never better sounding than its rock-titled top 40 format it had for
most of the 80s. Rock 40 KEGL of the mid 80s was what I want back on
97.1 - the one that played "Eagle free flights of back to back rock &
roll hits," that had cool contests (the free Porshes), and DJs that

had personalities. That KEGL managed to beat KAFM/KZPS "Z92.5," KTKS
"Kiss 106" (now KHKS), and KHYI "Y95" during those days.

> KISS-FM - 106.1. For the most part, their sound quality is lower than

> slow songs and Mariah Carey, that you would think that they were
> trying to grab listeners from MOR KVIL 103.7! And now to the EDGE>

All true about KHKS. I hate them. They either bore you to death during
the day or rap all night long. If I want to listen to an AC, KVIL does

it better. If I want rap, KKDA-FM and KJMZ do it better.

> In much of Dallas city limits, The Edge is half static, and half MTV.

> downtown or south. The listeners on the NE side of Dallas occasionally
> get treated to a country station from somewhere that competes for
> the frequency - 94.1 There you have it! STATIC,REPETITION or COUNTRY.

I like KDGE. I only wish Bonneville would flip signals of its two
stations. Take the less-listened to KZPS and stick them on 94.5 and
move KDGE to the bigger and better 92.5 frequency. That country station
on 94.5 (not 94.1) is KWKH-FM Shreveport. Actually, KDGE is probably
more top 40-sounding than KHKS is.

> Wont someone please grab a frequency and give us something to brag
> about! Dallas radio can be so much better! Listen to KRBE 104.1 -
> Houston, or B97 New Orleans, or Chicago FMs - IT CAN BE DONE!

I hope you mean present day KRBE and not the disco-happy KRBE "Power 104"
of a few years ago. When I was in New Orleans in January, WEZB "B97"
really surprised me. B97 was rockin' (and I mean I think I heard one
non-rock song; B97 was sounding like a great KEGL described above).
I hope they still are. It was probably the first time, I actually
enjoyed the music B97 was playing.

Thanks for the concern...but it really wasn't a trauma. Just an example that anyone who's spent much time in a production studio could easily understand. Again, this was a multi-track spot...multiple voice and music tracks...plus effects.

> Thanks to the range of splices available and the audio manipulation abilities

But isn't that only if you're working with a dry voice track? Not to split hairs with you Bill...but may I ask a question?

How do you suggest we "punch in" a different phone number or change of date, when the 2-track mix contains not only voice, but also music and sound? That is if you need to maintain the integrity of the background music and effects bed? Is there something to the DSE-7000 that I had missed?

Thanks for the help Bill!

But Dorman and >Casey Kasem and some others probably had these great voices when they >were in high school!

Although I haven't listened to Dale for over 5 years, I would have to say that his appeal was not his voice but his style. His voice, unlike Casey Kasem's which is very well modulated and controlled over a narrow range, runs from hyper to whiney to nasally and back to hyper all in the course of one set. His energy and conversational style is what keeps him afloat. His production was always fun to listen to as he chronically miscued records and cd's on the air and made the flubbs into fun.

From: mlennartz@aol.com
Message-ID: <3ju5cl$3q2@vixen.cso.uiuc.edu>
Source record: 34031

The following at the Sacramento NOV-DEC-JAN trends:

12+

KFBK (News-Talk) 13.9 - 14.6
KGBY (Adult-Con) 7.3 - 6.7
KSFM (CHR) 5.8 - 6.0
KHYL (Gold) 5.8 - 5.9
KNCI (Country) 5.7 - 5.8

KYMX (Soft Hits) 4.4 - 5.4
KSEG (Classic R) 4.3 - 4.3
KWOD (Alternative) 3.8 - 4.1
KRXQ (Album Rock) 3.4 - 3.9
KXOA/F (70's)(Arrow) 4.5 - 3.8

Summary: KFBK continues to re-build its once legendary lead, but KHTK (Hot Talk) and KSTE (Talk 650) are hoping for Winter Book inroads with the NBA and OJ SIMPSON coverage respectively. KHYL despite going up drops to 4th eliminating the Chancellor 1-2-3 fall book sweep (remains intact in the 25-54 demo). The MIX (KYMX) enjoyed a recovery after a surprising fall report. Rock radio spent the last three months at the bottom of the top 10, with the ARROW (KXOA/F) dropping both 12+ and in the demo (Luckily, Brown Broadcasting's other property, KQPT, The Point, went UP one point in the demo to make up the difference). No surprises yet, but the winter book always makes for interesting times in Sacramento. Stay tuned.

In Tampa-St. Petersburg, Citicasters has taken over WGUL-FM's 105.5 frequency under an LMA pending purchase of the station. The station is currently a Class A station, but it an upgrade to Class C1 will be sought. Citicasters already owns WXTB (98 Rock) in this market, in addition to Channel 10 television.

The 105.5 format was Music of Your Life. The Citicasters temporary format on 105.5 consists of about half a dozen songs, all storm-related, such as "Purple Rain," "Rainy Days and Mondays," "Stormy Weather," and "Rain" (by the Beatles). Reportedly the 105.5 call will be changed to WTBT(FM).

WGUL(AM) 860 Dunedin continues the MOYL format, and the station plans to purchase WBSB(FM) 96.1 Dade City and change its call to WGUL-FM, so that the nostalgia format will remain on AM and FM.

For those interested in a little trivia, WGUL(AM), New Port Richey, FL, went on the air October 31, 1963, with 250 watts, daytime only, on 1500. The first record aired is believed to have been "Washington Square" by the Village Stompers. I've been told that three weeks later, when the station reported President Kennedy had been shot, listeners called in to complain about the joke since the new station had no credibility yet. WGUL-FM, New Port Richey, went on the air in 1969 on 105.5. WGUL(AM) adopted the Music of Your Life format on Thanksgiving Day 1979. The first song played that morning was "Moonlight Serenade" by Glenn Miller, which was song 1 on reel A1 supplied by the syndicator. The station began simulcasting the format on AM and FM in 1983, and "Moonlight Serenade" was also the first MOYL song aired on WGUL-FM. To continue the tradition, the same title became the last MOYL song aired on 105.5 just before midnight March 8, 1995. The song was followed by a recording of Frank Sinatra saying, "This is Francis Albert Sinatra and you are listening to the Music of Your Life."

***** The Washington Redskins have a new broadcast contract signed and in hand. The winning bidder of the 3 year contract is Infinity Broadcasting's WJFK. The games will be heard on FM 106.7 here in metro Washington and on both of Infinity's Baltimore stations, WJFK AM 1300 and WLIF FM 101.9.

The big announcement was made on Friday afternoon, March 10, during the nationally syndicated Don and Mike show. The wacky duo, who are self confessed major "jock-sniffers"--especially when it comes to the Redskins, are anxious for the season to start. For the next 3 years they'll have close contact with the team, coaches, management and on-air crew. That includes having on-field media passes! It should make for a very interesting and FUN three years coming up.

The price paid by Infinity for the broadcast rights was not released but is estimated to be in the range of three-and-a-half to four million dollars a year. Ken Stevens, WJFK/WLIF General Manager, said the station is now working on re-signing the broadcast team of Sonny Jurgenson, Sam Huff and Frank Herzog.

***** Well, hello Ollie! As mentioned in earlier Airwaves articles, Oliver North now has a radio job. The show goes on the air Monday afternoon, March 13, on WWRC radio AM 980 and will by syndicated by the Salem Broadcasting Network beginning next month.

North's hiring means that current afternoon host Victoria Jones has been bumped to the morning show. Jones, who has gained quite a following here in Washington, acquires the slot left vacant since Mike Cuthbert was told his contract would not be renewed.

Still no word on WWRC's power increase to 50,000 watts. My phone calls to the station have yet to give me an exact date. I'm sure that it won't be long now. Although, at first I thought the increase would be in place by the first of '95.

***** WXTR FM 104.1 is still running its new '70's format jock-free. The local papers reported that jocks would return to the air. However, station management hinted that perhaps not all the station's former jocks would return. They're expected to be without live on air voices (with the exception of Wolfman Jack's radio show) for at least another week.

In listening to X-tra 104 this week I learned a few things: one is that they play "SHAME" by Evelyn "Champagne" King and "FUNKYTOWN" by Lipps Inc. almost every day! Yikes! It is kind of neat to

occasionally hear "WHAT CAN I SAY?" from Boz Scaggs and "EBONY EYES" from Bob Welch as well as some others that aren't being played by the ARROW station in town, WARW FM 94.7.

***** Former WMZQ FM 98.7/AM 1390 (Country format) morning voice Sandy Weaver has landed another radio job, this one in Atlanta. She now works part time at WKHX FM. Weaver left her highly rated morning show to join her husband, Bob Carman, when he headed south with IBM.

***** Candy Shannon has been promoted to Program Director of WDCU FM (90.1). She'll continue working afternoon drive on the jazz show each day.

***** WHFS FM 99.1 (Alternative Rock format) has promoted Music Director Bob Waugh to Assistant Program Director. Pat Ferrise has become the new Music Director.

***** WWDC FM 101.1 (Rock format) has promoted part-timer Kelly Knight to the evening shift, 6 p.m. to 11 p.m. Knight replaces long-time WWDC-er Dusty Scott who left last month to go to Michigan.

Mike

Bill Lee got MUCH better since TIC. In fact, I'd say he is one of the best talents currently (not?) working in radio.

Get one of his classic shows from HOT 97 or even KFRC...you'll like it.

In <3jr89g$f96@vixen.cso.uiuc.edu> ReedP@aol.com writes:

A couple of correspondents have questioned the need for airborne traffic
>reporters in Buffalo and San Francisco, in part because they say road
backups are always in the same place. I had an experience that tested
that theory, although it was 15 years ago, here in Chicago.
Chicago's expressways are wired with sensors that link up with a
state-run computer. Every five minutes it spits out backups and
continuously updates estimated travel times. One afternoon drive, I was
editor in charge at a traffic reporting service. Our plane was grounded
by weather, our 94th floor windows were fogged in, and we had only one
mobile on the roads when the computer went down for about an hour. We
were almost completely "blind."
>What could we do but give an educated guess? We were horrified that
we'd sound like idiots predicting backups that weren't there. However,
knowing the time, the day of the week, the weather, and the patterns
those factors produced--and keeping our ears glued to the scanners for
accidents--when the computer came back up, we were proven remarkably
accurate. In fact, on many of the expressways, we were right on the
button.

The situation is much the same here in Hartford where I spent a year in
the plane mornings and evenings for WPOP-AM and WIOF-FM. On days when
we were either temporarily or permanently grounded because of the
weather we could call the back-up without even looking out the window as
long as there wasn't an accident or breakdown.
It's been a few years since I last flew, but I can still recite the
back-up from memory for any given time of day.

1681. Young Country Dallas - Dying?

Newsgroup: rec.radio.broadcasting
Date: 1995-03-12 06:46:52 UTC
From: sandrae631@aol.com
Message-ID: <3ju5cs$3qj@vixen.cso.uiuc.edu>
Source record: 34039

Is KYNG / Dallas (Young Country) dying a slow death. I've noticed a tremendous change in the past six months. Their play list now includes Dolly Parton and a host of other older cuts, a stark change from their earlier mission statement when they said they would only play the latest country hits (nothing older that 6 years).
Also, the station has been airing promo's that features listeners in their 40s and 50s saying they listen to Young Country, then a new jingle sings out the phrase "Middle Age Country".
The fall book was a disaster, as the station slid to 13th in the market place. The last Arbitrend showed that the fall book was not a fluke, (as they were telling advertisers). Young Country got resoundly beaten in there precious 18 - 34 demos by country leader KSCS.
Add to that the KDIL in San Antonio (A New Cities Young Country type station "The Armadillo") recently flipped to a NAC/Jazz format.
Is the Young Country trend dying. Country stations across America are still doing well but it seems that the ones that marketed themselves toward the fickle 18-34 crowd are really hurting.
As the Dallas area is starting to turn it's nose at Young Country, what is happening to the rest of the nation. I'd be interested in knowing.
Add all this together and it makes WVIC / Lansing decision to flip from CHR to 'Wild Country" seem a little odd.

>From my vantage point as a "recovering" broadcaster (with a 12-stroke program, and your prayers, I can overcome my need to ever broadcast again...), group owner, former Dallas news anchor/talk show host, I think the answer is very simple.

Name one-- just one-- locally owned (owner lives in town and works daily at the station) licensee among the top 20 or more stations in Dallas. I can't think of a single one, with the possible exception of Hyman Childs at KKDA. The rest are programmed by a "Group PD", who sees what seems to work in Atlanta and Detroit, and thinks it should work equally well in Dallas.

The original concept behind the licensing of radio stations is that they will be owned and operated by people who live in a community, know it, and would be responsive to it. In the 60's, 70's, and early 80's that was the case, which beget some legendary stations and programming. Do you really think corporate would allow today the things KZEW-FM did daily in the 70's? Besides, the programmers who are "rotated through" DFW by group owners are simply punching their ticket for a larger market, and aren't gonna make waves this close to the top.

What's the answer? I discovered quickly as an owner that the easiest station to program is anybody else's.

|: How do you suggest we "punch in" a different phone number or change of
|: date, when the 2-track mix contains not only voice, but also music and
|: sound? That is if you need to maintain the integrity of the background
|: music and effects bed? Is there something to the DSE-7000 that I had
|: missed?

Rule #1: Forget every limitation you learned doing analog multitrack production. A good DAW -- and the Orban DSE7000 is certainly among the best ever made -- can let you fake your way out of that kind of situation easily.

a) Of course, first record the new phone number so the voice matches. The DAW makes this easier, because you can play back and auto-punch just the relevant section, then very quickly pitch-shift or time-justify individual syllables of the new recording... as well as slide it one sample at a time, level-match, or whatever else you need.

The trick here is you don't have to match the entire paragraph. Just the individual words that changed.

b) Grab the original music bed (or a similar one), and slide a section so it matches. Likewise, all you have to match is the music under the words that changed.

Do the same thing for the sfx. It doesn't have to be precise (see step c).

c) [Here's where the magic happens] Set up the DSE to punch in and out on your original mix, precisely at the syllables that are changed. This takes, oh, maybe four seconds on the DSE7000.

Listening carefully, do a pass where the voice matches at the punch. UNDO, and do the same thing for the music and fx.

You'll find that the ear tends to bridge-over the copy changes, following the words. If the music and fx changes happen _in_sync_ with the word changes -- that is, if there isn't any place where the new music/fx are in the clear -- minor errors are almost impossible to spot.

Because the DAW lets you punch in precisely, and UNDO and make tiny adjustments quickly, this kind of editing is fast and easy.

In fact... I've got the multitrack backup option on my DSE7000, so bringing back a full 8-track layout plus mix settings for a year-old spot takes less time than I used to spend racking up old 1" reels... but I

still find myself doing updates the way I've described here. It's faster.

It's called copywriting and good performance.

I've been working with Digital workstations for awhile (they're great), but they are NO SUBSTITUTE for a good script delivered well.

We're lucky to have some excellent writers at KidStar and people who know how to act with all they've got.

>From what I hear on the radio elsewhere (adult radio), management would be better off hiring a good writer and performer and read a simple, well-conceived piece over music into an old tube magnecorder.

We production guys usually have to make a piece of crap dazzle and the truth is, people are more interested in something well-written and delivered honestly. Then we can spend our time on producing very special stuff instead of putting fires.

Good radio writers have always been hard to find. Probably because good writers cost money and radio doesn't respect that talent. It's about time management honored such talent.

Don Goldberg.

1685. QUESTION: Restrictions in what you can play?

Newsgroup: rec.radio.broadcasting

Message-ID: <3ju5cu$3qr@vixen.cso.uiuc.edu>
Source record: 34043

I have absolutely zero knowledge about the other side of radio stations -- the DJ side, that is. So here's my question.

Are radio stations (and, in effect, all their DJ's) restricted from just picking up a CD and playing it on the air? Let's say I give a CD to a DJ and ask him to play it for me -- and let's say the CD in question is something by U2 (and I am not in any way affiliated with U2) -- can he just play it? This question comes from the fact that I hear the songs "With or Without You" and a bunch of others off of "The Joshua Tree" yet I've NEVER heard "Red Hill Mining Town" off of the record on the airwaves. Just curious. Thanks.

[Moderator's Note: I already answered this person with the obvious answer of "no, im 99% of all cases the DJ has precious little or no leeway to play what (s)he wants to..." But if anyone wants to reply personally to this poster with more detail.. feel free. Bill]

Here's one...about 1972, at my first station, KIBS in Bishop, Terry Flood was the night jock. I was the 16-year old music director. At the time Wolfman Jack had a recording deal with the RCA subsidiary Wooden Nickel label...and was doing evenings live on KDAY(1580) in L.A. Terry decided to call Wolfman live on the KDAY request line and turn it into a bit that would intro Wolfman's record. Here's how it went...

WOLFMAN: "K-DAY."

FLOOD: "Wolfman, this is Terry Flood at KIBS in Bis..."

WOLFMAN: "K-I-What, man?"

FLOOD: "...KIBS.."

WOLFMAN: "K-I-What, man?"

FLOOD: "...KIBS..."

WOLFMAN:"...K-I-What, man?"

FLOOD: "B-S."

WOLFMAN: "B-S?"

FLOOD: "YES!"

WOLFMAN: "You mean like Bullshit?"

(Terry gasps, rolls record and never does live phoner again)

True story.

I know that a lot of Closed Circuit AM college radio stations are setting
up shop in the 1620-1710khz part of the AM band. They aren't official or
anything, but word from the suits in FCC-land is that they will look the
other way as long as they are less than 100 watts and that they don't
receive any other complaints from legitamate stations.

A couple manufactures are actively marketing to these stations to upgrade
facilities at little cost. (about $12,000). The college station here in
Johnstown, Pa. purchased a package from Radiosystems. They are currently
running at about 75 watts on 1650khz. Since there aren't even any upper
band stations allocated to the entire state of PA, I guess they feel
pretty safe. They havn't received any death threats yet.

Still, I don't know if it is a good idea. If this continues, anyone with a
couple extra bucks and some technical knowledge could get themselves up and
running. All the while, they'll be polluting a part of the band that was
supposed to be cleaner then the rest of the mess that is what we call AM.

1703. WWRC 50KW UPGRADE

Newsgroup: rec.radio.broadcasting
Date: 1995-03-12 06:47:10 UTC
From: richwood@commspec.com
Message-ID: <3ju5de$3s6@vixen.cso.uiuc.edu>
Source record: 34061

IE>It's official; WWRC received program test authority to begin broadcasting
IE>50KW DA-D yesterday,March 9th. Hopefully,this combined with Ollie North
IE>and the rest of the revamped lineup will generate the ratings the station
IE>is fully capable of.

I'm sure the 50kw will help, but Ollie North will keep them down in the dumps in that time period. Just what radio needs - the 834th white male conservative, Clinton-bashing Talk Show host. Been there. Done that.

Watching paint dry would be more exciting.

Rich

1704. NYC Radiowatcher Report 3/11/95

I just want to clear up a couple of things before I go off on vacation to the land of Lost Wages.

The Yankees contact with WABC is up this year. WABC has said they would like to keep them, but at a reduced cost. Under John Mainelli, they were looking to dump everything else, but since Mainelli has left the building, the new PD will make the call. They still haven't aired a game this year.

Radio World has a nice piece on WCBS-FM's overnight personality Max Kinkel. Max came to NYC over 10 years ago and does a great show. He worked at CKLW during the 'Big 8' days as 'Super Max'. There's a shot of him during at radio reunion on an Art Vuolo tape.

No word yet on the new PD's for Mix 105 and WABC.

Condolances to the Strauss family on the death of Ellen Strauss, wife of WMCA pioneer Peter Strauss and former station President herself. She ran the station in the 70's when the station was talk.

One point to clear up - AJ Hammer is still working at WPLJ on weekends. He decided to give up his weekday shift to work in TV. Al Bandiero replaces him, and the station will expand their 70's show with Al to 6 nights a week.

I'm off - Talk to you when I return.

AFRICA: African broadcasting -- tapping the democratic potential;
ARTICLE 19 and Index on Censorship to release report

ORIGINATOR: ARTICLE 19, London

On 27 March 1995, ARTICLE 19 and Index on Censorship publish "Who Rules the Airwaves?: Broadcasting in Africa". As African politics is transformed by a spate of multi-party elections, the report examines the role of broadcasting during and after the process of political transition.

ARTICLE 19's Executive Director, Frances D'Souza, comments: "The power of radio is immense. Governments struggle to retain control of that power. For real democracy to take root in Africa, government stations must be transformed into editorially independent, public service broadcasters."

The report discusses broadcasting operations in nine African countries, and concludes that private broadcasting, while necessary and valuable, cannot meet the information needs of the whole population. An informed public is crucial to participatory democracy.

The report's recommendations for measures to protect and promote broadcasting freedom should set the terms for debate on this key topic for years to come. The report calls for:
-Statutory guarantees of editorial independence.
-Safeguards to prevent government interference with broadcasting budgets.
-The non-discriminatory allocation of broadcast licences.
-Measures to limit media concentration.
-Fair access of all political parties to the broadcast media during elections.
-Independent mechanisms to respond to complaints about broadcasting.

Within this framework, the report presents lively anecdotes and much other information about the current state of broadcasting in Africa. According to ARTICLE 19, this is the latest news about the news: a snapshot of the politics, the issues and the finances which control broadcasting in Africa. "Who Rules the Airwaves?" is an indispensable starting point for everyone concerned about the future of mass communication in Africa.

For further information, please contact: Catherine Drucker, Campaigns Co-ordinator for ARTICLE 19 at tel: +44 171 713 1357, fax: +44 171 713 1356, or e-mail: article19@gn.apc.org.

From: johnschad@aol.com
Message-ID: <3jvrmj$56b@vixen.cso.uiuc.edu>
Source record: 34066

Doug:
I read your message with interest. Our company is also involved in digital
automation and we have interfaced a few UDS systems. The basic problem is that a computer is very aware of what is going on within its own operating framework, but is not aware of what is happening in the outside world. If we tell
another unit to start, and it doesn't start,. it's often difficult to know that. So,
we often see a ping pong control problem. The audio computer tells the cd system to play. The cd system plays, then sends a signal back to the computer to play a break. After the break the computer tells the cd system to play again, etc. If the chain ever breaks both systems wait for the other to respond. Then you have to resort to 1960's technology such as silent sense to catch it. Recently we have all but abandoned the cart approach and simply put all the music on the hard drives of the computer. Now it always knows what's going on. Its even possible to automate the dubbing process.

>> WTC-FM, KFRC

I had the pleasure of working with Bill at WLOL/Minneapolis, this was his
next stop after KFRC. He was an incredible talent and damn nice person,
too. His breaks would rhyme complex material flawlessly, and he would
need more than about 5 seconds prior to keying the mic to put it together.
You could be chattinf with him in the studio about something, and he
would notice he had :14 left on the song, excuse himself, and rap out a
great break.

I, too, sat in my parents' Long Island home taping what was happening on New York City radio stations. Only one television station, WCBS 2, had emergency power at both studio and transmitter and was on the air a few minutes after the blackout began.

It was a chuckle to hear WABC go to a news-talk format. They were still top 40 at the time. Chuck Leonard never could figure out enough things to say to fill the time. George Michael, in order to not alarm people inside New York State but outside New York City (who should not have been experiencing a blackout), kept referring to the whole city as "The Five Boroughs of Manhattan." Manhattan is only one of the boroughs.

When the blackout ended the next day at midday, Terry whats-his-name on 99X (WXLO 98.7) came back with "Glad you all got your radios fixed!"

I help air a show at WUJC-FM 88.7 FM at John Carroll University in Cleveland, OH. WUJC is in the process of converting from cart. to MD. We are currently on our second round of Denon MD machines. The first batch had various problems with not playing at all and playing a high-pitched "chirp-stream".

Denon claims a firmware replacement will make their second generation machines more reliable. Let's hope so. When all your drop-ins to cover the commercials aired by your network news feed are on MD and you have no working MD machine, life is rough.

Here in Boston, it's easy to find people in *any* industry who are pessimistic about the future. I grew up here, left and began a career in braodcasting, came back eight years ago and I am still amazed how people within 128 can find the worst of the best situation.

For the past two and a half years I have had the chance to travel the US and meet broadcasters from companies large and small, in markets from #1 to #250. And, guess what?? All I have met, except a very, very few, are in this business for the good reasons. Moreover, the Cap Cities and Infinities of the world, although big and growing, are still run by folks who care about what they do and how they impact their communities. Really.

Don't take this nation's temperature by talking to people inside the Beltway in DC or 128 here in Boston. You'll get a skewed perspective.

|: I've been working with Digital workstations for awhile (they're great),
|: but they are NO SUBSTITUTE for a good script delivered well.

Actually, they can be.

A good workstation operator can take a couple of fair-to-middling readings, massage them, and end up with an excellent "performance"... frequently, a lot faster than coaching an announcer to do the same thing in a single take.

Heck, we used to do that with 1/4" tape. Workstations let you do the same thing faster, more precisely, and with the power to stretch or re-pitch individual syllables.

Of course, good writing COMBINED WITH good performance AND good production will always give you the best result...

Well, I'm not Bill, but what we do here is run a split-track with mx/fx in one channel and the voice in another (if you want to maintain stereo integrity, record the mx/fx independently of the voiceover...reuniting the voice with the fx tracks is quite simple on the DSE, as you can imagine)

When a copy change comes around, we have a dry voice isolated from the mx/fx that we can easily cut, change, etc. Granted, the mx and fx are pretty much set in stone, but a change in _them_ is rare indeed, and given the time it takes to back up a production in workpart form to data DAT, it's a chance I'm willing to take.

In Canada, no station has yet been authorized to operate in the
1610-1700 kHz portion of the band. However, this may change in the
near future. CFOS Owen Sound, Ont (560 kHz, 7.5 kW days, 1kW night)
has applied for a repeater station at Collingwood, about 30 miles to
the east, to operate on 1610 kHz with 1kW, day and night, apparently due
to nighttime reception problem of the 560 kHz signal in the Collingwood
area. CFOS at present does have a repeater station, CFPS, at Port Elgin (1490
kHz, 1kW) about 25 miles to the west of Owen Sound. Incidently during the
day CFOS has a great signal and get out 100+ miles.

It seems rather unlikely that the expanded band will see much use outside
the densly populated areas of Southern Ontario and Quebec however. Many
stations on AM are going to FM, leaving behind good frequencies in the "old"
530-1600 kHz band. (Yes, 530 kHz is part of the AM band in Canada, with
two stations using it at present, CKHL High Level, Alberta, and CIAO
Brampton/Toronto, Ont). For example, CFQC (600 kHz, 10 kW), Saskatoon,
Sask. moved to FM last month. CJWW (750 kHz, 10 kW) also in Saskatoon in
turn moved to 600 to gain better coverage (the 600 kHz signal can even
be heard here in Calgary during the day). In turn, CJVR Melfort, Sask
(1420 kHz, 10 kHz) has applied to move to 750.

Here in Calgary, 50 kW CFXL-1140 is moving to FM later this year. Anyone
wanting to build a new AM in southern Alberta would likely perfer to use 1140
than a frequency in the 1610-1700 kHz band.

From: Steve Bauer <sbauer@tyrell.net>
Message-ID: <3jvrn7$57p@vixen.cso.uiuc.edu>
Source record: 34080

One aspect of radio broadcasting that I've always enjoyed is the jingles. I would not call myself a collector, but I do have several tapes of nothing but jingles. Well, I got wind of a new double CD about jingles produced by JAM Creative Productions. With little hesitation I sent the $14 check to JAM and within days, had the CD in my hands. After playing it, I was so impressed with what they have done. The 20th Anniversary Cd chronicles the history of JAM Creative Productions which is one of the largest jingle companies in the world. If you like jingles, you'll love this CD.

In 1985, JAM created the Jingle Song. I have it on record, but to my surprise it's on the CD. There's a 20 minute medley of jingles which is fantastic. This collectors double CD is more than two hours of pure enjoyment.

If you want more info, or wish to order, here's the info:

1724. KFI's Tower, and other antenna questions

Newsgroup: rec.radio.broadcasting

Source record: 34082

What's the length in wavelengths of KFI's tower? Might it be a 5/8 wave antenna? In fact, what's more popular for AM stations: 1/4 wave or 5/8 wave? With either you have to have an excellent ground plane (visions of a couple San Francisco AM transmitter sites sitting in the back waters of the Bay come to mind; salt water is an unbeatable counterpoise!).

And how do you engineers tune your towers for the lowest possible SWR? At the power levels you're running any reflected power would be measured in the hundreds of Watts - enough to cause quite a bit of damage to your PA.

Do you notice any changes in SWR with the weather? Since your ground plane system is so extensive I would imagine after a heavy rain the impedance, and thus the SWR, of your antenna system would change.

live up to the hype.

I'm fairly certain that this show was the Robert W. Morgan Special Of The Week. It was a one hour music and interview show that featured a different pop artist each week. The show was produced and distributed by Watermark, Inc. I used to listen all the time, and still have a couple of shows on tape. Robert W. Morgan also used to host short daily segnments called (I thinnk) "Record Report".

"Monitor" must have been, it seems to me, a pretty expensive format. It included live remote pickups (with union musicians), drama and comedy spots (it was the last home of Duffy's Tavern and Fibber McGee and Molly, along with younger comedians like Nichols and May and Mort Sahl), and a lot of other stuff that required serious production.

It was not just an anchor in a studio ("Radio Central") talking into a microphone and doing interviews with celebrities who happened to drop by.

In order to do something like that today, you'd need a large production staff and a huge budget. To make any money out of it, you'd have to find advetisers who wanted to pay for it.

Aside from working from carefully researched and reworked playlists, in some cases handcrafted and adjusted for popularity, tempo and flow by the music director and/or PD of the radio station, there is a different angle to your question, and that is: who decides what cuts are officialy released as singles?

The answer is the record company. The A/R (artist and rep) department, responsible for the artistic direction of a group or solo act, along with the promotion department determine if and when, and in what order, cuts from an album are to be released for airp[lay and for sale to the public. In ideal circumstances, the singles released from an album leapfrog each other on the charts, so that as one is peaking in the top 10, the next one is released to make its climb to the top to help sales of the album all over again.

In some cases, mostly on free form AOR stations, odd cuts from an album are given airplay, but not nearly to the extent that officially released cuts are aired.

The exception does occur: sometimes, an overwhelming number of PD's will program a cut because they hear something the record company doesn't. For example, I was a jock at WNCI in 1977 when Running On Empty (the title cut from the Jackson Browne album) was released, and my PD at the time, E. Karl, listened to the album. He decided to play Running on Empty, but thought that The Load Out/Stay was the cut that was selling the album in Columbus. So he added that too. Sure enough, other PD's saw it on his playlist and started to play it, and it went on to become an "unscheduled" hit for Jackson Browne and his label.

And we won't even get into the other reason records are sometimes
played...payola. Cause it never happens anymore, right? :)

>I concur that Leykis could give Limbaugh a
>run for his money any day of the week.

If that's true, how many stations is Limbaugh on and how many stations is Leykis on? This isn't about style or ideology. It's about market share because this may be show business but it is a business. The fact is that Leykis is not and will probably never be anywhere close to Limbaugh. The market is clearly there for conservative talk and radio is market driven.

That said, neither is on KTRT. We prefer our prime time talk to be live and local. And it is conservative as is most of talk-radio (1993 Times Mirror Institute study)

We are using a UDS in combination with a Computer Concepts DCS system.
The difference in this system as I've been told and have seen work is that
the UDS computer IS in charge of the station. It tells the DCS machine
what and when to play a commercial, jingle, etc. Control is never passed
from computer to computer. These to companies have worked well together
to make a seamless interface for an excellant on air presentation.

1740. WABC/The Blackout of 1977 Remembered

Newsgroup: rec.radio.broadcasting
Date: 1995-03-13 04:06:22 UTC
From: jeff560@aol.com
Message-ID: <3k0gbu$dkk@vixen.cso.uiuc.edu>
Source record: 34098

Regarding WABC radio coverage of the 1977 blackout, Greg Monti wrote:

>Chuck Leonard never could figure out enough things to say to fill
>the time. George Michael, in order to not alarm people inside New
>York State but outside New York City (who should not have been
>experiencing a blackout), kept referring to the whole city as "The
>Five Boroughs of Manhattan." Manhattan is only one of the boroughs.

I happened to tape a few minutes of WABC coverage that night. The quality is poor since I was receiving the station by skywave, but I just listened to the tape again. Chuck Leonard did try to discourage people from looting. He said at one point, "I don't want to be preachy because I'm not a preacher--I'm a disk jockey."

And, sure enough, I did hear two references to "the five boroughs of Manhattan," although it was Chuck Leonard who said it both times. WABC went off the air for about a half hour around 3 a.m. when one of its generators failed. When the station returned to the air, Chuck apologized for the hum on the air. He said that management personnel were working because of an engineers' strike and that it was a minor miracle they were back on the air.

Of course some of us are old enough to remember the 1965 blackout, which affected much of the Northeast. I recall that the CBS radio network fed WCBS radio coverage to its affiliates that evening. Some reports on NBC television that night were read by candlelight. NBC explained that it was a method to reduce power demand on their generators, although I recall some people felt the candles on screen were a gimmick.

>
> SandraE.
>

Sandra, I agree with your assessment of YOUNG COUNTRY, the Dallas
Young Country station was the first in America as they so proudly
boast, and maybe it will be one of the first Young Country formatted
stations to fold or change format. Hey - I've got an idea......
like I said in an earlier post - get out of that crowded country pie!
If the trend is developing like it appears, then break free and
initialize another trend setting format or as in the case of Dallas
radio - take the existing CHR/ALTERNATIVE/DANCE and hybrid it into
a format that will force those guys at 106.1 to KISS off! Go ahead,
play music that's over the EDGE! The new 105.3 -------- I have to
stop dreaming......DJRON

P.S. Sandra, I'm still not over that WVIC thing either, I grew up
w/WVIC on my radios. I haven't heard anything else about it lately,
how about it Mid Michigan radio surf/listeners! What's Goin' On???

This subject has generated some very interesting replies both as general postings and directly to me. In a very real sense I wish that FCC would post proposed rule-makings and actually read the comments from real-world broadcasters and others. Dave Hoeffel is correct when he insistes that the 80/90 stations have had a detrimental effect in many markets. The FCC stubornly refuses to consider economic impact in certain licensing situations and it tends to color their thinking in rulemakings such as 80/90. Unfortunately the excess stations are there. The FCC still is not addressing the answer to the problem. In fact, they are not addressing the problem much less the answer. In my personal opinion they should allow the maximum spectrum flexibility to all existing stations including using there assigned frequences for non-broadcast uses. At least they should put this out for comment. Some would stay in broadcasting some would move to other uses. I know that there are many who would disagree with a lot of the potential uses for this resource, but all sides should be being heard on the matter. Steve B. is also correct in his observation about inside the beltway thinking or the lack thereof. I am inside the beltway and I wonder about myself much less the policy makers. At this moment there is only one FCC Commissioner with broadcast experience, Jim Quello, and he may retire at the end of his term in June, 1996. When deliberations are going on within the agency, it was always useful to get Commissioner Quello's input in broadcasting matters as his experience was hands-on. It is probably time for a serious consideration to getting the FCC out of the broadcast licensing business altogether. Treat all licensees as homesteaders whom have added to the value of the original license grant by their improvements and only make sure that they stay within their assigned frequencies unless there is an agreement for movement by all effected parties. Maximum flexibility in operation, no reporting, no renewals in return for some quantified commitment to local service.

With regard to the following "combined" posts from awiener@delphi.com and richwood@commspec.com...

"IA>>data indicates that Kiss is primarily taking core listeners away from IA>>WBLS, WQCD, and WLTW.

IA>Warren--just curious. Are they taking away any percentage of listeners IA>at all from oldies formatted WCBS-FM as of now?? Also, should JoeMcCoy IA>(long time PD) be crying in his glasses as of yet?? I would be.

Andrea,
The format has been on the air a little more than a month. Joe has several more ARB's to see before he does any crying.

Logic would have it that the three stations mentioned will be targets. However, they're all very strong and listening patterns in New York change very, very slowly. I doubt WCBS-FM has anything to worry about.

Rich"

Everything in our data thus far suggests that despite the tremendous jump of WRKS to the top of the 25-54 rankings, WCBS-FM is holding its own. Although I can not confirm my opinion until our full Winter 1995 report is released on March 28, my review of our weekly reports is still telling me that WBLS, WLTW, and (to a lesser extent) WQCD are the biggest victims of WRKS's increases. I will let you know if I am right or wrong when our full quarterly report is released.

Hi!

I've followed this news group for a while now and just want to say hello to you all and give a short introduction of myself.

I am the music producer of Megapol, a network with five (soon to be seven) AC stations in Sweden. My daily duties includes scheduling and editing of music logs, keeping the rotations and strategy up to date, preparation of music research and collection and implementation of research data. I also do a bunch of other things at programming.

I started out as a pirate broadcaster 17 years ago and went to community radio during the 80's as commercial radio wasn't allowed in Sweden until two year's ago. I've done programming, on-air shifts and some limited promotion and production during those year's. I've been with Megapol since Apr '93.

>> WGUL(AM) 860 Dunedin continues the MOYL format, and the station plans to purchase WBSB(FM) 96.1 Dade City and change its call to WGUL-FM, so that the nostalgia format will remain on AM and FM. <<

What's BSB's penetration into south Hillsborough & Pinellas?

On a totally unrelated subject, who has the inside track on Devil Rays baseball broadcasts, or has there been any noise on this at all?

Regards, Burke Roberts/Richmond

>metro Washington and on both of Infinity's Baltimore stations, WJFK
>AM 1300 and WLIF FM 101.9.
>
Seems like an odd choice. Any idea why the team didn't go with Infinity's other station, WPGC. WJFK has such a lousy signal in the Md. suburbs, esp. Monty County. I thought that was one of the problems with WTEM--a poor signal.......

>***** WXTR FM 104.1 is still running its new '70's format jock-
>free.

Again, seems like an odd choice. WARW's been on the air less than a year--and its ratings are not good. So why would WXTR want to ape that format.

I just don't get Washington radio and its propensity to recycle formats. Why not a pure pop Top 40 station or even a second country outlet instead of yet another oldies/classic rock station?

Hi, my name is Jesse Fitzgerald and I am currently the News
Director of WPCR, Plymouth College Radio at Plymouth State College,
located in Plymouth, NH.

The college has just built us a new station and we are looking
into finding a new "news service."

We are currently using the AP service. With standard printer.
You know, the "Rip and Read" system.

What we are looking for is a new service, hopefully computerized,
that is affordable, easy to use (most of our DJ's are college students)
and has most of the following requirements:

- Easy acess menu for sports, weather and news (entertainment and
headline).

- Score updates every 15 to 30 minutes.

- Able to print out neat looking pages (as opposed to our current
AP service)

- Preferably, printer should be noiseless.

- Possibly something for an "On Air" dumb terminal.

Please mail any and all info to j_fitzge@oz.plymouth.edu.

Thank you,

Jesse Fitzgerald
The Jester of PSC

PS- I am currently lookng at Wire Ready and need the number for USA Radio
News.

1755. North San Diego Radio Watchers [3.14.95]

Newsgroup: rec.radio.broadcasting
Date: 1995-03-15 02:57:58 UTC
From: Chris Carmichael <CCHRIS@cei.mhs.compuserve.com>
Message-ID: <3k5l3m$hda@vixen.cso.uiuc.edu>
Source record: 33913

Here's the lateste radio waves from the 55th market: Carlsbad, Vista, Escondido and Oceanside, California:

Hats off to KFMB [760, 5kw D, 50kw DA II-N] for broadcasting the women's NCAA basketball finals. During the past week the area newspapers were blasting XETRA-AM, KFMB, and KOGO for not picking up the women's finals. But, with the local tie in of San Diego State University Women's team with Montana made the vote for coverage possible.

[But I have to agree with the fourth estate: it's still a male sports world as far as coverage on radio and television. XETRA said that there wasn't enough revenue in broadcasting the games!]

KJQY's entry from soft rock to mix rock has been -- a bit confusing for the listner. The station at 103.7 claims to be "Rock Mix 103," "Mix 103," and other monikers at times. Personally, I don't see much of a mix, just the same tired recycled songs heard elsewhere in the southern California airwaves. :~(

I've changed e-mail address to a mail server. With the move, the San Diego Radio Log is on special this week! For every request to "cchris@cei.mhs.compuserve.com" will receive free, the complete XETRA-AM line up! Hurry, this offer expires soon!

1756. Aging Issues in Talk Radio

Newsgroup: rec.radio.broadcasting
Date: 1995-03-15 02:57:58 UTC
From: mikecuth@paltech.com
Message-ID: <3k5l3m$hdb@vixen.cso.uiuc.edu>
Source record: 33914

I'm researching a project on the handling of aging issues and how stations approach "older" voices as callers on talk radio. I'm casting my net as wide as possible for guidelines, (official or not) policies, statements, anecdotes, whether personal or station-wide. We've all heard them, I'd just like to collect as many as possible to see if there is a pattern. Obviously, with the Boomers nearing 50, this becomes a more interesting question than it may have been before. Response here or directly to me at mikecuth@paltech.com would be deeply appreciated. I will share the research when it is compiled but will do it in general terms rather than direct quotes by station in case you disagree with the station policy. <g>
Thanks ahead of time.

1757. Re: KFI's Tower, and other antenna questions

Newsgroup: rec.radio.broadcasting
Date: 1995-03-15 02:57:59 UTC
From: searls@batnet.com
Message-ID: <3k5l3n$hdd@vixen.cso.uiuc.edu>
Source record: 33915

> What's the length in wavelengths of KFI's tower? Might it be
> a 5/8 wave antenna?

I believe it's a half-wave, about 760 feet in length.

> In fact, what's more popular for AM
> stations: 1/4 wave or 5/8 wave?

Generally, half-wave is considered ideal, but they come in many different fractions. Many of the stations at the bottom end of the dial, for example, could not afford to put up half-wave towers, especially in directional arrays. Quarter waves are more common there. As for popularity, though, I think most engineers would prefer 1/2 wave towers, altough maybe Lou Schneider or somebody can come in and correct me on that.

A 5/8 wave tower pushes more of the energy along the ground and less to the sky, but at low angles still produces a good skywave. WSM (650) in Nashville has a tower that's over 800 feet tall that probably fits this profile.

> With either you have to have
> an excellent ground plane (visions of a couple San Francisco
> AM transmitter sites sitting in the back waters of the Bay
> come to mind; salt water is an unbeatable counterpoise!).

Salt water has the highest ground conductivity available; and the SF Bay area is blessed with a lot of it. Some of the Bay Area also has high ground conductivity away from the water, too. This is one reason why AM stations here do so well.

By the way, none of the big Bay Area stations uses a 1/2 wave tower. The closest is KNBR, which uses a "capacitive hat" on its 568-foot tower to achieve an electrical half-wave length. The height is truncated, I believe, to respect airport approach paths. KGO's towers at the east end of the Dumbarton bridge are only 220 feet. KCBS's up north of Novato are around 500 feet. KFRC does extremely well with a 400+ foot 1/4 wave tower in Berkeley. By the way, KCBS blasts the equivalent of about 200kw in the direction of Los Angeles, down the length of the bay. The signal at night in Southern Cal is like a local.

You'll need a better engineer to answer your VSWR questions.

I agree. Boston could use another All-News Station. Having some competition would make BZ better. I would love to see a commercial FM station in town go all-news. I think the time is right. Maybe one of the country stations in town should abandon that format, and switch to all news!

Well, The Ticket (KTCK 1310 AM) has been independently owned by a live-in GM/owner, except now it's being sold to SFX Broadcasting. And yes, that station up to now has allowed the same kind of independent thinking that happened back on KZEW FM in the early 70's. I know, 'cause I started the ZOO back then and now consult The Ticket. With Spence Kendrick staying on to run the station, I'm hopeful that the station will be able to keep its spirit.

Today I was listening to the old 105.5 WGUL in Pasco, and waiting excitedly to find out what the new format was going to be! Knowing that it was owned by the folks at 98 ROCK Tampa I was hopefull that maybe we whould get a progressive rock station or some other source of new music...Needless to say I was dissapointed when it turned out to be another "classic rock" station...what's that now, 4 or 5 such stations in the Tampa area? How frustrating to live in a vacuum like Tampa bay when it comes to music.

1763. JAM Jingle CD

Newsgroup: rec.radio.broadcasting
Date: 1995-03-15 02:58:05 UTC
From: Steve Bauer <sbauer@tyrell.net>
Message-ID: <3k5l3t$he0@vixen.cso.uiuc.edu>
Source record: 33921

A few days ago I posted an announcement about a 20th Anniversary Double Jingle CD available from JAM Creative Productions. To my surprise, I have received many inquiries.

Since I do not work for JAM, I can not respond and speak for them. As far as I know, anyone who sends them a check for $14 can purchase this collectors item. I don't know if they accept credit cards or not. Additionally, I'm sure there is some shipping charges that will apply to overseas orders, but I don't know what they are.

I do know that this is one darn good CD. If you like jingles, then you will love this one. The historical perspective and interviews are very interesting and are interspurced with jingles. The JAM Jingle Song is pretty cool too.

The number for JAM is 214-388-5454.

I look forward to hearing comments from anyone else who purchases this CD.

I know there are probably other jingle CD's out there, but this is the first one I have ever heard about.

Steve

1765. KKCJ: The Final Hours

Newsgroup: rec.radio.broadcasting
Date: 1995-03-15 02:58:06 UTC
From: transvox@interstate.net
Message-ID: <3k5l3u$he3@vixen.cso.uiuc.edu>
Source record: 33923

Beginning at midnight, March 14, KKCJ began airing
alternating 15-minute blocks of promos for KFKF and KBEQ-FM to encourage
listeners to the former country station to tune to either of the stations
in the new KFKF-KBEQ duopoly.

Country station KKCJ(FM) stopped originating its own programming
at 6 pm Friday (Mar. 10), after a farewell statement by afternoon "Cattle
Drive at Five" jock Roger Carson and three commercials.

Sometime between 12 noon and 12
midnight on Saturday, March 11, KKCJ began simulcasting KBEQ-FM, "Young
Country 104." The former KKCJ format was a "hot country" format with more
similarities to KBEQ-FM than to KFKF. The simulcasting evidently is being
accomplished with an off-the-air pickup. At 3.20 pm and again at 7.30 pm
Sunday, KKCJ was briefly silent. Then KBEQ's programming came
back on, first off-channel briefly, and then back to normal. Overnight
before 6 am Monday (March 13), KKCJ resumed simulcasting KFKF.

KFKF is a country station that had leased KKCJ since February 16, 1992.
The LMA with KKCJ had to end because KFKF owner Sconnix is entering into
an LMA with KBEQ-FM.

The new LMA is part of the sale of KBEQ-AM/FM to EZ Communications,
which has one year to buy KFKF as well. If EZ does not buy KFKF, Sconnix
has the option to buy KBEQ.

Rather than running a standalone station, owner Ardman Broadcasting
sold KKCJ to KCFX owner Heritage Media.
Under a provision of the KKCJ lease, the new station owner must choose
a format other than country. The new format for the 106.5 frequency
remains a closely-guarded secret. However, the change is likely to
happen either Wednesday (Mar. 15) or Thursday (Mar. 16), based on the
date the original KKCJ lease started.

1766. What's going on at KDMX-Mix 102.9 In Dallas?

Newsgroup: rec.radio.broadcasting
Date: 1995-03-15 02:58:06 UTC
From: Tom Desmond <wsu@mimi.itg.ti.com>
Message-ID: <3k5l3u$he6@vixen.cso.uiuc.edu>
Source record: 33924

Something seems to be going on at Mix, here in Dallas. They've been without a program director for the last month, and haven't really added any new music to their playlist in about the same time. This seems to me like it could be a prelude to a format change? If anybody knows anything about what's going on behind the scenes, I'd appreciate if you could post the information.
Thanks.

1767. New England Radio Watcher: Cape Cod's Fox Goes Underground

Newsgroup: rec.radio.broadcasting
Date: 1995-03-15 02:58:08 UTC
From: fybush@world.std.com
Message-ID: <3k5l40$he8@vixen.cso.uiuc.edu>
Source record: 33925

This per M Street Journal --

Cape Cod FM duopoly WFXR 93.5 Harwich Port - WFAL 101.1 Falmouth
has switched from simulcasting a satellite hot country fornat
to the "Underground Network," based at WDRE in Garden City, Long
Island. This is the first modern rocker on the Cape...although
Providence's WBRU 95.5 can be heard in the western reaches
of the Cape.

WFAL dropped its AC format to begin simulcasting WFXR's AC format
a few years back. The two class A stations manage to cover the
whole Cape, with substantial overlap in the Middle Cape (Hyannis
area). The stations switched to country in '93, and outlasted
50kw FM blowtorch WCIB-101.9 Falmouth, which also switched to
country in '93, but then went back to its AC format in early '94.

In early '94, heritage Cape FM WCOD-106.1 bought WFXR/WFAL, and today
all three stations operate from WCOD's facility on Stevens St. in
Hyannis.

New calls are WUNZ for 93.5, WUNX for 101.1. Last I listened
to both, the audio seemed to be going first to 93.5, with
101.1 doing a scratchy over-the-air pickup of 93.5...problematic
because WSNE 93.3 Taunton-Providence, another full class B FM,
is not much farther away from the 101.1 transmitter than 93.5
is. (The 93.3 transmitter is about 35 miles west, the 93.5 is
about 30 miles east...and when propagation got funky, all kinds
of weird things would happen).

This is what the Cape market looks like now:

1170 WKPE Orleans // 104.7 FM, oldies
1240 WUOK W. Yarmouth Prime Sports, satellite

90.3 WCCT Harwich public radio // WBUR Boston
90.7 WKKL W. Barnstable public radio // WBUR Boston; college radio
(Cape Cod Community Coll.)
91.5 WSDH Sandwich public radio // WBUR Boston; high school radio
91.9 WOMR Provincetown community radio (CP for 92.1A)
92.7 WMVY Tisbury (Martha's Vineyard) AAA
93.5 WUNZ Harwich Port modern rock // WUNX and co-owned with WCOD
94.9 WXTK W. Yarmouth talk, co-owned with WUOK
96.3 WRZE Nantucket CHR "Rose", co-owned with WPXC and WCIB
99.9 WQRC Barnstable AC
101.1 WUNX Falmouth modern rock // WUNZ and co-owned with WCOD
101.9 WCIB Falmouth AC, co-owned with WRZE and WPXC

102.9 WPXC Hyannis classic rock "Pixy," owned with WRZE and WCIB
103.9 WOCN S. Yarmouth standards "Ocean"
104.7 WKPE Orleans oldies "Oldies 104"
106.1 WCOD Hyannis AC, co-owned with WUNX and WUNZ
107.5 WFCC Chatham classical

58 WZBU Vineyard Haven simulcasts WABU-TV 68 Boston

The only signals that cover the entire market are 99.9, 101.9, 104.7, and 106.1. 93.5/101.1 cover almost the whole Cape together, and 96.3, 102.9, and 107.5 come close.

Interesting that there's now no country there, although depending where you are, you can hear either WCTK 98.1 New Bedford-Providence, WCAV 97.7 Brockton, or Boston's WCLB 105.7 and WBCS 96.9.

1768. New WWWW Newsletter from OnLine Tonight

Newsgroup: rec.radio.broadcasting
Date: 1995-03-15 02:58:08 UTC
From: oltdavid@aol.com
Message-ID: <3k5l40$he9@vixen.cso.uiuc.edu>
Source record: 33926

ONLINE TONIGHT ANNOUNCES NEW WWWW WEB MAILING LIST

March 14, 1995 -- Glenwood, MD (OLT PR) -- OnLine Tonight with David Lawrence, the country's fastest growing computer oriented radio talk show, announce free subscriptions to a new and very simple ad hoc online newsletter, OnLine Tonight's WWWW.

The newsletter, who's title stands for 'What We Wike on the Web', will consist of nothing but a series of URL's (uniform resource locators) that the recipient can copy and paste into their favorite WWW browser. That URL will then take them to a site on the web picked out by the OnLine Tonight staff as a cool, unusual, or just well designed page.

David Lawrence, host and executive producer, said, "The growth of the World Wide Web has been to say the least, explosive. Just about every day, as we travel around the Web, we seem to be popping our heads up from behind our screens and saying 'Wow! Look at this!' to each other at the OLT studios, and we wanted to share this with our listeners."

"The reason we're not giving anything other than the URL is to create an experience of surprise and delight on the part of the subscriber. Often, the gist of the web page can be gleaned from the URL, but sometimes, it's a surprise," Lawrence said. "For example, the URL for the new FedEx home page, which allows you to among other things, make sure that the package that they *said* was sent last night really was, is 'http://www.fedex.com/' (no quotes). On the other hand, the cool stuff at 'http://bvp.wdp.com/BVPM/' (no quotes) is not so readily apparent."

To subscribe to OnLine Tonight's WWWW mailing list, send an e-mail message to oltdavid@aol.com.

OnLine Tonight With David Lawrence is a nationally syndicated radio show based in Washington, DC and has affiliates across the United States and around the world, including KEX/Portland, WCBM/Baltimore, and the Armed Forces Radio Network. Its two-hour Sunday night talk show format covers personal computing and electronic entertainment, and features news, reviews, listener phone calls, industry interviews and fun and games. Hosted by radio veteran David Lawrence, its cast includes Rita Daniels, resident DOS/Windows expert and Peter Burns, news anchor. For more information, use keyword OLT on America Online, or call 301/854-5459.

>
Hi Clarke!
I remember you from the KZZP days! I agree with you about the signal limitations...but I don't think format dominance is the goal here...just a livable number. Combined, KGME and KZRX drew a 1.7 in the most recent trends. Stern alone should get the FM that, and perhaps bring some males to the AM who will stick around for the Fabulous Sports Babe. The options are limited with these signals(their other station, KEDJ, at 106.3) has the same struggle), so why not take the shot? BTW, KHOT has a translator (104.1)that went on without much notice about 6 months ago in an attempt to beef up the Z-Rock audience.

Does anyone know more on this? Home for spring break, I noticed that WHWH (1350 am, Princeton NJ) had dropped G Gordon Liddy and was running what appeared to be satellite programming. The annoucer would break in occasionally for station ID or to say some corny phrase like "all music WHWH" or "programming that won't offend people in the car." Liddy had been pushed around, but a couple of weeks ago he was still on the air. Even the Talknet programs at night, there well before I began listening in 1988 are gone, replaced by this satellite. The station had been going downhill recent years, topped off by the loss of its morning man "Big Mike" in the past few months (anyone know what happened to him either?). Its sad. I can get AC music anywhere, but the local personalities are what made the station along with some Liddy in the mid-day. Their sister station WPST FM 97.5 is the top station in southern NJ and ranks high both in northern NJ and PA. Does anyone know if they're going to concentrate on the FM at the expense of the AM? I'm pretty sure WHWH was over 30 years old. Its sad. If anyone know the whole story on my Spring Break Shock, let me know. Thanks......

: >Broadcasting's WJFK. The games will be heard on FM 106.7 here in
: >metro Washington and on both of Infinity's Baltimore stations, WJFK
: >AM 1300 and WLIF FM 101.9.
: >
: Seems like an odd choice. Any idea why the team didn't go with Infinity's
: other station, WPGC. WJFK has such a lousy signal in the Md. suburbs, esp.
: Monty County. I thought that was one of the problems with WTEM--a poor
: signal.......
I think it is because they also get the AM and FM in Baltimore with WJFK,
and logistically it makes sense to get as much coverage as possible.

: >***** WXTR FM 104.1 is still running its new '70's format jock-
: >free.

: Again, seems like an odd choice. WARW's been on the air less than a year--
: and its ratings are not good. So why would WXTR want to ape that format.
Dont look for this format to last very long. My bet is that this is a
smoke screen to the next format. I have no idea what it may be, but I
cant imagine that Liberty thinks this will fly. Top 40 from them *might*
be out of the question for fear of stealing from their onw (WHFS) since
Top 40 is very much alternative these days.

: I just don't get Washington radio and its propensity to recycle formats.
: Why not a pure pop Top 40 station or even a second country outlet instead
: of yet another oldies/classic rock station?
While I like the idea of a Top 40 station, I dont think another country
would fly very well. They is a "fringe" country station in 107.7 in
Western VA that gets to some of Wash DC market, and remember how bad KIX
106 got smacked around way back when. I imagine that WMZQ has enough $$$
in its pockets to fend off any challenge to its hot spot!
Just my .02...for what ever that is worth now.

I have just recently found this news group and cannot believe what a great resource this is.

My subject/question is regarding the station and the people where I had my first big radio job in the early 70's...WPIK (730AM)/WXRA-FM (105.9 FM) ("Washington's Twin Country Giants") licensed to Alexandria/Woodbridge Virginia. This is back when the station was owned by the late Carl Lindburg, before it was subsequently sold to Metroplex, then Sillerman, then Group W, etc.

For years I have asked around about JAY PERRI who was the operations manager of the station for many years and hired me. I know he left the station at some point and worked for a chain of weekly newspapers in the DC area. But after that no one seems to know. Does anyone know where he is?

Also, other names from that era come to mind like: Red ("Hit it, darlin'")Shipley; Jim ("Old Fitz with the Country Hits") Fitzgerald, Bob Hughes (NOT the Bob Hughes that was on WASH and is now in San Diego); Sports with Nat Albright; and Bob DuPree. Seen any of these folks? Have any recollections of this station?

Thanks for thinking about it.

Source record: 33936

***** News radio WTOP's Jamie Bragg, a 38 year veteran of the station, has retired from AM 1500 citing health problems. Bragg has been battling prostate cancer for the past two-and-a-half-years.

Bragg, 68, just didn't have the strength to do his job any more. The physical pain of his illness just got to be too much for him to deal with along with the daily pressures at work.

Bragg, whose real name is Casper James App, hasn't been on the air for about a month. He mentioned in the local paper that station management was supportive of him and told him to work as many or as few hours as he could but, things just got to be too much for him.

Back in October, Bragg received an AIR (Achievement in Radio) award at the local banquet in D.C.

Stay healthy, Jamie. We'll miss you on the air.

***** WRQX FM 107.3 (AC/Mix format) has secured it's morning team until the fall of 2000. Jack Diamond re-signed with the ABC/ Capital Cities station last weekend. Terms of the deal weren't released but is rumored to be in the area of $500K a year.

Diamond, whose real name is Harvey Fisher, grew up in the metro D.C. area is happy to be staying in his hometown. As a teen, Jack Diamond--then known as Bruce Diamond, used to spin the hits at AM 1600 WINX in Rockville, MD.

Diamond, and his side kicks Bert Weis and Barbara Britt, received many lucrative offers from out of town--including several from Los Angeles. But when push came to shove, Diamond and crew decided that it would be easier for their families to stay in D.C. rather than move west.

***** I've noticed a lot of chatter here in Airwaves/RRB on X-tra 104's format change. There seems to be some confusion as to who's playing 70's music in town.

WARW FM 94.7 is currently playing rock music from the late '60's, the '70's and early '80's. When they first began their ALL ROCK & ROLL *OLDIES* (ARROW) format, they had more of a pop flavor to their sound than they do today. After only one rating period that wasn't very good, they modified their format just as WCXR dumped their Classic Rock format for Smooth Jazz. Then WARW changed their moniker to ALL ROCK & ROLL *CLASSICS* and stopped playing most of the 70's pop tunes they were playing in favor of more guitar rock

tunes.

WXTR, on the other hand, is playing pop, rock and soul-oriented songs from the 70's. Today I heard "SHOW & TELL" from Al Wilson; "LOVE OR LET ME BE LONELY" by the Friends of Distinction; "EMMA" by Hot Chocolate; "PATCHES" from Clarence Carter and "I'LL BE GOOD TO YOU" by the Brothers Johnson. I haven't heard these songs on the radio in years.

Last weekend I heard the Brothers Johnson's other hit "STRAWBERRY LETTER #23." I almost drove off the road when I heard that. Anyone else out there remember that strawberry colored and *SCENTED* promo 45 RPM that A&M released?

Mixed in with these tunes you have pop hits like "IT DON'T COME EASY" by Ringo Starr; "FEELING STRONGER EVERY DAY" by Chicago and "HONKEY CAT" from Elton John.

Among the nice mellow song I've heard just tonight are James Taylor's "SECRET O' LIFE" and "GET TOGETHER" from the Youngbloods.

All in all, the new sound--which is still jockless for a few more days, presents itself to me as a well balanced station. It's a good representation of what I heard in the 70s. Yes, even "FUNKYTOWN" by Lipps Inc!

***** WWRC AM 980 is sounding quite a bit stronger now that they've upped their power to 50,000 watts. At night I still can't get their signal at home in Frederick, MD., when they drop to 5,000 watts directional. Let's hope this will help the station with their ratings.

***** Some WMAL AM 630 employees have gone on line. Here are the addresses I have:

Here at WBFO in Buffalo, we've been using Fidelipac Dynamax DCR-1000 digicart machines for nearly a year. In theory, they're dynamite, and their potential is great. However, we too have frequent "chirp-streams" which are annoying and painful to the eardrum, especially in the production studio (and I keep the volume at an otherwise comfortable level). Annoying too when one starts chirping unexpectedly on the air! It seems that a disk is going bad, but it seems like the sample of troublesome disks is much too high. We also use preformatted TD (triple-density) 13 kb disks, which can hold up to 15 minutes in mono at 22 kHz, but other than Fidelipac itself, we haven't found a source of the disks, and they are pretty expensive. Some of those TD disks have also gone bad. They are cheaper than long blank analog carts, and in some ways more versatile (it's not as frustrating when carting up multiple cuts, and having a miscue on the second-to-last cut!). Too bad the disks can't be truly random access, though...if you want to replace cut two, it can't be any longer than the original cut two was, unless you erase the entire disk and start over.

Wild Cat Country WVIC, Lansing MI., formerly a top 40 station recently switched to country. They are running jock-less at the moment, with a healthy amount of current and recurrent tunes. Attitude Liners include "The Cat is Out of the Bag - 95FM - Wild Cat Country" plus the usual "we play more songs and the other guys talk too much" liners. I thought the play on words with the cat being out of the bag was pretty slick.
DC Cavender, late of WKCQ Saginaw, is going to be wearing the PD hat at the Cat. Although the station is "searching" for a PD/Morning Man, I think you can expect DC to be working again soon.

Guys-

Some info on a couple of the stations that you've discussed...

I found your comments regarding KHKS to be interesting considering the fact that they've been hugely successful there. Their ratings have soared, and you'll find them consistently in the top spot, or #2 in the market. Sure is refreshing to see a Texas major market being dominated by a non-Country station!

Regarding B97/New Orleans... the station is rocking at night, playing mostly Modern Rock, and calling the show "Planet B." But the rest of the day, they are talking. They now carry Howard Stern in the morning. And both the midday and afternoon drive shifts are morning-type shows, with lots of personality, and only about 8 songs an hour. This will be an interesting station to watch.

KRBE in Houston is one of the coolest and most innovative stations in America. Their ratings have also soared, and you'll find them consistently scoring in the Top 5.

Sure is great to see quality CHR stations kicking butt again!

Hi Don,

Nicely said. In fact, I will be doing a 2 hr seminar at NAB this spring on how improving your copy, concepts and performance you can reduce tuneout, improve ratings, get more for each spot and increase the value of the radio station. The point is, every listener a station loses to tune out, is lost money.

I will be havin' some fun with this one!

: I believe it's a half-wave, about 760 feet in length.

: > In fact, what's more popular for AM
: > stations: 1/4 wave or 5/8 wave?

: Generally, half-wave is considered ideal, but they come in many different
: fractions. Many of the stations at the bottom end of the dial, for
: example, could not afford to put up half-wave towers, especially in
: directional arrays. Quarter waves are more common there. As for
: popularity, though, I think most engineers would prefer 1/2 wave towers,
: altough maybe Lou Schneider or somebody can come in and correct me on
: that.

In reality 1/4 wave towers are the norm. Of the 100's of AM stations
that I measured for NRSC Compliance last year on Texas, New Mexico,
Oklohoma, and Lousiana there were only 3 that used any thing other than a
1/4 wave tower. Those two were 1/2 to get the height needed for the side
mounted FM antenna. One was a Franklin design that allows you to contol
the takeoff angle of the signal for Sky Wave control.

Source record: 33949

Not to give consultants all that much of a plug, but one thing they often tell you is NOT to zap your competition when you're promoting yourself, because it just reminds people that you think you have competition! It does seem logical that a radio station should promote its own strong points, personalities, reasons for tuning in, etc... because if you're tuning it in, you aren't listening to the competition, at least for the moment.

How about comments on really good (or bad) self-promotion listeners have heard stations do? What makes you want to listen to a station, especially a new one? What kind of promotions backfire? Is it ever a good move to put down the guys you're trying to steal audience from?

Hi Scott:

When I visited the Cape about three years ago, I gave up trying to listen the the local stations since they seemed to fade in & out about every two miles or so. (The only station that had a decent signal was WKPE, and I even lost them somewhere near, ironically, the Marconi site). Wound up listening to WBZ all the way up 6 to Provincetown, then all the way back to Boston.

BTW, what's Fun 107 in New Bedford up to? Listened to them for a long time driving out I-195 from Providence.

The T-Man has surfaced here in Seattle at KJR-RADIO, an all-sports station. He starts tonight, doing 9-midnight. His so-called vacation was supposedly a suspension, as he had asked out of his contract to negotiate with KJR. His arrival here has been planned for some time. This is somewhat ironic as far as KJR is concerned, since it's a similar situation that developed with the Fabulous Sports Babe, who had been doing mid-days at KJR when she was approached by ESPN Radio. She wanted out of her contract at KJR. KJR gave Nanci permission to talk to ESPN, but wanted her to do her national show from Seattle. ESPN, obviously, wanted her to go to Bristol. KJR suspended her--with pay and benefits--until the whole mess was sorted out with respective lawyers. KJR's owner threatened to honor her contract, but not put her back on the air, for two years--keeping her out of radio. Nanci eventually got it worked out and wound up on ESPN and now she is carried (1 hour live, 1 hour tape) on KJR. The new (but everchanging) line-up at KJR is:

6-10 Michael Knight and New York Vinney
10-12 The Fabulous Sports Babe
12-3 Mitch Leavy
3-7 Mike Gastineau
7-9 Brian Wheeler
9-12mid The T-Man
12-2 Ron Barr (delayed)
2-6 Sports Fan Network

I agree with most of your points. Just to illuminate mine:

>I think it is because they also get the AM and FM in Baltimore with
WJFK,
>and logistically it makes sense to get as much coverage as possible.
>
Well, here again I have to question the logic behind this choice. Because,
before, Baltimore represented a separate market the 'Skins could sell
their broadcasts too (I'm pretty sure they get a piece of the affiliate
$$$). WBAL picked up the broadcasts last year. Now, with JFK-AM repeating
the signal, the games can't be resold to another Baltimore station.

>I cant imagine that Liberty thinks this will fly. Top 40 from them
might
>be out of the question for fear of stealing from their onw (WHFS) since

>Top 40 is very much alternative these days.
>
I dunno, I think if you compare 'HFS's playlist with the Billboard Top 40,
you'll find there's not much overlap. Even if there was, it's not
unusual for duopolies to try and lock up a particular format in a single
market (i.e, if you want to listen to non-country music made after 1985,
you're going to have to listen to it on one of our stations).

>They is a "fringe" country station in 107.7 in
>Western VA that gets to some of Wash DC market, and remember how bad KIX

>106 got smacked around way back when. I imagine that WMZQ has enough
$$$
>in its pockets to fend off any challenge to its hot spot!

Actually there are several country stations that reach the outer suburbs,
incl. WFLS, WPOC and WFRE. But none really has a presence in the greater
Wash. area (or its rating books). I wasn't around when KIX was, but the
country market is much more lucrative now then it was then. But, I
certainly can understand the reluctance to go up against a powerhouse
like Viacom/WMZQ.

I think the Redskins chose Infinity because of their experience
with doing NFL games in New York (WFAN) and Philly (WYSP). To
chose another station (non-Infinity) would mean possibly using a
company not experienced in NFL games. Also, I think Infinity felt
that WJFK fits the Redskins demographics better than WPGC. If the
signal becomes too big a problem, they could always simulcast on
both WJFK and WPGC. Also, I don't live in Maryland but how does
WJFK-AM 1300 come in up in Montgomery Co.?

>
>>***** WXTR FM 104.1 is still running its new '70's format jock-

>

I heard a station with this format in Chicago on a recent trip. It is
a true 70's format nothing is off limits. If it was on Top 40 radio in
the 70's they play it. A little more unstructed than WARW. Now whether
it will work is another matter.

I stopped trying to figure out Washington Radio along time ago. :)
I just enjoy my trips out of town to listen to stations with decent
formats. :)

Back when WLS ruled the AM nightwaves, a late-nite announcer called Yvonne Daniels did a nice rock show. Heard her once about 2 AM doing a live ad for some Xmas sale, on toys, and some producer must have been playing "crack up the jock" because in the middle of straight copy she simply lost it, laughed for at least 30 seconds straight unable to regain composure. It was a memorable moment, out on the Lone Prairie, hearing her crack up.
She ran a tight show, with a very terse strong delivery.
As a beginning jock, I'd never heard another woman on the air, and several listeners told me I sounded like her. They were wrong. I was a wobbly country back-announcer, but sounded like a girl so they noticed a connection. I owe her for the reflected glory.

Stella (we're only fictional characters) Starr
StellaStar@aol.com

[Moderator's Note Yvonne also worked in the sixties on an all night jazz show on WCFL. The show was called 'Sid & Yvonne' and played cool jazz all night. She also worked at WNUA, Smooth Jazz in Chicago.

Howard:

Thanks for the memories regarding WPIK/WXRA. I actually remember back when WXRA called itself "The BIG X-RAY", and its signal, from Woodbridge, Virginia, barely reached the DC area.

WPIK was country long before it was cool to be country. It's only competition, as I recall, in the DC area was WDON from Wheaton, MD, an incredibly weak signal, though it did have Tom "Cat" Reeder, a legendary country broadcaster.

Don't know where Jay Perri is. Do remember that Bob Dupree had one of the deepest voices I've ever heard...comparable to Lucille Ball late in life.

I'm full time news , weekend and fill-in talk at KGO, S.F....general feeling around here is if it's an aged caller move on quickly. I find myself avoiding topics such as social security knowing it'll bring a response from 55+. Although I've never seen it written nor been advised of an "official" position. This is a personal observation.

I agree with you the boomers "bubble" may change that. However, seems programmers are still reaching down in demographics. This could be "old" thinking. Not realizing that the teen, then 20's were important because of boomers. Still one can argue the younger set has more "disposable" income while aging boomers may be saving for retirement. Would like to know results of your research. Please advise.

I am a 19 year old male that has wanted to a broadcaster for most
>of my life, my only problem is I dont know how to go about it . Do I go
to college and
>get a degree in Broadcasting or do I attempt to get an entry level job
at a Radio Station and work up.
>Or do I go to some sort of Broadcasting School

I was working as a printing pressman in my twenties when I decided to make my move. I took night classes at a local community college that offered a program with lots and lots of hands-on experience. I was able to train in each broadcast position in radio and television.

When my opportunity came, it meant a helluva cut in pay and work at a small market radio station with a small staff where I could do everything. I hosted a morning-drive jazz program and worked off-air as Music Director/Librarian. From there I got experience as Production Director, Operations Director and Program Director. I also got experience at other stations in town with other formats, further broadening my range of experience. Now I'm at a major-market station doing radio/tv announcing.

I would suggest college classes with education in broadcasting technology and operations, as well as a general background education in lots of subjects. The latter will help you be more articulate on the air. Be prepared to work at a small station and work your way up. Be aware that your paycheck will be quite small for along time {hope you like soup and a small place to live :^) }. The possibility that you can leave school and land your dream job is next to impossible, and happens only to a very few. The more you learn on your way up, the more valuable you'll be to future employers.

It's hard for me to advise you on a "Broadcasting School". During my career, they were pretty much made fun of, but since I don't have any personal experience, I'll reserve judgement and leave that call to my colleagues.

-Matt-

For what it's worth, I went to a broadcasting college -- Emerson, in Boston -- where they taught me a bunch of stuff I didn't think I'd ever need to know. After a long period of courses in communication psychology, language theory, voice and articulation, phonetics, copywriting... they finally got down to what you do in a control room.

The longer I stay in this business, the more I use those dumb theoretical subjects every day. And the more I realize how transitory the basic 'here's how you act on the air' training was.

Also, for what it's worth, I've been real happy with my career.

Richard Groves (rgrove1@ibm.net) Writes:

>I'd like to ask a question to you broadcasters out there. How did you get start on your way....<

Richard, "I" was lucky enough to attend a high school that had it's own radio station. I entered that school in '86, and immediatly inquired w/ them about working as a student DJ. The only way I could work there, was to have a "study hall" class. I.e. no credit towards graduation. <smile> Eventually, they initiated a student DJ class, that did grant a credit towards graduation. I did work w/ them before and after they had their own class. So basically I did manage to graduate from high school on time, provided that I did take "study hall" one year.

I graduated from high school in '89, and had to leave the station. Let me say I was not happy about that! Fortunately for me, I was hired as a p/t employee a year after graduation. I am still there today, as a p/t employee. The pay leaves a lot to be desired, but I still love the work. I have been pretty lucky, I guess you could say.

My advice for you, in getting your own radio gig, is inquire w/ radio stations in your area about internship programs. The thing about radio, is that you don't get hired easily, even though you went to the "big radio broadcasting college" in Anywhere, USA. Radio is very hard to get into, so the more "hands on" experience you have, the better your luck will be.

Most internship programs will be non-paying! Granted there are a few that are paying. And finally if you "do" get an internship, rule #1 is "don't try to be someone else". Don't act like "Mr. Know It All, and don't try to act like you're Casey Kasem. Radio stations are looking for people with their own talent, not someone copying someone else's talent.

Last but not least, as I have already stated... a college degree from a broadcasting school, is not necessarily a "guarantee". I have no such degree. As a matter of fact, I have no college degree, period. I am a college drop out. The hours I work right now at the station are a part of that reason why I dropped out (aside from the fact that I thought the female students looked ugly....) JUST KIDDING about the females <smile>

You need experience.... and the best way is to be an intern. Also if you have a good sense of humor like me (snicker) that might help out some... but work on your humor later <grin>. Start with the basics... and work your way up.

Good luck!

Robert Bass

I have asked Marvin Collins about KFI 640's antenna. It's located inside of Los Angeles County, but Berry Berry close to Knott's Berry Farm. You can't miss it from the north side of Interstate 5.

Marvin tells me it's 755 feet, including the base insulator. I don't know the mathmatics, but that doesn't come out to 5/8 wave. The tower was installed in 1948.

Marvin Collins e-mail address is: KFIam640@aol.com

Thanks!

I thought about Monitor and this discussion while driving home last night
from work.

I'm not sure why it would *have* to be incredibly expensive. Hasn't
technology made such a production more affordable than previously possible
(in Monitor's heyday) through enhancements such as ----

(for example)

Switched 56 Kbps lines & ISO/Musicam Codecs
vs
"Classic" AT&T Leased Lines

or Satellite Uplink from various sites (mobile & fixed) along
with bandwidth reduction technology like SEDATS, etc.

or Disk-based workstations vs editing audio tape on the reel to
reel with razor blade, splicing block, paper leader, etc.

(only ones I can think of at the moment)

Talent costs would seem to be a wash, in that you'd need an announcer, etc.
in either case but I would think that the production costs would be less,
and that so would distribution costs what with all the satellite
distribution already in place and easily augmented if necessary.

Perhaps rights fees, etc. for obtaining the source material have increased.
And I'm sure that there are less news departments and local production
resources out there for gathering and contributing material (at least in
the commercial radio world) which in effect might make obtaining a suitable
amount of program material more costly.

Now whether the audience would be there, with the right quantity and
demographics, is another question. Clearly the role of radio (particularly
AM) has changed since the Monitor heyday. I'm not sure people still want

this kind of radio --- but that's another discussion.

I'm a big big fan of the "Solid Gold Soul" format on a local AM station. They're a great miox of classic R&B, jazz, and blues. Apparently they are a service out of Texas somewhere. Can anyone gve me more information? Are they carried by any of the satellite services, so I can hear it in stereo?

Thanks!

FM/AM Radio stations for sale in New York State!. These two profit centers offer an exciting opportunity for the right person or group owner to transform these underdeveloped properties into a winning combination. Owner is in his 70's and plans to retire this summer. FM signal reaches into 10 counties including the Syracuse ADI and enjoys a state college in town, strong tourism and other attractive industries. Plenty of acreage, towers, studios and pure income being generated by leasing of FM tower. Purchase the entire package for $618,000 with terms or $418,000 without FM tower, real estate and transmitter building but a sweetheart lease of the FM tower. For more information contact Ron Hickman at 908-850-5188

1825. Dallas Radio a 10 year verteran's perspective

I would like to ad my two cents worth tot eh thread of Dallas/Ft. Worth radio.
I have been working in the market here for the last 10 years or so, and my experiences have taken me from being an intern at a traffic reporting service to getting an offer to work at a 50k AM station, to moving on to a syndicated overnight radio show based in Dallas, to the present position at a FM station that at the present time is on the verge of being purchased by a larger company. (Pending the FCC approval)...
The radio market here has not changed looks in over 20 years or so... now I the argument that there has been change of stations and formats, but not since Gordon McClendon made strides to make radio more entertaining, with his morning show host and music formats. There has not been one station in the Dallas/Ft Worth area that has challenged the next guy. The contest during the sweeps months is all that gauges the difference between the first place and the also rans. What is NOT happening in radio is what should be the concern of all. The article that ran a few issues back about how the market has been flooded with Country stations or Classic Rock station... we also have TWO A/C stations, one CHR station if you wish to call it that... I personally would like to call it the Mariah Carrey STation.. ALL MARIAH ALL THE TIME... it really is sad. Then there is the EDGE. Which if you allow it to do what it set out to do... be the alternative music station for the area, it would be leaps and bounds from the others in the area. The PD just won't allow the jocks to turn it loose. I don't understand that.
The other thing that is bothersome to me, is that there is one OLDIES format in the market, with no competetion, but they also have very little personality, they have a formant of nostalgia radio, yet they won't let the jocks perform the way it could dictate them to.. In other words... bring back the style of format that fits the era.
NOW to the AM side of the dial, Dallas/Ft Worth's news leader KRLD and its parent company SFX had just purchased new comer KTCK the TICKET all sports radio. Making the aquisition pretty interesting. Now there is a new player as of March 16th, in the Dallas Morning News, there is a group in Dallas that have made a bid to buy SFX for 160 Million dollars, there is a whole lot of shakin goin on. With KRLD and the TICKET in the same house, the sports and information that they can trade will be a great asset to the both stations. KRLD has the Texas Rangers Baseball broadcast and the TICKET will carry everyone else. A few years ago, I made the suggestion to the owner of a 50K AM station here that he ought to consider going 24 hours sports, and his response to me at the time was..." this town could not support a radio staion that had nothing on it but sports without substance"... the proof is in the pudding so to speak. The TICKET ranked number 2 amoung its demographics for the last book.. and they had only been on the air for one year. NOT BAD eh?..
Now to prove my therory about sports all day long in this market.. Lets

look at KLIF 570AM.. they start their day off at 6 with Norm Hitges, one of the best in the business for sports, and then at NOON to 3 they brought in a sports writer from the Ft. Worth Star Telegram to take over from John Rody who had that slot for about a year or 2. Management says that ratings was the cause for the change. Not real sure. WBAP 820 AM still have the Dallas Stars Hockey team games, KLIF has the Dallas Mavericks Basketball games, KVIL 103.7 FM has the Dallas Cowboys, and like I mentioned earlier, KRLD has the Texas Rangers, and The TICKET has everyone else.. from college to Pros, they pick up the network feeds, and that is why it is a good deal with KRLD and The TICKET to get together.
Until next time,
Dave Melane
Dallas,TX

1826. Re: WABC gets new PD

As per Inside Radio:

Phil Boyce to program WABC, New York. Detroit programmer will take over the controls when John Mainelli begins his latest sabbatical - most likely in mid April. Boyce just hit his fourth anniversary at WJR Detroit. Says it was a "tough decision" to take the transfer to CapCities/ABC sister station WABC. Boyce programmed KHOW-AM Denver before joining ABC. Mainelli had announced his intention to walk off into the sunset.....again.....last month. Soon GM Don Bouloukos' in box was bulging. Yesterday afternoon, he and Boyce shook on the deal. No work yet from Detroit on who succeeds Boyce at WJR. Mainelli fashioned WABC into a mostly-local talk station that wasn't afraid of controversy. WABC jumped 3.9 to 4.7 12+ in the Fall Arbitron.

I wish Phil the best in continuing to have fun on a great station!

>"FUNKYTOWN" by Lipps Inc!

Tom,

Yeah, I've noticed the wide range of stuff from the 70s they're playing, as well. It makes for a nice music balance, and clearly sets them apart from Arrow. To their infinite credit, last weekend, Xtra played one of my favorite songs IN ITS ENTIRITY: "Load In / Stay (the Roadies Song)" by Jackson Browne. Mix 107 drives me up the wall whenever they play just the "Stay" part.

As I mantioned, it sounds as though they tracked down the playlists from such great 70's era D.C. area stations as WRC, WPGC-AM, WASH-FM, WKYS, to name just a few, to determine their music mix. Oh, and I do notice they're "dayparting" to some degree, as well, leaning more toward 70s rock tunes after 7pm, and easing up on the pop/soul stuff, which dominates the morning drive/midday segments.

Now it will be interesting to see how many of my former jock colleagues from the previous XTRA will survive to the new "seventies" format (I anchored the morning news on XTRA when Bill Dalton owned the station.)

Cheers, Max

Source record: 33986

Don't know how many of you in NY know WJR...but those of
us here in the Great Lakes know it is a VERY different radio
station from WABC in its target audience, its overall approach
to talk and its general tone. Phil Boyce has been its PD for
a number of years, I believe since at least 1990, and was with
the station---if memory serves, as news director---for quite a
while before that, when Gary Berkowitz programmed it. A
full-time Detroiter who has Boyce's full track record at hand
is very much invited to supplement my memory here.
WJR basically is one of the last of the friendly full-service
outlets that still takes a neighborly, non-confrontational approach.
I don't know Mr. Boyce myself, but as a frequent visitor to the
Detroit area over the last decade I do know the product he put
out over a number of years. Like WABC, it's one of the best
at what it does, although what it does is closer in concept to
WOR in its 1970s heyday. Boyce passed on Limbaugh when EIB's
contract with WXYT was running out last year ('XYT balked at
paying the higher carriage fees as well, but people in the market
say Limbaugh cut a more favorable deal once 'JR let it be known
they weren't interested and Rush had noplace else to go.) 'JR re-
tained its 12+ lead minus Limbaugh, and remained strong---even
#1 12+---in Rush's daypart, although the demos are still older than
Rush's.The rest of WJR programming is also 180 degrees from the
in-your-face approach that WABC is known for. Contrast the kindly
and mellow J.P. McCarthy's morning show with Lionel if you want
proof.
If Boyce is the man, will he change WABC to reflect the style
he pursued at WJR? Or will he change his own concepts to fit what's
going on now at WABC? Or will there be a mix of styles, something
mellower that today's WABC but edgier than 'JR? I can see most of
the schedule surviving fairly intact, even Limbaugh, but how's he
going to deal with Bob Grant?
This is going to be interesting to watch. It's no surprise that
they're promoting from within the company, because those of us
who've spent any time at all drawing a CapCities paycheck know
that while they will hire from outside, they prefer to promote from
within the chain.
Having said that, a lot of us doing admittedly idle speculation
were expecting someone within the CapCities/ABC chain, but a
lot closer to WABC's style---maybe Drew Hayes, or Al Brady Law
from LA, or Tyler Cox from Dallas-Fort Worth---to take over. All of
them have proven top 10 market track records of success, as does
Boyce. Look at this list of all star programmers; Hayes, Boyce, Cox,
Law---they're all top shelf men with excellent credentials, any one of

them would probably be able to win in NY. So there must be something else afoot...the style, the programming ideas and concepts he brings to the table must be the deciding factor.
Now the next interesting question for everyone in the business in the Northeast to chew on...Does this mean WABC sees its current incarnation about to run its course and plans for kinder, gentler talk? Or has Boyce just been waiting for a chance to cut loose and do things he knew he never could get away with in Detroit? Or will they fool us all, including the Post, and appoint someone else, like Cox or Hayes, whose styles are closer to what WABC is now? Stay tuned...

Larry Glick is reportedly retired, though he's been heard
on occasional guest shots. One poster to this newsgroup
says he's living down South now, in a resort community.
Jerry Williams went to WRKO some years ago, and
held down afternoon drive for a long while, then late last
summer he was moved to a shorter two-hour daily airshift
from 10 to noon, which he's doing now. You get varying
opinions on why...some say he was shuffled off to make
room for Howie Carr in afternoons, others say Carr was only
brought on board after 'RKO lost Tom Leykis and Williams
(who is 71) told them he wanted to ease up a bit and get out
of the afternoon pressure cooker, but wanted to stay on the
air in a shorter show. In any event they went to Limbaugh
noon-3 and Carr in Williams' old afternoon slot.

I hate to be the bearer of bad news, but Yvonne passed away about 3 or
4 years ago...her last gig was at WNUA where she was much respected and
loved...she had a show with Lou Rawls which featured lots of great jazz,
not just the elevator-music kind. Her death was caused by cancer. She
came in to work near the end first with a cane, then with a walker,
finally in a wheelchair...then took a leave of absence...called the
staff to say goodbye, but it wasn't common knowledge at the station
that she had cancer or was dying. She was a very courageous woman and
a great broadcaster.

She was the sultry, beautiful voice of The Big 89 (WLS) during the overnight. As a sixteen year old kid in 1976, I spent many a night just listening to her show. My teen age phone bill could ruin anybody's allowance. Before she left LS' to go to WVON/Chicago....I had the pleasure of getting a publicity card with her picture on it along with a WLS QSL card in the mail in 1979. What a lady she was. What a station WLS once WAS. Hint, hint...Rush Retreads.

About the only lady of the airwaves that even comes close to Yvonne is B.J. Stone, who up up until 2 weeks ago graced the WOWO airwaves from Fort Wayne.....but that's another story.

Perhaps some of you are aware of the Buffalo News feature article on Friday, March 10, 1995 that rated radio morning shows in Buffalo, not according to audience, but to the quality of the presentation. I am proud to say that WBFO-FM's broadcast of National Public Radio's Morning Edition received the highest rating, an A+.

But I am not here to talk about our rating but to respond to a letter to the editor in the Friday, March 17, 1995 Buffalo News written by Darren Neaverth, the sales manager of WHTT-FM (Oldies 104) in Buffalo. Darren wrote to defend the poor rating Critic Anthony Violanti gave to his father, long-time Buffalo broadcaster Danny Neaverth.

I will say that I agree with Mr. Violanti's view that Danny's time has past. But I will go no further in my criticism. Danny Neaverth was a boyhood idol of mine. Perhaps I wouldn't be in the business today if it weren't for the influence of Danny, who was truly creative as the morning host at the old WKBW (KB Radio) in Buffalo. I will not be as kind to Darren.

I have no doubt that Darren wouldn't be where he is today if it weren't for his daddy. To disparage other hosts in defending your father is uncalled for. The last time I checked, announcers like Bill Lacy and Tom Campbell, each of whom received higher ratings in the News article, also had more listeners than WHTT in morning drive. Don't give me that baloney that your father has been number one in adults age 35 to 54 for five years. Anyone can take narrow demographics from the ratings and hype them. Bottom line, I want to know who has more listeners, period. And WBEN and WYRK do!

Secondly, I resent the characterization that you "could store all of Bob Edwards' talents in a thimble." How dare you say that. You don't know Bob Edwards. And I wonder if you've ever listened to him. Bob is one of radio's most accomplished interviewers and program hosts. Enough said!

Thirdly, I will concede that Danny Neaverth has more listeners than WBFO's Morning Edition. That may be more an indication of Buffalo's "blue-collar" nature than anything else. In such major cities as Boston and San Francisco, Morning Edition competes for number one with the commercial stations. I love Buffalo and do not want to put it down. That happens enough already. I will say that if you told me 25 years ago that WBFO would someday have a higher rating than KB, Buffalo's most popular radio station at the time, I would have laughed. Well, it's happened! WBFO is now more highly rated than KB in Arbitron. I look forward to the day when I can say Morning Edition is not only Buffalo radio's number one show in terms of quality but in audience numbers as well.

KZTO RUMORS PLANTED IN NEWSPAPER?

A curious item appeared in the Kansas City Star's local gossip column on Tuesday, March 14.

It read, in part:
| You read it here first. ...sources say a deal is in the
| works for radio station KHUM-FM (95.7 on the dial--go ahead, punch it
| in on your car radio) to become KC's first true alternative rock station.
| ... The station moved its antenna ... to Eudora, Kansas, four years ago,
| enabling it to send a "strong signal" into the cowtown. Stay tuned.

Not quite. The station is now silent, and presently has the call letters KZTO. Perhaps the radio used on My Mother, The Car could get it, but ordinary radios have difficulty tuning in a station that is not on the air.

A sale of KZTO is pending, as reported in AIRWAVES on January 24. The corporation purchasing the station owns CHR-formatted modern-rock stations in other cities. The Eudora site, also the site of KMCI-TV (channel 38), in the past has not enabled KZTO to put a good signal into the Missouri side of the Kansas City market.

When KZTO and KHUM (its old call letters) were on the air, I never could receive it at my old site near 63rd and Rockhill Road.

One source told me this item was planted. Why would someone do this? It makes no sense to provide the newspaper with an item featuring the wrong call letters for the station. (Maybe KKCJ can go back to calling itself KXXR for a while, while we're at it.)

NOTES FROM MID-MISSOURI

A couple of items from a weekend trip to Columbia:

Jefferson City's KTXY(FM) appears to be inching closer to a CHR sound, after its initial beginnings as an adult contemporary station. This could be an attempt to break into the Columbia market. Columbia, despite being the home of a major state university and two smaller colleges, has no CHR station (nor a true modern-rocker). In recent years, the station has wobbled between a soft-rock format (as KKFA) and a watered-down album-rock format. The station now seems to have found its focus.

Adult-alternative KBXR(FM) (studios in Columbia, licensed to Ashland) has pulled off an amazing feat: it managed to tighten up its format without losing much variety. Until the LMA-to-buy with Columbia's KFRU(AM)/KPLA(FM)

began, the station's previous owners indulged their personal music tastes, and played far more blues and far fewer alternative rock tunes than the AAA format normally calls for.

KBXR now is emphasizing an "unplugged" theme, with a focus on acoustic sets. But it also has broadened its playlist to include alternative and modern-rock tunes it wouldn't play before. The station still plays a little of the blues, but it now is well-controlled, in a diverse mix of folk and alternative music. Even some synth-pop now makes it onto the KBXR airwaves. I wish Kansas City had a station like this.

1839. Kansas City: KKCJ to adopt interim format

Newsgroup: rec.radio.broadcasting
Date: 1995-03-18 01:36:07 UTC
From: transvox@interstate.net
Message-ID: <3kdde7$6kr@vixen.cso.uiuc.edu>

Written March 17, 1995

After nearly a week of airing a numbing alternation of 15-minute promo blocks for country stations KFKF(FM) and KBEQ-FM, LMA orphan KKCJ(FM) has revealed plans for the next month or so.

The station will air an eclectic format of polka, Christmas music, and "an hour or two of Led Zeppelin, Frank Sinatra and maybe even Elvis," KCFX(FM) general manager Bill Newman told the Kansas City Star.

Rather than running a standalone station after its previous LMA with KFKF ended, owner Ardman Broadcasting sold KKCJ to KCFX owner Heritage Media. Under a provision of the KKCJ lease, the new station owner must choose a format other than country.

KFKF is a country station that had leased KKCJ since February 16, 1992. The LMA with KKCJ had to end because KFKF owner Sconnix is entering into an LMA with KBEQ-FM.

The new LMA is part of the sale of KBEQ-AM/FM to EZ Communications, which has one year to buy KFKF as well. If EZ does not buy KFKF, Sconnix has the option to buy KBEQ.

Newman told the newspaper that a "permanent format" (or, at least, as permanent as a radio format can be) for the station will be put in place in May.

The station is also offering members of the public the opportunity to host their own air shifts during the day. Civilians can play or say whatever they want, within legal and "good taste" boundaries, for a $1,000 donation to Children's Mercy Hospital.

(If instead they would accept a $1,000 donation to the Good Samaritan Project, our local AIDS service agency, I'd do it.)

At this point, it's impossible to determine what format the station will choose. The only unserved niches in the market are jazz (ironic considering Kansas City's history) and album-adult-alternative (AAA).

It is interesting but not necessarily conclusive to note that Columbia's KBXR(FM) took a similar approach before unveiling its AAA format during the fall of 1993. That station played comedy records, easy listening artists, and broadcast spillover pro baseball and football games.

>decent signal was WKPE, and I even lost them somewhere near,
>ironically, the Marconi site). Wound up listening to WBZ all
>the way up 6 to Provincetown, then all the way back to Boston.

Now THAT'S ironic...considering that the WBZ directional
pattern is notorious for cutting out the Cape. A bit of
background: WBZ is directional, designed to look non-directional
from the inland side of things. The null to the east in
our pattern is there so we don't waste energy out over the
ocean (seems Arbitron doesn't distribute many diaries
out there ;-) Only problem is, it seems whoever designed
the pattern made the null a bit broad, so that it ends
up cutting out the Lower Cape somewhat.

>BTW, what's Fun 107 in New Bedford up to? Listened to them for
>a long time driving out I-195 from Providence.

CHR and more CHR. WFHN, and its sister AM WBSM, were part
of the bankruptcy of H & D Communications. Apparently, that's
being sorted out and the stations are about to go
under new ownership.

One more thing...WKPE (FM 104.7, AM 1170) in Orleans, MA (Cape
Cod market) has ditched oldies...and is in an interim
format now while they choose a new one. They inherited
the former PD from WMVY on Martha's Vineyard when she, uh,
left that job. (Rumor has it she became intensely unpopular
when she started cutting back on local programs and PSAs
and such...)

Here's the latest from the 55th market: Carlsbad, Escondido, Vista, Oceanside, and Carl's Diner on I-15:

Dawson out? KOGO's afternoon lineup includes San Diego legendary talkster, Dave Dawson, but since his return to the airwaves on KOGO, he hasn't exactly been the ratings booster sought. Dave maintains a home near Kansas City, Mo., is reportedly on his way out. An inside source at Par Broadcasting told me that "He's out!" To re-cap, Dave has: talked about anal intercourse in front of school children at the Del Mar Fair, given the impression he is a racist, and generally been a snob on the air. Promos for his show are still on, but two sources tell me that KOGO has ads for a talk show in various journals.

KOGO has the best day and night signal of all the AM stations in San Diego. [KOGO, 600, 5kw-U, DA-II N]
[The Escondido Times - Advocate was also used in this report]

KKOS [95.9, Carlsbad] will simulcast Mellissa Etheridge's "Unplugged" concert next Tuesday at 10 p.m. Pacific. Slated guests include the Boss, Bruce Springsteen.

No word of yet when the proposed frequency move to 95.7 for KKOS. An application was filed in January. Tri-Cities Broadcasting would like this to happen by summer.

The Mix keeps -- well, umm, see, it's "Mix 103!" No, it's "Rock Mix 103.7!" Naw, it's "Sunny Mix 103." What ever KJQY [103.7 FM] decides to call it self, other stations are jumping on the ad wagon:

KYXY [96.5] is the co-owned station, and has TV ads to move listeners from 103.7 to 96.5. KIFM [98.1] and KFMB-FM [100.7] have both bought ads to grab displaced fans of the former AC station. Biggest winner would probably be KYXY: co-owned, and promos on KJQY have said, "If you're missing Sunny 107, turn to KyXy 96!"

XETV Ch. 6 [Fox] and KFMB-FM [100.7] have teamed up on promos to tie in the "Fox Kids Countdown" that airs Sunday morning. Of course, KFMB-FM is part of the KFMB-AM and TV combo. The on air promos on KFMB-FM do not mention the call letters of Ch. 6; and likewise, the on air promos on XETV do not mention the call letters of KFMB-FM.

Last week I announced the special of the XETRA-AM line up! It's a hit; and the offer has been extended this week as well. For every San Diego Radio log request, your bonus is the XETRA-AM line up! Wow, be the first one on the block to own one! Hurry, this offer is subject to interstate trafficing laws.

I'd like to ask a question to you broadcasters out there. How did you get started on your way. I am a 19 year old male that has wanted to be a broadcaster for most of my life, my only problem is I dont know how to go about it. Do I go to college and get a degree in Broadcasting or do I attempt to get an entry level job at a Radio Station and work up. Or do I go to some sort of Broadcasting School, if so what do you think of the Broadcasting Institute of Maryland.

I got started by going to the fourth-ranked station in a three-station market when they were desperate for bodies. I also started working for a college radio station at about the same time. Don't go to a broadcasting school. Go to a real college, and don't major in broadcasting--major in political science, or history, or something that teaches you how the world works. Become a good writer. Learn your broadcasting at a part-time job or at the campus station. Start small and work your way up. It's very, very hard, but if this is what you really want, do it. The mechanics of this business are really pretty easy. The hard part is having the intelligence, creativity and knowledge to apply to the craft, and then finding some place to apply it. BTW, I'll celebrate (?) my 30th anniversary in radio this fall.

Richard,
GO TO COLLEGE! Get an education in something useful. A good
station can teach you the mechanics of broadcasting in a week. We can't
teach you to think.

Many colleges have internship arrangements with stations. Steer
clear of Broadcasting Schools. You can have a voice that would shatter
coffee mugs and they'll tell you you have a great future as an
announcer, so long as the check clears the bank.

Getting a job as a Disk Jockey is relatively easy. Once you've got
it, you'll need something interesting to say. That's where an education
can't be beat.

Good luck!

Dear Richard:

In my own limited experience in this biz (8 years - 5 on the air in the majors)
I have not yet me ONE broadcast school graduate...

Most of us have a bachelor's or part of one, and took a radio class somewhere along the line and then just sort of fell into it. By "falling in" I mean that we got an off-air job and managed to get on the eventually, or got on the air someplace small and kept moving up...

The only advice I would presume to give to you is to make sure you have some other skill with which to support yourself, because it's an erratic biz to say the least, and even people who are in it, are sometimes "out" and it's sometimes hard to get back IN!!!!!

Get a degree in a field unrelated to broadcasting, in order to provide you with a career fallback as well as some broadening of your knowledge, forget about broadcast school, and go for that minimum-wage weekend all-night board op shift. Maybe sneak in a few unauthorized on-air breaks once you get comfortable with the board, but otherwise be good and be stable and work your way up within the organization. Develop versatility, learn all the jobs in the radio station that you can, and if you feel lile they're using you, then use them right back--by building experience and contacts. Forget about market hopping--it's just an illusion that major markets are inherently superior to medium ones--but when you've learned all you can in that first station, go to a bigger, better station. Don't change jobs a lot, don't burn bridges, but at the same time, to thine own self be true. And finish that non-broadcast degree--funny stuff happens in this biz.
Good luck!

I have a few wonder bloopers on tape from the Monitor days at NBC. Will share if you're interested.

Is that the same Robert Beecham from Alexandria VA?!?

The first words I ever spoke into a mike were during a visit to the old Joy Boys Show on the original WRC -- probably in 68 or 69 or so. As a joke, Willard decided that I should intro David Rush, who was upstairs in a small radio news booth -- the Joy Boys, you may recall, were relegated to the NBC winecellar downstairs. At the appropriate time, the news beeper/sounder started and in a cracking, pubescent voice, I said, "And now from the NBC WRC newsroom, here's David Rush and the news".
An unseeing Rush paused for about a second or two and then remarked on how the air staff seemed to be getting younger every year!

Any other Joy Boys fans still around?? Write!!!!

From: lpbinc@aol.com
Message-ID: <3kddei$6ls@vixen.cso.uiuc.edu>
Source record: 33859

This is a general post and note that anyone interested in putting a college station above 1610kHz would do well to read. It has been noted on rec.radio.broadcasting that the college station in Johnstown, PA is operating with 75 watts at 1650kHz. I chatted with the FCC to confirm the statement that the "suits" would look the other way on this. NOT TRUE. BEWARE. Whomever is using these systems, you will face a minimum $8,000.00 fine and will have to shut down the station when the FCC arrives. Don't be surprised when they do - there are so few signals up there that you would be easy to find, even by accident.

The rules do not permit operation at that power level for anything. And, there are no Type-Accepted transmitters up there and the only ones that would qualify are the ones we make which *are* Part 73 Type Accepted. Whomever is selling these systems (and according to the post there are a couple of people) for $12000.00 is screwing anyone who buys it. According to my conversation with a member of the FCC Technical Rules Branch, the transmitters aren't approved and the broadcast is totally illegal.

Don't believe the hype. If it sounds to good to be true, get a written note that says the seller is liable for the FCC fines levied on any operation 1610-1710kHz. Carrier Current operation to 1700 is possible, but the FCC must approve the transmitter. AM Antenna operation is also possible under Part 15 (with a very tiny power level : 1 watt or less typically), but is also subject to transmitter approval by the FCC.

If you don't know or understand the rules, call the FCC. Don't belive me or any other sales guy. Call the FCC if you are not sure. A 50 cent phone call or a serious fine, easy choice.

I have many questions about many radio topics but the moderator here said I had to put all the unrelated questions into one message

I do a local computer radio talk show and need all sorts of help.
How do I sell the show? We have no sales staff. Right now I have to pay for the time myself.

How do I syndicate? How does sattelite work?

How do I sell ads for the syndicate? National companies aren't interested in advertising on local shows. But to syndicate I need National advertisers. If I get local advertisers then I preclude myself from going national.

I need to figure out how to get two phone calls on the air at once. Our phone system is routed through a "Telos" machine which, I think, converts the phone out put to high impedance input. I dont have several hundred dollars for a black box.
Any way I could have a guest call on a cellular line then feed his audio into the board? Should be easy but I dont know how. I rigged a speakerphone so I can tape interviews at my office. Can I take the earpiece output from the phone into the board directly?

Andy

Both KABC-790 talkshow host Ira Fistell, and his wife were charged Wednesday 3-17-95 with felony hit and run driving. Ira was involved in an accident in which a car hit his, killing one occupant of the other car and injuring another. Ira was not seriously hurt. The police have so far said that they believe the cause of the accident was excessive speed of the other car and was not Ira's fault. Ira called his wife after the accident. She arrived in a taxi. Ira left to go to the radio station and do his 11pm to 4am show before the police arrived. His wife initially told the police she was the driver because Ira's license was expired. She soon recanted that story, however. The Fistell family attorney says the couple first "panicked" but then calmed down and told the truth. Ira has not been back on the air since the accident. The station says they will decide his future next week.

Bill, you are being modest.

I want to jump up on my cyber soapbox and testify to the 99.999% of the folks out there who haven't experienced radio at its living best.

Folks, I am here to tell you that KPIG is nothing less than the Last Living Radio Station, and the best damn thing on any dial, anywhere. If you remember and long for the legendary days of KFAT, KSAN, KROQ, WNEW, WMMR, or any other station where the music was selected by the "hey you'll really dig this" system and the jocks had fun and the community was involved because the station was a real part of it, KPIG is your cup of pork.

Wallow in their Website and see if you taste the best mud that ever smeared a dial.

Since we're playing, "What ever happened to..."

What ever happened to Dr. Greg Chiwawa Martinez
the Mexican Radio Boy from 1090 XEPRS (1090 Express)?

He used to follow Don Diego in the late 70's. The
old 1090 Express lineup was:

4PM-7PM Rick (it'll blow your mind) Ward
7PM-10PM Don Diego (wanted in Canada)
10PM-2AM Dr. Greg C.M. (The Mexian Radio Boy)
2AM-4PM Mexican Radio in Espanol.

Special guest appearances by Beaver Cleaver and
others. Now that was RADIO!

You're absolutely right about the technology. Two years ago, my lover and I tried to start a gay radio network with very similar concepts to those you discuss.

Submissions would come in .wav files from field producers. The ultimate product would be assembled on computers and served to a transmitter equipped with an A/D converter.

There would be no "now", but "now" would be very close to real time. The real killer in network radio of the Monitor years was the vast number of people sitting waiting to be "on."

The technology is there. The audience is not. All the people who could make this happen on radio are in video, and the existence of this very vehicle (the internet as server for usenet) should tell us all that bandwith will make "radio with pictures" as accessible as radio without them.

I post on this newsgroup because I have a nostalgic appreciation for the way things were. But that is not the way they are now. Our audience wants to see, not just hear. They've grown up with seeing, they expect it, and we will soon have the bandwith to provide it.

I loved NBC monitor. I loved early Ford T-Birds. But I rented one for my 20 year high school reunion and found that a cheap contemporary midsized Mitusbishi drove 1000 times better, even with all its plastic parts and rounded corners.

We can't go back again. A voice in the night doesn't carry the baggage it did, because there are 300 channels of video alongside it now, and our audience has come to expect more, even when less may be better.

I have to echo Rich's comment. Depsite the proliferation of new technical goodies, there is still a cost in procurement and operation. Satellite time, though available, is a finite resource. Booking it on an as needed basis is not necessarily cheap. LEO technology will make satellites more affordable but is it all really needed?

Personnel is still one of the largest unappreciated expenses. It takes more than an announcer to put on a show of high quality. It can also take many hours to produce and package a five minute element. When you multiply out all the blocks needed to fill a day, costs rise astronomically. Personally, I think NPR does a great job with Morning Edition and All Things Considered. That's a heck of an effort on their part. Is there anyone from NPR that can comment on what it takes to get all of that together?

IM>I'm not sure why it would *have* to be incredibly expensive. Hasn't
IM>technology made such a production more affordable than previously possible
IM>(in Monitor's heyday) through enhancements such as ----

The technical aspects of a "Monitor" type show are very simple.

IM>Talent costs would seem to be a wash, in that you'd need an announcer, etc.
IM>in either case but I would think that the production costs would be less,
IM>and that so would distribution costs what with all the satellite
IM>distribution already in place and easily augmented if necessary.

Hardly "a wash" for a network show. Monitor was a labor-intensive show,
as are all magazine shows. It chews up material voraciously and requires
multiple sets of producing teams to feed it. The on-air talent required
to make it work would cost a couple million at today's rates. They'd
have to be nationally-recognized personalities ($$$$$).

IM>And I'm sure that there are less news departments and local production
IM>resources out there for gathering and contributing material (at least in
IM>the commercial radio world) which in effect might make obtaining a suitable
IM>amount of program material more costly.

Don't forget that Monitor had the facilities, staff and on-air talent of
the NBC Radio Network available to it. To reproduce that, today, would
be crushingly expensive. Don't forget, in the days of Monitor most major
market stations had large news staffs. WOR had nearly 50 people then.
Today we're down to 10 or so.

IM>I'm not sure people still want this kind of radio --- but that's
IM>another discussion.

Not necessarily. In fact, it's the most important part of the
discussion. My experience tells me they don't. Talk/Information/Full
Service radio lives on controversy. We're becoming less and less
interested in reasoned discussion and more interested in venting. The
highest ratings go to those who attract the greatest victims.

When we all produce programming using white male, conservative,
Republican, Clinton-bashing, superpatriot felons, and get good ratings
doing it, I see very little hope for a "kinder, gentler" magazine format
any time soon.

Mort was at WRC for a while in 1992-93, but got fired
early in 1993 from his midday show. The new PD, Pete Lau-
fer, couldn't stand him or his style. Mort's former producer
there told me he was a real sweetheart off air, but could be
absolutely inflammatory when the mike was live, and drove
the brass totally nuts (and to the phone with their lawyers)
on a daily basis. ('RC since changed PDs and brought Ollie
North aboard, so who knows, maybe they'll welcome Mort
back too...) Then he wound up operating out of Dallas'
KGBS/1190, which may have since changed formats and call
letters again...he was syndicated in a lot of markets while he
was there. Last I heard he was launching a new syndicated
TV effort and had at least some cable or indie TV carriage lined
up for a fall 1995 start...but you never know, he's been close
to launching a new TV show before only to have it fall through.
Meanwhile you see him doing bit parts and guest shots in TV
shows, made-for-TV and made-for-cable movies, etc., and NOT
playing himself or a close facsimile either. They usually cast
him as a semi-villian, either a crooked cop, mobster or semi-
corrupt politician or businessman; sometimes he gets to be a
second-banana good guy. He's actually pretty good as an actor
playing character parts and heavies, and he's getting fairly
frequent work, so maybe that's how he'll spend most of his time.
I remember that old TV show you worked with him on...I
know it got killed when potential sponsors got scared off after
the second year in syndication. But by TODAY'S standards, if
he brought it back just the way he did it then, it'd look fit for PBS
by comparison with what Limbaugh, Ricki Lake, Jenny Jones
and Jerry Springer are putting out. At least Downey was focused
on real issues instead of getting people to punch each other out
on stage after they'd slept with each other's sisters/mothers/
fathers/household pets...

Hi everybody,

I4m looking for the e-mail and/or postal adress
of UNISTAR RADIO NETWORK.
The only thing I know about this network is, that it4s located
somewhere in Cal.,USA.The toll free number is 1-800-827-7882 (,which is
not avaliable from outside the USA)

Unistar is also supplying AFRTS and the American Forces Network, Europe with
an 24h "album rock format" radio programm.

Maybe somebody could help me.

Thank4s in advance.

IT> Now the next interesting question for everyone in the business
IT>in the Northeast to chew on...Does this mean WABC sees its current
IT>incarnation about to run its course and plans for kinder, gentler
IT>talk? Or has Boyce just been waiting for a chance to cut loose and
IT>do things he knew he never could get away with in Detroit? Or will
IT>they fool us all, including the Post, and appoint someone else, like
IT>Cox or Hayes, whose styles are closer to what WABC is now? Stay
IT>tuned...

Bob,
My understanding is that the Boyce appointment is firm. WABC has many years left in its current incarnation and would be foolish to change it. In New York City hate works. To become "nice" would put them directly in the path of the "nicest" station on the air - WOR. They tried to beat us at our game once and failed. They've found their niche and it works, in spite of corporate's distaste for it.

My bet would have been Drew Hayes or Bobby Hatfield.

I expect no changes in WABC. I don't know Phil's abilities in hate radio, but I expect the momentum of the station is strong enough to allow him to get used to it. If they soften it, they'll lose.

I'm almost surprised they didn't grab J. Paul Emerson from KSFO for mornings. We have more illegal aliens in New York City than most states have. He could suggest that we shoot them here and most of WABC's audience would agree. Of course, here they shoot themselves.

Rich

Often wondered what happened too her also. Before she went to WLS, she
was on a station called "The Winner" (WYNR), was a Mclendon station and
the went after LS circa '59-'60. Never quite made it signal sucked(1390
5k straight up), changed to all news WNUS then swapped freqs with 1230
WVON and took the WVON calls.

Tom
(aka: T. Michael Jordan)

[Moderator's Note: Actually WNUS was bought by WVON (it was not a trade)
and adopted the calls. WVON was 1450, not 1230, and was, for a while, a
simulcast for classical WFMT. Now it is share-time between black-talk
WVON and ethnic WCEV (both use the same 1450 facilities). Dont
forget, also, that WNUS was beautiful music after the news format was
dropped and before WVON bought them. 1390 is now black oldies as WGCI-AM.
The signal is really quite good, it mainly heads north from their 87th
and Kedzie 4 tower site and is in glorious AM stereo. Bill]

Source record: 33885

Hi all:

The AIRWAVES web pages have been transformed in the past month into much more attractive pages since I was able to view the stuff with a graphical browser. I still don't have an 'on line' graphical browser since my local host has no SLIP/PPP access (that may change with a new provider making noises about coming to town) but I have MacWeb on my home Macintosh and I am able to download the pages, view them, edit them and view again until I am satisfied. No graphics or sounds (yet) but the layout is sweeter and much more organized.

We also are now linking to TONS more places and are adding more all the time. I encourage you to point your browsers to http://radio.aiss.uiuc.edu/~rrb/ and do some exploring. Just about every page has a mail link to me in case you have a bug report, a suggested URL to add, or some helpful advice. When you log on, look at the 'whats new' page for recent ads, but dont stop there, I only list stuff added recently, along with the date that the page was updated.

You can access the AIRWAVES archives via this page too. We hope to make AIRWAVES your one stop web shop for all media-related links. I know this is a never ending job, but it is well underway now, and with everyone's open eyes we can keep adding stuff till the cows come home. To submit a link, send it via email to web@airwaves.com . Include a brief paragraph describing the link.

Soon we will be offering the AIRWAVES RADIO JOURNAL in HTML format (in addition to the current text format) for those who wish the ease of use of HTML with the convenience of an email digest. We will, at that time, also place the past week's digests on the AIRWAVES page for easy web viewing. The emailed HTML version will be helpful for those without web access but who have (or can get) a browser on their personal machine. HTML will allow easy scanning and immediate access to any article in the journal rather than having to scroll through or use pager commands as you must do now. In the HTML version, you just click on the Table Of Contents entry and you immediately are at that article. Pretty cool, huh?

The FTP/Gopher site now has a directory called 'DE-COMPRESSION-UTILITIES'. In that directory are two small programs which will compress and decompress the Unix 'compress' format used to store the various files on our FTP site. One program works with the DOS platform and the other works with Macintosh. Now you will be able to decompress AIRWAVES files that you get via FTP. Gopher and web users need not worry about this because those platforms will decompress the files for you on the fly as you download or view them.

The FTP site is ftp://radio.aiss.uiuc.edu/misc/rec.radio.b-cast/
Gopher access: gopher://radio.aiss.uiuc.edu:7070/
Web URL: http://radio.aiss.uiuc.edu/~rrb/

Feel encouraged to poke around these archives. There are a lot of stored goodies there..... It is strongly suggested that you use web or gopher access if it is available.

We also now have an incoming directory for in-bound FTP. If you have something for us, place it in the INCOMING directory in FTP, then send email to let me know it is there.

n-joy

Bill

IA>How do I syndicate? How does sattelite work?

Andy,
Based on your message, you don't. You appear to have no broadcast
experience. That makes you ripe for plucking by the satellite
distributors. If you pay for the time, only they make money. They'll
want cash in advance.

I receive 5-6 calls like yours every day from people who want to be
on my network or want to know how to form their own. I'll give you my
standard response: take out your barbeque grill. Fill it with money. Buy
a steak. Light the money. The end result will be the same as
syndicating, with one exception - you'll have a great meal.

Satellite distribution is the worst/best thing to happen to
networking. The worst because it makes it so easy for anyone to form a
network. Just buy the time and "I are a Network." The best because it
makes it so easy for those with the infrastructure to make it work.

Ask yourself: who will affiliate the stations? Who will sell the
time? Who will handle the performance affidavits the advertisers will
require as proof the commercials aired? If this is a weekend show, how
will you make enough to survive on the limited inventory you'll have to
sell.

IA>How do I sell ads for the syndicate? National companies aren't interested
IA>in advertising on local shows. But to syndicate I need National
IA>advertisers. If I get local advertisers then I preclude myself from going
IA>national.

No advertiser will be interested until you have a large enough
audience to make the CPM attractive. National advertisers use ad
agencies. These are sharks that eat bumpkins for snacks. You'll need to
hire someone who knows their game and can package your show with
something else until it can stand on its own.

IA>I need to figure out how to get two phone calls on the air at once. Our
IA>phone system is routed through a "Telos" machine which, I think, converts
IA>the phone out put to high impedance input. I dont have several hundred
IA>dollars for a black box.

You'll need far more than "several hundred" to make this work.
Stations will want a broadcast quality show, not something produced in a

garage - or in your office.

IA>I rigged a speakerphone so I can tape interviews at my office.

See above. That's hardly broadcast quality. I hate to seem so negative, but you're getting into something where you're likely to lose your shirt. And ... we've not yet discussed your qualifications to run a computer show and make it compelling listening against the other computer shows by nationally known computer people (John Dvorak, for example).

Since I don't know you, I could be way off base in terms of your talent on the air and your computer expertise. However, from your message, it's clear you don't know the broadcast/network game. That's even more dangerous for you when you can't afford to lose a lot of money while you try and make it work.

Also, be very careful about "consultants" who offer to find you a network. All they do is find you a place to permanently park your money - usually in their bank accounts.

ID>As you know my name is Jamie K. I have in my hot little hands the FCC
ID>report for my area, we have 1 more allocation avalible to open a radio
ID>station! My quest is to find people who understand the music format that
ID>we want to put on the air. If you have an interest in radio, a way of
ID>helping us out financially, and drive to make money......

Jamie,
If anyone has a drive to make money, they'll steer clear of radio!

Any smart investor won't invest based on a "music format we want to put on the air." They'll invest if you can show them you've researched the market to be sure there's a market for the format.

If it's going to be the 15th version of AC in a glutted market, they won't invest. If it's some esoteric "alternative" format with a small potential audience, they won't invest because there won't be any profit potential and their investment will be flushed down the porcelain facility.

Just a suggestion: make sure your business plan emphasizes the research you've done to show there's a need (from a potential audience point of view) for the music you plan to play.

Also, I'd suggest that you use a more formal name in your search for backers. Handing money over to someone named DJ Jamie K isn't something that would inspire a good night's sleep for an investor. Sort of like buying a used car from "Honest Al."

Good luck!

<CCHRIS@cei.mhs.compuserve.com> wrote:

> Marvin tells me it's 755 feet, including the base insulator. I don't
> know the mathmatics, but that doesn't come out to 5/8 wave. The
> tower was installed in 1948.

The standard math for these things is to derive a quarter wave by dividing 234 by the frequency in MHz. So KFI's quarter wave would be 234/.64 = 365.625. And a half wave would be 731.25. Five eighths would be 914.0625 feet.

So it seems that the tower approximates a half wave.

Above 1/2 wave, the horizontal profile, as I recall (it's been years since I looked at this stuff), begins to extend toward the horizon (desirable) flattening to limit skywave radiation. But a second skyward lobe starts to form that becomes pronounced at 5/8. Generally, 5/8 is considered a good length by many engineers, because it maximizes ground wave efficiency; but it requires a lot more tower, especially at longer wavelengths like KFI's.

I used to listen to KFI almost every night, in the early 60's, on a transistor radio at my home the New York suburubs. At that distance, by the way, the angle of departure for skywave is very low: only a few degrees above the horizon, and that's for the double-skip required to traverse the 2800 miles from Los Angeles to New York. Quite a signal.

I always wondered what stood at the site before the current KFI tower. I have a reception report reply from the station, dated 1962, that shows two towers standing in a farm field with mountains in the distance. I suppose it was a rig like the old KPO system in San Francisco, which hoisted the radiator -- a fat wire -- to hang vertically from a midpoint between two towers. I imagine it was at the same location, because the KFI transmitter house appears (at least from the highway) to be quite old.

1881. KZON Phoenix goes online

Newsgroup: rec.radio.broadcasting
Date: 1995-03-18 23:07:47 UTC
From: transvox@interstate.net
Message-ID: <3kfp43$5pe@vixen.cso.uiuc.edu>
Source record: 33889

It's good to see more commercial radio stations who *really* are going online, and not just limping by with an e-mail address.

HOWEVER, the design of some of these pages leaves a LOT to be desired.

The most rude, inconsiderate, and just plain stupid thing to do is require a particular TYPE of browser to get information from your server.

If you are designing a heavily graphical page, make sure people with text-only browsers can get the same information as well. Many, many more people have access to the text-only browser lynx than they have to accounts that can run a graphical browser. Furthermore, pages with big graphic files are SLOW on SLIP or PPP links.

Regarding graphical browsers: it is especially rude, inconsiderate, and annoying to use the special features of one browser, namely Netscape, thereby excluding the users of OTHER graphical browsers.

Anyone who has viewed my Web pages can readily tell that I have tried very diligently not to leave anyone out. You could even have them e-mailed to you via the listerv@info.cern.ch and you would still get most of the information.

Don't think you can slip by with a link to download an evaluation copy of Netscape. I already have a graphical browser, thank you (AIR Mosaic), and I am NOT interested in another at the moment.

You are also excluding OS/2 users, who are going to be using Web Explorer.

If you are going to use Netscape-specific features, make sure people who do NOT have or WANT it have an alternative path into your information.

The KPIG page seems to work on AIR Mosaic despite some of the warnings. Still, again, it is NOT a good idea to embed that kind of dependency in your pages.

The KZON Phoenix web page does NOT work on AIR Mosaic. Memo to KZON--rewrite your pages to be accessible by ANY kind of browser.

THINK about your readers. You guys are in radio: you should know how to anticipate audience reaction, be it over the air or on a Web page!

Memo to WILD 108, Boston--Good, informative pages without a lot of graphical "chartjunk" (to borrow the Edward Tufte term).

1883. NAB Has Copywriting & Production Seminars

Newsgroup: rec.radio.broadcasting
Date: 1995-03-18 23:07:48 UTC
From: tford1010@aol.com
Message-ID: <3kfp44$5ph@vixen.cso.uiuc.edu>
Source record: 33891

The Sunday session (2-4pm) will take a close look at how to minimize listener tuneout during spot breaks. The logic being, holding 'em through the spot break means better ratings...which results in being able to charge more for air time...which increases the revenue to the station...and makes the station more profitable. Find out how to reinvent and improve your radio station's airsound.

The Monday session brings together a panel of radio production directors to talk about what works for them.

These session are "trial balloons". If the NAB sees that they work, there will be more in the future. They are being scheduled during the Spring show instead of the Fall radio show for two reasons.
1. When the PD is at the Fall show, the Production Director often has to stay home and take up the slack.
2. The Spring show has a lot more production gear to look at.

I have suggested to the NAB that production people would very much like a forum, but that due to the costs ($1200--$1500 airfare, hotel, registration, expenses) they may not get the attendence they expect on the first attempt because stations need to put an item of that size in the budget a year in advance.

I'd be interested to hear from anyone with any ideas on how to make this (and hopefully future radio production events) as successful as possible.

Thanks,

To All-

I am an Elementary Education major who worked at our college radio station
to add some diversity to his activities and ended up having alot of fun.
Now, I am trying to get my resume together and have a question about how I should
word my experiences at the radio station. Mind you, I am not looking for
a job in the broadcast industry, I just want to show that I had a life outside
the education department (If you know what I mean)!

Here are the two ways to word what I want to say:
-Served as Staff Announcer.
-Served as Staff Disk Jockey.

Which one would you use? Or would you use any of them? Any suggestions
are appreciated since I'm kinda stuck on this one!

Thank you,
Mike Hale

Radio station WABC is the first radio station in the nation to file papers against a Major League Baseball franchaise for loss of income over the use of replacement players. According to the local media, WABC is looking for a ten million dollar rebate. Similiar action is expected by the cable tv industry. As an interesting side note, the Yankees' 10 year deal with WABC will expire in 1996. WABC has failed to realize any real profit from carrying these games over the last 9 years. With the bean counters mentality taking hold in most corprorate board rooms, the Yankees may be looking for a new home in the future.

IJ>Most of us at WLS am/fm knew Drew was in the running, and we wanted him
IJ>to get it, but we held our breath and when he didn't there was a small
IJ>cheer went up around the building. He is much loved here! We're glad he'
IJ>staying put!

Jay,
WABC would have been foolish not to consider Drew and I expected he'd
be one of the candidates. It would have been a tremendous loss for WLS.
I strongly believe that both WLS-AM and WLS-FM will continue to grow in
the market. Ultimately, I think they'll dominate it.

It's always fun to talk to Drew, even though he doesn't take network
programming other than Limbaugh. I still call him to pick his brains
every once in a while. It would have been great to have him in New York,
but I think WLS needs him. I get the impression that he and Tom work
very well together.

From: JJB92@aol.com
Message-ID: <3kgk12$6q0@vixen.cso.uiuc.edu>
Source record: 33897

For sale: One radio station

WNUA-FM (95.5), Chicago's smooth jazz station is up for sale. Pyramid Communications, owner of NUA and 11 stations in four states has retained a brokerage firm to sell off its radio stations. NUA was formerly Chicago rocker WMET.

The spinning door of news/traffic reporters:

Mary Dixon has resigned as morning news anchor on progressive rocker WXRT. Mary will continue as a fill in reporter on WGN-TV. No replacement has been announced.

Dorothy Humphrey returns to the Kevin Matthews morning show on WLUP-FM. Dorothy, who had been at sports talker WSCR, will handle traffic and "other contributions". Cara Carriveau is the new news anchor on the show.

Kathy Voltmer, who had been doing news and traffic on Kev's show has landed at WCKG. Kathy will handle the news and traffic on the morning show with Patty Haze.

Personality/behind the scenes changes:

Dave Kaplan, early afternoon host on sports talk WMVP has signed on with WGN starting on April 1. Dave will be an anchor and sports reporter at GN.

Mary Green is leving WVAZ-FM (102.7) after 5 years as director of advertising/promotions. Mary is starting her own company.

Format/station changes:

WCBR-FM (92.7) has dropped its syndicated sports talk programming at night. The station will continue to air its alternative/progressive rock format. Greg Easterling and Robert English will handle the night shift.

The former WZZP (95.1) is now WVLI. The station, located in the far western suburbs, will feature oldies.

WKKD-AM (1580) has dropped its oldies format. The station now features "real country" from the satellite music network.

Broadcasting schools are a joke!!!! You either have the ability to sound good on the radio or don't. A diploma doesn't automatically mean you have talent.

Get a part-time job at a small station and work your way in there. I am not a believer in internships because you can't develop an on-air style by driving the station van.

However, do go to college to get something to fall back on in case your career dive bombs.

Source record: 33750

A couple more tips for using the DSE-7000.

What I do sometimes is copy a session, which leaves me free to change or experiment with a spot or promo. Since Undo also works on record, say you mix down and record to two of your tracks, you can undo, freeing up anything you recorded over and go to town re-creating a promo or spot, knowing you still have the original safe and sound in a another session.

I also keep music and sfx separate from the voice-overs. It makes script changes an easy task to accomplish.

If I want to read the copy to the music as I record, I lay down the music first and use my headphone cue-circuit and the input (black) faders of the DSE to help mix together playback of the music tracks with my voice input. It comes in handy for high energy reads and hitting music/sfx posts!

Punching in works great, too, as mentioned elsewhere, especially when you need you doctor a jingle donut from a package of various length sings. You can easily line up tracks and "move over" the vocals or instrumental parts you need to fill or expand a donut.

Hope they help!

Neither. I have written my own resumes both for jobs and for getting financial backing for my own projects in the past. So, while what I say might not be "by the book" it has worked for me.

Passive voice ("served as") tends to sound aloof. Also, forget what they told you about using lots of verbs. Today, the people who read resumes are looking for what you actually did, so nouns are in. Here's a Before and After example:

BEFORE:
Served as Staff Announcer at KZZZ, April 3, 1989 to May 7, 1993.

AFTER:
Staff Announcer at KZZZ 1989 to 1993.
I wrote ad copy for the Bay Area Ford Dealers Association, Red Cross, and Pet World. I did remotes from the National Livestock Exposition, Sports and Boat Show, and Kmart. I've used Sparta cart machines, Marti remote transmitter...

This is one school of resume writing. Another says to just list your goal at the top, then tick off your last 5 jobs, then list any highlights of your career which pertain to the job objective. Remember, though, that the best resume is one which is written for a specific job or kind of job. At present I have something like 7 or 8 resumes, 3 of which are for the same kind of job, but with different foci.

I just joined this group a couple days ago and have been fascinated by the content of its articles. My interest in radio dates back to the mid-fifties when I was a toddler learning to tune the old GE tabletop model.

The "where are they now?" messages I found herein prompted me to post one of my own. One of the first voices I remember hearing over the airwaves belonged to Tony Spossa (sp?), who at that time spun records and announced over WKTC in Charlotte. A neighbor of mine worked at the station, and she actually took me there at about age five and introduced me to the great man. I am sure that I spouted back some of his lines to him, just as my five-year-old son spouts mine back to me now. I still remember his saying to me that day, "Kid, I'm gonna bring you back down here some Sunday afternoon, and we're gonna sell houses." (Some of you veterans may remember the big way construction companies went in sponsoring Sunday afternoon broadcasts in those days). Anyway, subsequent to all of this I heard that Tony had bought a station in Danville, Virginia. From there I have lost track of him. Anyone knowing of his subsequent career can contact me privately or post to the list. It's great to be amongst you.

WAAF was served with eviction papers from its studios in Westboro, Mass. last week.

Located 45 minutes west of Boston, WAAF's huge signal covers much of the six state New England area except for extreme North
and south areas.

What happened to this big powerhouse of the 80's.

When I worked at WAAF in the 70's it was owned by George Gray. Later 70's it was sold to Dick Ferguson from Connecticut who
brought into Steve Marx to run it.

It became a very profitable entity (i should know as I was the top salesman there until I left in 1981).
Ferguson merged with Katz Broadcasting from NY but apparently that didn't work out to his satisfaction and he wound up
buying it back again from the Katz ESOP.

Then Ferguson apparently traded the station to Zappas (sp?) from Cleveland for a southern station in return.

What happened here. ????

WAAF now can't even sell spots in Worcester to which it is licensed.

Ratings are terrible and now they can't even pay the rent. Very sad.

The am station at 1440 didn't even register in a recent book although it has Imus in the am.

Who the hell is this Zappas and how do people like this get to control radio stations ?

John Gallagher/Boston (I've been out of the biz for over a decade but still have a lot of friends in the industry)

Today, radio seems to serve as a sideline to TV -- radio commentators get the sport or the political convention or the news story from TV then report on it. Programs are fed to TV with radio as an add-on.

During their off-moments more and more cable TV networks are grabbing radio hosts such as Howard Stern to simulcast their radio gigs on TV. The result of this is that they begin to play to the TV audience and forget the radio audience. There must be a reason for this -- maybe radio is on its way out?

> What's it like where you are?

It's a fight against an old way of thinking in my market. Lots of changes in frequencies, ownership, and power output. Many people are used to making a buy at a station because it was the one they listen to. Now the mind set has to be, that they make a buy because it's the one that everyone else is listening to. It's a growing area and my company is on the leading edge of bringing this market into the present way of doing business. Our SM just instigated a similar policy as your's where :60s are the same price as :30. As well, the price of a spot just went up 50-75%, depending on the client. Before they were buying a :30. Now they are paying more, but they're getting a :60. The greatest benefit of this to me , as the copywriter/production director, is that there's less work. I don't have to write as many commercials, and when I do write em, there much more creative. Something that works well for both of us... client and radio.

"I'm surprised they didn't grab J. Paul Emerson for mornings..."
I'm not. One thing I've noticed in a lot of markets is, hate
may draw a certain number of listeners (mostly downscale and
older white men who aren't exactly the ad agencies' prime
targets for a media buy). But does it sell ADVERTISING?
I can't hear Bob Grant every day as the days grow longer and
the 770 signal no longer takes an ionospheric bounce upstate
in the late afternoon, but when I have heard him, seemed to
me he wasn't getting the volume and quality of advertisers his
12+ ratings might justify. Folks in the Bay area say Emerson
had similar problems. This is a business. It depends on the
trust and goodwill of other businesses. If they think they're
going to get a negative (racist, extremist, etc.) image with the
public from advertising on a certain station, or if they find out
their target demo (women, upscale men 25-54) is turned off
by the programming, they'll keep their checkbooks closed
when the account exec comes around. Wonder how many
buys went to WINS, WCBS or to WOR just because
WABC's programming, or segments of it, was obnoxious either
to the client or the demographic he wants to reach? Downscale
middle aged and older white guys don't buy the new cars
and major appliances or take out the bank loans......They can't
and that's why they're angry and listen to WABC and stations
like it. It's also why advertisers may be a lot less likely to make
them a prime buy than the 12+ numbers lead you to expect.
So...it may be a business decision, and a good one, to
put a muzzle on guys like Grant.
Bob Smith, middays WXXI-AM 1370 Rochester NY

I can't remember the exact year, but 1990 is close. I worked for Gary Berkowitz as a utility/production part-timer from 1986 til 1989 when Gary left and hired me away as Production Director for Q95FM/WKQI, Detroit.

Jimmy Barrett, Gary's Assistant PD was the man running things before Phil Boyce came on board, from Denver. Bob Shuman (sp?) was News Director at WJR when Gary ran things (Mike Freedman succeeded Bob for a heart-beat). Rod Hansen preceeded Bob as News Director. Phil Boyce was new to Detroit as far as I know.

He inherited much of WJR's sound and has done a fine job maintaining high ratings with all the changes WJR went through (Ernie Harwell being fired, etc.) As those of us who've worked at big stations know...PDs at that level are more involved with the big picture (budgets, research, marketing) and pretty much let the stations staff run things as they have. Living here in Detroit, WJR billboard campaigns are more along the lines of a WABC, then what WJR has been known for. The "graffitti" boards come to mind along with the "Superstation" slogan.

Kevin Sanderson
Production Director, Q95FM/WKQI, Detroit

1919. Old WRKO jocks...follow-up

Hi all.

Recently, somebody requested an update on the WVIC-FM 94.9 East Lansing situation. Well, it's not a publicity stunt as someone thought a couple weeks ago. They ran jockless until a couple days ago when they all returned. Many of the old "95FM" DJs came back in similar time slots, with the noticeable exception of popular morning man Mark Maloney. People at the station when the flip to "WILD! country" occurred said that Mark would be back, but some guy going by the name "D.C." is doing the 6-9 shift. There isn't any morning show to speak of, other than Mr. D.C. announcing that there'll be 25 minutes of your wild country favorites after the next set of commercials. This is odd, especially if they're trying to appeal to younger females with country "dance mixes", contests and "fun."
As an aside, I have to comment on the "country dance mixes" thing. WVIC plays things like "Cotton-Eye Joe" by the Rednecks. This is a DANCE song, not a country song! 'VIC played this BEFORE they flipped to country. This seems a little odd to me--a country/dance station. It's like some station saying, "we're all heavy metal/easy listening all the time!" It just doesn't make a heck of a lot of sense to me. But, then again, I'm not a radio professional so that's expected...
By the way, all other country outlets in the market are still country. No one has flipped to CHR to fill the gap in the market.
Any more questions? Feel free to e-mail me and I'll try and answer 'em...

Why is it that some people judge the value of a commentator's perceptions and his/her performance in contrast to an "in-your-face" shouting match. Hey, to be heard, it is wise not to yell. Bill Moyers doing SIGNIFICANT commentary is the best thing to happen to commercial broadcasting since it started to judge success on the basis of AM jocks going cerebral, which I think is a contradiction in terms.

I'm going to take a stand here that some of you are not going to like. I did reports for Monitor and I also worked in news at KFRC, under RKO General, during the Drake days and just before when it was a jazz station. I am tired of hearing about the cost of quality program. The media has to take some responsibility for contributing to the demise of American common-sense judgement and so does the FCC. Some of the stuff permitted to occur on-the-air now came about because the Nixon-Reagan-Bush bunch did things which allowed large conglomerates to develop and small stations to die. During the time I was on-the-air we were not afraid to attack what was wrong and to applaud what was right. We would never have been able to get away with the excesses conducted on-the-air, which occur now. It is opportunism to the max. Don't talk to me about how much things, because management of hot stations are cleaning up while disseminating garbage. I know John Mainelli and I knew Norm Woodruff. I care a lot about John, and I cared a lot about Norm, personally. In business they were cold and hard and exploitive. I don't believe these qualities need to exist in a county that is virtually involved in a civil war of many factions. NBC Monitor was the greatest program of its time, and the only reason it is not on today is because somebody looked at their numbers and decided for the stations and for the public what was right.

I'm fed up, and you all will see me here a lot. I have paid my dues.

Ask your AP rep about the "Wire Browser" software! It's probably just what you're looking for -- the AP downloaded into a "capture" PC. You can search by a number of criteria -- Category (National Headlines, Sports, Weather); Headline (headline or substring); or text within story (find all stories with "Gingrich" in them). You can split the screen, using the lower half to write your stories from the AP copy displayed on other half of screen. You can highlight (block) only the text you need. You can archive, save to ASCII text file, etc...

Good luck!

: Dave, Kiss FM has not been HUGELY SUCCESSFUL here, they landed the
: number 2 recently but they've consistantly been down around 6 or 8. Not
: the top spot as you stated. They are the only game in town when it
: comes to TOP 40. Our discussion has centered around the quality
: of programming and actual sound quality.

I would have to agree with Dave,
Kiss sounds like an exciting hit driven station to me. Their jocks are
good, Kradick does well...

Kiss was ranked #1 12+ within the last couple
books. It was the first time in over 1,000,000 years a top 40 was #1 in
Dallas and not country (from R&R). I believe they are back around #2
or #3 in the last book or trend.

Maybe DJRon's tastes are closer to that of alternative leaning chr (which
Kiss is certainly not).

Do you like the Edge?

There are plenty of companies who specialize in broadcast finance, but not mortgagtes because you
cannot mortgage a broadcast license.

Also, most finance companies look at deals of $3-million and up. A small market exception is your local
bank with Small Business Administration guarantees. The catch to all of this is that nobody loans to
startups and other assorted low experience, high risk deals. For that, see a rich uncle.

I met Mort in 1982 at KFBK where he was just starting and I was about to start. He was one of the most gracious, and civilized people I have ever met in broadcasting, OFF-THE-AIR. I have no doubt that he was attempting to emulate Joe Pyne, who I never met, but have heard was also a much kinder, gentler creature off-the-air.

Anyone know what satellite is used most often by commerical radio stations in South and Central America for network programming? I'm told PanAmSat 1 and INTELSAT 325 & 335 give the best footprint of the region, but I would like to know which one the radio stations have their receive dishes pointed at. Also, are they using analog or digital systems in general there? Any advice would be appreciated! Email me at jeram@aol.com

Thanks,

Joe Ram

>of Public Broadcasting that I have heard in weeks..

Obviously, a non broadcaster...and someone who doesn't pay attention to most public stations nowadays as well. You don't think they don't gear their shows to where the money (the contributions they solicit) is? You bet they do. Our local AM-FM NPR affiliate used to run gavel-to-gavel coverage of the Iowa Legislature-but complaints from "members" ($$$$ from listeners) about interruptions of shows like "Fresh Aire" and "All Things Considered" put the brakes on that two years ago.

What many argue is that so-called "public" radio is no longer that-it is not reliant on taxpayer contributions, but rather on private contributions. This is really commercial radio and should be freed of government restrictions and contribution to persue that goal.

BTW-of course talk show hosts want callers in the demographics their advertisers are looking for. Callers in a talk show are the equivalent of songs in a music show-both are screened to make sure they appeal to the demographic the station is trying to reach. It's a reality of radio.
Of course, good callers of any age with topical information are always encouraged.

1933. Old WQSR folks...

Whatever will the Cope-A-Nuts do?
As of April, they won't be able to tune in Myron Cope's radio show and shoot the breeze over sports-related matters anymore.
WTAE-AM announced yesterday that the long-time host will cease doing his sports talk show and TV and radio commentaries.
Cope will continue to do all Steelers broadcasts. He'll also work on special projects at WTAE, including Steeler draft day coverage in April and summer training camp reports.
The host cited a wish to spend more time with his children and leisure activities for the decision. His last talk show broadcast will be April 4.
Cope's long-running nightly talk show started at WTAE in 1973. In '89, he scaled back to Mondays and Tuesdays.
WTAE-TV's Bill Hillgrove will take over Cope's slot, starting April 10.

WIXZ-AM (1360) in McKeesport has switched format It's now Prime Sports Radio 1360, a sports news and information format.
The station is affiliated with Prime Sports Radio of Dallas, Tex., a 24-hour sports radio network. The new lineup is a mix of syndicated and local programming. WIXZ previously played country music and carried a lot of sports programming, including auto racing, high school games and late night sports talk. The live racing and high school events will continue, along with ``Rappin' on Racing,'' WIXZ's locally produced auto racing talk show.
General manager Alan Serena said the change came about in part because the station had been moving more toward sports and away from music.
``We went from being a country station to a station that played country music,'' he said.
They've added Chet Coppock's sports talk show from Prime Sports, airing Sundays through Thursdays from 9 to 11 p.m.
It won't be all sports all the time, however. Some popular local programs, like the Sunday morning polka show and Saturday/Sunday night Pittsburgh oldies shows will continue, along with the Channel 11 News at 6 simulcast.

What's it feel like to go up against your own family in the competitive morning drive bloodbath? John Garry of WTAE's O'Brien and Garry, and son Mark Andrew, who's at WZPT-FM (The Point), are finding out.
Andrew, who usually does overnights, is filling in on the morning show this week. ``When I found out, I called him up and said, `You can kiss your 25- to 54-year-old demos goodbye,''' Andrew says. But it's a friendly sort of contest. ``Actually, he was excited about it.''

Dad's reaction?: ``It's a shame he can't get honest work.''
Andrew joined The Point when it switched to an all-'70s format last fall. Before that, he worked at WVTY-FM and WRRK-FM.
O'Brien and Garry hosted morning shows at WVTY and at WMXP-FM, which occupied the Point's frequency several format changes ago.

WYEP-FM's bluesmen Wrett Weatherspoon and Bumblebee Slim got some special recognition Saturday..
Pittsburgh Postmaster Anderson Hodges Jr. presented the blues show hosts and the station with commemorative plaques of the Postal Service's jazz and blues stamp series, which features portraits of Billie Holiday, Muddy Waters and Howlin' Wolf.
Anderson commended their work in preserving the blues and fostering an interest in the music locally. Weatherspoon hosts ``Big Town Blues'' and Bumblebee Slim hosts ``The Blues and Rhythm Show,'' which air Saturday nights on WYEP.

Pittsburgh Penguins defenseman Larry Murphy is the latest hockey player to hit the airwaves. Starting Monday, WAMO-FM will air a weekly report at 8:30 a.m., featuring Murphy and WAMO sports director Tony Girdano discussing NHL and Penguins developments.

WSHH-FM is diversifying its adult contemporary format a bit, with ``After Hours,'' a nightly program featuring new AC artists like Sade, David Sanborn, Anita Baker, Sadao Watanabe and Spyro Gyra. A mix of New Age sounds and mellow contemporary hits, it's designed as a relaxing backdrop for the evening.
QQ``After Hours'' airs nightly from 9 p.m. to midnight.

WLTJ-FM has a new nightly feature designed to create a romantic ambience. ``Pillow Talk'' features classic love songs, along with requests, letters, poetry and love stories. It airs weeknights from 9 p.m. to midnight.
Due to popular demand for that '70s decade, WLTJ has expanded its all-'70s programming on Sundays. It now airs from 9 a.m. to midnight.

Never ask a question like ``What would you do for front row Eagles tickets?'' Because you're bound to find out, and you don't want to know.
WXRB-FM (The Rebel) used the question as a hook to give away a pair of tickets the Eagles' March 10 show at the Civic Arena . Three people competed. One guy washed the Rebel van in his underwear. Two others mud wrestled in drag. Paul Hunter, of Hendersonville, won the wrestling match and the tickets.

We still do. A few years ago when I was at NYU we switched the radio station off the lone-printer setup to a Mac-based system that had all the bells and whistles Jesse was asking for. Now I'm at the AP itself (woo!)...this isn't my department, but I can certainly dig up the right contacts if anyone's interested.

An even easier move would just be calling your local AP bureau.

In a previous issue, Rob Olson, 93QFM, Milwaukee was responding to a previous post and said:

Broadcasting schools are a joke!!!! You either have the ability to sound good on the radio or don't. A diploma doesn't automatically mean you have talent.

(I agree on the fact that they're a joke.....but let met add that the "ability to sound good on the radio" is also very subjective. I've heard people who I think suck...yet they're VERY successful! Who am I to judge what sounds good? Only listeners inevitably make that decision.)

Get a part-time job at a small station and work your way in there. I am not a believer in internships because you can't develop an on-air style by driving the station van.

(Yes, but interns are generally afforded better opportunities over time which can lead to eventual on-air try-outs and positions. I've seen it time and time again. 90% of opportunity is being in the right place at the right time. I'd rather see someone being and intern than wasting money at Broadcasting school!)

However, do go to college to get something to fall back on in case your career dive bombs.

(Absolutely! There is no substitute for a well-rounded education.)

Pyramid is selling off *ALL* of its radio stations?? If I recall correctly, the duopolies of WYXR (Star104) and WJJZ (SmoothJazz106) in Philadelphia, and WXKS (Kiss108) and WJMN (Jam'n94.5) in Boston are all owned by Pyramid? Or are there two separate companies -- Pyramid Communications and Pyramid Broadcasting? I could be confusing things here..

Andy,

Aside from your syndication questions, which I would be happy to talk to you about, I'm puzzled by your "two lines at once" question. What model Telos unit are you using? Or do you answer the phone on an old-style keypad?

Sean,
KISS (KHKS) 106.1 is the only game in town (CHR). Closest to that
would be MIX 102.9 and you all know what MIX stations format.
KISS has shown well lately, but that still doesn't address their
repetition of tired/late songs like MARKY MARK VIBRATIONS (programing).
The ratings DO NOT reflect poor sound quality which drives me up the
wall and down the dial. Some of the songs that are heard by Dallas
listeners of KISS sound like a KMART cassette tape. This is the
number 8 market in the nation - why are we being fed low quality and
major repetition? I guess my point of all of this is that someone
on some frequency here could do much much much better! Dallas listeners
would eat up a 'KRBE' formated station - great mix.

RE: The EDGE - I'm very glad that we have the EDGE on the air in Dallas,
and have had the EDGE for many years. "Do I like the EDGE?" - yes.
What I don't like about the EDGE are the number of hard alternative
songs that are in rotation. For instance, you hear let's say, "Cotton
Eyed Joe" and then you get smashed between the ears with several
MTV hard edged tunes. I love EDGE club 94 w/Jeff Kaye on Saturday
nights - undoubtedly one of the best mix shows in the nation.
Many listeners in Dallas are constantly frustrated with poor reception
from the EDGE because of the Gainesville location of their transmitter.
Gainesville is approx. 60 miles north of downtown Dallas. We experience
severe multipath and stereo pilot error (switching on and off).
This happens in cars as well as home stereos. I finally got a fairly
good copy attaching a 110 mile range FM antenna to the ceiling in
my townhouse. Yes, I like the EDGE, but they aint perfect.

The Dallas radio market should be filled with good honest competition,
and quality. Instead (outside of country) there seems to be no

competition in CHR or Alternative. The other stations just let them do what they want which is often sloppy. Just watch how fast KISS would change if faced with some real competition. I know of many people that are so turned off by what's available on our dial, that they now only listen to CDs or tapes.

DJRON - from my ears to you on the NET!

Kevin, have you played with the time fit and pitch shift features yet? They sound great and are fast...

but I've been having the _most_ fun selecting individual words and phrases, and shrinking or stretching them to totally change the way the announcer read the copy.

Stretching just the client's name 10% or 15% won't hurt the total length of the spot significantly, but makes the name jump right at you.

If a syllable I want to change is less than the half-second minimum the DSE needs to do a flawless timechange, I just use a "fit-IN" function and cut out the excess.

Thanks to all those who let me know about the Dutch station 538 (both by e-mail and this newsgroup). Here's the definitive answer:

Radio 538 is still in business and is doing reasonably well (they are not losing money..),but they are no longer on Astra.

They're only available on a (digital?) transponder on Eutelsat II-F1 (13degr.East)
11.126 GHz, together with Radio 10 Gold, Sky Radio, Concert Radio, Love Radio, Radio Noordzee Nationaal, Radio 1 and Radio 5.
According to the German TELE Satellit magazine, they are using "RadioNet 250" system. I do not know what kind of equipment you'll need to receive this system.

I've been doing a science fiction interview show in Atlanta for a couple of years now. I'm considering pitching it to NPR, but I know nothing about how the process works. Can someone either direct me to a good reference (electronic or otherwise) or would someone be willing to answer some basic level questions? I'm just assuming that everything starts locally and works outward from there, and that one first pitches to a single station, which in turntries to get other stations to carry it. Is this even close?

Please e-mail me if you've got a few minutes to talk to me.

Mark,

I have to disagree with you. You almost offhandedly dismiss grabbing Netscape as an alternative to the teeth gnashing involved with browsers that don't support HTML 3.0 conventions (that's really what you're talking about).

Because the technology is evolving *so* rapidly, Netscape's popularity and increased feature set is actually setting the next series of standards for web browsers and HTML (and HTTP). I say, do what ever you want with your pages and make them as cool as you can, because as of today, over 57% of the people who do web browsing do it with some incarnation of Netscape. And that figure comes from the NCSA, who has a great deal of interest in making sure Mosaic stays as an alternative.

I, for one, hate blink. But I love the fact that I can design web pages with tables now. Your argument is very reminiscent of those who argued against the Macintosh because DOS was just fine, thank you; and who later railed against Windows for the very reasons you use.

Just one jerk's opinion, though. I dig your posts, Mark...I just think you're being parochial here.

General comments of public radio funding snipped...

Well, hello there. As the manager of the above mentioned public stations
for 25 years and the originator of the gavel-to-gavel legislative coverage
that the stations started back in 1967, I can tell you that you don't have a
clue as to what you're talking about.

We started the legislative coverage
because it appeared to be a good public service at the time. And it was.
At the time. At the time there *was* no NPR, APR (PRI) and so on and on.
So legislative coverage filled time and was a decent use of the medium. But
now, gavel-to-gavel coverage has to compete with all sorts of available
public radio alternative. As a useful service, as good radio, as a needed
service, *gavel-to-gavel* coverage...and opposed to other forms..simply had
had its
day and was not good public service in terms of *the alternatives available
to the stations.*

Whether we were wise or not to drop it (except in the
case of coverage of really critical legislation) is a legitimate subject for

argument. But the idea that the stations cut the coverage out of concern for underwriting or member dollars is total hogwash. The subject didn't come up in the many meetings held to deal with the matter. I was at all of them. I go on at
length about this because your post is not the first I've seen in this group that purports to tell the world the "inside story" of what did or didn't happen in organizations other than your own. And it's not the first story to be totally wrong. Can we all please try to refrain from writing authoratively on subjects about which we're in total ignorance? (Heck no. If we did, it just wouldn't be the net :=)

<<What many argue is that so-called "public" radio is no longer that-it is not reliant on taxpayer contributions, but rather on private contributions. This is really commercial radio and should be freed of government restrictions and contribution to persue that goal.>>

Huh? Private contributions coming from the public to a 60% level is not "public radio"??? WAMU-FM in DC just completed a spring fund drive with 12,000 calls and $840,000+---from the public that listens to it. Corporate (private underwriting) run a reported 10% with the University 10%, and the rest government and fund-raisers outside the on-the air stuff. THis is NOT the ratio enjoyed at smaller stations in smaller markets and I daresay Iowa is not without many that will fade away with the lack of government support.
BTW, could you forward Jan Mickelson's e-mail address? He doesn't seem to be on Compu$erve and I want to get in touch with him again. Thanks.

We live in a mountain community in Southern California (Big Bear Lake), and the county approved a permit for a 75 foot FM radio tower broadcast at 6000-12000 watts of power! The county did not consult anyone near the construction site, nor was a lot of surveying done. The radio tower site is around 350 feet from my front porch!!!!! There are MANY neighbors who live between 300 and 500 feet from this proposed tower, and we are starting a campaign to stop it! Unfortunately, even though the county admits to many mistakes, they said they will resume construction again soon (we had it stopped temporarily about a month ago). The fact that they don't care and say they will resume construction is completely outrageous!!!! We are getting legal help, but we are out of ammo and would like any comments that can be provided on here. We are all for a new radio station, but not in the middle of a residentially zoned area!!!!! There are empty lots no more than 20 feet from the construction area (unbuilt residential lots). I APPEAL for ANYONE's assistance that may be able to help us find a way to STOP this construction and at least have it moved away from our quiet residential area. ANY help will be GREATLY appreciated on here.

Signed.

Your comment isn't the first. I'm reworking the main menu to make it more
friendly. The OS/2 Web Explorer can handle it. Lynx can't. I don't own
AirMosaic so I wouldn't know.

I put the Netscape evaluation link in as a stopgap until I could finish the
rewrites.

>THINK about your readers. You guys are in radio: you should know how to
>anticipate audience reaction, be it over the air or on a Web page!

I went on the advice of my ISP. Oh yeah... that's right... we in radio know
everything and don't need to ask experts. Which is why radio people never do
research to anticipate audience reaction. :)

Honestly, AirMosaic compatibility doesn't concern me as much as Prodigy
compatibility does. I have a hunch that more of our audience uses the
commercial online services than ISP's.

Since my marketing director can't get the P* browser to download at her home,
I haven't had a chance to try it out.

If anyone has the P* browser, I'd appreciate a constructive evaluation via
e-mail.

Thanks.

From: transvox@interstate.net
Message-ID: <3klho2$fhv@vixen.cso.uiuc.edu>
Source record: 33824

Written March 20, 1995

Aside from the KKCJ change to an interim polka
format, there have been other developments over the past few weeks.

FORMAT CHANGE INDICATES NEW TOPEKA DUOPOLY

Former album rocker KDVV(FM) changed format last week to classic rock.
One source indicated this would occur when KMAJ-AM/FM closed on its
purchase of KDVV and KTOP(AM), forming Topeka's first full duopoly.

The thinking behind the change: a classic rock format on KDVV is a
better complement to the "hot" adult contemporary format on KMAJ.

KMAJ's purchase of KDVV and KTOP was announced last August, after a felony
conviction of one of the KDVV/KTOP owners forced a sale. KDVV and KMAJ-FM
both have 100,000-watt signals that are marginally receivable in the Kansas
City metropolitan area.

KZTO TO MOVE TOWER IN HOPES OF A BETTER KC SIGNAL

The prospective owner of now-silent KZTO(FM), nominally based in
Lawrence, Kansas, has revealed plans to move the station's transmitter site.

An item in the gossip column in the Kansas City Star on March
18 quoted buyer Frank Copsidas as saying, "this station's going to cover
the market, period" from a new tower site near Bonner Springs, Kansas.

Before it went off the air last year, KZTO's signal was nearly impossible to
receive on the Missouri side of the metropolitan area because of interference
on the station's 95.7 mHz frequency from transmitters located near
Kansas City's urban core. The present KZTO site is just southeast of Lawrence.

Copsidas is also the owner of KTOZ-FM in the Springfield, Mo. market.
KTOZ programs a contemporary-hit-formatted modern rock format called
"Channel Z." Copsidas told the newspaper he contemplates the same format
for KZTO. The projected air date is described by the newspaper as
"late this summer."

The station will face competition from modern-rock KLZR(FM) in Lawrence
and modern-hit KISF(FM), rimshotting the Kansas City market from a
transmitter site near Odessa, Missouri.

FORMER WHB PERSONALITY SURFACES IN TOPEKA

Louie Louie, whose long-running Saturday night oldies show was displaced
when Kansas City's WHB(AM) switched to a farm and country format
in August of 1993, is now manager of new oldies station KQTP(FM).

Louie tried to keep his oldies show going after WHB abandoned its rock-and-roll heritage and began simulcasting farm-oriented stations KAOL(AM) and KMZU(FM) from Carrolton, Missouri. However, the Louie Louie show only lasted one week.

Louie is also the morning personality and does frequent remote broadcasts for the station. It has been reported that the station is being leased by Topeka country station KTPK(FM), but I have not been able to confirm the LMA. The station went on the air in December, and is automated most of the time.

KIDS' RADIO GETS NEW CALL LETTERS

The Kansas City market's Radio AAHS affiliate has new call letters. The former KBEA(AM) is now known as KCAZ. Interestingly, the station does not call itself "KC AAHS" on the air, although the call letters certainly suggest such a slogan.

KCAZ, at 1480, has an adequate daytime signal but a marginal nighttime signal over the sprawling Kansas City market.

KCAZ owner Robert Ingram leased the former nostalgia station to the Children's Radio Network November 1 of last year. Ingram continues to own and operate classical station KXTR(FM).

According to the M Street Journal, the KCAZ call letters went into effect March 1.

1967. KKCJ polkas end KC promo torture

Newsgroup: rec.radio.broadcasting
Date: 1995-03-21 03:38:43 UTC
From: transvox@interstate.net
Message-ID: <3klho3$fi0@vixen.cso.uiuc.edu>
Source record: 33825

Written March 20, 1995

After six days, it finally happened.

In an apparent attempt to conduct psychological torture on listeners in the Kansas City market, KKCJ(FM) played the same alternating 15-minute promos for KFKF(FM) and KBEQ-FM. Over and over again. And again. And AGAIN.

There was a mysterious interruption at noon March 14. KKCJ began playing country music again. After an hour, like a badly digested lunch, the promos came back again. This time though, the promo for KFKF did not say that KKCJ "was going off the air." Instead, it said the station had been sold and another format was coming to the 106.5 frequency.

At 7 o'clock Sunday morning there was another break in the torture: two public affairs programs for "Hot Country CJ 106," the latter of which concerned finding homes for abandoned horses and branding them to make sure they didn't end up in some dog food somewhere.

Someone should have branded KKCJ while they were at it. It was beginning to sound like the dog's lunch.

But at 8 o'clock, it started up again. And again. And again.
So explain to me how this served "the public interest, convenience, and necessity" that provides the legal basis for the existence of radio stations in the United States.

At six o'clock Monday morning, the cycle was ready to begin again.
"Hi, this is Mark McKay from 94 FM KFKF. I know what you're thinking, 'Whoa!'" SNIP!

There followed the most welcome 98 seconds of dead air I ever have heard.

Then the station picked up the middle of a polka. At the end, the legal ID said, "Kansas City's Best Polkas -- 106.5 KKCJ, Liberty-Kansas City," and it's been non-stop polkas ever since. As promised last week, KKCJ's new LMA partner KCFX(FM) put an interim format on the 106.5 frequency that had been controlled by KFKF for more than three years, until a new LMA with KBEQ-FM left KKCJ up for sale by an owner that didn't want to operate it.

Other liners include "Kansas City Polkas to 106.5 KKCJ," and "The Best Polkas of the 60s, 70s, and 80s on 106.5 KKCJ."

Such a prolonged stunt is rare in Kansas City. The last one occurred in 1993, when the former KXXR(FM) at 107.3 flipped its call letters

to KISF(FM) at 3 pm February 5, and drove the point home by playing
"Kiss" by The ASCII-Free Artist Formerly Known As Prince for 24
continuous hours.

Last week, KCFX, which is buying KKCJ, said it would be May before a
more permanent format would be installed at the station.
A country format is ruled out by the terms of the KKCJ sale.

>happen in organizations other than your own. And it's not the first story to
>be totally wrong. Can we all please try to refrain from writing authoratively
>on subjects about which we're in total ignorance? (Heck no. If we did, it
>just wouldn't be the net :=)

Gee, I still remember long, detailed conversations with Cecil Hickman about the resistance from management to legislative coverage BECAUSE of the funding problem; debate coverage interrupted shows which receive large amounts of pledges and/or underwriters and he was concerned about that. (Cecil is the former news director at WOI, for those of you outside this inside conversation)

I won't say anything more...but the information I posted is based upon conversations I have had with your station's employees in the past...so if they were lying to me, I apologize...but I don't believe they

were. We all know that radio is an expensive enterprise-public or private-and to deny that funding (or commercial sponsorship in the case of my station) plays a part in programming decisions is disingenous. I know it makes a difference in what programs are aired on WHO (those which cannot sustain sponsors don't last-and those with heavy sponsorships are rarely interrupted). That's my dose of net.honesty.

IG>Obviously, a non broadcaster...and someone who doesn't pay attention to most
IG>public stations nowadays as well. You don't think they don't gear their sho
IG>to where the money (the contributions they solicit) is? You bet they do.
IG>Our local AM-FM NPR affiliate used to run gavel-to-gavel coverage of the Iow
IG>Legislature-but complaints from "members" ($$$$ from listeners) about
IG>interruptions of shows like "Fresh Aire" and "All Things Considered" put the
IG>brakes on that two years ago.

Perhaps I'm being picky here, but I always find it funny to see someone claim not to know, or care, about something, then launch into a declaration of "truth" about it.

There is nothing more stultifyingly boring than listening to "gavel-to-gavel" coverage of our public fools in action, except maybe watching it on the tube. I'll bet even those "poor folk" who've never contributed a dime to NPR also complained that a great show like "All Things Considered" was preempted for some political pooling of ignorance.

Frankly, I find that putting a camera or microphone in front of a politician drains all intelligence (an oxymoron, probably) from him. Let them ply their trade in secret (since they'll ignore us anyway) rather than traumatize the children and frighten the horses.

IG>BTW-of course talk show hosts want callers in the demographics their
IG>advertisers are looking for.

T'aint necessarily so. We want callers that are compelling. I'll take an interesting older caller over an illiterate teenager any day. Our advertisers are looking for active consumers. Unless a teen is a drug dealer, he can't afford a Cadillac or a Beamer.

Don't know about KXXX (sic), but KIRO's probably got a leg to stand on. They've already cancelled several TV games from Spring training, and I would guess they're considering bagging a lot of Spring Training radio games.

Since Belo recently bought KIRO, things could get very interesting. I'm just guessing Belo has a healthy legal fund, and the thought of losing substantial ad revenue probably doesn't appeal to them.

Then again, I'm one of those fans who feels like suing the Mariners.

Previously, Sean Caldwell <caldwe33@futures.wharton.upenn.edu> stated:
[...about a new Lansing Mich CHR...]
>WILS (currently country--not well rated) will flip to CHR.
>See if it happens tomorrow.

Well, as Sean said, WILS will (should) flip to CHR at 1:00pm this after-
noon, Monday 3/20. A source said told me of the 1pm switch time. I have no
idea of what kind of CHR WILS will program (mainstream, CHUrban, CHR/Dance,
CHR/Hot AC, etc...). I'll send along a quick update later on after any
switch takes place. Bad part about this is that WVIC is 50kw on a 500' tower,
while WILS is only 2kw on a 300'ish tower. Not as good coverage, but beggars
can't be choosers, can they?

:
: Grant

Out here in Seattle we had lots of fun with XEROK and *two* 10 kw Canadians in BC (Langley and Penticton). Plus, we had a local daytimer, owned by Tom Read. Read became very active in the Daytime Broadcasters Association, lobbying for extended or full time hours. Read's only problem was he was a brick shy. He'd go on tirades against KGO, claiming it was "that station in San Francisco" that required him to sign off at sunset. I still have a letter in my file from about 1980 where Read rails about KGO, blaming them for all his ills. Yeah, I wrote him back, reminding him that 800 was a Canadian/Mexican clear channel.

Read finally managed to exact revenge of sorts against KGO. He sold the Seattle facility (now on 820) and bought an outlet in Ephrata, WA (Eastern Washington). Then he moved it to 810. And guess what...it's still a daytimer, while his old 820 in Seattle is a full time outlet. Go figure.

Jay, I've used the time fit a couple times...the first time was
awesome...shaved off 3 seconds from a v-o track and it sounded great.
The second time, I wasn't so lucky...seemed to get more glitches
toward the end of the 60, though it did compress the time perfectly.
It was strange because I was using less of an adjustment than the first
time...only thing I can figure was maybe the use of different voices.

Haven't tried the vari or pitch yet. Too busy trying to get all my other
work done but I look forward to giving it a go!

Pete Laufer may well go down in history for being the guy who told Morton Downey Jr. to "zip it!" And Mort may have gone through changes as a result. I'm told by those who've seen his latest work, that he's a lot kinder and gentler...although when you come to think of it, Mort at his worst was never as mean-spirited, strident, trashy or trivial as the worst of Limbaugh, Jenny Jones or Ricki Lake. He may have been sensational, but I never remember a show that WASN'T about a serious issue.

Pete was at 'RC for about a year in 1993-94. I did a little fill-in work for him there while he was PD/OM. He had a spat with management, and I guess with Greater Media corporate brass as well, over staffing, philosophy, and mostly cutbacks in local programming. The upshot of that; BOTH Laufer and GM Dick Rakovan ended up turfed, and ANOTHER new management team ended up in place (the one that decided Ollie North, the religious right's favorite felon, ought to be their afternoon man).

Pete sued Greater Media in a case still inching its way through the courts, a legal battle about which I know very little and understand less. Last I heard from him a couple of months ago, he was finishing up his book on talk radio past and present. I'm looking forward to reading it. In fact, he even asked me for an 8x10 glossy to include in the book...God only knows why he wants my face on those pages. (If you see me occasionally on The Rhat Pack on National Empowerment Television, where I play token Democrat, you'll see why I say I have a face for radio.)

I don't know if or when Pete will be back in radio or TV, but he's got plenty left to contribute, so hopefully he'll be back on the air in some role after he's gotten the writing bug fully out of his system.

>American common-sense judgement and so does the FCC.

Good 'un, Ed. You can keep raising hell for my money. I guess yours is one of the few voices left that pipe up on the side of common sense as opposed to controversy for its own sake.

I have learned about the palmy days of broadcast journalism largely after the fact, through listening to and reading about Murrow and his ilk. He might have been the most famous of his generation, but he voiced what a lot of conscientious broadcasters, people of monumental integrity, felt: that entertainment was eating away at the fabric of the institution they had created.

My work is not in radio. Perhaps I can (and will) be accused of not having an ass to hang out in the wind by those who get paid to make the decisions that are so eloquently called into question by messages like Ed's. But I am still of the old school that believes that, due to the limited amount of frequencies out there on the airwaves, broadcasters have an obligation to consider more than the public taste (if that is what you call it) of the moment.

IT>station. I am tired of hearing about the cost of quality program.

Ed,
... and I'm tired of having to pay for quality programs. When the cost of talent is $250,000 and up, per person, I'm going to think twice about the risk involved in "quality" programming that won't return its investment. I loved Monitor and have lamented it's demise. My company's owner worked the show. Today, it would be prohibitively expensive.

IT>media has to take some responsibility for contributing to the demise of
IT>American common-sense judgement and so does the FCC. Some of the stuff
IT>permitted to occur on-the-air now came about because the
IT>Nixon-Reagan-Bush bunch did things which allowed large conglomerates to
IT>develop and small stations to die.

You ain't seen nothin', yet. The "new Majority party" has plans to let conglomerates rule. The Nixon-Reagan-Bush bunch will seem like flaming Liberals compared to them. At least with government the citizenry has a modicum of control through elections. We have absolutely no control over conglomerates.

IT>to me about how much things, because management of hot stations are
IT>cleaning up while disseminating garbage. I know John Mainelli and I
IT>knew Norm Woodruff. I care a lot about John, and I cared a lot about
IT>Norm, personally. In business they were cold and hard and exploitive.

I also know John and knew Norm. While I find WABC's programming incredibly hateful, I can't blame John for following the market. His job was to get ratings, nothing more. He did it. It appears there's a market for the product. If listeners wanted "quality" programming they wouldn't listen to anything else and nothing else would survive. WABC would have failed. It didn't and the audience got what it wanted - what it deserved.

IT>virtually involved in a civil war of many factions. NBC Monitor was the
IT>greatest program of its time, and the only reason it is not on today is
IT>because somebody looked at their numbers and decided for the stations
IT>and for the public what was right.

It's a bit more complicated than that. Individual affiliates decided for themselves and stopped carrying the show. At that point, NBC had to decide if it was viable. They decided it wasn't. This was well before the present day "in-your-face" talk radio. We went through a period where Program Directors felt bad local programming was better than great network programming. While I disagree with Rush Limbaugh's "make the government make everybody moral" approach to politics I credit him for

legitimizing network radio, again.

IT> you all will see me here a lot. I have paid my dues.

Great! I'll look forward to it.

>> and only daytime coverage that you can't even get decent music from the
>> PAST here.

A note of clarification...I think the poster means KDMM (the former KVIL-AM) at 1150 with the poor signal. It's got a kilowatt running through a 6-tower array with the major lobe toward the east (from a westside xmtr, of course). KDMM operates with very limited power after sunset (I _think_ it is on the magnitude of 20 watts, give or take 0x0F).

OTHO, KLIF at 570 has a _great_ signal with 5 kW day and night with a superbly located site in the middle of the metro. (I didn't want any readers to think that this legendary station had signal problems -- and, no, I don't work for Susquehanna).

Finally -- this area should have a brand new MOYL-ish outlet within days or weeks as what was essentially KAAM (now KTCK at 1310) is reborn at 620 kHz with 5 kW. (This ought to be a monster in this market with that frequency and power -- and from what I can determine -- a very good transmitter location, too). We are getting this facility in D/FW by virtue of moving the former KWFT from Wichita Falls to Plano (a Dallas suburb). [BTW -- this marks the second time that the Dallas area has acquired a Wichita Falls frequency -- the other being KGKO back in the 30's -- which was part of the famous time share of WBAP/WFAA. That KGKO frequency was 570 -- now occupied by the aforementioned KLIF. KLIF's move from 1190 to 570 is a topic for another time...].

I can't confirm his presense on the air, but I can say that KJR is sports talk. It's KJR-AM, though. KJR-Fm is a 70s gold format; a tribute to the hay-day of KJR-AM when it had 10 shares in the market with t-40 format.... back in the 70s.

Like the moderator, I wonder what is the real problem?
I find it hard to belive that a 75 foot tower could be erected
without the necessary permits and environmental impact statements
but that's a local problem. The FCC mandates that the area
around the main lobes WILL NOT be in an area exposed to people
without doing all kinds of shielding, putting signs up and the
like. 6-12KW of power is also a lot to put on such a short tower.
If there in fact building lots right next to the property they
might have been bought by the builder, if he doesn't want to
risk the tower falling on someone.

My comments alone and with no regard for the political implications...

In an excellent Airwaves Journal #1201 the following appeared:

>We live in a mountain community in Southern California (Big Bear Lake), and
>the county approved a permit for a 75 foot FM radio tower broadcast at
<6000-12000 watts of power!

There was a similar move in Vista, California, for a proposed LPTV.
The stick, proposed at less than 100 feet, worried the propety owners
because of:

*gangs trying to tag the antenna [tag=spray paint]
*an antenna would devalue property
*suspected RF radiation would cause cancer!

This was debated in city halls for over two months, and the proposed
LPTV never got off the ground. :-(

Californians take a different view of commerce, free trade and new
business. [The city of Oceanside put it to the voters for a new
Wal*Mart; and Carlsbad had to vote on a new theme park, LegoLand!
Both passed, but did the fur fly.]

I'm not in southwest Kansas anymore!

It's seems the only thing that he's concerned about it the view outside his front porch. I'd hate to say it, but the tower's got to go somewhere. And if he was inovative enough, maybe he could pick up a couple bucks by offering to be the emergency guy at the tower sight. My station's tower sight doesn't have anyone on-sight to fix things as they go hey-wire. the engineerr has to climb the damn mountain everytime. Lots of good exercise though. :-)

>6000-12000 watts of power! The county did not consult anyone near the
>construction site, nor was a lot of surveying done. The radio tower site is
>around 350 feet from my front porch!!!!!

You put exclamation marks at the end as if this is something shocking or eye-opening. As FM transmitter sites go, that is pretty low power and not much to be lathered about. Do county ordinances require that neighbors be consulted before such permits are issued? If so, and they were not, it would seem an open and shut case. Otherwise, you don't have much of an actionable case--as far as the county is concerned.

>There are MANY neighbors who live
>between 300 and 500 feet from this proposed tower, and we are starting a
>campaign to stop it!

I suppose that it is a minor inconvenience to have RF appear in the usually shoddily-shielded consumer gear. But the station itself will be obligated to handle those problems to your satisfaction when it is put on the air. To get a license, the radiation levels in any are where life is present must meet the new ANSI specifications, so that is not much of a concern. (IMHO, unless you are actually experiencing RF burns, the radiation isn't hurting you anyway.) So I am somewhat at a loss to understand why this is such a disaster for you.

>We are getting
>legal help, but we are out of ammo and would like any comments that can be
>provided on here.

I don't think you have a leg to stand on. The station will be required to deal with any blanketing problems and it will have to certify that radiation is within accepted levels. Maybe you can convince a court that the aesthetics of the tower are offensive, but don't count on it.

>We are all for a new radio station, but not in the middle
>of a residentially zoned area!!!!!

Many FM transmitters are in "residential" areas--some are very ritzy areas at that. I service two such sites that happen to be right next to homes in the $1 meg plus category. A transmitter in a residential area is hardly going to raise any eyebrows.

>There are empty lots no more than 20 feet
>from the construction area (unbuilt residential lots).

Empty lots are of absolutely no concern. They are empty. Who cares how close they are?

>I APPEAL for ANYONE's
>assistance that may be able to help us find a way to STOP this construction
>and at least have it moved away from our quiet residential area.

Transmitters are not noisy. It will not raise the noise level in your "quiet residential area". The possible exception would be if they use a standby generator, but that would only be a problem when your power goes off. Then you will have other things to worry about.

It would appear that you don't have much of a case. I am hardpressed to understand why you are so upset about this.

>Edgerton Tract Homeowners

As I mentioned, I maintain transmitters in two of the most expensive areas in the San Franscisco Bay Area. If these people can live with an FM transmitter, you can probably find a way, too.

Not to make light of a bad situation, but from a practical standpoint, I assume WAAF will either LMA or JSA with another local station for studio space, or, failing that, will trade a trailer and a Port-a-Potty and set up temporary digs at the transmitter site. (Don't laugh: I once worked for a CHR in NW Pennsylvania that consisted of a trailer on top of a mountain with a Port-a-John across the parking lot. No heat (except what was given off by the transmitter), no running water, no paved roads, and the nearest town was 9 miles "down the mountain".)

Rich,
What do you mean by "hate" radio? Sounds like sour grapes to me. If you mean radio where the talk show host fights with the callers I call that entertainment. If people wanted otherwise NPR's style of talk would be king of the hill. There are those of us in radio who think that what you do, and you and I have been over this before, is boring. To each their own and let the ARB choose each time around. Don't get carried away because your with WOR INC. I know just as many people who laugh at the Dolans as hate Bob Grant or Rush.

Just speculating (and gleaning nuggets from the trade papers);
but could the real impetus for this, be to bust a rights deal which
was never really profitable? A lot of stations have found that
play-by-play rights aren't the cume and AQH builder they used
to be, and this may be more true of baseball than any other
sport.
WABC, according to the NY Post, was disappointed with the
yield of its Yankee deal even before the strike. Now, with the so-
called "major league" teams fielding squads that probably are
somewhat below short-season A-ball in quality, and inferior to a
lot of the best college teams, they know they'll draw an even
sparser audience and sell fewer spots at lower prices. It's a loser.
And they are close enough to team management to know these
guys are willing to ride the sport into the ground rather than let the
union come away with even a shred of dignity. So you are looking
at a seriously damaged product for 1995, 1996 and beyond. Who
can blame WABC and other stations for not wanting to put their
prestige and their money behind it? It's possible that unless the
strike is settled quickly, August 11, 1994 may end up being re-
corded as the date of the last major league baseball broadcast
for many years to come...

Talk1370@aol.com (Bob Smith) recently wrote about how hate-oriented talk radio primarily attracts angry, downscale white men, who are not the targets of most advertising buys...

As much as I hate to admit it, our data shows that the opposite is true of Bob Grant's audience on WABC. Overall, we reported in our Fall 1994 report that WABC was the number 5 station on weekday afternoons, with a 4.6 share of core listeners. With people living in households with annual incomes over $50,000, however, Grant moved up to number 4 with a 5.7 share. He was even stronger with people in $100,000-plus income households, where he remained number 4 and his share increased to a 6.3.

We report a similar trend in the occupational and educational categories we measure.

>Oh yeah, look at the miracles the Redskins worked for WTEM.....

WTEM's problems have nothing to do with the Redskins. WTEM was failing
WITH Redskins' football and they'll do even worse without it. The reason
is simple: You don't turn to WTEM when you want sports. You turn there
when you want to hear guys TALKING about sports.

It continues to amaze me: I will turn on the radio on a Saturday
afternoon: I can find Maryland, Navy, AU, Geo. Mason and
game-of-the-week-type games on 3 and 4 other stations on AM. What do I
get on WTEM? Guys TALKING about sports and an occasional update on games
I could be LISTENING TO on other stations. Who wants that? No one
apparently. Otherwise WTEM would have some numbers.

Here are more details on the death of Charlie Minor based on the LA Times article of 3/20, it was written by Hugo Martin a Times Staff Writer.

Colorful Record Promoter Fatally Shot

Music Industry exec Charles Minor is found dead at his Malibu home after a quarrel with his ex-girlfriend, who is being held.

One of the music industry's more colorful executives was shot to death Sunday at his Malibu home, and an ex-girlfriend was later tracked down and arrested in Santa Monica, authorities said.

Charles Minor, an executive at Hits magazine and former president of Giant Records, Minor 46, was found dead at his rented Malibu Home following an argument with Suzette McClure, 27, who was booked for murder after two people heard gunshots and authorities found Mcclure's driver's license in Minor's house.

"He was just a working class boy from Marietta, Georgia who hit it big" said Mike Bone, a long-time music industry promoter who knew Minor for over 20 years when both were starting out in the business.

Witnesses told investigators that McClure had gone to Minor's Malibu home at about 11:30 am and asked to speak to him. Moments after she went upstairs, a friend of Minor's and a housekeeper heard several four gunshots. Deputies later discovered Minor's body on the secound floor landing.

McClure left but was tracked down after police found her drivers license at the house.

Minor lived in Beverly Hills, but spent most weekends in the Malibu home on the Pacific Coast Highway.

That's the story from the LA Times, guess we'll hear
more in the trades next week. Sorry to see such a nice guy leave us that way.

Hi, I'm Kevin Kent at a Commercial Classical station in GR, MI. I also act as production director here.

No ideas on CHR, I always use the High Teen content to steal advertisers for our format. sorry. Any help for us Long Hair types.

Kevin Kent

We here at WFGR FM 98.7 in Grand Rapids Michigan have been using DAT
} machine automation for about 3 years now. It is very reliable and very
} user friendly. After each >>Event<< or piece (it's a Classical Station)
} there is and announcement about the piece then a 25 khz tone. The
} computer hears the tone, stops the tape, goes on to the next event.
} Commercial, announcement, next piece whatever. At the end of each
event,
} commercial or whatever, there is the same kind of tone. It works very
} well. Email me if you have more ????s.

PS I think we got our system from KDFC.

We were shooting the breeze the other day, and the subject of the original "Good Guys" campaign (from the halcyon days of Boss Jock top 40 radio) came up.
We're stumped. Which jingle company marketed the original music sigs for this ubiquitous campaign? And, as an aside---was it absolutely mandatory that "Good Guys" have their publicity shots taken in blue blazers?:)

|: Jay, I've used the time fit a couple times...the first time was
|: awesome...shaved off 3 seconds from a v-o track and it sounded great.
|: The second time, I wasn't so lucky...seemed to get more glitches
|: toward the end of the 60, though it did compress the time perfectly.
|: It was strange because I was using less of an adjustment than the first
|: time...only thing I can figure was maybe the use of different voices.

There's a pretty good, non-technical discussion of how the timefit works in the mini-manual they sent with the upgrade. Yeah, it was probably the different voice.

The mini-manual suggests a couple of ways to get around it. UNDO and re-select the source a half second or so earlier, or change the ratio a tenth of a percent or so, and do it again.

I don't bother:

If I get a glitch (maybe 5% of the times that I use the function, there'll be a glitch somewhere in the track... heck of a lot better than my H3000B...) I just select that sentence from the original again, time-fit just that part, and copy it over the noise. Takes maybe fifteen seconds including the editing.

I would love to be able to do that, too, but I have managed just fine without them, resorting to the preformatted tag. I also have maximum control that way.

> Your argument is very reminiscent of those who argued
> against the Macintosh because DOS was just fine, thank you; and who later
> railed against Windows for the very reasons you use.
>
Not quite.

The argument is to be considerate and provide backward compatibility with previous browsers, ESPECIALLY given the disparity in types of browsers out there. There was NO backward compatibility involved in the case of the Mac; Windows is just DOS with a lot of makeup that smears occasionally.

There's nothing wrong with keeping two sets of pages, although it does turn into a maintenance hassle. I have the same problem keeping my HTML stuff and my non-HTML stuff (.plan file for finger clients, submissions to AIRWAVES) in sync. The REAL killer WWW application will be one that graphs the links for you and lets you manipulate them graphically.

I believe in the supremacy of content over form (which is probably why I'm not in radio news anymore); I tend to criticize situations that go the other way 'round.

I don't believe HTML 3.0 is a settled standard yet, but I could be incorrect.

I happen to know about this problem on a very large scale, being the project coordinator for the conversion of some 20-odd LAN Manager workgroup networks to a single enterprise-level NetWare 4.02 network, affecting nearly 3,000 users and a transition between two incompatible protocols (at least on Windows workstations). Parochial I ain't, and it pissed me off a bit to have that label applied to me.

New memo to KZON-sounds like a good plan. I'd like to see what you have. AIR Mosaic, by the way, is NCSA Mosaic with a lot of bombproofing. Netscape 1.1. is still a beta, judging by the announcements I've seen on the WWW newsgroups.

Memo to other radio stations--what are you waiting for? You should be able to get a simple web site up for less than it costs you for

a couple of days of your sales manager's three-martini lunches!

>
> I'm fed up, and you all will see me here a lot. I have paid my dues.

Dues are one thing, payroll, power bills, insurance, and taxes
are quite another. Now that you've paid your dues, how about
working for free to bring quality radio programming back?

Maybe we can hold a fund drive and get people to pay the costs
to keep a transmitter on the air and a studio maintained. We
could call it Pacifica. Maybe we'd find ourseles in the same
hard times they have.

Somebody has to decide on behalf of the public what is right,
and in radio they have to do it in a way that pays the bills.
That's the way we decided we wanted it back in the 20s, even
though AT&T was lobbying long and hard that "the ether" was just
like long lines, and AT&T ought to lease it out to whomever
wanted to rent a piece.

In 1980, my partner and I went to a Radio & Records conference
at the Hungtington Sheraton Hotel in Pasadena. There was a lot
of talk about a new programming service on cable called "MTV."

The session became an exercise in MTV bashing; one guy got up
and said: "Music is something that you listen to with your ears
not watch with your eyes," as if an ethical argument could cause
the groundswell of new viewers to turn off those offensive
CRT's.

Now comes Treehouse2 Media with another ethical argument against
the only people making big money in radio--the shock performers
both liberal and conserative; and a broadside against people who
make hard decisions based on financial realities.

I think the trouble is that you can't keep 'em down on the farm
after they've seen Paree. Houses have 4 and 5 televisions in them
and the public would rather listen to television than listen to
radio.

How many people now turn on the television as background entertainment
walking out of line-of-sight of the picture?

.>this even close?

You don't have to be on an NPR station to get your show played on public radio stations.

First a little background: "NPR" is a group of stations. There are somewhere around 250 of them. In addition there are close to 250 MORE public radio stations that are NOT affiliated with NPR.

You can get your show played on ANY of these stations with or without it being an NPR show.

The way you do that is:
1. market individually to stations (by phone and mail), or
2. market to a lot of stations at once (through the public radio DACS message posting system).

You can call NPR for information on how to get access to DACS. Once you on, you can post a text-only annoucements about your show (a commercial of any length, feed times, etc). Attach a coupon on the bottom and give the stations your address and/or FAX number. They are usually pretty good about letting you know if they're using your show.

I have done this with varying success in this way with a number of public radio shows that I have produced.

"He's afraid the rock station...will have loud parties and
invite all its microwave pals over for popcorn..."

ROFL! But seriously, folks, unless the tower is physically
so close it can fall over and crush a house (and maybe not
even then) it literally can't be stopped, IF it's intended pri-
marily for broadcast communications. FCC broadcast law
pretty much pre-empts all local laws, like any federal stat-
ute does, and if they say the tower can go up, and meets
all FAA and FCC rules and regs, it goes up and the station
signs on. That's that. There was a battle in the Rochester
suburb of Farmington, NY when the owners of Rocket 95 FM
(WRQI) got a federal CP to relocate their transmitter on a
knoll there near some homes...the locals fought, and LOST.
Rocket 95 signed on the air, with 50,000 watts ERP.
They'll stay there as long as they generate enough $$$ to
remain on the air.

Hitler was overwhelmingly popular too by offering simple, no-brainer knee-jerk solutions to Germany's political and economic strife. Hitler, like Grant/Limbaugh and others of that ilk, find scape goats, and lump all of our problems on the back of those scape goats.

Not that their scape goats are blameless, but they are not soley to blame as these hosts like to tell everyone. Naturally people gravitate toward easy answers, especially ones which dont require them to think for themselves, shoulder any of the responsibility themselves and provide a comfortable 'us versus them' scenerio to lull them into a blissful sleep of ignorance and blame.

Its odd to see Jay Marvin defending the likes of Rush and Grant. I havent heard Jay for a year but he *used to be* the opposite of these guys. But then again Roe Conn was a liberal until he worked at WLS a while...

Not that liberal extreamists are wonderful. The PC crowd is just as repressive. I have often said that the Left are *sensitivity fascists* and the Right are *decency fascists* both want to limit free debate and both have their scape goats to blame, usually each-other.

Just one fool's observations.

>"cool" :)) -- I'm also gradually learning more and more about
Programming
>by bugging our Music Director to let me help him out with various
things..
>for which he seems more than grateful :)

Always remember that there are many different philosophies in this business. There are many different ways to win and lose. What works for one PD, might not work for another. What one PD thinks is cool, may suck to another. Decide what you want to do in this business and pursue it. There is no better education than experience.

Even though internships are educational, I knew I would never be able to prove myself as an air talent; which was my goal. I know a lot of Intenrs who aspired to be on the air and aren't today because of that route they took. Get on the air however possible! You'll find that you'll acquire the same experience that you are now, but it will be *you* who will develop your own philosophy and knowledge of what works; and that's really cool :)

>
> GaryB

I think you will find, however, that marginal programs tend to stay on public radio longer than they would on commercial radio for reasons that have a lot to do with the basic difference between them. e.g. WAMU-FM here in DC, for which I once worked, should, by all indications, drop bluegrass during afternoon drive (3-6) for more news and information. They take the late feed of ATC and kill with it but bluegrass makes no sense. It is on the air because 1) it has an audience here in DC and always has had 2) it has been in the afternoons for years even though the audience is not growing 3) former presidents of American University liked it there and 4) inertia in station management. Bluegrass would not be in the format if the station was commercial, that's a simple fact. Station management does not blush when they discuss "station mission" in the community. When is the last time you heard such a quality as part of a commercial station's plan? :-)

Bill,

Noticing your item about the "pointers" on your www site, may I add one that is not actually on the internet?

BROADCAST and FCC are echos in the Fidonet system, a series of local BBSs around the world. Quite a number of professionals are found on these echos and with the BBSs usually being a local call, it is easy to set up and pick up the echos and email.

I happen to moderate the BROADCAST echo (tag name BRODCAST), and we are involved with everything from format discussions to technical assistance to historical discussions about the pioneer radio stations. We'd love to welcome additional readers. (If you can't locate a Fido BBS in your area, feel free to email me, and I'll try to locate on for you).

FCC includes participation from someone who spent 30 years at the FCC and is more than current on the rules.

I got a Sony car radio that displays the call letters (or slogan) of many radio stations that it's tuned to. That includes about two-thirds of the FM stations in Los Angeles, but only two AM stations (KFI-640 and KNX-1070).

I'd like to know--how does this work (obviously, the stations are sending an inaudible code over the air, along with the regular program material). Does anyone have a description of this system?

thanks in advance!

2032. Questions on DAD486x (Hard Drive Automation)

Newsgroup: rec.radio.broadcasting
Date: 1995-03-22 09:55:07 UTC
From: Tom Desmond <wsu@mimi.itg.ti.com>
Message-ID: <3kos5r$dab@vixen.cso.uiuc.edu>
Source record: 33740

I recently acquired a copy of the DAD486x hard drive automation software from Enco Systems, which I am running on a Compaq Deskpro XL 466 PC. This setup is producing good results, except that the graphics periodically freeze up when I'm in certain modes (Edit mode and playlist modification mode seem to be the most likely to have this problem, so far). When this happens, the only way out is to turn off power to the computer for a moment, and power it back up.
The folks at Enco Systems have told me that the probable culprit is the PCI Video board that my Compaq Deskpro uses, and their solution is to replace this board with a non-PCI board (they've suggested the Diamond Speedstar Pro).
I would like to know if there's anyone who's worked with this software and bumped into this problem. If so, please let me know what worked before I go off to buy another video board. If you've had this problem and solved it, did you do so by replacing the video board (and if so, which replacement board worked for you), or were you able to find an effective software solution? Let me know.

Tom Desmond

By the way, I don't want this message to scare other folks away from this software. I believe that Enco has a good product--it just doesn't totally agree with my computer. Unfortunately, this is not an uncommon problem in the wonderful world of PCs...

Steve Wright is out of Radio 1!!!!????? Wow! Here's a guy who actually got "it". There are a lot of American radio wannabes in England. This includes jocks and management. Steve Wright in his heydey was someone who understood the American style and didn't get it lost in the translation. What a shame.

The most inexpensive system I know of is the Digilink by Arrakis Systems (Ft. Collins, CO). We're using one on our satellite-formatted AM station, and it can also handle live-assist, although rather awkwardly.

Would I buy it if I had it to do all over again?

No. I'd step up to the pump and buy a TROLL system from Scott Studios. Yep, it's expensive (about 25 - 30 K) but its flexibility is unequalled, at least in anything else I've seen.

2036. KPIG RADIO *WOW*

Newsgroup: rec.radio.broadcasting
Date: 1995-03-22 09:55:10 UTC
From: wdp@airwaves.com
Message-ID: <3kos5u$daf@vixen.cso.uiuc.edu>
Source record: 33744

I just got my first taste of pork. Radio Pork that is.

I have just received a couple of hi-fi VHS tapes of KPIG radio from a friend who is local to them, and I must say *WOW*.

Here is a real radio station. I have just heard about 2/3 of their morning show and it is the most interesting mix of music I have heard in 20 years. The host (Wild Bill, a name *I* have used on the air) is kind of a laid back hippy-sounding fellow with great pipes and a style that is IMHO perfect for morning alternative radio. Authentic,o no screeming, yet wont put you to sleep either.

The music is a strange, quirky blend of acoustic rock, folk and what I would have to call 'progressive country' with a good dose of boogie woogie blues too. The sets are actually thematically segue's and the host seems to be very in-touch with the music.

Interspersed throughout the show are little commentaries and such from the likes of Jim Hightower and someone calling himself Travis T. Hip. The commentaries are refreshingly left-of-center and yet not preachy or overly PC.

The format reminds me of a 90's version of the old 'progressive' California sound once found on KSAN and KTIM in the seventies. Well done, and fun. I have not heard a station that sounds like this in a Looooooong time and I am considering moving to the Santa Cruz area just to bve able to listen to it.

I have not heard the other dayparts yet, but I am sure they will be just as cool.

Cudos to whoever programs this outstanding station and it proves that out-of-the-ordinary formats can work.

Keep up the great work...
Bill

Herr Frank Buchner wrote:
<What happened to the former djs of the famous
english service of Radio Luxembourg ("the great 208")?
Where are they working right now ?
I4m specialy interested in:
Mike Hollies
Peter Anthony
Bob Stewart
Stuart Henry>

Mike Hollis married a Luxembourger, and is managing a Luxembourg FM with partner, Andy Hayward, the former Music Director of the "Great 208."

Bob Stewart, when I last talked to him, was weekends/swing shift at Capitol Gold (1548 kHz) in London (this was early '94)

Stewart Henry, I believe, is deceased.

Frank, can you tell me, what is on the air at night on 1440 now, replacing the English service? Es ist mehr Deutsch? Danke schoen.
Ken Williamson

Dave, you are quite correct; what you need to do is to get a local carrier, build up a following, then try and talk someone into sponsoring you so that you can "get on the bird"--that is, the NPR satellite. Then you have to pitch like crazy to get stations across the country to carry you. Send tapes. Go to conventions (the Public Radio Convention is one of the finer gatherings of people you are likely to find in this country!!). Schmooze, schmooze, schmooze. But schmoozing with the intelligent, thoughtful folks who make up public radio is a serious pleasure.

How do I know all this? I am working with a fledgling show myself. It is a thing called "West Coast Live," and we have in just over a year) got 35 stations to carry us, from McGrath, Alaska, to Santa Fe/Albuquerque, to Philadelphia. If you'd like to talk, I'd be happy to email back and forth. And, if you like, to give you a few contacts in the Bay Area of California.

Let me know.

At WXLV, a college fm station we have used Sony Mini discs for the last 9 months with no problems and I can strongly recomend them.We replaced 2 of our 3 Audi-cord carts with the sony units . I did not chose the Denon because 1, they were more expensive 2, Sony invented the MD media and 3,they were exact replacements in the turret rack for the audicord units. The Sony units also have a remote key pad for captioning which the Denons do not. I'm sure Denon will get it ironed out in time . the MD format is superior in every way . We do all our production on a Tascam DA 88 , so it's like airing a CD.

>to judge what sounds good? Only listeners inevitably make that
decision.)

Absoulutley correct Corey! However I might add that there are certain fundamental skills that a person should posess in order to be on the air. A lot of people don't have them. Some poeple by nature speak monotone. Some have no inflection, animation or range. These people aren't on the radio because they don't have the aptitude or god-given talent. Just like I don't have the aptitude for medicine or engineering. I doesn't matter how long I go to school, don't let me near an operating room! And don't even think about flying in something I've built!

So sounding good on the radio is subjective, but not that subjective. If you don't posess the fundemental skills, you'll get weeded out very quickly!

2042. Inappropriate Radio Tower Location!!!!!!!!!!

Newsgroup: rec.radio.broadcasting
Date: 1995-03-22 09:55:15 UTC
From: BXPM36A@prodigy.com
Message-ID: <3kos63$dan@vixen.cso.uiuc.edu>
Source record: 33650

Here is a better post of my previous call for help to fight a radio tower.

My other message (titled "Need Help Badly") may not have given everyone
the correct picture. Comments, Suggestions, etc.. VERY welcome.

(this message is regarding construction of a large FM transmission
COMPLEX 300 feet from many homes {and mine}).
Here are my concerns (I don't think any of them are illegitimate). We
have temporarily stopped construction simply due to
over 150 residents calling and writing the county. FYI - They sent a
reply letter saying "Maybe we made a mistake" once they saw our community
and where the complex might be built.

First, we have recently seen the plans on the tower, and the
70 foot tower is not some little antenna, it is very thick
(12 feet in diameter at the base, 3.5 feet wide at the top).
Something this large only 300 FEET away from our front porch
is not going to be pleasing to our beautiful views of the
mountains we live in. It will also have a 10 foot by 15
foot bulding next to the tower, surrounded by a large fence
that will encompass a large area. Plus, two bright blinking
lights that will be blinking in thru our front windows every
night, all night long.

Let me give you some background as to where we live. We
live in a city called Big Bear Lake which is a small city
located in the 8000 foot mountains about 150 miles from Los
Angeles. Our specific community consists only of about
50-75 homes, spread out and surrounded by thousands of acres
of forest and empty land. Why they would try to put this
antenna complex right smack in the middle of our
neighboorhood completely baffles me! Like I said, there are
thousands of acres of mountain peaks, forest land, and empty
land all around us! They actually BOUGHT a piece of
RESIDENTIALLY ZONED land to build the tower on! We are only
1 parcel away from this tower!

Also, the station is going to put out between 6 and 12
KILOWATTS, which to me is a LOT of power to have next door
to me. Im not worried about cancer or disease, I am worried
about picking up FM stations that I WANT to listen to.

The most serious consequence of this tower (being 300 feet
away from us) is that we have heard from real estate people,
and even a lawyer, that once this tower is constructed, we
will face a substantial reduction in property value (we are

talking between 15 and 30 percent). One basis for our property value is due to our location. Our location is far away from cars, traffic, and commercial entities. We are surrounded by forest, land, and can see every star in the sky once the sun goes down. This is the main reason we bought out here, and we wouldn't have paid anything to buy next to a tower of this sort.
I hope you can understand our position and why I left the plea for help on the Internet.

If you have any suggestions or comments, please reply back to my account on Prodigy (BXPM36A@PRODIGY.COM), or for public forum, here.

Thanks Much..

Regards, Craig.

2043. Ted Byrne

Last I heard Ted Byrne, he was substituting on WHP in Harrisburg, PA. He did three weeks between the firing of the 3-6 PM person and the addition of Dr. Laura Slessinger. I was disappointed to see him go because he was one of the most energetic and entertaining talk hosts I've heard in a long time. Also, he was smart, made good points and didn't sound like he didn't know his stuff while on the air. He would have been great for WHP to go up against the other PM talkers in Harrisburg (IMHO), but such is life on the dial!

2044. Re: Tower Too Close

Newsgroup: rec.radio.broadcasting
Date: 1995-03-22 09:55:17 UTC
From: umar@tiac.net
Message-ID: <3kos65$dao@vixen.cso.uiuc.edu>
Source record: 33652

talk1370@aol.com (Talk1370) writes:

>ROFL! But seriously, folks, unless the tower is physically
>so close it can fall over and crush a house (and maybe not
>even then) it literally can't be stopped, IF it's intended pri-

I live in Needham Heights, Massachusetts, a quiet suburban bedroom community near Boston whose principal landmarks are four 1200 foot towers (well, two of them are actually just across the river in Newton, but they're all within a mile of my house) which support antennas for seven FM stations, four VHF TV stations, three UHF TV stations, and God only knows how many two-way, microwave and cellular transmitters. The local hams sometimes refer to this area as "Intermod Alley".

Do I have any problems living with RF? Yes, but principally because I'm so close to the TV transmitters that I can't get a clear picture from any of them (fortunately I don't watch much TV). Do I have a problem with all those FM's? Yes; reception of stations that transmit from other parts of greater Boston, especially low powered guys like WFNX or WBOQ, is damned near impossible because of all the intermod products generated in my radios. I've learned to make notch filters so I can get the stations I want to hear. When I lived in another part of Needham a few years ago I got Rush Limbaugh in my phone; WHDH's ^H^H^H^H^H^H WEEI's transmitter site is right next to the town dump.

Have I had any unpleasant experiences with the towers? Yes. One day I drove my car close enough to one that a big chunk of ice falling from one of the guy wires smashed the roof in. There's a Sheraton hotel built right under one of the towers and cars in its parking lot get ice-bombed every so often.

BUT: Broadcasting is one of the most environmentally friendly industries one can imagine. The WBZ-TV tower sits on about 50 acres of woods that shelter deer, foxes, pheasants and hawks, to name only the creatures I've seen from my car when driving over there to service WCRB's transmitter. Without the tower that land would be wall-to-wall condos and the rods would see a lot more traffic.

There's a station in Concord (WADN, the nation's only commercial station with a contemporary folk music format) which built its AM array on a cleaned-up toxic waste site that is now a nature preserve.

In general I'm extremely partial to transmitters as neighbors, but then I've learned to live with them. I understand some people have problems with large RF generators in their back yards; if there's any way in which I can be of help, please e-mail me.

From: wpgc955@aol.com
Message-ID: <3kos65$dap@vixen.cso.uiuc.edu>
Source record: 33653

The subject of tuning AM towers and dealing with line VSWR is rather old science. Virtually all AM towers are tuned at the base with usually a "T" or "L" network composed of reactance arms (inductors and capacitors). The most common installation uses a lagging 90 degree "T" network. Its easy to tune and works well as a low pass filter for harmonic attenuation. AM towers frequently are not matched very well back to their transmission line impedance. VSWR levels greater than 1.5:1 or even 2.0:1 are commonly found, especially in directional arrays to the low power towers. Even mismatches of this magnitude to high power towers or non directional single towers usually do not cause any real problems, unless the transmission line is very long or marginally sized for the power it is handling. In 30 years of AM field work, I've never seen a transmission line burned up or even a PA stage damaged because of a line mismatch, unless the mismatch became grossly high (caused by a failed component) and the transmitter did not overload and shut down for whatever reason. Moderate mismatches are easily transformed by the transmission line and the output "T" or pi network in the transmitter so that the PA stage is still looking at a comfortable load. At AM frequencies, the wavelength of most transmission lines is very short, so the losses per hundred feet are very low. Thus higher VSWR values do not translate into significant system losses or potentially destructive voltages and currents (not to mention signal quality degradation) which do occur at FM and TV frequencies.

IJ>What do you mean by "hate" radio? Sounds like sour grapes to me. If you
IJ>mean radio where the talk show host fights with the callers I call that
IJ>entertainment.

Jay,
Fighting with callers is nothing. Referring to the Black mayor as "a black shoeshine boy" and calling ethnic taxi drivers "towel heads" is what I call hate. If you're not a downwardly mobile white male there's a label for your particular religion, race, ethnic origin, etc. That's what I call hate.

It's not sour grapes because we've consciously chosen another direction. We simply won't do that kind of programming. Let them have the hate. We make more money.

IJ>own and let the ARB choose each time around. Don't get carried away
IJ>because your with WOR INC. I know just as many people who laugh at the
IJ>Dolans as hate Bob Grant or Rush.

Again, we make more money. I really don't care who laughs at what. The Dolans are sold out, at high rates, 6 months in advance. I can deal with that and offer no apology or feel the slightest bit of embarrassment that we don't contribute to the pooling of ignorance.

The problem with Talk Radio today is that there's no variety. There are 8,000 white male conservative, Republican, superpatriot, felon, family-values totin', Clinton-bashing talk show hosts on the air (and one Liberal - you). I've just completed a talent search and found virtually no one - no one! - who breaks the mold. Same ol, same ol.

If I hear, or read in a resume, "I'm the next white, black, asian, hispanic, ___fill in the blank___, Rush Limbaugh," I think I'll spit up. There is only one Rush. The next great Talk Show host won't be a Rush wannabe. He or she will be a talent all their own.

Personally, I'd love to find the next Jean Shepard.

Rich

Congratulations to the engineering staff of WWRC980 for the impressive signal enhancement. Much of the credit ofcourse goes to Milford Smith for getting the CP accepted and extended under the old AM allocation rules, prior to the "AM Improvement" rulemaking. A real stroke of genious. We have driven the daytime signal north in the fringes. 980 now sounds almost like a local in Frederick, Howard, and parts of Baltimore counties. Also impressed with the null fill of the old night pattern. We can now drive the beltway without the signal getting trashed near the 95N exit. As for Ollie North, he appears to be doing a very credible job handling callers and tough questions during his first week. The show is also well produced. But with all talk shows of this ilk, there is often entirely too much political rhetoric. It is seldom the pure truth as Ollie would have you believe.
I still prefer Dr. Laura who is almost always on the bullseye of veracity..

* As the rumors of the upcoming group sale continue to swirl around Pyramid, its CHUrban WJMN-94.5FM in Boston shook things up a bit last week. They sent JoJo Kincaid to the beach on Friday. They added New Haven product Mike McGowan who's been doing some weekend duty for them for the past few weeks.

New line-up looks like this :

6a-10a Baltazar Ibanez with Pebbles
10am-2p Mike McGowan
2-6pm "Lady Di" Diana Steel
6-10p Ralph Marino
10-2a Marc Clark
2-6a Christina Fox

* Things are getting a bit rocky on a sister-station CHR powerhouse WXKS-107.9FM where the morning man Matty Siegal has lost both of his primary sidekicks -- Judy Papperelli and Billy Costa -- in a matter of one week. Costa is out indefinitely with a viral pneumonia. Papperelli has been suspended. Siegal starts syndicating his morning show in Portland and Providence on Monday, April 4th.

And as mentioned here before, WXKS is now on-line courtesy the Internet Access Company in Bedford,Mass. Check out http://www.kissfm.com/kiss Nice piece of work!

On Monday night, KIRO, the Mariners' flagship in Seattle, aired a sub-Mariners game with the San Diego Paraders. Now, ya gotta understand, I'm not only a die hard baseball fan who endures Seattle winters just to hear the crack of the bat in Spring Training, but I also spent two years covering the M's and the AL.

I listened to Dave Niehaus trying to work up some enthusiasm for something I know he detests. Pretty sad. Interviewing guys nobody cares about, et al. I turned it off. Couldn't listen.

I think KIRO's gonna lose their ass on this stuff. Especially with the NBA playoffs coming up, nobody's going to care too much about "major league" baseball.

I'm really sick of hearing people put down Broadcasting Schools! First gentlemen, get your facts straight. Proprietary schools have a far higher job placement rate than four year degree programs. Certainly there are a great number of bad schools out there that I wouldn't send my dog to, but that doesn't mean they all suck. There are bad Universities as well. Properly accredited broadcast schools can be a tremendous place to get a start. I went into radio during school, then attended a broadcast school. In the twenty seven years I've been in the business, I have been a jock in small, medium and large markets, I've been a P.D., sales manager, General Manager and a station owner. I became involved with a two year proprietary school in Maine as adjunct faculty while I owned a station. I hired a number of graduates and have seen many go on to be very successful. For the record, it is unlikely that you will find a radio or T.V. station in Maine, or New Hampshire that doesn't employ one or more of our graduates. We have graduates working at BCN in Boston and at CBS in New York. Don't ever tell them Broadcast School didn't help. I don't know where you've been for the last century, but I don't know many stations that hire off the street anymore. They all want experience,and lots of it. Our students have 5 modern production studios to work in, plus a low power FM that runs 365 days a year entirely staffed by students. We have a complete 32 track recording studio, and 3 television editing facilities.
Come visit some time. We'ed be happy to show you where broadcasting is heading!

Charles Hobbs (af660@freenet.carleton.ca) wrote:

: I got a Sony car radio that displays the call letters (or slogan) of
: many radio stations that it's tuned to. That includes about two-thirds
: of the FM stations in Los Angeles, but only two AM stations (KFI-640 and
: KNX-1070).

: I'd like to know--how does this work (obviously, the stations are
: sending an inaudible code over the air, along with the regular
: program material). Does anyone have a description of this system?

There are two systems in the works. RDBS is a system that transmit a carrier with all sorts of data on it. On FM is about 1200 baud, I am not sure it there is a RDBS for AM.

The other system is called ID Logic. It has a chip that contains a database of station information. When on AM is relies on that data to display the information you see on the display.

What model radio is that sony ? I have yet to see one in the real world, only several years ago on at the NAB.

From: tford1010@aol.com
Message-ID: <3kqphn$jbf@vixen.cso.uiuc.edu>
Source record: 33665

Dear Folks,

I now have the "rest of the story" concerning the NAB sessions. In addition to mine, "Better Profit And Ratings From Better Copy and Production", Sunday from 2pm-4pm, there will be two back to back seminars on Monday starting at 11am and running to 2pm (check those time, I think they're right).

The first monday session will deal with how to jump start one's creativity. The next session will start with a panel of Prod. Dirs. who will speak. Then folks will break off into groups and each group will write spots together. It's a great idea. I can almost smell the synapses burning now.

NAB hasn't come to let this pass without serious questions. My spies inside tell me that this is a trial balloon. The evolution of copy and production seminars to come depends on how well these are attended AND how well they are received.

I've made it clear to them that, since this is a first effort, they can't expect it to be HUGELY attended. I've also told them that, if it does go well, station management might be persuaded to put another $1000-$1200 in the budget for next Spring. (Just because it's in the budget doesn't MEAN we have to spend it).

Sooooo. What are your ideas? If you aren't a production type, tell the person at your station about this posting and get them involved. If you snooze, they lose.

Well tonight on the way to Union SC to help my engineering friend do some work to the old RCA backup, I tuned up 93.7, WFBC-FM in Greenville, SC and it seems they have a "new format" that out does Mark Roberts reporting of all Polka. WFBC was reading the names in the phone book. This is the phoen book from A to Z. Everyone needs new music.....and they went on with this in a 60 second promo then went BACK to reading names out of the phone book. I wonder how long this stuff will go on. This is a class C that normally covers well over 100 miles in most directions.

St. Louis Cards network is giving our AM station (WSOY) the option to carry or not. We've passed that on to the listeners via a phone poll. In two days of calls, the no replacement games on air has netted more than 300, with the yes to replacement games garnering only 70. Don't know if other stations are getting the option or not, but the audience certainly doesn't seem to want the games.

IB>At WXLV, a college fm station we have used Sony Mini discs for the last 9
IB>months with no problems and I can strongly recomend them.We replaced 2 of
IB>our 3 Audi-cord carts with the sony units . I did not chose the Denon
IB>because 1, they were more expensive 2, Sony invented the MD media and
IB>3,they were exact replacements in the turret rack for the audicord units.
IB>The Sony units also have a remote key pad for captioning which the Denons
IB>do not. I'm sure Denon will get it ironed out in time . the MD format is
IB>superior in every way . We do all our production on a Tascam DA 88 , so
IB>it's like airing a CD.

Brian,
Superior, in some ways. It depends on the audio/distribution chain.
There are two kinds of digital audio compression. One delivers a 100%
accurate signal from the input. The other takes out some information
that isn't sonically necessary. The MD uses the latter. If you make a
digital to digital copy on DAT tape the copies will all be identical to
the original. If you copy MD to MD in the same way there will be
degradation in the copies.

If you go directly from MD to air without further digital
compression, you'll be fine.

The problem comes when you run them through other systems in the
chain that also remove information. For instance, any distribution
system that uses digital satellites (SEDAT, for instance) subjects the
audio to possible distortion products.

Herb Squire of WQXR was the first to raise the issue. He delivered a
paper to the NAB. It might interest you to look into it.

Hi. I'm back again, at least for a brief few seconds:

Here in Cleveland, we can get several radio stations from the Detroit/
Windsor market. One in particular that I'm interested in is The River,
93.9 FM (which I assume is still CKLW). It sounds AAA but as there are
no other AAA stations anywhere near where I live, I am not sure. Can someone
clue me in as to what their official new format is?

Thanks,
Steve

The newest station in the Tampa-St. Petersburg market is Classic Rock Thunder 105.5 (WTBT), which premiered on March 9. Station is currently tracking CD's and asking for listener input, awaiting a move into more permanent studios.

Thunder 105.5 is being operated by Citicasters, which also owns 98 Rock (WXTB). WTBT is currently a Class A station but the new owners hope to upgrade the station to a Class C1 station, and move both WTBT and WXTB to a new tall tower in Holiday, Florida.

From: towncom@aol.com
Message-ID: <3kqpia$jde@vixen.cso.uiuc.edu>
Source record: 33681

Townhouse Communications Group is looking for freelance radio producers, reporters and other talent to contribute to a "magazine" format radio program in development. We are looking for segments of 1-8 minutes in length to fill out a 55 minute pilot program. These segments can be documentary, reportage, drama/theatre, "service" pieces (e.g., how to listen to classical music), vaudevill, comedy or any other interesting and exciting ideas. "NPR" type features are welcome -- this is a mainstream commercial production, but we will consider all ideas. A modest fee will be paid for all work used in the pilot. The pilot will be tested in the Northeast region in September and rolled out nationally in early 1996.
Post synopses or summaries of your segments to: towncom@aol.com
We will respond to all postings. Thanks -- Steven Merahn, Managing Director, Townhouse Communications Group

: mismatches of this magnitude to high power towers or non directional
: single towers usually do not cause any real problems, unless the
: transmission line is very long or marginally sized for the power it is
: handling.

Some directionals that I have worked on latley are in deed marginally engineered. 1 5/8" line for 50Kw Transmitters. Medium power towers with 7/8" line. This is asking for truble and trouble did indeed strike. Taking out the Referance tower, causing the remaining power some 35 Kw to flow into a 7/8" line resulting in burned line. At that power level the line go like fuse. By the time the Mangnphase triped the transmitter off the damage was done. The transmitter of course was fine but the undersized 5 tower directional was gone. After being in operation only 3 years.

I replace the 1 5/8" line with 3" and the two medium power towers were upgraded to 1 5/8". That was 1987 and it's been on since then with no other problems.

>what I call hate.

So who are we talking about here Bob Grant? Dimond? I don't thibk Rush,
Lionel, Lynn Samuels or Kotch do that. At least they didn't the last
time I was in town.

> It's not sour grapes because we've consciously chosen another
>direction. We simply won't do that kind of programming. Let them have
>the hate. We make more money.

I didn't know you had WABC's billing figures for the last month. And I'm
sure they're not loosing money.

> Again, we make more money. I really don't care who laughs at what.
>The Dolans are sold out, at high rates, 6 months in advance. I can deal
>with that and offer no apology or feel the slightest bit of
>embarrassment that we don't contribute to the pooling of ignorance.

You know you really shouldn't use terms like "pooling of ignorance."
You're not the end all be all of radio. You sell programs to stations in
small markets. I don't think that gives you any right to judge or pass
judgement. And if you were at WABC you be talking against WOR. Come on
we've all been doing this long enough to know.

> The problem with Talk Radio today is that there's no variety. There
>are 8,000 white male conservative, Republican, superpatriot, felon,
>family-values totin', Clinton-bashing talk show hosts on the air (and
>one Liberal - you). I've just completed a talent search and found
>virtually no one - no one! - who breaks the mold. Same ol, same ol.

Ok, here I would agree. Talent that is not right-wing and white is very
hard to find. In fact I think we could all count on are fingers the
number of liberals left in talk. BTW you didn't call me? :)

>
> If I hear, or read in a resume, "I'm the next white, black, asian,

Message-ID: <3kqpid$jdm@vixen.cso.uiuc.edu>
Source record: 33684

talk1370@aol.com (Bob Smith) writes...

"...What I want to know at this point is, who's claiming the first
three spots in those prime demo categories? I will be willing
to venture a guess that not only is WABC not #1 while Grant
is on, but a format competitor (maybe WOR, maybe WINS)
probably is..."

Again going back to our Fall 1994 book (our Winter book will be released
on Tuesday), and limiting our analysis to afternoon drive...

Persons 18+ living in households with incomes $50K+
1. WPLJ (Rocky Allen Showgram), 7.5 share of core listeners
2. WFAN (Mike & the Mad Dog), 6.8
3. WQXR (Classical programming), 5.8
4. WABC (Bob Grant), 5,7

Persons 18+ living in households with incomes $100K+
1. WFAN (Mike & the Mad Dog), 9.9
2. WCBS-AM (News), 7.9
3. WPLJ (Rocky Allen), 6.9
4. WABC (Bob Grant), 6.3

Bob, WINS and WOR do not seem to be particularly strong in the higher
income categories. With news in this market, WINS has always been strong
in the five boroughs of NYC, while WCBS has always ruled the suburbs. As
a result, WCBS consistently enjoys strong income numbers.

>think) "Record Report".

The WNBC Saturday Night Special of the Week was a 2 hour long locally produced feature on Saturday nights from 11p-1a. They only did it for a couple of years from 1977-1979. During the week, Michael Syarzinski hosted the WNBC Music Magazine, their version of a nightly show done in other markets (WGAR in Cleveland did it) The RWM show was done on a national basis and WNBC might have aired it. But, not as the show described above.

DK>What happens when the audience of "Jenny Jones" wants more than to read
DK>about a gay man being murdered 3 days after appearing on her show? What
DK>happens when they want to see him murdered ON her show? At what point do
DK>program directors and talk hosts have a moral responsibility?

It seems to be a time-honored tradition. The Romans did it with the Christians and the Lions and Donohue wanted the right to broadcast an execution. Perhaps I'm too much of a cynic or too jaded to expect much else.

To expect bean counters to enforce "moral standards" when they see their audiences dwindle away isn't realistic. It's the good old American way to "find a need and fill it" (thanks to Henry J. Kaiser). As long as audiences watch the stuff there'll be some entrepreneur ready and willing to provide it, however gross, however tasteless or however damaging. The only ones who'll suffer are the guys doing the "moral" thing as they lose their shirts in the marketplace.

Once the audience refuses to watch you'll see it disappear overnight. The law of supply and demand still works. If there's no demand there'll be no need for a supply.

Someone a while ago was asking about some old WPIK/WXRA jocks
one of them was Red Shipley. For a while I remember hearing
him on WAMU 88.5 FM as a Bluegrass DJ. I'm not sure if
he is still there or not.
Also Someone else mentioned WDON in Wheaton, MD
and Tom Cat. I think he is still working on a station in
Warrington, VA on an AM Country station.

2080. Replace-ball broadcasts

Newsgroup: rec.radio.broadcasting

From: TRRadio@aol.com
Message-ID: <3kt280$h66@vixen.cso.uiuc.edu>
Source record: 33688

Since I posted the original question, let me follow up with some thoughts:

>From what I can gather, whether or not the games are on depends on the rights agreements. In LA, The Dodgers pay KABC to air the games, and they have been doing so this spring. I think there are a couple of teams with this arrangement. The teams which sell the broadcast rights to a station are the ones who are having difficulties. Toronto and Baltimore haven't aired any games yet (Baltimore hasn't played any), WABC isn't going to fulfill their quota with the Yankees, and other stations are only looking at weekend games.

The sticking point in the Yankees/WABC situation is that Steinbrenner received the bulk of his money in the front end of the contract - could he have some idea there were going to be labor problems????? WABC is asking for some relief based on both the strike and their losses overall.

As the regular season draws near, we should hear about the station's plans. It makes for an interesting dilemma. One point of view - NBC's Dick Ebersol who was quoted in Tuesday's USA Today saying his network will carry games even with replacement players. His deal is the Baseball Network, not the owners.
Also, what are CBS Radio's plans? They do a Saturday and Sunday game of the Week and I wonder if they are having second thoughts or affiliate cancellations.

Bob Smith said:
> August 11, 1994 may end up being recorded as the date of the last major >lea gue baseball broadcast for many years to come...

I don't think that's the case, but it mark a D-Day in broadcast rights dealings and baseball.

BTW--To give you some perspective about how replace-ball is being viewed among the public--Las Vegas Sports Books aren't accepting any future action on Baseball until the strike is settled.

2083. Cheap Mac-based edit suite?

Newsgroup: rec.radio.broadcasting
Date: 1995-03-24 00:03:16 UTC
From: jkaza@algonet.se
Message-ID: <3kt284$h6i@vixen.cso.uiuc.edu>
Source record: 33691

Hello,
I am looking for some advice on how to put together a relatively cheap Macintosh-based system with which I could do the following:
1)Transfer and edit material recorded on either a DAT or standard tape cassettes
2) Record my voice intros, outtros, etc and put together a 5-10 minute feature spot, with interview or actuality cuts.
3) Zap the finished or semi-finished piece back onto a DAT cassette or ordinary cassette at acceptable quality
or upload the item as a compressed sound file to the Internet, to be downloaded by the recipient station.

Could you suggest the appropriate hardware (CPU, hard disk capacity needed, mikes, speakers or earphones) sound editing software and anything else you may think of. What I am aiming at is to have a modest digital home studio, as I wrote, mainly for voice-based work, editing together interviews and actualities for short features.
I presently have a Mac Performa 450 4/120 with Apple CD 300. Am drooling at ads for the Performa 630 8/350 CD TV.

Regards,
Juris Kaza
Stockholm, Sweden

} downloaded by the recipient station.

Macintosh archives such as Umich have several decent sound recording, editing, effects-creating programs in share ware and free ware. I use 'soundeffects 0.91 whoich records mono or stereo audio at any rate up to 44 khz, allows for up to 10-1 compression, has a bunch of effects and will save as aiff or .snd.

There is also an inexpensive program called SoundEdit Pro which is a slightly snazziwer version of the above, has a few more feffects and is abvout 99.00.

All run just fine on my IIci witrh 8 megs of ram. I wind up using sound effects 0.91 more than the SoundEdit Pro, but that is just preference. Both work well and Soundedit Pro has more features.

There is also a freeware called SoundApp which will play and convert almost every sound format on earth as well as playing MOD files and MIDI files. It too is at UMICH. Look in /mac/util/sound/soundutil for a listing. If Umich;'s server is busy (as it usually is) try ftp mirrors.aol.com in the /pub/mac directory.

These are not a substitute for a DAW, but does damned good work for the price...

If you have any other mac sound questions Ill try to assist

Bill

> transistion of that station.

The KKCJ thing, however, seems a little different. It is actually running polkas most of the time, although a twist was added Tuesday afternoon.

At intervals ranging from 15 to 25 minutes, the station will play John Cleese of Monty Python saying "And now for something completely different...", followed by a rock or jazz record. Artists heard during these drop-ins have included Green Day, Pat Metheny, Stone Temple Pilots, Yes, Run DMC, and the Village People.

After the song is played, the station punches up about five seconds of laughter, and then it's back to the polkas.

While at times annoying, KCFX/KKCJ are showing more imagination than anyone in this market since the old Rock-40 KXXR back in 1988 and 1989.

(KXXR liked to play requests at the top of the hour: some of which did not quite fit the format. But KXXR had a playful, irony-intensive, in-your-face attitude that Kansas City sorely needed -- and which was very successful until an egotistical general manager forced out the PD who made it all happen. KXXR *should* have evolved into our modern rocker, but bad management and a financially weak owner screwed that up.)

> Max...
> who still remember KMOX-FM changing to KHTR on New Years Eve 1982 with a
> simple playing of KMOX-FM's first ID from the 60's
>
But you may also remember that KMOX-FM during the fall of 1981 was transitioning from what we would now call a "soft AC" format into CHR. At KFRU, we used to communicate with KMOXers quite a bit, and they would say, "they're doing some pretty wild things downstairs" at the FM station.

Apparently Bob Hyland was not pleased with the changes, but it was one of
the few times he lost a disagreement with the home office.

Do you also remember when WOKZ-FM from Alton became WZEN(FM) (later KATZ(FM),
now KNJZ(FM)) on New Years Day 1980, playing 24 hours of disco?

And Travus T. Hipp was once on KSAN as well. Unfortunately, KPIG is a little too far south of me to get it, but it's a sort-of reincarnation of KFAT Gilroy, a legendary station (which apparently wasn't intended to be that way). Yes, there are still people in these parts who are trying to keep the style of the old KSAN alive in one way or other. You should hear some of the low-power non-com stations in the Northern California fringes, such as KMUD in Garberville, etc. Radio the way it could be.

: Looooooong time and I am considering moving to the Santa Cruz area just
: to bve able to listen to it.

You'd probably LOVE Santa Cruz. It is said that if you pick up the USA and shake it, everything that's loose will fall toward Santa Cruz. Tom Lehrer of parody song fame is a math professor at UCSC, and some fascinating innovations in computerdom (such as the IUMA independent music archive) are based there. Scruz is one neat town.

2093. Morton Downey Jr.

Newsgroup: rec.radio.broadcasting
Date: 1995-03-24 00:03:39 UTC
From: Davradio@aol.com
Message-ID: <3kt28r$h9v@vixen.cso.uiuc.edu>
Source record: 33601

I have been reading some articles in Airwaves recently about "whatever happened to Morton Downey Jr.?"

I use to work with Mort here in the Dallas/Ft. Worth area for about 6 months before I was dismissed by him in June of '93.

In October of '92 my station KGBS AM 1190 needed to replace Rush Limbaugh who was taken from our station and put on WBAP 820, and so my people listened to what was on the satelite and found that Mort had a show based in Washington D.C. at the time. He sounded pretty good too, when he was on subject. He had two very good people working with him from WWRC, one was his producer Neil Augustien and the other was Rob Chickering, a wunderkind with engineering.

In Novemeber of '92, Mort decided that he wanted to do his show LIVE from Dallas,Tx. for the 29th anniversery of the Assination of President John F. Kennedy, and he wanted to broadcast from the Sixth Floor of the Old School Book Depository. With the aid of our Program Director, Tom Scott, and 3 other employees, Jim Long who was Production Director, John Basham, our metorologist, and my self, Dave Michaels who at the time was doing traffic reports for the station, took the task of securing the location and all the needed guest that Mort's people asked for.

It is after this show on the 22nd of Novemeber, that Mort and the owner of KGBS, Mike Russell spoke and and at length about having Mort move his base of operation to Dallas. In January of '93 Mort and his crew moved to Dallas and fired up his "Blue Collar Network" from the studios of KGBS AM 1190. With doing so we also added another talk show host from New Mexico, who use to work in the Dallas/Ft. Worth area for a long time at the old KLIF Mighty 1190, and that was Ron Engleman.

Mort started out like gangbusters, had a good show with a good following, during the next couple of months he fired up his old TV show with the help again, of Mike Russell, and a new partnership was formed. The TV show was doing well at the begining and for whatever reason that I am not sure of, the honeymoon came to a close. I was released BY Mort, in June of '93 (my claim to fame so to speak) and a short time later, Mort and Mike had a falling out around October of '93. Mort then was reported to move to Chicago and work out of the Satelite network there. He was on a few stations around the country, but no one has heard his show lately.

When Mort was in Dallas, his got married, and his wife was pregnant. She gave birth to a baby girl in October of '93. Wish I could be more helpful to where he is now. But at least you know where he was from 1992 to 1993. A hell of a year for KGBS.

Well...there IS a Robert Murphy in Chicago...used to work at Q101 in the 80's as morning drive personality when they were adult contemporary, survived the switch to repetitive "alternative"...then got replaced and after a brief unemployment got hired at the new WLS-FM "lifestyle talk" where he does mornings... I'm never up early enough to hear him, but the station overall has a lot of territory to gain if it wants to be viable vis a vis ratings... this is the station where the brilliant though sometimes caustic Jay Marvin has an incredibly entertaining show afternoons, and Turi Ryder whines about her wedding plans and the guys her girlfriends date every evening (thank G-d WJJD has Tom Leykis in that same time slot...)

Robert is followed by local Sun Times columnist Richard Roeper, then it's Rush, Jay, Turi and Johnny Von who has perfected the art of being funny and engaging without saying anything about anything.

The new calls are CIDR and it's indeed AAA. It's part of CHUM Group's, um, quadropoly- CKLW (Talk), CKWW
(Standards), and CIMX (Alternative "89X"). CKLW and CKWW swapped formats a while back. CKLW-FM did variants of
oldies,including '70's, until going AAA...

I don't think anybody suggested getting a degree in broadcasting; I think most people who've suggested college said to get a degree in anything BUT broadcasting. And likely by the time they do get degrees, even though they entered college for the expressed purpose of getting into broadcasting, they see something else they like better -- THIS may contribute to the lower broadcasting job placement rates. College grads may be seeing that there's more to life than being a DJ or weathercaster.

: Properly accredited broadcast schools can be a tremendous place to get a
: start.

Properly accredited? Like what kind of accreditation? Nearly anybody with a storefront and stationery can get be "approved for veterans". I seriously doubt there are many broadcast schools out there with any accreditation at all.

: the record, it is unlikely that you will find a radio or T.V. station in
: Maine, or New Hampshire that doesn't employ one or more of our graduates.

In the SF Bay Area it is unlikely you will find a station which hasn't employed graduates from the College of San Mateo or SF State University, two local colleges offering broadcasting courses. I can tick them off nationwide as well: Jon Miller of ESPN, Steve Wilson of "Inside Edition", etc. So, what's your point?

Having been moved to weekends to finish my contract in favor of Ollie North who yesterday built a "show" out of a single lie in the Washinton Times about V-J Day, and having corresponded with you in other venues, I wish we had talked earlier. I may be getting out of the business, but as a non-conservative, I was able to out-pull WRC at night (8-11) when I was at public WAMU-FM, did fine at WRKO even with the handicap of a partner who did no homework, did not like the issues and did not like the format and came back to DC and, in four variations of a morning show, more than doubled the audience and exceeded programming targets all in one year. That year included no promotion and a horrible signal which has only in the past month been upgraded. I was told I was "too intelligent" for the audience here in DC---the single most-educated market in the US with two of the top-ten counties in the US in terms of per capita income. The "failure" of "liberals" on talk radio is often not caused by a lack of talent but by a near-total misunderstanding of the market and the audience by programmers who have come from other formats. The weekends are now jammed with callers, topics are ambitious and the approach is NOT conservative. Yet I am looking to get out and Ollie North is lying in the afternoons.

I think much of the Rush-cloning is caused by unimaginative, tin-eared PDs who think it cool to "go with the flow" rather than to cultivate and promote the alternative.

Of course, I am classified as a "liberal" because I often grant there are two sides to most questions... ;-)

Where are they now?? The original Program Director, Larry Miller? He lured the other Larry Miller from WPLJ. This meant that the 'PLJ Larry Miller had to change his registered AFTRA name so that Program Director Larry Miller could use the name on the air. Sleezy! The real Program Director Thom O'Hair is running a gen'l store at some Park in Cal. Jim Cameron has a news consulting firm in Ct. Carol Miller is doing middays at 'NEW-FM. Al "How Do I Sound" Bernstein is doing middays at WLTW, N.Y.C. "Rosko" Bill Mercer does Sports Promo V.O.'s for CBS. Joe "From Chicago" Piasek has a production house at his home and teaches at Quinnipeac College. But where is the rest of the "Quad Squad"? News Director John Parsons, Mike Linder, Dave Mallow, Billy Bass, etc.? One very cool thing that I was allowed to do on the overnight was to track ANY album I wanted. How's about "Clear Spot" - Capt. Beefhart! There's not a P.D. alive today who has the balls to let a jock program that kind of an album on overnights! Of course we were "Progressive Rock" long before the current crop of consultants re-discovered the format! It was a great 10 months!

As has been reported in an official release earlier in the newsgroup, Z-93 (WZGC/92.9 FM) midday host Red Noize lost his battle with cancer this past Sunday morning. Noize had been on an 'extended leave of absence' per his request for the last few weeks.

Cox Broadcasting announced this week that it had reached a joint sales agreement wtih Ring Radio. Cox owns WSB-AM (750AM), WSB-FM (98.5 FM), WSB-TV (Ch. 2/ABC), The Atlanta Journal/Constitution, and Access Atlanta (a regional joint venture with Prodigy). Cox also has an LMA on WJZF (104.1 FM - licensed to LaGrange/Atlanta). With the agreement with Ring, Cox is able to sell WCNN (680 AM), and WALR (104.7 FM). This agreement allows Cox to cover most market segments in Atlanta,

WSB-AM is NewsTalk, and the flagship station of the Atlanta Braves and the University of Georgia; WSB-FM is a light rocker, WJZF is a NAC/light jazz station; WALR is an urban oldies station; and WCNN is all sports. Inside word is that Cox fired ALL of the sales people from Ring's stations, and that very few of the other stations in Atlanta will contest Cox's move.

Protest their move? Hmmmmmmmmmmmmmmmmmmmm.....I'd better leave that one alone for now...more details as they become available...

Written March 24, 1995

During the past two weeks, the St. Louis market has been buzzing over the possible fate of the Zimmer Broadcasting stations.

Most of the speculation centers on contemporary-hit/modern station WKBQ-FM. WKBQ is now at 104.1 mHz, after Zimmer purchased its former 106.5 mHz frequency. Zimmer swapped country station WKKX(FM) with WKBQ at the beginning of 1994 to take advantage of the 106.5 frequency's stronger signal (100,000 watts versus 39,000 watts at 104.1).

Two sources have told me that it is known the Zimmer chain is having difficulty with operating the stations the same way they operate in other, much smaller markets, such as Cape Girardeau, Columbia, and Poplar Bluff in Missouri, and Harrisburg in Illinois. In addition "Q-104" is Zimmer's only station that isn't either a country station or a news/talk outlet.

A published report in the March edition of the St. Louis Journalism Review noted the departure of WKBQ program director Lee Cruze for a higher-paying PD position in Mobile, Alabama. It's poignant to note that St. Louis is the 18th largest market, according both to Arbitron and the M Street Radio Directory, while Mobile ranks 90th by Arbitron's measure and 97th by M Street's reckoning. This may indicate a low-budget method of operation for the St. Louis stations.

The Journalism Review quoted one unnamed "observer" as saying Cruze had been "saving Top 40 radio in St. Louis" by introducing a liberal sprinkling of modern-rock tunes otherwise heard only on KPNT ("The Point"). The swap of frequencies apparently did not hurt WKBQ much in the ratings, at least in the 12+ numbers, and it appeared to help WKKX.

The story also said Zimmer's consultants were pressing the chain to move to a country format to complement WKKX ("Kix 106"). Another source confirmed this to me.

This source and yet another observer believe Zimmer, at the very least, has WKBQ up for sale, and possibly more, because Q-104 doesn't fit in with the rest of the chain's programming style. As one of them put it, "Zimmer got what they wanted" when the company bought the stronger 106.5 signal of WKBQ for WKKX to use. One possible buyer has recently made moves to enter the Kansas City market as well.

One source also believes WKKX may be up for sale, with the most likely buyer being Emmis, the owner of legendary album-rocker KSHE(FM). KSHE is now is one of two standalone FM stations in the St. Louis market.

The other, KXOK-FM, is owned by Legend, which briefly controlled WKBQ-FM and KASP(AM) (now KRAM) in an LMA-to-buy before financing for the purchase fell through and former owner Evergreen Media had to take the stations back in mid-1993.

If all this weren't enough, there's the change of WKBQ(AM)'s call letters to KRAM on February 22, after the AM station at 1380 kHz switched to mostly a news/talk format at the start of the year.

AIRWAVES reader Alan Cassel has told me that St. Louis media reported Zimmer paid $5,000 to find and secure the call letters, in order to exploit the extensive publicity being given to a move of the Los Angeles Rams professional football team to St. Louis. The National Football League has denied permission for the move.

The St. Louis media now report the calls may change once again, since it's obvious that there won't be any Rams there for a while. The M Street Journal reports the station is using the slogan "K-Ram." Also note, and this is important, that KRAM is MARK spelled backwards. In case I ever move into ownership (right!).

Briefly...

* The St. Louis Journalism Review in its March issue also reported the switch of suburban KFAV(FM)'s format to what is described as a "hybrid AAA/ARRO format." In December, AIRWAVES reported the station was calling itself a "classic hits" station after dropping its original contemporary-hits format. KFAV is based in Warrenton and primarily serves Warren and St. Charles counties along Interstate 70.

* The Journalism Review also reported that another version of the Album Adult Alternative (AAA) format may be under consideration for classic rock KSD-FM. The format, called "Americana," is supposed a to be country version of AAA. The report, however, noted that several local participants in radio and in records said they never heard of such a format. Does anyone here know about it?

A little late thanks to free-net e-mail problems, but...

Coolidge classic rocker KAZR(103.9) is now Coolidge-Phoenix "contemporary hot rock" KBZR "The Blaze". The station flipped on Monday by tracking the Enigma CD over and over and over...on Tuesday, it was entire CD's punctuated only by station ID's. Now, it's music, presumably close to the real format...jockless until Monday when PD Ern Gladden(KUKQ, KGB, San Diego) launches the morning show. Other dayparts will be added later. Gladden is aiming for a rock-based CHR that some observers believe will attract former KZRX(now "hot talk" KHOT) and KUPD listeners long before having any effect on Churban KKFR(Power 92).
Coolidge is a farm town 45 miles southeast of Phoenix...power upgrades for the station are in progress and studios have moved to a building near Camelback and Scottsdale roads in Scottsdale.

2111. 360 Systems Digicarts: A problem

Newsgroup: rec.radio.broadcasting
Date: 1995-03-25 05:10:20 UTC
From: robert573@dallas.relay.ucm.org
Message-ID: <3l08js$tj@vixen.cso.uiuc.edu>
Source record: 33619

I have suggested to our station folks that when we move to our new studios, we should upgrade our Digicart's to Digicart II's.

However there is an interesting little "bug" in the Digicarts, that I would like to know if anyone else has seen, and if Digicart II's have the same problem. I ran into this problem again last night, so that's what sparked the idea to post it here.

DIgicart uses the Bernolli (SP?) disks. I realize that all things will fial someday, but this probelm seems to occur no matter how new or old the Digicart carts are. Basically here's what happens: We will record the program. Then when we try to dump it to the hard drive in the "on-air" studio, the machine locks up during "copy cue" mode. We then have to shut the whole unit down, and power back up, to unlock it.

It doesn't happen ALL the time, I'd say it happens about once every other month or so... When this happens, the "cart" can no longer be used. If you try to play the program straight from the cart, it will play for awhile but then it will just "stop", and you have to do the power down / power up procedure to unlock it.

Reformatting the "cart" is usless... it apparently has a bad spot on it. I realize this can happen to carts which are old and have been used a lot... but I have seen new carts go bad like this, some that were only used 2 or 3 times. Then I have seen other carts which have been used hundreds if not thousands of times, and they still work like new.

What is causing these carts to go bad like that, and will we have this problem with Digicart II's? Also, what keeps this from happening to the hard drives?

DOn't get me wrong, I love the system!!! I just want to know what causes this "bug", and has any one else seen it?

thanks!

Rob Bass

Minidiscs sound bad. They just have very significant audible degradation,
and after multiple digital-to-digital copies, it gets really awful.

However, broadcast carts sound a lot worse. And you don't even want to
think about doing multiple generations.

It's a question here about whether raw sewage or treated sewage tastes better,
and my vote is for the treated sewage. Compromised as MD is, at least you
don't have to wiggle the cart back and forth to get the azimuth to settle
down. The MD format may not be even close to the same league as CD, but it's
a hell of a lot better than carts.

Dear Mr. Hobbs,

Unfortunately, I don't have an answer for you, just a
question. You mentioned KNX on 1070. I work in Burlington, Vermont,
where we had an AM on 1070--at 5000 watts and limited to daytime operation
only. That's because Canada has at least a couple of stations on the same
frequency, one in New Brunswick, I think, and one in western Ontario.
Do you happen to know what KNX's power and day/night configurations are?

Regards,
Andy Potter

Hello. I read the posting about the Sony car stereo that displays station call letters. It seems like a useful feature on mobile audio... or any radio for that matter! This would be greatly helpful when commuting/travelling cross-country! Here's what I had to in-put in regards to this...

Last year, I was in Germany -- Bavaria, to be exact... and my friend's cars (a 1992? VW Polo and a 1990? Audi 100?) both had Blaupunkt stereos with a cool traffic info "emergency channel"... if there was a wreck or congestion ahead the radio automatically switched to the info channel! This is especially necessary when travelling 120+kph! I'm not sure how it works either... I recall a tone that sounded prior to the traffic update... It stopped the tape/radio/CD for the announcement... I think it was a government-sponsored service... as I can recall... there wasn't a way to cancel or mute the announcements...

Does anyone have any ideas?

Thanks,

It's called RDBS (for Radio Data Broadcast Service, I believe), and the standard has been around for a little while, although only a few manufacturers have put it in their radios. Grundig's Satellit 700 is a great portable with the feature, but only for FM.

There are systems for both FM and AM, although they differ a bit.

RDBS allows display of more than just call letters. It can also display format, song title and other info. Ultimately it can allow radios to scan for format, or for other interesting stuff. Stay tuned.

If you've got plans for changing staff members in the fall, keep this in mind:

4 Year pro. with extensive small market AC/assist. MD; CHR late night/night jock/PM drive & assist. promotions dir.; organizer and teacher of radio program at exclusive summer camp...

I've stopped looking for now, because of the camp gig, but if you're interested in getting a T&R for late summer/early fall staff changes then E-mail me, and I'll get one to you before I pack them away. Or if you like, keep my E-address, and get in touch with me later on this year. At the end of the summer I'll be hitting it VERY hard, looking to relocate somewhere before the snow hits Central Maine, so act fast while supplies last! Get in early, while you can....Get a lock on a sure thing! I could be yours in the fall with little effort from you!!!

It surprises me a bit that the magniphase circuit did not properly protect the station Ron Cole refers to. The magniphase systems I've worked with in the Continental 317C transmitters are very fast and almost provide too much protection during wind storms and high static conditions, if they are setup with adequate sensitivity threshhold. A properly responding magniphase should normally have instantly shut down that TX when the 35 kw from the ref tower got shifted to a mismatched 7/8 line, unless ofcourse there was lots of isolation between the phasor power divider and the TX output. I wonder if your station's magniphase sensitivity control was set too low when the burnup happened?

During my first hitch in the Navy, I got to sail the northern Atlantic. The trouble is, the only reception on shortwave was either political [VOA, BBC, Radio Moscow] or religious [TRW and others]. One night, about mid-Atlantic, off the coast of Iceland, I thought about AM DXing to see if I could get the power-houses from New York. At 1440, this station, playing Top 40, screamed in like a local. I thought the bridge made a great navigation error -- because it was hitting the strength meter real high.

That was my first experience with Radio Luxembourg. Every night at 2000 GMT, where ever the good ship USS Mount Whitney was in the North Atlantic, I tuned into 1440. It pleased the crew, who were starved for current music, please the British liason crew, who were starved from cricket updates, and made the moral officer happy. [And a happy moral officer = happy crew]

The furtherest away from Europe I received 1440 was off the coast of Nova Scotia, in 1983.

I believe that I read in Popular Communications that she is all German now, changing the format from Top 40 sometime back.

RW: Once the audience refuses to watch you'll see it disappear overnight.
RW: The law of supply and demand still works. If there's no demand there'll
RW: be no need for a supply.

ID>But you know that will never happen. Again I ask the question: where is
ID>the line? Would you support the "right" for a talkhost to show someone
ID>being killed on TV? Would you support a talkshow airing kiddie porn,
ID>rape videos, or animal sex? At what point do standards come into play?
ID>Or are you saying that you and your brethren have no responsibility at
ID>all? Just trying to get a handle on this.

David,
What I choose to do and what the audience will tolerate are often
very different things. Actually, Talk Show Hosts have no "rights." The
licensees have rights because they also have the responsibility. The FCC
won't take away the show, they'll take away the license (in a million
years, or so).

How can we tout the "rights" of listeners and viewers, then say
we'll decide what's best for them? If viewers demand to see kiddie porn,
someone will give it to them. I won't, but someone will. I guarantee it.

From what I see on the tube, there are no standards. I strongly
believe the only way to rid the business of the kind of crap you're
asking about is for viewers to refuse to watch it. It's like drugs,
until people stop using them, they'll never go away.

REQUEST FOR DISCUSSION (RFD)
rec.radio.digital
**************************************************
```

(This is **NOT** a Call For Votes. A Call For Votes will be issued in the groups to which this message is posted 21 to 30 days from the date that this message first appears. Voting is to be recorded by a neutral third party.)

Group Name: rec.radio.digital (to be gatewayed to RADIO-L) Status: Moderated (RADIO-L moderatorTed Ledingham at ah617@freenet.carleton.ca) Summary: discussion of Digital Audio Broadcasting (DAB) Distribution: World

========== CHARTER ==========

rec.radio.digital Rationale

Two lists on Digital Audio Broadcasting (DAB), RADIO-L and the DIGITAL RADIO DISCUSSION FORUM are planning to merge into one list on RADIO-L on April 1, 1995. These discussions will merge into one forum to better promote the common goals of discussing issues related to DAB. The participants of both fora stand to benefit as the combined subscriptions will bring together more than 300 people from around the world who are actively working in digital radio, or who share an interest in its development and implementation. The merger will involve minor changes for all of the participants. The new list will take place on the current RADIO-L discussion, although will be moderated by DIGITAL RADIO FORUM moderator Ted Ledingham (ah617@freenet.carleton.ca). The archives of both previous fora will remain in their present locations.

Ron Stone established the RADIO-L discussion and alt.radio.digital newsgroup gateway in late 1993. Ted Ledingham, of Canada's Task Force on the Introduction of Digital Radio, established the DIGITAL RADIO DISCUSSION FORUM, which grew out of the Second International Symposium on Digital Audio Broadcasting (Toronto, March 1994). In merging the two memberships as RADIO-L, both Ted Ledingham and Ron Stone will play key roles. Enquiries or problem reports regarding submissions should be directed to Ted Ledingham, ah617@freenet.carleton.ca. Question/difficulties regarding the filelist, archives, subscription or the general administration of RADIO-L should be directed to Ron Stone, ston0030@gold.tc.umn.edu. The list is maintained at St. Paul Computing Services, University of Minnesota.

The participants of DIGITAL RADIO DISCUSSION FORUM will be added to the RADIO-L subscription list on April 1, 1995. After that date, all contributions should be sent to:

RADIO-L@vm1.spcs.umn.edu (Internet)

RADIO-L@UMINN1 (BITNET).

In regard to newsgroup access to the discussions, we are planning to remove the alt.radio.digital newsgroup gateway to the RADIO-L discussion, however are seeking to create a new newsgroup (tentatively rec.radio.digital). The new newsgroup will be gatewayed to the RADIO-L discussion much like the old alt.radio.digital was, except that it will be moderated.

We look forward to the benefits that a combined community will provide, and welcome your comments and suggestions in regard to the administration of the discussion and filelists.

About the RADIO-L discussion

The RADIO-L discussion list is to be a moderated forum for addressing the issues involved in the transition to a Digital Audio Broadcasting (DAB) standard in countries and regions around the world. Discussion regarding the relative merits of:
*various DAB proposals,
*research initiatives (consumer, economic, technical),
*regulatory and policy matters,
*programming initiatives, or the
*social and economic implications of a transition to DAB, is welcome and encouraged in this forum.

A filelist is to serve as an important part of the discussion and would include as a minimum :
FAQs about DAB and related topics
a list of internet resources related to DAB
a bibliography

The creation of this newsgroup would allow wider access to the RADIO-L discussions at a time when countries the world over are planning and implementing DAB serv ice.

We hope that you will support this group, and look forward to your comments and participation in the discussions in news.groups.

Please distribute this proposal to your friends and colleagues. This RFD has been posted to:
RADIO-L@vm1.spcs.umn.edu (alt.radio.digital)
news.announce.newgroups (newgroups@uunet.uu.net)
.....rec.radio.broadcasting

Thank you.

Ronald L. Stone : ston0030@gold.tc.umn.edu : (612) 644-9706

The call letters are CIDR ("D"etroit "R"iver I assume). The format is AAA
(Adult Album Alternative), which is pretty much the same thing as
Progressive. A mix of the lighter alternative tracks, combined with rootsy
and acoustic rock. I think they sound fabulous, it's hard to turn them off.

Dan

Well, CIDR (its new calls) is AAA, but with 20% or so Can-Con, it
sometimes seems like a Neil Youngathon...

Ann Delissi, long-time public-radio "program host" from WDET just moved
over to the River as MD, she should give it much-needed credibility.
Until she moved it was being programmed by a Canadian who just didn't get
it, and was basically copying the playlist from published charts.

AAA, according to the management at the station (owned by CHUM Ltd.) is a pretty good description. The station's making some inroads in BBM and Arbitron surveys on both sides of the river...something that, sadly, they never were able to do trying to recapture the glory days and the sound of the old CKLW-AM (aka The Big 8). Now, they've got all sides of the AOR franchise in the Detroit/Windsor market covered EXCEPT the classic AOR arena, which has a lot of competitors slicing each other up with variations on an all-classic or classic-dominant music mix.
The River 93.9/Mix 89 combo, meanwhile, seems to have just about no one shooting at them in the new rock and AAA arenas where most of the growth in rock radio will be over the next few years. And it's hard to envision anyone rising to challenge them in the immediate future. A good strategic move on operations manager Warren Cosford's part...

Bob Smith, middays WXXI-AM 1370 Rochester NY

Speaking from experience, I have been working in radio as a DJ for over three years in small and medium markets. I started long before I ever thought about entering college. (I had my first show at the age of 16) Now I am beggining to take several courses in Broadcasting at SF State Univ. They are a joke and SF State is considered one of the best broadcasting schools outside of LA. So I have decided to major in marketing instead with only a minor in Broadcasting. Entire schools devoted to broadcasting? HA, don't waste your time. Go find a small market station and work for them. A textbook and classroom studios will never give you the feedback that an audience of 100,000 people will!!!! Oh, and find a good PD or GM who will take you under their wing. Sit in the studio with them during their shifts or ask them to sit in on your shifts to give pointers. The ONLY way to learn is to do it!!

>I don't think anybody suggested getting a degree in broadcasting; I think most people most people who've suggested colleg said to get a degree in anything BUT broadcasting<

I agree.... Radio is very hard to get into as is... whether you have a degree in broadcasting or not... (IMHO). I would second anyone who says that you should get a degree in something else... so if your radio career fails, at least you have something else to fall back on. I am currently a college drop out (tsk tsk) and am working at ONE p/t radio job, which by the way I got even though I never attended any form of broadcasting school...

I was just lucky enough to attend a high school that has it's own radio station. That's where I am working today... and let me point out that it's the three years I worked as a student DJ< that helped me get this job. So in a way I was an "Intern". Actually "student DJ is the more proper term...

One of the full timers at this station, also has no degree in broadcasting. SO you see, attending a broadcasting school isn't necessarily a requirement...

Just for the record. I assume the school we are talking about is the New England School of Broadcasting in Bangor, Maine.

I actually worked with Dave at WWFX in Bangor about 6 years ago. (Hi Dave, E-Mail me and I will let you know what is going on with me now)

NESB is a fine school with a lot of great people. I actually went there for a semester. I left because I felt it was a waste of time. I guess for me it was. Thats not to say that for someone else it may be a great opportunity for a career.

I can see the benefits of going to a broadcasting school but lets face it. No one person or school can make a student into a radio personality. I think there is a bit of an art to it. The days of liner cards and hot clocks are pretty much over. I think a broadcast school will give someone the basics and help them make an educated decision about whether or not Broadcasting is the field for them. But it can't make them into a personality that can share, and inform, and be a "Real Person" on the radio.

I do think it is ludicrous to think that just because a person "graduates" with a certificate that you can automatically place them with a job. It's even harder today with a shrinking job market in this industry. Dave I think we would really all be interested to see the enrollment/placement ratio.

The problem also with a broadcast school is that the industry changes so fast a lot of the time the instructors don't keep up. When the student gets out he finds that things are a lot different than they were at college radio station X.

How do you get into radio? Gosh, I don't even know how I did it. Anyone have any realistic suggestions to persons who want to get into the industry without going to a school? I'm sure they would appreciate it.

ID>I'm really sick of hearing people put down Broadcasting Schools!

Dave,
I'm tired of hearing tapes of people who should be plumbers. I'm tired of seeing their disappointment when I tell them it's unlikely they'll get a job after their "instructors" at their broadcasting schools have convinced them they're the next Imus.

And, most of all, I'm tired of seeing functional illiteracy and blank stares when I ask even a simple question that requires knowledge of, or interest in, much of anything other than what Madonna wore (or didn't wear) at her latest party.

I can teach anyone to run a board and play Disk Jerky in two weeks. I can't teach them what a college education can. I can't teach them what will make them interesting to listen to once they know the mechanics.

I don't hire people for their knowledge of broadcasting. I hire them for their expertise in life, business, politics, education, etc. Then I put them on the air and train them in the mechanics. It makes them far more interesting to listen to.

ID>Maine, or New Hampshire that doesn't employ one or more of our graduates.
ID>We have graduates working at BCN in Boston and at CBS in New York. Don't
ID>ever tell them Broadcast School didn't help. I don't know where you've
ID>been for the last century, but I don't know many stations that hire off
ID>the street anymore. They all want experience,and lots of it.

I've been in major market broadcasting for much of the last century. Stations want experience and a track record. The experience comes only from working at a fully functioning commercial radio station where the daily emergencies have some meaning. It comes from the knowledge that one's mistakes cost money and that one's decisions affect people.

ID>Our students
ID>have 5 modern production studios to work in, plus a low power FM that runs
ID>365 days a year entirely staffed by students. We have a complete 32 track
ID>recording studio, and 3 television editing facilities.

Impressive.

ID>Come visit some time. We'ed be happy to show you where broadcasting is
ID>heading!

In my opinion, broadcasting is headed into the digital realm with more satellites, ISDN, Digital Audio Broadcasting and tapeless studios. Unfortunately, the new human talent we'll need to staff the stations of the future can barely spell their names. I know why they call it Generation X.hlin

To those of us in and around broadcasting towers have a warm place in our hearts. But I can say that if I didn't choose to live along side a tower that was already there when I chose the location, I would be as upset as our writer, and do everything possible to stop the contruction.

In the short term it will probably depress the property values, in the long term it probably won't make much difference. It will definately, however, lessen HIS enjoyment of his property. It's an esthetics/emotional thing. Pick a subject of your choice that you don't want to be near to increase your empathy. A 7/11, a billboard, a church of a faith for which you have little respect, etc.. Towers a this guys hot button.

IJ>You know you really shouldn't use terms like "pooling of ignorance."
IJ>You're not the end all be all of radio.

Jay,
I don't believe I ever claimed to be. Just because I'm not a Talk
Show Host doesn't mean I can't express opinions.

IJ>You sell programs to stations in small markets. I don't think that
IJ>gives you any right to judge or pass judgement.

Actually, the fact that I have a keyboard and an Internet connection
gives me that right. Just like Talk Radio, those opinions can be nothing
more than value judgements. There's no requirement for accuracy. Since
it's radio, no predictions are valid, either.

I checked my affiliate list of current and recent affiliates
(affiliate lists change daily, as you know) and found some of those
"small markets" you mentioned. Among them were New York, San Francisco,
Boston, Miami, Dallas, Portland (OR and ME), Cleveland, Detroit, St.
Louis, Cincinnati, Seattle, San Diego, Denver, Orlando, Indianapolis,
Salt Lake City, Sacramento, Phoenix, San Antonio, Austin, Providence,
Oklahoma City, Norfolk, Birmingham, Rochester ... among many others.

In many of these markets I have more than one affiliate, each
carrying a different show or shows.

The markets I've listed include stations only licensed to the metro,
not 50 miles out. If those are the "small markets" my network appeals
to, I'll just have to live with it. It makes the trips to the bank much
more bearable.

IJ>I didn't know you had WABC's billing figures for the last month. And I'm
IJ>sure they're not loosing money.

Jay,
There are several sources. I didn't say they were losing money.

IJ>You know you really shouldn't use terms like "pooling of ignorance."

Why not? That's what contemporary Talk Radio is becomming. Carefully analyze the accuracy of the content of most Talk Shows and tell me the phrase isn't appropriate. Perhaps you'd be happier with "pooling of inaccuracy." Talk Show Hosts can declare something to be true without fear of having to substantiate it. No one else has the platform to contest it. It's no different than a newspaper running a story under a front page headline. When it's discredited, the retraction is run somewhere behind the classifieds.

Frankly, I don't worry too much about it because Talk Shows have very little impact on real life. They simply don't reach enough of the population. That's why it's so important that they be almost pure entertainment. Even Limbaugh doesn't reach much of the total population. So, when he declares that the US Armed Forces have never been under foreign control, it doesn't really matter. It's inaccurate, but not enough people will hear it.

IJ>You're not the end all be all of radio. You sell programs to stations in
IJ>small markets. I don't think that gives you any right to judge or pass
IJ>judgement. And if you were at WABC you be talking against WOR. Come on
IJ>we've all been doing this long enough to know.

I'm sure my major market affiliates would take offense at that. I "sell" programming to all sorts of markets, many in the top 50. Actually, I often have more than one station (with different shows) in those top 50 markets. It would be difficult to be as profitable as we are without them.

I don't consider WABC to be a competitor in any form other than as another place for my listeners to go, much like VCR's and Rikki Lake. We do completely different programming. Our mission is different. To compare the two is foolish. It's like saying WQXR serves no purpose because it isn't like WRKS.

RW> The problem with Talk Radio today is that there's no variety. There
RW>are 8,000 white male conservative, Republican, superpatriot, felon,
RW>family-values totin', Clinton-bashing talk show hosts on the air (and
RW>one Liberal - you). I've just completed a talent search and found
RW>virtually no one - no one! - who breaks the mold. Same ol, same ol.

IJ>Ok, here I would agree. Talent that is not right-wing and white is very
IJ>hard to find. In fact I think we could all count on are fingers the
IJ>number of liberals left in talk. BTW you didn't call me? :)

Are you kidding? If I stole you from Drew and Tom I'd never hear the
end of it. Lynn Samuels would seem pleasant by comparison! (BTW, Lynn is
my all time favorite on WABC). Actually, Lynn asked me the same
question: "where were you when I needed a job?"

IM>Having been moved to weekends to finish my contract in favor of Ollie
IM>North who yesterday built a "show" out of a single lie in the Washinton
IM>Times about V-J Day, and having corresponded with you in other venues, I
IM>wish we had talked earlier. I may be getting out of the business, but as a
IM>non-conservative, I was able to out-pull WRC at night (8-11) when I was at
IM>public WAMU-FM

Mike,

Over the past couple of years, even a test tone could out pull WRC. :-)
They've gone through some very difficult times. I hope they find a
schedule that works.

I hope it doesn't surprise you that North did that. I also hope you
don't expect that to change any time soon. It's his schtick. Accuracy is
not. No surprise.

IM>by programmers who have come from other formats. The weekends are now
IM>jammed with callers, topics are ambitious and the approach is NOT
IM>conservative. Yet I am looking to get out and Ollie North is lying in the
IM>afternoons.

The more "non-conservatives" who get out of the business, the less
competition the conservatives will have. The problem, for me as a
listener, is that there are no surprises. It's sort of like music radio.
If I want rock, I go to WAAA. If I want Classical, I go to WBBB.

If I want predictable conservative talk, I go to WXXX. If I want
predictable liberal talk, I go to WYYY. The biggest surprise I could
imagine would be for Limbaugh, Severin, Liddy or North to say "that
Democratic proposal is pretty good. I'll support it."

That's why Gene Burns is still my personal favorite. He often
surprised me with a take on an issue I didn't expect.

Bob Cruz had been doing voice work for ABC and others for a long time, and was the voice of "20/20" among other shows. They had put up an "in memory of" slide at the end of one of their shows last month.

Interesting, though not surprising, that CBS-style news radio and sports talk resonates well with the upper income demos, and with the market as a whole. (I like the CBS format best myself, and have always liked WWJ's version of it in Detroit...that's the closest CBS radio O&O to me, though they have a TV O&O now in Buffalo.)

It's also interesting to see how the FAN beats Grant in the afternoon. It may be a sign of a trend that sports talk or other personality talk may be overtaking right wing political talk in popularity. (For example, a sports talk show featuring a former Buffalo Bills assistant coach, Chuck Dickerson, is now beating Rush Limbaugh 12+ and 25-54 in Buffalo.)

Nevertheless, the numbers do prove my basic contention, that when it comes to the prime cuts in demographic terms, WABC is NOT getting the biggest slice, and other less strident versions of the talk format on the AM dial ARE. This is a problem Phil Boyce will have to address, and leads me back to the central question at the heart of this thread...will he want to, or have to, make some siginificant changes in the mix to improve WABC's long term competitive position? And is his appointment, given the kind of station he programmed before, a sign that WABC management WANTS and PLANS to reposition it and remake its image?

Bob Smith, middays WXXI-AM 1370 Rochester NY

Many have wondered why Infinity did not choose WPGC-FM as the outlet to offer the Redskins instead of WJFK/WLIF. The answer is very simple. Why fool with a 10 share franchise radio station, over 3 points ahead of the nearest competitor?
WTEM didn't loose with the 'Skins because of signal problems. It was because their production costs and rights fees were too high and the team was going through two miserable rebuilding losing seasons. Dwindling interest and decreased ad revenue added up to lots of red ink. Radio watchers have complained for years that the WJFK-FM signal was too crippled to ever allow the station to become successful. Infinity has proven them dead wrong. WLIF-FM has a monster signal and will cover the northside DC metro area very adequately whereever there may be a problem with JFK-FM. Service to other fringe areas with any hint of signal problems will be provided by the many 'Skins network affiliates. Who knows....maybe FLAVA1580 WPGC-AM (50 kw) will be one of those affiliates.

Marc,

It's been a long time... It's amazing how many people I have run into here that I haven't heard from or talked to in years...

This is Steve Davis from Birmingham, Atlanta, Philly, etc... We last spoke years ago... I hope you are well, (and yes, I agree, Todd is an "ace" guy.. We have started up a nice phone friendship over the past few months..)

I am Programming WMXB, Richmond , a Hot AC. Drop me a note when you get a chance...

Boy, that recap was nice to read!

When I was running WPLR in New Haven I thouroughly enjoyed that station.
Always wondered about the Larry Millers and what happened.

The 70's were a time of true art and risk on radio and we took our share of it
in New Haven....probably the 10 best years I've ever had in radio.

Really enjoyed reading Mark Scott's posting about Danny Neaverth and his son Darren.

I remember Danny from the early/mid 60's, when he had the afternoon drive shift on WKBW radio in Buffalo. I lived in New Jersey and could get KB's blowtorch skywave signal. I would tune in during the winter months, and listen to the "Danny-Joey changeover" at 7, and then the Joey Reynolds show until midnight. Since KB did the news at "20 after and 20 of" in those days, Danny and Joey were able to develop that shift change into quite an art form. Does anyone remember Joey's "Loyal Order Of The Night People" club? At one point, Joey even claimed - due to KB's skywave - that he was "number two in Baltimore".

After Joey left KB, I think he was at WXYZ in Detroit for awhile. He also turned up about 12 years ago doing the overnight shift at KOA in Denver. Anyone know his whereabouts today?

Subject: KSTP-FM
Status: RO

This just in: KSTP-FM Radio 94.5 went ahead with a goldfish-eating promotion Thursday (March 23) in spite of opposition from a local animal-rights organization.
The executive director of the Minnesota Humane Society called it "gleeful disobedience of the animal-cruelty statutes."
The winner eschewed attempts to seize the slippery fish by picking up the bowl and "just drank it with all the fish in it," according to KS-95's program director Bob Davis. All contestants wore ski masks, and the contest was moved, because of the Humane Society's complaints, from the Mall of America to a "secret" location which turned out to be the station's studios.
The winner got tickets to a Chicago concert by Hootie and the Blowfish. Losers got tickets to Thursday's Minneapolis "Blowfish" show. There was no corresponding contest for tickets to see the opening act "Toad the Wet Sprocket."

I response to a question about Bill Mack of WBAP Dallas/Ft. Worth, a friend tells me via e-mail:

I listened to WBAP last night on the way home. A guy named "Big Bill Brady" was on the air filling in for Bill-- as Bill was on his way to Louisville for a truckers' convention. But all WBAP promos and commercials were still plugging Mack-- he is still on WBAP. Perhaps this person looking for him listened on a Friday or Saturday night-- because that would be Bill's weekend. He is on Sundays-Thursdays. I'm going to listen tonight-- he is live from Louisville. "...My boy, my boy."

Hope this helps.

There was also a contest in the weekend color comics, as I recall, with entries sent in to the Jungle Jay show.

Dan Neaverth is still on in Buffalo, doing morning on WHTT-FM, Oldies 104. His supporting cast includes his two sons, and his daughter-in-law does the air shift after his. He's nearing 40 years on Buffalo radio, most at the old WKBW. His original shaft was afternoon drive, but in 1970 he went to morning drive, replacing Stan Roberts.

Stan Roberts took over AM drive on WKBW after Jay Nelson went to Toronto. Roberts, known for his corny style, stayed at KB until 1970, when he went to Boston. Neaverth took over the morning drive at KB, and has been a morning man ever since. Roberts came back to Buffalo in 1972, and took over mornings at WGR-AM, going against his old pal Dan Neaverth (neither could overtake Clint Buehlmann at WBEN..."yours truly Buehly" was the guy to turn to for the school closings!). Roberts went from WGR to WBEN in the 1980s, and did afternoon drive for awhile. Roberts now does sales for WBEN, and does the station's entertainment reports.

Jeff Kaye, who was program director at the old KB during its glory years of the late 60s and early 70s, later did air work on WBEN-AM Buffalo, and is now one of the voices of NFL Films. You can usually hear him on football trivia question commercials during NFL telecasts.

Tom Shannon, another Buffalo area native, did evenings on KB in the early 1960s. He went on to Denver and Detroit, and came back to Buffalo about ten or

so years ago before leaving town again. Shannon's high school band, the Rockin' Rebels, had an instrumental hit with "Wild Weekend" in the early 60s...it was Shannon's theme song (with lyrics added: "KB Radio, Tommy Shannon Show...").

Joey Reynolds (real name Joe Pinto) grew up in Buffalo, and is an old childhood pal of Dan Neaverth. The two worked together for several years (and recorded the novelty hit "Rats In My Room"). Joey's first big radio gig was at WKBW, until he was fired in the mid-60s for failing to show up on WKBW-TV's annual benefit telethon for Children's Hospital. He reportedly nailed a pair of shoes to the PD's door with a note saying "Fill these". Joey was (and is) a great radio talent with no respect for authority...he has been fired from many radio stations across the country. Remember Joey's theme song, by the Four Seasons (sung to "Big Girls Don't Cry": "Joey, Joey Reynolds Show, what a show, on TV and radio-o-o-o-o-o-o")?

Rod Roddy, who worked at 'KB in the mid 60s, is now doing voice work in LA...he's the voice of "The Price is Right" game show ("Come On Down!"), and he was the narrator for "Soap" (or was it "Mary Hartman Mary Hartman?").

In the mid 60s, Bud Ballou did the evening shift on KB. One of his characters was Stanley the Engineer ("Isn't dat awful dere?"). Ballou went on to Boston (WMEX I think), and sadly, passed away a few years later.

Sandy Beach replaced Ballou, and stayed at KB for several years. He started on the evening shift, then soon went to afternoon drive. Noted for his sharply sarcastic style, Beach also worked for WGR-AM, WNYS-FM (now WHTT-FM), WMJQ-FM in Buffalo, and then WMJQ-FM's sister station WBEN-AM, where he did talk...quite well, I think. Beach also worked in Erie PA, and San Francisco CA for a while, before he returned to Buffalo another time. A year or two ago Beach went to Milwaukee, to an oldies station there. I think he's still there.

Don Berns, another late 60s/early 70s KB jock, now lives in Toronto, and is active in playing new music in clubs. I think he still does some air shift in Toronto, but I don't know the particulars.

Jackson Armstrong was perhaps the most well-known of the KB personalities during the "glory days" of the early 70s at KB. His style was high power, and he became quite famous on WKBW's 50 thousand watt signal, heard up and down the Eastern Seaboard. The fastest man on radio (and one of the deafest...he was known for very loud headphones and air monitors), Armstrong left KB in early 1973 for Pittsburgh, and last I heard was doing midday on a small station somewhere in California.

Shane (Ronald Maxwell Gibson) came to WKBW in late 1973, after Armstrong left. He was the runner-up in KB's "Great American Talent Hunt", in which listeners got to vote on what DJ they wanted to replace Jack Armstrong. The Janitor won, but only lasted a couple of months. Then Jeff Kaye hired Shane. Known as the "Cosmic Cowboy", Shane did a lot of his own poetry on the show. "Shane Brother Shane" also did air shifts at WYSL and WGR, and he still lives in Buffalo. He has taken up politics, and has unsuccessfully run for a seat on the Buffalo Common Council.

Perhaps my favorite all-time KB DJ (and later on WGR-AM) was Jerry Farrell. He only did radio on weekends, as his full-time job was as PR director for the Robert Moses Power Project in Niagara Falls. But his shows were terrific, and it was obvious that he loved doing radio. Farrell died unexpectedly of a heart attack in 1977, only in his 40s.

There were others, but those are the names that come to mind now. Enjoy!

2148. WPGR-1540 tapes wanted

Newsgroup: rec.radio.broadcasting
Date: 1995-03-25 05:10:56 UTC
From: Paul_in_NJ <72212.441@compuserve.com>
Message-ID: <3l08l0$10k@vixen.cso.uiuc.edu>
Source record: 33556

I would like to get one or more tapes of WPGR-1540 in the Philadelphia radio market.

According to Billboard's Vox Jox, WPGR "Geater Gold Radio" is soon to become brokered ethnic. They currently have an old-oldies format that is very unique.

I would like to get several tapes of this station before that happens...especially of the "Geater" in the afternoon. He is on 2-6 pm, according to a station employee on the phone today (who said he "could not comment" about the Billboard blurb).

If anyone is in the Philly area who could tape AM 1540 for me please get in touch. I can trade/pay/etc.

Another observation is that the new format may need a new transmitter site; there is a land "for sale" sign at their current site on Ridge Pike in Roxborough.

Archive-name: greaseman-faq

The Greaseman is a radio personality on the Infinity Broadcasting network. He broadcasts from Los Angeles to New York City, Washington, Atlanta, Philadelphia, and San Jose. He is known for his bits and song parodies. He also has his own vocabulary which he uses to avoid trouble with the FCC. Before, he broadcast out of DC on DC/101 where he competed and beat Howard Stern on a consistant basis. The Greaseman is on by himself most of the time, though sometimes you hear his producer, Bill Scanlan cackling in the background.

Q: What is the Greaseman's real name?

A: Doug Tracht. He prefers to keep his radio life and his personal life separate. His radio name is Nino Greasemaneli.

Q: Why does Howard Stern hate the Greaseman so much?

A: Howard worked for DC/101 until he got fired. When the Greaseman was hired to take Howie's place he not only held on to Howie's audience but increased it. Then when Howard syndicated in DC he competed with the Grease until the Grease moved to Infinity where they now are co-workers for the Broadcasting Giant. Now, mentions of the Greaseman on the Howard Stern show appears to be just an act in part of Stern.

Q: Which one was the Grease in the Village People?

A: He was not really in the Village People. But in the bit, he was the construction worker.

Q: What is this Bingo that the Grease dislikes so much?

A: The Greaseman's college nick name... Ask him about it.

Q: How can I get in touch with him?

A: Call him between 1730 and 2200 EST at 1-800-544-9294 and 1-213-850-0986 (FAX) and BTW do not address him as "dude".

Q: What bits does the Greaseman do?

A: Fudgeman- Fudgeman and his chicken assistant throbin
save the world from deviant behavior
Back in time with an uzi-
the Grease uses the equipment in the radio
studio to return to key moments in history

with his uzi
Carlos the International Terrorist-
Episodes of running into the famed and heavily
armed terrorist, Carlos
Medical Man- Stories about when Nino was the pompous
Dr. Greasemaneli
Bet the Bomb Bays-
Try to stump the Grease, but if you don't, you best
drop them pants....
Sgt. Fury- the Grease relives his time in Viet
Deliverance 101-

A unique workout for men
Baby talk- Conversations with the unborn
The Greaseman Quiz (formerly the morning quiz)-
Watch out Alex Trebek, here comes the Greaseman
Hobo-doo-ga-ga Handbook-

Methods to which recieve ingus.
Damien- The Grease has occasion to run into the "dark master"
while he is trying to perform his duties.

Q: What is the alarm that is sometimes heard in the background when the
Greaseman talks?

A: The Geeze alarm. This goes off when the greaseman starts geezing.

Q: What other gigs did Grease do on the radio?

A: Like any other up-and-coming DJ, Grease worked at other stations in
other markets to develop his unique style. They include:

Washington DC (WRC-AM 980) 1974 - 1976
Jacksonville, Florida (WAPE) 1976 - 1981
Washington DC (WWDC-FM 101.1) 1981-1993

Q: Did he always leave on good terms?

In almost all cases, yes. The one notable exception was WRC, when
management decided his morning personality wasn't quite right, and gave
him a choice between dropping the "Greaseman" character and leaving.
Grease chose the latter. If you ask about it today, he will joke about
the time he was collecting unemployment insurance in DC and would "stay
up to watch the moon rise and CURSE THE NIGHT!" although I'm sure at the
time it was somewhat unsettling.

Although he left Florida voluntarily to take the better offer at DC-101,
he did offend some bible-belt types during his stay. The Florida gig
was important to developing the Grease as a "god-fearing, truck-driving
redneck," though. The Florida station has since gone to religious music
("From Grease to Grace" was their motto for a while). Their loss.

Q: Are there any good biographies or other comprehensive stories about
the Greaseman?

A: Grease is a very private person, and spent a number of years in DC
before finally consenting to an in-depth story about him in the
Washington Post Magazine Fall 1987. It's a good resource to summarize
his past gigs and overall life story. Also the Washingtonian Magazine
did an article on him in the January of 1993 in commemeration of his
departure from DC.

Grease also appeared on the Larry King Show (early to mid-80's) to talk
about morning radio in general. The only down side was that he was
teamed with a "Morning Zoo" DJ as a co-interviewee, a format that has
become annoyingly ubiquitous on the radio landscape. Transcripts may be
available (don't know how to get them, sorry). This is the old
Mutual show that ran all night (Grease probably got up early to do it :-),
and not the current CNN TV talk show.

Q: Are there any albums or compilations of Grease bits?

A: There was a 4-part "Best of Grease" compilation, available on cassettes. These became unavailable shortly before he left DC-101. They are now prized collectors items and can only be obtained from private owners. Part of Grease's popularity on a national basis before he went into syndication (and hence part of the motivation for this newsgroup) was the creation and exchange of bootleg tapes among an extended network of fans. Some of his best work has never been republished (although you can occasionally talk him into doing them again on his current show).

Q: Did Grease ever serve in the military?

A: Like John Wayne, Grease has a deep and abiding respect for everyone who serves in uniform, but never served himself. During the Vietnam war, he was attending Ithaca College in New York, and his draft number never came up.

Q: But Grease did serve as a policeman?

A: Yes, he did. While working at his gig in Florida, he worked as a reserve police officer on the night shift. Morning staffers would be jolted out of their bleary-eyed state by the sight of Grease doing his show in full uniform with a 44 Magnum strapped to his belt.

Q: Is Greaseman a bigot/homophobe?

A: Certainly not. Like the program "In Living Color" or even rec.humor.funny, Grease parodies what's funny in everyone, and winds up defusing hatred as a result. Grease respects all of his fans, and wishes well even those who don't like him.

Q: But there was that "Martin Luther King, Jr." incident in DC?

A: Yes, sometimes there's a fine line between parody and cruelty, and Grease crossed the line only once during his otherwise unmarred broadcasting career spanning over 2 decades.

Sometime in the late 80's, he was noting the passing of Martin Luther King Jr.'s birthday (which had then only recently become a national holiday). Grease said something about "killing 4 more and getting rest of the week off." Grease was suspended, and apologized for the incident on an "Editorial Rebuttal" on WRC-TV in DC.

Haven't the rest of you made mistakes or are you all perfect?

Q: What does AMF mean?

A: Adios my friend.

Q: What is the "Bit without an Ending?"

A: When Grease was working in Florida, he would be prevented from getting a good day's sleep after his morning gig by thoughtless model-airplane enthusiasts who would buzz their models outside his window.

Grease came up with a revenge skit with a model plane of his own that would shoot the others out of the sky. The plane became posessed by Damien and started chasing after him. Grease then got too deep into this bit without a way out (and tried to incorporate this into the bit). After fumbling with the sound-effects, and trying a foray South of the Border, and then calling in Big-Dick Brannigan, he finally gave up groping for a punch line. Grease can usually be counted on to do some of the most impressive ad-libbing and improvisation on the radio today, but at that time his talents failed him. The bit originally aired in the Fall of 1982 from WWDC FM Washington, DC/101.

It's considered a classic, and is on Vol. 1 of the "Best of Grease" tapes. He owns the rights to all his bits, and may rerun it on his current show from time to time.

Q: What stations carry the Greaseman?

A: City Station Time
==== ======= ====
Washington DC 106.7 WJFK 1900-2300
Baltimore MD 1300 WJFK 1900-2300
New York NY 92.3 WXRK 1800-2200
Philadelphia PA 94.1 WYSP 1800-2200
Los Angeles CA 95.5 KLOS 2300-0000
Atlanta GA 92.9 WZGC 0600-1000

Q: I like what I have read so far, but the Greaseman is not currently in my city. Is there another way I can get hold of this zanyness?

A: Sure there is, there is currently a Greaseman Web server at http://absolut.gmu.edu/greaseman/ where you can listen to some of his bits.

programming?
Q11. I have some old transcriptions and tapes, how can I make them
sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the themes of
OTR programs?
Q16. Is there a World Wide Web page (URL) or FTP address that I can
```

access for more info?
Q17. How do I subscribe to the OTR electronic newsletter?
Q18. Can I get archived copies of old issues of the OTR newsletter?
Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?
Q22. What is the best radio / antenna to get distant OTR stations?
Q23. Is there a group for modern radio drama ("new-time radio")?

Q1. What is "OTR"?
A1. OTR is an abbreviation for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the early 1950's. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures.

Q2. You haven't mentioned OTR music, why not?
A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. There is no restriction to discussing OTR music in the OTR Newsletter.

Q3. Where can I buy recordings of old radio shows?
A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from the OTR WWW page or FTP address listed later.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?
A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR newsletter to learn of their experiences, then check with potential vendors.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is ongoing, and is summarized at the archive site, and my FTP / WWW sites.

Q5. Are OTR shows rebroadcast? If so, where and when?
A5. Yes, several AM and FM radio stations, three satellite feeds and a shortwave station rebroadcast OTR. Check my OTR WWW page or FTP site for current info. If you learn of other sources, leave a note!

Julian A. Smith (jsmith@blues.epas.utoronto.ca), Frank Passage (passage@pluto.dss.com) and Bill Pfeiffer left the following information:

For AM listening, try the brand-new National Radio Club's _AM Radio Log, 15th Edition: Complete Listing

of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price range: $20.00]

For FM listening, I'd suggest Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at 800-248-4242 or +1 212 473 4668 voice, or +1 212 473 4626 fax. The address is M Street Corp., 304 Park Ave S Floor 7, New York, NY 10010 USA. costs $29.95 + p/h,

Those lucky listeners living near Boston can have a periodic update of local OTR programming by sending email to Noah Schaffer, at nschaff@k12.oit.umass.edu. Noah will send you monthly OTR & Radio Drama updates, including program titles and station/frequency/time data.

Q6. I remember a great show called (x). When was it aired?
A6. Check with subscribers to OTR newsletter, or look through the program database (WWW or FTP). Also see answer A14 below.

Q7. Are there any books about OTR?
A7. Yes, there are several books related to OTR. See my WWW page or FTP site for a list of some of them.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books
acornbks@netcom.com

Q8. Does anybody trade tapes of OTR shows?
A8. Yes. Check with subscribers to the OTR newsletter. We hope to get a database of private traders as well. Leave a note in the

OTR newsletter if you want to trade, or send email to me if you want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?
A9. The copyrights on most OTR shows have expired. A few copyrights have been renewed. Examples of the latter include The Shadow and some of Arch Oboler's productions. See my WWW site for both "common sense" and legal citations.

Q10. How can I get my local radio station to broadcast OTR programming?
A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us: "The days of radio being ruled by the artisians is over, and for some time now it has been in the hands of people who only look at the bottom line, so to reach them you must talk through public radio pledges, or through sponsors on commercial stations."

Q11. I have some old transcriptions and tapes, how can I make them sound better?
A11. You might try using a good equalizer and/or digital signal processing unit (DSP) between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables and sound processing units that can dramatically improve old recordings. Their sound processing unit runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all their material at the following site: ftp.atd.ucar.edu. Log on with the usual anonymous then, your routine password. head on over to /pub/dat-heads/ You will find a wealth of info up there. All the digests to the current day, and mike

faqs, as well as market postings on equipment. Highly recommendable for anyone to get their feet wet in this media. Happy taping

Q12. Are there any OTR clubs near me?
A12. Check the two club listings in my WWW page, and leave a note in the OTR Newsletter asking about local clubs for your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?
A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program serial?
A14. Some of the larger vendors / collectors may have this data. If you find such a publicly available source, we can make it available in the Internet OTR file repository.

Some of the OTR Newsletter subscribers have contributed Program Logs for several well-known series. The logs are available at my FTP/WWW site.

The "logs and publications" entry in my WWW page gives names and addresses of several vendors of these items. It can be FTP'd as sou_pub.otr. (Thanks to RadioJoe5@aol.com (Joe Coleman))

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of -The Ultimate History of Network Radio Programming and Guide to All Circulating Shows- (last supplemented in Oct 94). Jay's address is:

Jay Hickerson
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?
A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR newsletter for inclusion in one of our databases.

Jim Widner has contributed some synopses / introductions to various programs. They are on file at his and my WWW/FTP sites.

Q16. Is there a World Wide Web page (URL) or FTP address that I can access for more information?
A16. Yes, there are four WWW sites, as well as two anonymous FTP addresses and a Gopher. The four WWW sites are independent, and contain different information. The FTP directories each contain different files & information. My FTP site holds OTR station lists, catalogs / libraries, bibliography, the most recent FAQ, etc. The Airwaves FTP site holds archived copies of the OTR digests as well as other files relating to -Airwaves- and rec.radio.broadcasting. The Bellingham page is described elsewhere in this FAQ. Jim Widner's page has text, pictures and sound clips.

If you learn of any other sites, I'd appreciate your informing me via email!

(1) My site:

World Wide Web URL:
ftp://ftp.crl.com/users/lg/lgenco/otr.html

FTP:
Anonymous FTP to ftp.crl.com
directory: users/lg/lgenco

(2) AIRWAVES E-Publishing's Site (courtesy of Bill Pfeiffer):

FTP:
Anonymous FTP to radio.aiss.uiuc.edu,
directory: misc/rec.radio.b-cast/OTR.

GOPHER:
gopher radio.aiss.uiuc.edu 7070
(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

(3) The Bellingham Antique Radio Museum
World Wide Web URL:
http://www.pacificrim.net:80/~radio/

(4) Jim Widner's new homepage
World Wide Web URL:
http://www.infinet.com/~jwidner/otrweb.html

For subscribers without normal FTP access, there is a FTP-by-mail server that will automagically send you a copy of the latest OTR FAQ. To receive a FAQ, send email in -exactly- this format (the case of the file name IS important):
To: lgenco@crl.com
Subject: Request otr.faq
(the body of the message is ignored)

Q17. How do I (un)subscribe to the OTR electronic newsletter?
A17. To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

Q18. Can I get archived copies of old issues of the OTR newsletter?
A18. Yes. The OTR Digests and Index are updated three times a week, and are accessible through the first two WWW pages mentioned above, or from the AIRWAVES anonymous FTP site mentioned above.

Q19. What is the best way to archive OTR programs?
A19. The most popular way seems to be reel-reel tapes, using each of the four tracks to record monophonically. Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind
1839 Frankfort Ave.
Louisville, Kentucky 40206
Tel. (502) 895-2405
Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines, Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment
division at 1-800-622-0022 or call Radio World
magazine at 703-998-7600 for subscription

information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

Q20. My old reels squeak. Why does this happen, and can I fix it?
A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a lubricating film can be automatically applied to the tape as it is played. I tried it. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape expand a bit, so it doesn't fit the machined tape-guides properly anymore; and they can interfere with the lubrication impregnated into the tape; and it is theorized they can even interfere with the polished smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the formulation of the plastic backing and binder. In the mid-70's, both 3M (Scotch) and Ampex, the two major tape manufacturers, started experimenting with their formulas. They thought they were introducing major improvements, but instead created a tape much more prone to hydrolization than anything had ever been. The problem did not show up for years, and the formulas did not get corrected until sometime in the mid-80's. Theoretically any tape could get hydrolyzed over a long period of time, especially if stored in a high-humidity situation, but in

practice most squeaky tapes were made (roughly speaking)
between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and
entreprenurially successful producer of radio drama in
the US today) gave me his formula and I've done it many
times now and it works:

Bake the tapes in a convection oven for 8 hours at 130
degrees Fahrenheit. It is entirely possible to bake a
tape twice if the first time doesn't do the trick. You
get about a three-week "window", sez Tom, before the tape
starts to re-absorb water. So the best deal is to bake
the tape and immediately make a copy. But if you forget
to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?
A21. An excellent place for discussions about antique radios,
phonographs and accessories is the rec.antiques.radio+phono
newsgroup, created by Bill Robie. His FAQ may also be found at my
WWW site.

The WWW site, "The Bellingham Antique Radio Museum" is also
available through my WWW site, or directly via URL
http://www.pacificrim.net:80/~radio/. This site contains info and
GIFs on old radio hardware, as well as soundclips (.au files) of
OTR show intros. Well worth visiting!

(The Bellingham Antique Radio Museum is a private collection
gathered over the past 20 years by Jonathan Winter.)

Q22. What is the best radio / antenna to get distant OTR stations?
A22. Several readers have been acclaiming the GE SuperRadio III as an
excellent choice for picking up distant stations that carry OTR
programming. Although the tuning dial has notoriously poor
calibration, the sensitivity and selectivity seem superior to
other radios. A SuperRadio FAQ is available at my WWW / ftp site.

-Some- readers have had good success with the Select-A-Tenna
antenna advertised in several magazines, and the Grove Catalog.
The S-A-T seems to be rather directional, and may eliminate
off-axis interference. Ham Radio magazines sometimes carry
information about small loop antennas for AM DX-ing.

Dan Hughes <dhughes@prairienet.org> left this note:

Several years ago one of the electronic magazines ran
plans with dimensions and number of turns, etc to build
one of these antennas. I have built several and I'm no
mechanic. If you (or anyone else reading this) would
like a copy of the article and plans, drop me a stamped,
self-addressed envelope: Dan Hughes, P.O. Box 933,
Urbana IL 61801.

Q23. Is there a group for modern radio drama ("new-time radio")?
A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you. Meanwhile, johnsd@logica.com (DJ) tells us that there's a new mailing list has been set up for anyone interested in the technical aspects of radio drama production. To subscribe to the new discussion list send a "subscribe radiodrama" message to radiodrama-request@world.std.com.

I am also 19 and have been in radio for over 3 years. I started in high
school and had my own show at the age of 16. I suggest finding a small
station and starting there. Part time jobs are easy to come by at smaller
stations. The pay isn't great but I have been making $7/hr at my most
recent radio job. I have worked for three stations, 2 AM and 1 FM.

> get a degree in Broadcasting or do I attempt to get an entry level job at a Radio Station
and work up.
> Or do I go to some sort of Broadcasting School, if so what do you think of the

I am attending SF State Univ. with a major in Broadcasting, because that is
the only way to get classes, but I have been disappointed with them. I have
learned a lot more in a lot shorter time by working in radio. I am minoring
in marketing and sales, I suggest giving yourself something to fall back
on.

GOOD LUCK!!

Costa was back this morning...they played a spoof of the Welcome Back Kotter theme.

Does anyone know (JJ?) the station in Portland that he will carried by? I worked in the market for a few years, and believe me, Portland needs a CHR desparately. The only station that is doing anything close to hit music is WHYR (R-96), a 3kw out of Saco. To give you an idea how bad the station is, here was the set I heard when driving home last week:

Ugly Kid Joe, "Cat's In The Cradle"
Van Halen's new record
Toad The Wet Sprocket, "Walk On The Ocean"

pretty good, heh?

Geno Teare

About 6 years ago I was installing a Media Touch Systems automation system at KBET in Canyon Country California, where I met a woman by the name of Maggie Melanson, going by the radio handle of "Maggie McKay".
We became close friends, and traveled to far and distant tourist traps together, including Jasper State Park, in Alberta Canada, Rome, Italy, Martha's Vinyard on the Cape...and then lost touch.

So, I'm driving around in the Framingham Mass. area yesterday, and I hit the search button on my car radio...it lands on AM 1200 WKOX in Framingham...and I hear Maggie...at least I think it's Maggie...the voice was running a program, obviously from UniStar (used to be TranStar Radio Network), it's the "Real Country" format originating from the Sunset strip in smoggy LA.

Maggie left KBET when the station fired it's staff and went fully automated using the Media Touch System, and she was operating at TranStar under the name "Maggie McKay" on the weekends.

Now I hear her on the air (again, I'm assuming that it's her) on UniStar's "Real Country" doing a live request show under the name of "Chris Wilson".

Can anyone confirm that Chris is Maggie?

The fact that I've worked in the Dallas market for the past seven years may not qualify me to comment on the state of this city's quality of radio simply because I can't be bothered to listen to FM radio. If I want to hear 40 minute music sweeps I can slap in my own equalized cassettes and not have to put up with flat sounding stations, boring disc jockeys and six minute stop sets at the obligatory :25 and :50. Of course, these occur just after the p.s.a. and "for more information call me here at KXXX". Is that the sound of digital tuners being changed? No, it can't be because everywhere else the seek function lands, the same thing is happening. As far as information is concerned, Dallas AM radio is great if you want to hear play by play of Aggie Lacrosse games, high school football, or Clinton bashing Rush Limbaugh wannabees.

It might be difficult to bring back the style of that era today when most of the jocks capable of that type of radio are either a)dead, b)working at WCBS-FM OR c)selling insurance.

Pristine Systems used to market a DAT automation system utilizing Tascam DA-30 machines. As I recall, there were some data timing problems if you triued to control the DA-30s from one of the newer, faster PCs. Anything over about a 386-25 sent it into occasional seizures. It was quite reliable however at slower clocking rates. No tones...and the tracks were randomly accessable.

I don't know if they still market the DAT system. It would be worth a call, I guess. Try 310-670-7500.

Anyone out there heard McLains new radio program? I read some time ago that on Feb 13 he was to have started a sydicated radio prog 9-midnite EST on the american entertainment network. As far as I know, no Detroit area affiliate has picked it up (I live in metro Detroit). Anyone else hear it or heard anything about it?

Thanks

Tim

2162. Equalizing For Broadcast

Newsgroup: rec.radio.broadcasting
Date: 1995-03-26 09:21:37 UTC
From: robert573@dallas.relay.ucm.org
Message-ID: <3l3bn1$f44@vixen.cso.uiuc.edu>
Source record: 33569

OK let me make this as simple as possible... We have a very rare and extensive collection of music which we will be putting on DAT tape for broadcasting. The source material of this collection varies (i.e. some is from vinyl LP's, some is from cassettes, and some is from store bought CD's).

Here is my question: I would like to know if there is any sort of processing device on the market, that would allow me to make the finished product DAT tape, sound as similar as possible to the quality of CD's made by such places as TM Century, and / or Broadcast Programming, etc...

I mainly want to make the recordings "brighter" but I don't want that "hollow" sound that results from your basic EQ curves. I have been told there is a proccess called "Phase Shifiting" which may or may not do what I need.

Can anyone offer any advice and recomendations as to what processing gear I could look for, to "spice up" the DAT tapes, and make them more punchy? I know that record companies will mix special digital masters of songs for radio stations and record promoters, etc... But is there a way I can take what we have, and make it sound that good for broadcast?

Thanks in advance

Rob Bass

>After Joey left KB, I think he was at WXYZ in Detroit for awhile. He also
>turned up about 12 years ago doing the overnight shift at KOA in Denver.
>Anyone know his whereabouts today?

I co hosted a show with Joey in Philadelphia (WFIL) back in those wild, crazy, 80's.

Joey did a cross country tour ...doing week-long fill-ins at stations all over the country. When he filled-in at WFIL, they asked him to come aboard for good.
The show took off, got a lot of notice, but things got repetitious, the interest died, and Joey moved along.

He's still an incredible talent, still a very funny guy, and occassionally employed. He replaced Howard Stern for the last gasp of WNBC. When he was fired there, he alleges that he and Soupy Sales laid down on the floor of the hallway at the GM's doorsteps clutching flowers in their hands.

Of course a reprise of the legendary shoes-nailed-to-the-door story ("fill these, asshole.)

He later worked at WIOD in Miami, and has done some morning show gigs on the Florida coast. He's still in Fla, but I don't know if he's on the air.

Other than the shareware stuff on ftp archives, there's Deck II put out by a couple of programmers who used to work for digidesign. Digidesign puts out ProTools and Session 8. The benefit of Deck II is that it is software based like SAW. SAW is for PCs only but Deck II is for Macs. And it's reletively well priced. As for the functionality of it, I'm not sure. Somewhere in all my notes I've got an e-mail address of some people who know a lot more about Deck II than I do. E-mail me for their address if you're interested. Deck II, the last I heard, was selling for around $500.

I any case... you'll probably have to get a sound card or memory enhancements to your performa even with SoundEffects 0.91. I've got the same computer you've got A performa 450 4/120. It's not as fast as the IIci so there's few limitations that you need to consider unless you go out and get another computer entirely.

From: umar@tiac.net
Message-ID: <3l3bnb$f4m@vixen.cso.uiuc.edu>
Source record: 33581

We bought DigiCart I's in March 1993, just before the II was introduced. We upgraded all three units to Digi-Cart II 2.2.13D in November, then in 1994 we replaced the Bernoulli drives with the DigiCart II multiformat drives and converted to version 2.2.12L firmware. We are now in the process of upgrading to 2.40 firmware.

Yes we did have lockup problems similar to the one you describe. The cause turned out to be fingerprints on the Bernoulli disks. When the disk is inserted, the metal cover opens exposing the actual disk medium. It is quite easy to touch the disk material with your finger as you insert or remove the disk. If you do so, the oils on your skin will damage the disk surface. There is no way to repair the damage.

To test for fingerprints, hold the disk in front of your face in a strong light and open the cover. Any fingerprints will appear on the exposed disk surface. A disk that has been fingerprinted will not work reliably; lockups will be quite common. Toss the disk and give your staff a good talking to.

2175. Standards in media? Are there any? (was: Re: NBC/Monitor)

Newsgroup: rec.radio.broadcasting
Date: 1995-03-26 09:21:48 UTC
From: dk@crl.com
Message-ID: <3l3bnc$f4o@vixen.cso.uiuc.edu>
Source record: 33582

richwood@commspec.com wrote:

: How can we tout the "rights" of listeners and viewers, then say
: we'll decide what's best for them? If viewers demand to see kiddie porn,
: someone will give it to them. I won't, but someone will. I guarantee it.

Rich, first of all, I respect you and your contributions to the online broadcasting community, but for the THIRD time you still haven't answered my question: As what point do standards come into play? Would you support showing killing on a TV talkshow for the tittilation of the audience? Would you support the airing of kiddie porn if the audience wanted to see this? Where would YOU draw the line on standards? Where do you think the industry as a whole should draw the line? Or do you think any standards of decency should be enforced at all?

I think by sidestepping this question for the 3rd time you're trying to play both sides here. Surely, you have standards; I've seen what you've written over the past 4 or 5 years. Why are you reluctant to apply those standards to programs under your control and to recommend that they be applied in some fashion? You're not a whore.

Please, this is a time when people have to speak up for some kind of standards of decency or we WILL see executions on TV, kiddie porn, and who knows what else. If you don't take the first step, who WILL?

: From what I see on the tube, there are no standards. I strongly
: believe the only way to rid the business of the kind of crap you're
: asking about is for viewers to refuse to watch it. It's like drugs,
: until people stop using them, they'll never go away.

Police departments routinely put people into detox to get them dried out from liquor and drugs because the police know the people are powerless to do it themselves. You're in a position to exert some influence in programming standards, yet you prefer that people stay hooked to their drug of choice (tabloid TV) and you're not going to do a thing about it?

It's been my experience that just because you receive permission from the FCC to put up a tower DOESN'T mean you'll be able to.

In past experience with stations, it certainly does matter if you receive permission from local / county regulatory agencies.

Case in point: KPWR in Los Angeles wanted to move their tower a few years back. The FCC would not give them permission to move to their proposed new site (closer to the city, better coverage etc) until they had exhausted their effort to place the tower somewhere in between the present site and the proposed site. When they returned with numerous rejections and letters saying they would not be allowed to put up a new tower in many of the localities, the FCC granted their original wish.

At my station when it signed on, the FCC had granted the CP and our owner still had to convince the localality it was of no harm / ugly / etc. In fact, later he received a CP to extend the tower past 1000', but the city would not allow this. So our tower sits slightly lower...

(the KPWR and other facts come from many conversations with our Chief, Mark Humphrey...a man with way toooo much knowledge).

>& demos like we can in the states? Thanks, Eye Lipson

We have RAJAR - Radio Joint Audience Research, jointly owned by the AIRC and BBC - which does quarterly audience surveys, based I think, on getting selected listeners to fill in a diary of what they listen to. Ratings are broken down into male / female and age groups plus overall share and reach.

AIRC by the way is the Association of Independent Radio Companies.

Cheers,

Dave

Fair enough!

>Why not? That's what contemporary Talk Radio is becomming. Carefully
>analyze the accuracy of the content of most Talk Shows and tell me the
>phrase isn't appropriate. Perhaps you'd be happier with "pooling of
>inaccuracy." Talk Show Hosts can declare something to be true without
>fear of having to substantiate it. No one else has the platform to
>contest it. It's no different than a newspaper running a story under a

I think there is good and bad in talk just like anything else in life,
and there's always something for everyone. Yes, Rush and Tony Snow (who
sucks so bad it's not funny) get away with saying things that just arn't
true. Yes, I agree you can't just call up and get in on that talk show
and hammer the host. We all know how that works. But there are still
those of us who will take on anybody who calls, and you can't tell me
that talk shows like the ones on WBAI don't do the same things? I love
them BTW! I see and agree with you on some of this, but I don't know
what the answer is? I get tired of the same right-wing crap every second
of the day, but what do you do? Muzzle the host? You and I both know
it's not about fairness it's about money and what works, and when it
doesn't the format will move in some other direction. No one feels the
heat more than me, and I'm sure Lynn gets it too.

I don't worry too much about it because Talk Shows have very
>little impact on real life. They simply don't reach enough of the
>population. That's why it's so important that they be almost pure
>entertainment. Even Limbaugh doesn't reach much of the total
population.

I agree here too. The trend just in shows Limbaugh with only a 2.1 25-54
and the more he preaches and the less he kids the worse it's going to
get. He now thinks he can shape and make policy and he very wrong.

>So, when he declares that the US Armed Forces have never been under
>foreign control, it doesn't really matter. It's inaccurate, but not
>enough people will hear it.

How about Tony Snow who said lat week "there are no hungry in this
country" and "everyone faces disrimination in the worl place" this
coming from a white male!

don't consider WABC to be a competitor in any form other than as
>another place for my listeners to go, much like VCR's and Rikki Lake.
We
>do completely different programming. Our mission is different. To
>compare the two is foolish. It's like saying WQXR serves no purpose
>because it isn't like WRKS.

john gallagher is sadly mistaken re: waaf/wwtm!!!! my wife is the business manager at waaf, & has been there 9 years, waaf has never been further from financial ruin. they had the most profitable year ever recorded in the history of the station, worcester and boston sales are at an all time high,. ratings have been continuously solid in that market, and they have hired 5 new employees in the past month. they have signed a new lease and are in the process of building out for more studio space. this wouldn't be possible if they weren't paying their rent on time. the am station (assumed new format on october 1, 1994) has already turned a profit. zapis has bought 4 new stations in the past year, (they now own 8). wzak in cleveland, has been one of the top rated stations in the market for years. "people like this get to control radio stations" by producing a phenomenal return on investment. i don't know where mr. gallagher gets his information, it and he are most wrong. if waaf was such a profitable entity in the 80's, why would ferguson trade it away? evidently, zapis had more faith in waaf than ferguson did. this disgruntled ex-employee has never even worked for zapis communications - he left waaf 14 years ago. his "friends in the industry" should spend more time listening to "the only station in boston that really rocks" for some ideas on how to produce a successful radio pro.

>Buffalo.)

Hey Bob!

I love ya, babe. But give it a rest.

I've been online for a year (AOL, Compuserve, the net) and three-quarters of your posts are about Rush {and other conservative hosts) teetering on the brink of a ratings disaster.

In time, his show will lose some of it's luster. But in the normal ebb and flow of quarter arbitron books, he seems to be doing okay. His fans are still faithful, and NOBODY in New York radio expects his popularity to dissipate anytime soon.

If it does, great! But you spend an awful lot of bandwidth trying to convince everybody about Rush's future.

Let's talk about you. What's your show all about?

2188. Re: The late WKBW Buffalo

Newsgroup: rec.radio.broadcasting
Date: 1995-03-26 09:22:11 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <3l3bo3$f64@vixen.cso.uiuc.edu>
Source record: 33595

In a previous article, bfowoz@ubvms.cc.buffalo.edu (Mark Wozniak, WBFO) says:

>Stan Roberts took over AM drive on WKBW after Jay Nelson went to Toronto.
>Roberts, known for his corny style, stayed at KB until 1970, when he went to
>Boston. Neaverth took over the morning drive at KB, and has been a morning man
>ever since. Roberts came back to Buffalo in 1972, and took over mornings at
>WGR-AM, going against his old pal Dan Neaverth (neither could overtake Clint
>Buehlmann at WBEN..."yours truly Buehly" was the guy to turn to for the school
>closings!). Roberts went from WGR to WBEN in the 1980s, and did afternoon drive
>for awhile. Roberts now does sales for WBEN, and does the station's
>entertainment reports.

As well as commercials(for both radio & TV). One ad I remember from his
'GR days was,"Listen to Stan Roberts...or you'll hear from his mother."-or
something along those lines.

>Rod Roddy, who worked at 'KB in the mid 60s, is now doing voice work in
>LA...he's the voice of "The Price is Right" game show ("Come On Down!"), and he
>was the narrator for "Soap" (or was it "Mary Hartman Mary Hartman?").

Yes,but that's not the only game show he's announced. He's also done
"Press Your Luck"(which the USA Network runs),among others-the new Game Show
Network might have some shows on which he did announcing duties. And,BTW,he
did announce "Soap"(which,I think,runs on Comedy Central).

>Sandy Beach replaced Ballou, and stayed at KB for several years. He started on
>the evening shift, then soon went to afternoon drive. Noted for his sharply
>sarcastic style, Beach also worked for WGR-AM, WNYS-FM (now WHTT-FM), WMJQ-FM
>in Buffalo, and then WMJQ-FM's sister station WBEN-AM, where he did
>talk...quite well, I think. Beach also worked in Erie PA, and San Francisco CA
>for a while, before he returned to Buffalo another time. A year or two ago
>Beach went to Milwaukee, to an oldies station there. I think he's still there.

When he first came to Buffalo,one of the media reporters(the News',I
believe)tagged him with the nickname "The Needler". And,when he was doing talk
middays on WGR,he was the only one who didn't succumb to the "crank your voice
up as loud as it'll go" style that 'GR has gone to. The station in Milwaukee
you're referring to is Oldies 95.7 .

>Don Berns, another late 60s/early 70s KB jock, now lives in Toronto, and is
>active in playing new music in clubs. I think he still does some air shift in
>Toronto, but I don't know the particulars.

He was doing PM drive for CFNY as late as 2 years ago. The last I heard of
him,he was at CING(107.9;Energy 108-dance CHR)doing a weekend mix show.

>Jackson Armstrong was perhaps the most well-known of the KB personalities
>during the "glory days" of the early 70s at KB. His style was high power, and
>he became quite famous on WKBW's 50 thousand watt signal, heard up and down the
>Eastern Seaboard. The fastest man on radio (and one of the deafest...he was
>known for very loud headphones and air monitors), Armstrong left KB in early
>1973 for Pittsburgh, and last I heard was doing midday on a small station
>somewhere in California.

BTW,Jack pops up in one of Kermit Schaefer's infamous blooper books,and it
deals with something that happened at 13Q in Pittsburgh. Seems that around
Vice President Agnew's resignation,13Q ran a contest to see who'd succeed him,
and he was it. The jock on the air called Jack,but instead a woman answered
the phone. The jock asked her to tell Jack the news;she wouldn't. When he asked
if there was anything else she had to say,she told him to do something
anatomically impossible. Dead air followed.

>Shane (Ronald Maxwell Gibson) came to WKBW in late 1973, after Armstrong left.
>He was the runner-up in KB's "Great American Talent Hunt", in which listeners
>got to vote on what DJ they wanted to replace Jack Armstrong. The Janitor won,
>but only lasted a couple of months. Then Jeff Kaye hired Shane. Known as the
>"Cosmic Cowboy", Shane did a lot of his own poetry on the show. "Shane Brother
>Shane" also did air shifts at WYSL and WGR, and he still lives in Buffalo. He
>has taken up politics, and has unsuccessfully run for a seat on the Buffalo
>Common Council.

On Shane:he also did a midday talk show on WWKB in mid-1993,but left due to
his other committments. He also did commentaries for the station.(This was a
few months after Howard Stern came on board.)

Boy, what memories! When I was PD at KROQ/L.A. in the mid-70's, Armstrong was at KTNQ ("Ten-Q...Yer Welcome!) doing his fantastic thing...with his sidekick "The Go-rilla." He was the talk of the town the whole time he was there...and stole a lot of thunder from long-time L.A. jocks, including "The Real Don Steele" of KHJ fame. Last I heard, Jackson had been working at KKDJ/Fresno. If he's still there, it's been a relatively long run.

>>>>

In the early 80's, Jack Armstrong was doing evenings at KFRC in San Francisco...I found that out by literally running in to him at the San Jose County Fair in 1983. KFRC had a mobile "walrus" with a beautiful Pacific Recorders studio inside and "Jackson" was doing his show live. It stood there for about an hour...it was AMAZING to watch him work! I was able to talk to him for a while and he remembered his 'KB days very fondly!

You forgot 5) : Bluegrass makes the station money. I don't remember what it was like when you were at WAMU, but I doubt it's changed -- the Bluegrass audience contributes a significant chunk of money during the campaigns (that wasn't true as much with the folk audience and that's one of the reasons -- I think, though I don't know -- that the folk music was finally dropped in favor of more talk).

And the amazing thing about the Bluegrass contributions WAMU receives: it comes to the station $30 and $50 at a time.

The Bluegrass listeners are loyal AND they pay for the service. That's one more reason WAMU sticks with them and with the music.

It looks like I missed the beginning of this thread, but it sounds like this short tower was put up in a residential area. If so, there's a possibility that the applicant lied on the FCC application form, where it asks if the required environmental-impact studies have been done. This is a shortcut that is all too typical these days...someone wants to put up a station cheaply, and such studies cost money.

All I can say is: Wait until the blanketing interference problems start to surface, most particularly for FM interference with telephones and TV/FM amplifier overloads. Complaints like that tend to get sent to the FCC, and someone from there will figure it out really fast. If these people lied on their application and didn't do the studies, their license will get pulled in a heartbeat. The FCC is unforgiving when it comes to their being lied to.

Nate,

This is called RDS in the US, perhaps RBDS in Europe. I think it stands for Radio Data System. The data is broadcast along with the RF signal and filtered/demodulated to be displayed on the radio.

I have a Grundig Satellit 700 shortwave/AM/FM portable radio that does this, but there are only about a half dozen stations here in northern California that broadcast the RDS signal.

I believe the plan is to eventually be able to also include station format information to be able to scan for stations that are jazz, classical, news, talk, etc., but I'm also not sure about this.

I will try to dig up some more information on this during the week when I'm at work and post it later.

Message-ID: <3l5ti3$qnp@vixen.cso.uiuc.edu>
Source record: 33503

Is there anybody out there who thinks that the whole Carmine deal was a setup. By that I mean that I don't think that he was just a caller who they gave a break. I believe that he was hired long before he started calling Willy's show. The idea that Furman found him in a smoking shop and put him on the air is not believeable to me. It reminds me of when someone would come out of the audience to save a wrestler and the next week he would become a wrestler. It is fake.
I love the Big One, but they are notorious for fakes. Remember when Willy "fired" the Bozo and he was gone for two weeks. He was on vacation!! Bill Wills needs to come clean on this shenanagin.

Thanks,
Mark (on Steve's account)

2195. Top 40 Back On The AM Dial....

Newsgroup: rec.radio.broadcasting
Date: 1995-03-27 08:38:29 UTC
From: "chip (c.d.) kelley" <chipk@bnr.ca>
Message-ID: <3l5ti5$qnq@vixen.cso.uiuc.edu>
Source record: 33502

Texas once again has an AM top 40: KXYL-1240 Brownwood is now live, local top 40. I'm not sure when they converted to "Hot Hits Kiss AM." They used to be satellite AC. The last AM CHRs disappeared a few years ago: KGRO-1230 Pampa to SMN AC and KRGE-1290 Weslaco (Rio Grande Valley) sold to a religious broadcaster. Until KXYL, the only CHR available on the AM dial is KAFX-1260 Diboll (Lufkin/Nacogdoches), which simulcasts its CHR sister KAFX-FM-95.5 "K-Fox 95" (for the time being since the AM is being sold of).

Other changes around the state:

- AC KHLR-103.9 Cameron (Bryan/College Station) "CD103.9" switches to new rock as "103-9 Express FM" (finally a modern rocker for the college town of College Station, where Houston's KRQT "Rocket 107" and Austin's KNNC "K-Nack" are too weak to really listen to).

- After a month of being back on the air and a month of People's Radio Network talk programs, KJIM-1500 Sherman is now oldies.

- Country KDIL-106.7 Terrell Hills (San Antonio) flips to smooth jazz KCJZ and becomes San Antonio's first smooth jazz station. According to the M STREET JOURNAL folks, crosstown KZEP-1250 is to flip to rock as KZDC next month.

- Urban AC KHYS-98.5 Port Arthur (Houston) finally made its flip to smooth jazz. They are also going to use SW Network's Smooth FM smooth jazz format.

I have read with interest a wide array of comments on the Dallas radio market over the past week or so. Let me say this, Dallas radio is not the best in the country, but frankly, radio ain't what it used to be..period!

Gone are the days of big top 40 stations duking it out in rating wars. The fragmentation of the top 40 market and the dominence of less promotionally conscious country radio have made radio a little less lively. Dallas is no different from anywhere else. We have one top 40 station...supposedly. Frankly, top 40 and urban are the same formats now. So...we have three stations vying for the exact same audience...much like we used to have when there were three or four top 40 stations.

In Dallas though, that is not the biggest battle. The biggest battle is among the country stations...all 4 of them! In ealier times, the ratings that the lowest ranked of these stations has today would have put them on top of the country market. Today, in Dallas, a country station is in serious trouble by many regards when it drops under a 4 share. Unless of course you are Young Country...due to the fact that they are co-owned with on of the other country stations..Easy Country Sunny 95. That arraingement makes them the king of the hill in country and near the top in the entire market.

We have 50 + stations that get into this market in one form or another. Is it any wonder that the fragmentation of the market is so strong here?
The only odd thing about Dallas is that while there is fragmentation, there is not a lot of innovation going on here. That may be because the market tends to not like that. The last innovative format to hit the air here was Young Country three years ago...other than that...I can't think of a single one.

Just thought I would put my two cents worth in.

Arnold

Hello again to all in cyberspace radioland from Texas....DJRON here.
Well last night (3/25/95)we (Dallas County) were under a TORNADO
WARNING for an hour or so. I guess because it was Saturday night,
the regular staff of station employees weren't working. In particular
the good folks at MIX 102.9 Not one mention of the turbulent and
violent nature of the storms rolling over Dallas. Finally about 10
minutes before the warning was due to expire, I phoned the station.
I asked them why they weren't announcing that we were under a
TORNADO WARNING. The woman that answered the phone said that they
may be announcing it soon...she said that they would check into it.
INCREDIBLE/BUT TRUE!!! KISS FM paused in their Boys II Men and
Mariah Carey Continuous hits marathon (joking) to announce the WARNING.
Anyway, most of the other FMs were equally negligent in Warning
announcements. Local TV (with the exception of Chaple 8) did a spotty
job of TORNADO WARNING awareness. The best coverage I saw was on
Cable's National Weather Channel! This is just a matter of PUBLIC
SAFETY and awareness - I feel that broadcasters should take our
safety more seriously. If there's a shooting at a crack house it's
all over the news!
Oh well, we survived, The Edge was knocked off for a little
while, but back on in time to send out another ABFAB EDGECLUB94!
Thanks again to Jeff Kaye for the underground club sounds in the
air waves over Dallas Satuday night. AFTER HOURS again! Jeff announced
last night that EDGECLUB94 is now online...I'll get the electronic
address to you all when I get it straight, I keep getting a host
error when I try to use the one that I wrote down last evening.
Until next time....DJRON - Dallas

[Moderator's Note: Loss of this kind of essential information and
service, in favor of yet another 30 minute music sweep is the saddest
part of the new 'profits are everything - service is meaningless'
approach that is now the dminant force in commercial radio. It is
real sad when the most information you can get about a Tornado Warning
is via the national weather channel. However, with today's
short-sighted, bottom-line-is-god philosophy rampant in the industry you
are likely to see more of this neglect... much more. Bill]

2199. Re: 360 Systems Digicarts: A problem

Date: 1995-03-27 08:38:32 UTC
From: edlacomb@aol.com
Message-ID: <3l5ti8$qnu@vixen.cso.uiuc.edu>
Source record: 33507

Rob:

I had nothing but problems with Digicart II's when I was in Orlando. We had 3 units and each one had the problems that you described...but also on the hard drives as well. Engineering sat down with 360 Systems and determined that it was a disc fragmentation problem. 360 supposedly sent some new ROM software to cure fragmented drives...didn't work. I'd recommend staying away from these things until they perfect the system.

Just my two cents worth...

Not sure, but WRC may have been a reunion for Mort and Peter. We had
both of these gentlemen on our staff when I was APD at KOLO, Reno in
the late 70's. Laufer was our ND for a very brief time...he was snapped up
quickly by KNBR, San Francisco...and Mort, using "Sean Downey", was a
weekend DJ for us...and one of the most mild-mannered, gentlemanly
folks you'd ever want to meet. I don't believe he stayed more than
8 or 9 months before moving to Sacramento, where his talk career began.
And...age and time...I can't recall if they were both on KOLO at the same
time..

2201. Equalizing For Broadcasting

Newsgroup: rec.radio.broadcasting
Date: 1995-03-27 08:38:33 UTC

Message-ID: <3l5ti9$qo0@vixen.cso.uiuc.edu>
Source record: 33509

We have a number of songs which we will be putting on DAT tape for airplay. I am trying to see if there some processing gear on the market, whcih I can use to help "EQ" the finished DAT product, so that they will sound very similar to the quality of CD's supplied from such services as TM Century or Broadcast Programming, etc...

Our source material of these songs is anything from vinyl LP's, to cassettes, to store bought CD's.

Please leave me e-mail, if you have any advice or recommendations for processing gear.

thanks in advance

Rob Bass

Anyone who offers and answer to this question, please send it to me too -- or post it publicly. We do this kind of work all the time and if a piece of machinery exists, I would like to be able to tell our engineering staff about it.

One word of warning to Robert: don't throw away the originals (especially the disks). From everything I've read, aging tests show that DAT has a life of about 20 years -- after which time information begins to fall off.

Thanks.

Orban used to make a wonderful gadget called the "1200 Rx". There are probably plenty still around; they discontinued it about two years ago.

It contains two different kinds of dynamic brightening, plus two different kinds of noise and hiss reduction, all metered and controllable. It was pricey, but worth it... I have one in my rack, and use it almost any time I've got an analog source.

Rumor has it that some of those circuits ended up in a brand-new line of dbx gear, separate boxes for brightening and cleaning but without all the controls and meters. This is just rumor, of course, but it's fact that up until recently Orban and dbx shared the same offices.

2204. Programmers: Hockey is HOT!

Newsgroup: rec.radio.broadcasting
Date: 1995-03-27 08:38:35 UTC
From: cookeh@aol.com
Message-ID: <3l5tib$qo4@vixen.cso.uiuc.edu>
Source record: 33513

Radio take note: Hockey is the pro sport of the 90s. Network TV rights, given up for dead by NBC 20 years ago, have been snapped up by Fox, whose games begin April 2. Maybe you've already seen their MTV-flavor promos, very Fox. Been to an NHL game lately? The crowd may be more upscale than you're expecting. And hockey's already big with Generation X. No, it's not great radio programming (it's hard enough to follow the puck on TV). So what! Many stations think of play-by-play as "a Sales promotion," non-ratings-driven long-term packages that air in non-drivetime hours and sell at premium rates. What's wrong with that picture? And, properly exploited, the association is a powerful promotional franchise. Example: Sell a between-periods "shoot-out" contest to a car dealer, who gets to drive the grand prize once around the rink while the crowd cheers on contestants' efforts to slap the puck through a teeny weeny opening in the logo'd plyboard in front of the net. Negotiate such promotional hooks, and arena signage, into rights contracts while teams are still hungry. And despite all the gags we howled at in Slapshot, minor league teams can yield major radio opportunities. One on-air tip (from a loyal but exasperated listener): "PLEASE! No more interviews with players' wives!" From monthly client
newsletter by News/Talk consultant Holland Cooke. For sample copy, send self-
addressed business-size envelope with 55 cents postage to: Newsletter Sample, Holland Cooke, 3220 N St NW, Washington DC 20007. Copyright 1995 Holland Cooke.

PAMS in Dallas, like many legendary creative houses, ended in
bankruptcy. After a decades-plus legal battle, Ben Freedman (214)
559-4000 was determined to have the rights to the name PAMS, plus the
right to create and license re-sings over the original music tracks,
which he does under the trade name PAMS. In fact, Ben still has many
of the original tapes that were cut for specific clients, and they're
sometimes revived by the stations that used them originally. Ben
started collecting jingles as a pre-teen, and has what is probably the
greatest collection. Amazing to me... apparently no one collects
Pepper-Tanner stuff.

Sometimes you can lose a tower or have another major event that only causes a small change in common point impedance. KCBS lost one of our 4 towers back in 1988 during a violent windstorm - this was the highest powered tower in the array - 22 out of 50 Kw. The feedline shorted against the ATU backplane as the tower went down, and the feedpoint shifted to about 60 ohms with a little reactance. We were running a MW-50 with fully functional VSWR protection, and it was perfectly happy feeding this until we were able to get out to the site the next morning.

Hi All,

Just a little KFI history.....When I visted the transmitter plant in the 1950's they used ballanced line (about 8" spacing on the conductors). This was feed through a VERY large knife switch that switched between a dummy load and the line out to the dog house at the base of the antenna. BTW, they now have a stand-by antenna next to the main. I suppose it is a 1/4 wave but it does not look half as high as the main.

Regards,
Mike

> forth to get the azimuth to settle

[...]

>Anyone know what data compression ratio they use on MD?

Hi, Sean! Don't know the ratio but it's based on studies performed on what most people actually hear. The predominant sound is what is recorded. The missing parts are above 15,000 hz and below 50 hz roughly. I attended a seminar put on by Sony and one of the hi-fi magazines when the consumer version first came out and they did a demonstration of playing a CD, a Mini-Disc and then what was missing from the MD...it was all high end and real low end stuff (sounded like a potential great effect!!!)
You know I'm gettin' "older" and my hearing isn't nearly as good as when we were at HYT 6 years ago, but it sounds like most FM stations to my ears!(If that's garbage, so be it...that's what processing can do, etc...)<G>

Sony is coming out, or it may be out already, with a computer drive that uses the MD for data storage. Now that sounds like the ticket to me!!!

Isn't the digital data compression used in MD required not only to get more playing time out of the media, but also to lower the bandwidth required by the I/O bitstream?

I seem to remember that this is also the reason for the RAM buffer MD uses during playback.

No, because the M-O media write speed (30 kb/seC) cnanot support real-time
recording otherwise. The data reduction (ATRAC) is built into the firmware
and cannot be disabled in erither direction.

>Anyone know what data compression ratio they use on MD?

The data REDUCTION is non-linear, and depends on the relative levels in
several frequency bands. Some data are thrown away. Some are digitized
using fewer bits. Others are fully encoded.

On the whole it's about 5:1 data reduction.

ID>Rich of WOR writes I'm tired of getting tapes of people who should have
ID>been plumbers!

ID>Perhaps you should be getting tapes of some NESB grads!

Dave,
I don't hire people fresh out of school for my network. We generally hire experts in a particular field and make them into broadcasters. We hired Arthur Frommer, the guy who wrote "Europe on $5 a Day," to do a travel show. He's got "Frommer Travel Guides" in every bookstore in the country. What he doesn't know about travel isn't worth knowing. He has something to say that's credible. He's not a broadcaster, but he's fascinating to listen to and my affiliates love the show.

This process has worked well for WOR for decades and it's now working well for the WOR Radio Network. It'll continue.

We've also had great luck hiring production and studio engineers
>from Fordham University.

You are Soooooooo Right!

About 10 years ago I got into radio straight out of college. It was a highly respected radio/television arts course here in Canada. Did that for a couple of years and then went into computers, where I am now. I had a lot of fun being on the air back then and still miss doing it sometimes. My heart's still in the biz but my wallet reminds me how the bills get paid now.

The thing is, I believe that learned more in my first year on the job then I ever did in 3 years of college. I'm not knocking going to school, far from it. But anybody who thinks they can come straight out of school and know it all has got another thing coming.

The funny thing is, this applies to all disciplines, not just broadcasters. Education is good but its only years of experience that will give you the saavy to survive and enjoy what you're doing.

Cheers,

Peter Karwowski peterkar@io.org

2223. Standards in media? Are there any? (was: Re: NBC/

Newsgroup: rec.radio.broadcasting
Date: 1995-03-27 08:38:50 UTC
From: richwood@commspec.com
Message-ID: <3l5tiq$qov@vixen.cso.uiuc.edu>
Source record: 33531

ID>Rich, first of all, I respect you and your contributions to the
online
ID>broadcasting community, but for the THIRD time you still haven't answered
ID>my question: As what point do standards come into play? Would you
ID>support showing killing on a TV talkshow for the tittilation of the
ID>audience? Would you support the airing of kiddie porn if the audience
ID>wanted to see this? Where would YOU draw the line on standards? Where
ID>do you think the industry as a whole should draw the line? Or do you
ID>think any standards of decency should be enforced at all?

David,
You never asked where *I* would draw the line. Frankly, I don't
support much of what's being done in broadcasting. First, if it's
illegal, if it physically harms someone it's off limits for me. Killing
does that. Kiddie porn is off limits because kids aren't capable of
making informed decisions on such things and become victims.

I hate it when I get the flu because it means I have to stay home.
Once I've played with my computer toys and read the papers, I'm almost
forced to watch daytime TV. The crud I see there is nauseating. The
world's losers seem to be gathered in one place with a camera so the
losers who couldn't make it can watch.

While I hate the stuff, I'm not willing to enforce my personal
standards on others through governmental legislation. Mostly because my
personal standards are higher than Jesse Helms', Jimmy Swaggart and
virtually every politician who ever lived (not much to compare it to, I
know) and I dont want them making the rules.

ID>I think by sidestepping this question for the 3rd time you're trying to
ID>play both sides here. Surely, you have standards; I've seen what you've
ID>written over the past 4 or 5 years. Why are you reluctant to apply those
ID>standards to programs under your control and to recommend that they be
ID>applied in some fashion? You're not a whore.

I always apply those standards to my programs. No shows I've ever
been involved with have ever stooped to those levels. Nor will I ever.
My point was that listeners and viewers are ultimately in control. If
they stop watching the sewage they'll see it dry up.

We spend so much time complaining about ABC showing David
Whatsisname's butt on NYPD Blue that we lose sight of the real sewage.
"A Current Affair," "Hard Copy" and their ilk do more damage to our
culture than all the naked butts and breasts combined. They harm
innocent people with gossip and inuendo and make it impossible to clear
one's name when proven innocent. I don't find sex on TV particularly

offensive when done well. The human body is a gloriously wonderful creation. That's probably why the great masters have used it as a subject of their paintings for centuries. I find violence incredibly obscene because it harms us both physically and culturally.

ID>Please, this is a time when people have to speak up for some kind of
ID>standards of decency or we WILL see executions on TV, kiddie porn, and who
ID>knows what else. If you don't take the first step, who WILL?

David, I'm not in a position to dictate standards to Tabloid TV. I can only set the standards for my own network. Those standards are very high. We don't do hate. We don't create victims.

Ask anyone in the Talk Radio business. Whether they're affiliates or not they'll probably tell you we run a very good network. They may not like our programming, for whatever reason, but they won't tell you we're sleazeballs. The WOR Radio Network is known for its technical and content quality. Some think it's boring. Others love it. That's life.

ID>Police departments routinely put people into detox to get them dried out
ID>from liquor and drugs because the police know the people are powerless to
ID>do it themselves. You're in a position to exert some influence in
ID>programming standards, yet you prefer that people stay hooked to their
ID>drug of choice (tabloid TV) and you're not going to do a thing about it?

I have a number of friends who are recovering alcoholics. They'd be the first to tell you that no one can change their lives but themselves. It wasn't until they made a personal decision to quit drinking that they were able to straighten things out. No amout of badgering from wives, lovers, friends or police could do it for them. They may have the support system of Alcoholics Anonymous, but the changes come from within.

I have no control over Tabloid TV. I can only offer an alternative with my network and hope my programming contributes to the quality of the lives of my listeners. If viewers really want better programming, they have to stop watching the crap. It'll change very quickly when the beancounters have fewer beans to count.

Rich

2224. Re: St. Louis Radio Watch (24-Mar-1995)

Mark Roberts (transvox@interstate.net) wrote:

: Written March 24, 1995

: During the past two weeks, the St. Louis market has been buzzing over
: the possible fate of the Zimmer Broadcasting stations.

: Most of the speculation centers on contemporary-hit/modern station WKBQ-FM.
: WKBQ is now at 104.1 mHz, after Zimmer purchased its former 106.5 mHz
: frequency. Zimmer swapped country station WKKX(FM) with WKBQ at the beginning
: of 1994 to take advantage of the 106.5 frequency's stronger signal
: (100,000 watts versus 39,000 watts at 104.1).

Other than the higher power it was the positioning of tower facilities.
WKKX (originally WJBM) has/had tower facilities in Jerseyville IL. The
106.5 site has a tower closer in to the St. Louis area making it better
for competition against the other country station WIL.

: This source and yet another observer believe Zimmer, at the very least,
: has WKBQ up for sale, and possibly more, because Q-104 doesn't fit in
: with the rest of the chain's programming style. As one of them put
: it, "Zimmer got what they wanted" when the company bought the stronger
: 106.5 signal of WKBQ for WKKX to use. One possible buyer has recently
: made moves to enter the Kansas City market as well.

Mark...Didn't Zimmer originally acquire WKKX in a recievership? I think
the original idea that Zimmer had was to sell WKKX and its 104.1 freq but
when the 106.5 deal came up they saw dollar signs and decided to stay in
the market.

: If all this weren't enough, there's the change of WKBQ(AM)'s call letters
: to KRAM on February 22, after the AM station at 1380 kHz switched to mostly
: a news/talk format at the start of the year.

: AIRWAVES reader Alan Cassel has told me that St. Louis media reported
: Zimmer paid $5,000 to find and secure the call letters, in order to
: exploit the extensive publicity being given to a move of the Los Angeles
: Rams professional football team to St. Louis. The National Football League
: has denied permission for the move.

: The St. Louis media now report the calls may change once again, since
: it's obvious that there won't be any Rams there for a while.
: The M Street Journal reports the station is using the
: slogan "K-Ram." Also note, and this is important, that KRAM is MARK
: spelled backwards. In case I ever move into ownership (right!).

I never heard them refer to these call letters over the past several weeks. I might have not been listening closely (mainly cause Ken Hamblin started to bore the heck out of me). I'll keep an ear to this one over the next week and see what gives.

Max...

IJ>I don't consider WABC to be a competitor in any form other than as
IJ>>another place for my listeners to go, much like VCR's and Rikki Lake.
IJ>We
IJ>>do completely different programming. Our mission is different. To
IJ>>compare the two is foolish. It's like saying WQXR serves no purpose
IJ>>because it isn't like WRKS.

IJ>Sure you compete, if WABC is not your competitor than who is?

Jay,
I said "... other than as another place for my listeners to go."

WABC is not our target. If it were, we'd consider doing more hateful programming. It isn't an option we're considering. Everything that lures listeners from AM radio is our competition. That includes TV, CDs, computers, video games, walks in the park (without a Walkman), etc.

Our programming decisions don't revolve around what WABC is doing. We don't ask "how will WABC react." We ask if it's right for us; if it'll generate an audience we can sell. Our commitment "not to be like WABC" is very, very strong.

IJ>> Are you kidding? If I stole you from Drew and Tom I'd never hear the
IJ>>end of it. Lynn Samuels would seem pleasant by comparison! (BTW, Lynn
IJ>is
IJ>>my all time favorite on WABC). Actually, Lynn asked me the same
IJ>>question: "where were you when I needed a job?"

IJ>Don't worry about Drew and Tom just get my agent's name and phone
IJ>number right! :)

Oh, God! Not another agent!

RW> I don't believe I ever claimed to be. Just because I'm not a Talk
RW>Show Host doesn't mean I can't express opinions.

IJ>Didn't we just cover this? Who said you had no right to give an opinion?
IJ>I think sometimes you come off like you have all the answers. But then
IJ>again, maybe we all do.

Jay,
I do have all the answers. I just don't know if they're the right
ones.

IJ>I guess what I'm trying to get across to you is that we're all just one
IJ>part of a big puzzle and none of us has the answers. Maybe that was a
IJ>cheap shot so I won't ask for stations or numbers.

Good. Because I wouldn't give them to you. I never release my list.
I don't want competitors to do to me what I do to them. :-)

The real problem is that there are many answers. Many of them
correct. We tend to speak in absolutes. If you're not #1, you may as
well dry up and blow away. In real life the guy who's 20th might be
making more money, with fewer headaches, than the top honcho. Look at
Bloomberg (WBBR, New York). The station is the one zillionth rated
station, yet he smiles while the limo drives him to the bank. Smart man.

I'm beginning to agree with Bob Smith that non-commercial stations
should be included in the ratings. It would give us a better (though
still inaccurate) picture of what radio listeners are actually doing.
Perhaps the top honcho wouldn't be the top honcho if we found people were
listening to NPR instead of the Morning Zoo. Imagine the bruised egos.
Maybe if Newt knew how many voters listened to NPR he wouldn't be so
quick to sell them to the Telcos.

[]
: Todd Fisher,
: I got a home not found error... you sure that's the right address?

He forgot the colon after the protocol token. It should be
http://www2.interpath.net:80/wralfm/

The small map of the station's coverage area is very nice.

Even though the page is still "under construction," its design shows
thought and purpose.

By the way...

Capitol owned KBEQ(FM) in Kansas City from 1980 until 1987 or 1988.
Its logo is still on the building that houses KBEQ on the west end of the
Country Club Plaza.

With the LMA with KFKF, I'm sure they'll be shacking up together soon.
Probably KBEQ will move in with KFKF on the east end of the Plaza.

Unless I've missed it, no one has mentioned The Hound Dog (George Lorenz).
I thought that he was the one who put WKBW on the map in the mid-Fifties
when he featured programs of all black music and helped make rhythm and
blues/ rock n roll a defining part of being a teenager.

I can remember trying to bring him in from some low wattage station in
Niagara Falls -- then suddenly there he was on WKBW and life was never
the same again.

Lest we forget... around '83, '84... Jackson Armstrong did Afternoon Drive in L.A., at the late, great (everything good is dead, dammit !! *) KKHR, Hitradio 93 in L.A. He never sounded better. Of course, you don't wanna mention this to his ex-p.d., who blames Jack and the Go-rilla for the demise of KKHR. On the other hand, Mr. Armstrong says the same about the ex-p.d. (notice I'm not naming names here !!)
Just an interesting little story about the era in which L.A radio sounded better than it had in a long time... think about it... KIIS-FM, p.m. drive: Big Ron O'Brien; KKHR, p.m. drive: Jack Armstrong. In a moment of true radio mediocrity, THAT is one neat memory.

(your very own PERSONAL...) Famous Amos

And in no particular order, at that:

Although Haverhill MA's WHAV 1490 (1 kw ND-U) flipped from oldies
to Spanish talk a few weeks ago, the fireworks have just started.
Seems the whole thing is closely intertwined with the long-running
rivalry between the small Haverhill Gazette and its much larger
competitor 10 miles away in Lawrence, the "Eagle Tribune." The
Gazette put WHAV on the air some 50 years ago, and sold it about
a decade ago, with the hope that WHAV would continue to be a local
voice for news and public affairs. So the Gazette's local owners
were distressed to hear WHAV becoming the second all-Spanish station
in the Merrimack Valley (and the fourth to run some Spanish), and
with a satellite format out of LA, at that! To make matters worse,
WHAV's new operators (and, with an LMA-to-buy, its prospective
new owners) apparently have financial ties with the Eagle Tribune!
(This is the same firm that owns and operates WNNW, 1110 in Salem
NH, serving Lawrence and Haverhill with a Spanish format).

In the meantime, WCCM in Lawrence has started paying much more
attention to Haverhill news, and today a Gazette official turned
up on WCCM's talk show to talk about how the Gazette now wants
to lead a fight to prevent this LMA from becoming a sale...and
to bring WHAV back to local news etc.

Among the things the Gazette will be focusing on will be some problems
with the way the LMA is working (most noticeably, the near-complete
lack of legal IDs on WHAV - I listened for 2 hours this weekend
and heard not a one), and perhaps a problem with unauthorized
transfer of main studio location as well (WHAV is apparently
operating from WNNW's studio at 462 Merrimack St., Methuen).
We shall see where this all goes.

*WBMA 890 - yes, them again - launched their first local sports
talk show Monday morning 3/27, as former Red Sox player Rico
Petrocelli hosted 3 hours from 6-9am. It's the first break in
the satellite Prime Sports since it debuted last month. Studios
are now at "a temporary location in Kendall Square, Cambridge,"
and will reportedly move to Flagship Wharf, Charlestown, soon.
So - where do I go to see the public file, again? ;-)

As for this station's call letters: They want to be known as
WBPS (for Boston Prime Sports) -- although the Globe, with its
uncanny sense for mucking up all things radio, called them "WPBS"
this past weekend. But they are apparently either too cheap
or too lazy or both to spend the $55 to file for a call change.
So they run IDs like this: "WBMA Dedham Boston is WBPS AM 890,

Boston's New Sound of Sports." Argh. Well, I'm not buying it. The Globe and the Herald can call 'em WBPS all they want. Until they change it legally, my postings about them, the Boston Radio Dial on my finger, and the Boston Radio Archives will call them by their legal name, WBMA. So there.

*WKPE-FM (104.7) in Orleans, on Cape Cod, was supposed to have flipped to an AOR format today (3/27). I can't hear them where I am, so I can't confirm it. I'm also hearing rumors that WKPE-AM (1170) was knocked out completely by a lighting storm to the tower a couple of weeks ago...and may not return. To be continued...

*Bob Bittner, the owner of WJIB 740 Cambridge-Boston and WKBR 1250 Manchester NH (as well as dark WNEB 1230 Worcester), is trying to form a club for people interested in New England radio history. The idea originated on Bob's "Let's Talk About Radio" show, on which I am also a panelist. It's heard Sundays at noon on WJIB, Saturdays at 8am on WKBR. Anyone interested can contact Bob c/o WJIB, PO Box 848, Needham Heights MA 02194, or at WJIB - 617-848-7400, or at WKBR - 603-625-WKBR, or they can contact the Boston Radio Archives at bra@radio.lcs.mit.edu.

*And finally: FMedia! this week shows a new application for an FM station on Nantucket Island, *91.1, 2000 w @ 22m AAT, by the "Cape and Islands Community Public Radio, Inc." If memory serves, this group applied for and was denied 89.3 at either Martha's Vineyard or Woods Hole (that frequency is going to WSMU 91.1 Dartmouth MA). This would be their second stab at it. Anyone know who this group is - and whether they're NPR-types or a religious broadcaster in disguise? In any case, 2000 watts down that low isn't going to get to much beyond Hyannis and Dennis and Chatham... they'll have a tough time of it, I think.

*Oh, and on a non-New England note (although just an hour away down I-84...) Seems to me there's something wrong when the FCC is seriously considering applicants for a third FM in Jeffersonville, NY, a *tiny* town on the Delaware River halfway between Binghamton and Middletown. The town already has WJFF *90.5, a nifty little local public radio station that signed on about 8 years ago, and is barely staying afloat. Then WPDH-101.5 in Poughkeepsie put WPDA-106.1 on the air in Jeffersonville, which is otherwise shadowed from the Poughkeepsie stations by the Catskills. Now there are two applicants for 102.1A. One is an "M.S. Celenza," about whom I know nothing. The other is William Walker III, who has an FM-FM-AM combo in the Kingston area, and an FM-AM-AM in the Amsterdam-Herkimer area further upstate, as well

as an AM-FM in the Saratoga area. I suspect Walker would simulcast one of his Kingston stations. I have no idea about Celenza. I do know that area, though, and it's economically devastated, with little industry, even less retail, and not much else going for it right now. To allow 2 commercial FMs on there right now is almost to guarantee failure. Nobody can afford to do anything resembling local news or quality local programming. So we get a full-power translator like WPDA, or at best a satellite-delivered machine like WSUL-FM 98.3 in nearby Monticello. A waste.

(Just to give an idea of the state of the market: Monticello's second FM, the new WXTM-99.7, is being used as an excuse for local commercial origination on a translator in Fort Lee NJ. Gerry Turro, the owner of W276AQ in Fort Lee, had been getting away with local origination by buying a class D NCE, WJUX 88.7 in Franklin Lakes NJ, and using that as his primary. Late last year, he shut down WJUX and built WXTM, which had been a CP for years. Because WXTM is commercial, he can now sell time on it -- and thus on W276AQ. So everything heard on WXTM is directed at Bergen County NJ, 60 miles away -- and far out of range of WXTM's signal!)

Enough grumbling for one night...

...and tell Bruce Elving the news. A quick scan of a few of the latest Trends in today's Inside Radio shows some very good news for AM stations, at least in the 12+ numbers. In Philly, all-news KYW holds its #1 spot easily...but more interestingly, big-band WPEN came in at #3 for the second trend running. And WWDB-FM, a talk station of the kind you'd hear on AM anywhere else, is in there at #4. Sports WIP 610 made it into the top 10 as well. (Which makes me wonder what CBS could have been doing with 1210 if they hadn't been wasting it for close to a decade now...)

In Detroit, even though WJR has been toppled from its long stretch at #1, they're a very comfortable #2, with all-news WWJ and talker WXYT not far behind. The real interesting part is further down, as we check in on CHUM Group's quadropoly out of Windsor -- powerful FMs CIDR (AAA) and CIMX (modern rock), 50kw AM CKLW, and little 500-watt nostalgia outlet CKWW. And wouldja believe that in the Detroit market, CKWW is pulling the best numbers 12+? CIMX just barely cleared the top 20, and CIDR and (gasp) CKLW are nowhere to be seen. (In defense - CKLW is programming to the Windsor audience these days, rather than to the US, and CIDR is still new).

Here in Boston, WBZ stays at #1, and WRKO solidifies its lead on CHR Kiss-108 for the #2 spot. All-sports WEEI almost cracks the top 10...and even little satellite-fed, practically-a-daytimer WXKS-AM 1430 makes the top 40 with its big band format. Makes me wish more of the AM band were alive here, rather than having been handed over to a) leased time, b) religion, and c) Bloomberg....

And perhaps the strangest of all (though I suspect a statistical blip may be involved here), in Hartford, not only is news-talker WTIC AM up there on top, 4+ share ahead of mush-AC WRCH-FM, but standards WDRC-AM, with a pretty bad 5kw signal at 1360, actually outpulled its 50kw FM oldies sister, WDRC-FM "Big D 103." There's only one other major AM signal in Hartford, news-talk WPOP, and it didn't make the top 10.

All of which suggests to me that at least some listeners out there still care about the message over the medium, even if that medium is a 500-watt AMer on the other side of the river. AM, dead? Sorry, Bruce, not quite yet.

I hear he is going to be on a station that is actually in Auburn, ME...Kiss somthing....I can't remember the call letters although I have them somewhere. Two things are kind of akward about this situation though. For one thing ths station is not a CHR and also it is quite a ways away from the Portland metro.

I agree with you that WHYR (R-96) is pretty bad. I guess he is doing the best he can though with the money he has.

As for a new CHR in Portland. I have heard rumors and rumbles from reliable sources.

2238. Becoming a Broadcaster?

Newsgroup: rec.radio.broadcasting
Date: 1995-03-28 10:23:14 UTC
From: bkurt01@curly.cc.emory.edu
Message-ID: <3l8o2i$2l2@vixen.cso.uiuc.edu>
Source record: 33547

I'm 18, and have been in radio since I was 13. Of course, at that point, there really wasn't much to do. I was lucky enough to come across a caring GM of a hole-in-the-wall and everything has snowballed from there. I would suggest talking to all the Program Directors of the local stations, offering to answer phones, run errands, whatever. Another good way to get involved these days is to offer to be part of the setup/breakdown staff for remotes. Although not a glamorous job, it will make you lots of friends, i.e. those who would have had to do it themselves. :)
I think you'll find that if you look hard enough, you're bound to find a person of authority who was in your position so many years ago, and will help you out.

2239. Inexpensive Digital Audio/Stalellite Automation

Newsgroup: rec.radio.broadcasting
Date: 1995-03-28 10:23:15 UTC
From: cwhitman@ix.netcom.com
Message-ID: <3l8o2j$2l4@vixen.cso.uiuc.edu>
Source record: 33548

If you are interested in inexpensive digital audio that has graphical editing of audio files and will record/play commercial spots/music with cart and music file databases and satellite automation?

Send email to cwhitman@ix.netcom.com for more information.

The above system is 1/3rd the cost of any other system marketed today, and works very well. It's a great system for small to medium size stations - big ones too.

This system is currently running at radio station KRGQ-FM in Salt Lake City Utah. It has been playing digital audio for 8 months and running satellite automation for 4 months.

Does anybody know where I can get my hands on copies of the Uncle Floyd show? I do know that he broadcasts from New Jersey 101.5 FM at the present, but I am really interested in looking for copies of his videos from when he had a television show... I would appreciate any help in locating copies or an address to the Uncle Floyd fan club! You may e-mail me at:
jmennon@vmhost1.mnsfld.edu
thanx joe

2242. Introduction

Newsgroup: rec.radio.broadcasting
Date: 1995-03-28 10:23:17 UTC
From: Steen Berg Andersen <SBA@nrg.dtu.dk>
Message-ID: <3l8o2l$2l6@vixen.cso.uiuc.edu>
Source record: 33401

Hi,

I'm Steen Andersen from Denmark,Europe. I'm News Editor at ENERGY TV doing what it takes to make the news be there on time for our one-hour-a-week broadcast.

ENERGY TV and RADIO ENERGY are based on Technical University of Denmark (DTU) in Lyngby. Lyngby is an suburb to Copenhagen - the capital of Denmark.

RADIO ENERGY is the only dedicated rock-radio in Denmark, mainly because our surveys show that most of our listners prefer rock above anything else.

ENERGY TV is the first campus tv-station in Denmark. It aired in April '94 for the first time and at the moment we're broadcasting one hour a week to approx. 1.5 mill. people.

We aim at students and high school-kids providing them with current information about research, education and social life among students mainly on DTU and in
Copenhagen.

We have a WWW-homepage where you can learn more about what we do and about what is hot and what isn't in Denmark.
The address is:
http://www.nrg.dtu.dk

Since I'm as new in this buisness as ENERGY TV any comments and suggestions would be very welcome.

Regards

Steen Andersen
News Editor

Well, this isn't exactly what you asked for, but this is all the
information that I have. The show went into syndication last Monday
(3/20) on stations in Jacksonville, FL; Oklahoma City; Green Bay, WI;
Tuscaloosa, AL; Wheeling, WV; Louisville, KY; Fort Wayne, Elkhart, and
Shelbyville, IN; and Athens, Bucyrus, Chillicothe, Gallipolis, Newark,
and Youngstown, OH. This information comes from the 3/19 edition of _The
Cincinnati Enquirer_. I found it interesting that most of the stations
carrying the show now are in markets well within the daytime range of WLW.

Sort of. As Cynthia from West Coast Weekend (are they still called that?) told you, you will be pitching your show to a set of programmers with different priorities. While some of the large-market public radio programmers might have commercial radio experience, for the most part you will be dealing with people of a slightly alien orientation.

Quality often means less than does content with the smaller-market public radio people, for example (it's a mind-blower to hear some of the junk that's on the NPR satellite).

Also, at some of the smaller stations, the "slickness" that you would consider essential on commercial radio (and in most large-market public radio) will often be considered a negative

quality -- both by station people and by the eventual audience.

But for the most part, promoting a show to public radio is the same as promoting a show on commercial radio -- make a great pilot, put together a good presentation, mail it out, make phone calls, cross your fingers and hope. I would stress, PLEASE, PLEASE PLEASE, if you are sending out a package of information about your show INCLUDE A TAPE!!!!! There's nothing more frustrating than getting pitched about a show you can't hear. After all, that's what the show sounds like ought to be the final determining factor (although you will find that THIS is not necessarily true at smaller market public radio stations either).

Finally, one thing Cynthia told you isn't necessarily true: you don't have to be associated with a station in order to get carriage (though it helps).

"Prime Time Radio" is an example. It is produced by the American Association of Retired Persons. It used to be produced in association with WAMU in Washington. It isn't anymore. But it is still carried. There are other, independently produced public radio shows that are also on "The Bird".

Good luck.

Does anyone know the specific rules about commercials on non-commercial stations. It seems I'm hearing alot of them on many of our local public stations, including the local N.P.R. affiliate. Am I being naive...or did I miss a big F.C.C. rule change somewhere? Does the fact that a disclaimer-like "Joe's Gas Station supports WXXX"...followed by "stop in or call for good gas" make such an announcement an underwriting announcement, rather than a commercial?

I suppose what I'm asking is: what exact rules govern such announcements (content and scheduling)? Do these public stations have spot rates like commercial outlets? Can an advertising agency include a public station on a spot buy, if spots are preceded by a "support" announcement?

> quick to sell them to the Telcos.

A subject near and dear to my heart. Why are so few major market PDs seemingly aware of the impact that public radio is having on their audiences, particularly in the talk format? Up in Boston I discovered that WBUR was kicking Jerry Williams' butt and he didn't even know it and denied it when he heard it from me. Morning Edition was also competitive. Here in DC Morning Edition has often been #1 in morning drive, ATC competitive on *two* public stations in the afternoon drive period. In other forums I have mentioned this and the usual reaction of PDs has been "They're not rated. They don't count," as if those listeners rise from the grave just to listen to NPR, then sag back into the earth without trying commercial radio. It absolutely confounds me.

RBDS or RBS is a data stream broadcast on a station's sub carrier.
Yes, the reciever will scan for your selected format. For instance if
you only want to listen to NPR stations, as you drive across the
country your RBDS reciever will switch automatically to the next
NPR station as you drive out of the last one's range, providing of
course that the next NPR station is spitting out RBDS information. At
this point there really aren't all that many stations providing the
data. I know there are a couple here in Detroit. Thanks to Denon
many public stations are hoping aboard this project. I gather some
stations are even providing information on the music they
play (artist, title, album), their advertisers, program names, weather,
etc.

Does anyone have actually have an RBDS radio? What information
are stations providing? Is it useful to you?

I have DMX (a digital music service delivered via cable) at home
and one of the things I love is that it displays song, artist, album,

label, composer.

The new radios that are coming out, not vey soon by most manufactures, but delco electronics has announced thqat it will start to install them in all gm products. Is called RDBS - Radio Digital Broadcast Service. Some stations around the country there are now about 500 that use RDBS also transmit things like global positioning satlellite information this is done now on an experimental basis.

European stations have been using RDBS for a couple of years. It is now just becoming popular in the U.S. manily because manufacturers do not or did not want to expend the money needed in R&D if radio stations where not going to broadcast RDBS at a fast pace. RDBS is and will be very usefull in other aspects also the new EAS Emergency Action System that will eventually replace the EBS Emergency Broadcast System will not only alert of an EAS but radio and tv's will have the capability that if they are turned off, they will turn themselves on upon reception of an EAS signal alerting those around the house or anywhere else that there is some sort of emergency be it local, statewide, or national.

If I get the time I will post an articel or two on the RDBS system to tell you more of what RDBS can and will be doing in the future. It's up to the broadcasters to expend the money into RDBS for there stations. Eventually though you will see many if not all broadcasters doing different things with RDBS.

I'm with Rich.

I hire or recommend as a consultant that other people hire a lot of people and I won't even look at someone who graduated from a trade school.

I want people who can think and trade schools don't teach that.

At best, you can spend $6,500 in taxpayer guaranteed loans to get prepared for a minimum wage job as a board op.

At worst, you won't be able to pay back the $6,500 and won't be able to bankrupt your way out of a government guaranteed loan.

My advice is always -- and I get about 10 calls a year because we have one of those (my opinion now) scam artists in Tulsa -- get a real education at a real school.

BTW, more people graduate every year from RTV and J schools than are employed in the entire industry, so I don't recommend those routes, either. If you go to a real school, get a real degree. Economics, English, History, Business, Law, Music. We can teach you most everything you need to know about our industry in very short order, but I can't take a board op and teach him to cover a bank failure.

Come on, get real. First, the public outcry over the abuse and exploitation of children (and rightfully so) would be overwhelming... widespread boycotts of any and all sponsors...people would widely refuse any other services from the provider of "kiddie porn"...and the government would never allow it...slapping huge prison sentences and fines on the provider *and* the recipients. Can you guys at least stick to *reality* in this debate?

} suicide and a murder never came up during those years.

In as much as I respect both David and Rich on most issues, I feel compelled to jump in here and say that Rich (IMHO) has the right idea here. As nice as the idea of cleaning up the swill in media may sound, Rich is correct that such a move toward regulation in the current political climate would result in the likes of Jesse Helms in the decision chair... a scary thought for anyone to the left of Gengis Kahn. There are many people who would just love nothing more than to regulate what we all see and hear, and thus how we percieve ourselves and our world. Do you trust the regulators to regulate *just to the extent that you want*? I dont.

A free people cannot resort to looking to government regulation to smooth all the rough spots.. Freedom in any degree is not an air-conditioned magic carpet, it is something that must be defended at all costs. I would rather see all the smut and swill that can be generated than to see, yet more of a government control over the public media (which is already so heavily regulated for content).

Actually I am surprized to see you, David, come down on the side of regulation. Sure, there may not have been talk of suicide on daytime tv, and perhaps we all look back nostalgicly on some part of history (even broadcast history) but to attempt tp bring back the order and apparent tranquiility of a period past, by regulating and prohibiting the signs of the times is a frightening and distasteful thing to me, a person who loves freedom and who knows that 'family values' is something that one must feel inside, not something to be forced on a people by law and regulation.

Does anyone sell Howard Stern radio tapes? We do not get his show in Kansas City.

I thought he was an idiot when I saw him on Letterman and on a really sophomoric video tape: " Butt Bongo" or something like that. But on a recent trip to Las Vegas I heard his radio show and he is very very good!

2262. Talk Show Hosts Quitting

Newsgroup: rec.radio.broadcasting
Date: 1995-03-28 10:23:33 UTC
From: Steve Bauer <sbauer@tyrell.net>
Message-ID: <3l8o35$2no@vixen.cso.uiuc.edu>
Source record: 33421

I've heard items on the news over the past couple of days and the number of nationally syndicated talk show hosts is falling.

Calling it quits are:

Ross Perot saying it is taking too much time to prepare for his weekly show. I think he does his last show in early June.

Pat Buchanan has to quit so he can run for President.

Sunny Block is off the air reportedly because he was charged with fraudulent advertising and cheating consumers. They also found tapes of him having sex with young women in his apartment.

Send me your money and I'll make you rich and straighten out your life. Never mind that I'm a crook and my life is a shambles.

Steve

Say, here's a solution.. when the m.d. is printing out the music log, have him/her insert between, oh, say, every three songs, a notation:"CHECK FOR TORNADOES" (this way, the hourly employee on the board will know what to do, as he/she has been thoroughly trained to read what's in front of him/her. Brilliant, huh?)

[Moderator's Note: A better solution... train the hourly employee (board-op) to understand the business enough to actually handle emergencies and provide service. Remember service? Nope, didnt think you did <g>. Bill]

2264. Tornado Warning (Was D/FW Radio - We Deserve Better)

Newsgroup: rec.radio.broadcasting

DJRON <marqkpin@connect.net> writes:

>In particular the good folks at MIX 102.9 Not one mention of the turbulant and violent nature of the storms rolling over Dallas. Finally about 10 minutes before the (Tornado) warning was due to expire, I phoned the station. I asked them why they weren't announcing that we were under a TORNADO WARNING. The woman that answered the phone said that they may be announcing it soon... she said they would check into it.<

Well I don't know about everyone else.... but THAT kind of reaction form radio air staff (or from anyone at that matter) is NOT paying attention to what's going on in their community! To me, that is very sad. It appears top me here, that whoever this lady was, had no clue there was even a TORNADO WARNING in place... so she tried bluffing her way over it. The fact that she said they would check into it, when there's 10 minutes to go before the warning expired, is not the best answer to give.... Did you tell her that the warning was about to expire...?

>Most of the other FMs were equally negligent in Warning announcements<

I hope when you say "Most", you don't mean ALL! I happened to be on duty that night, and let me tell you, I was very alert to what was going on. I had just come back into the studio after checking the weather outside. What I had seen and heard outside at that time, really gave me the creeps. You know that "freight train" sound everyone associates tornados with....? That's what I was hearing.

About 15 seconds after returning to the studio, our printer began printing the TORNADO WARNING statement from the National Weather Service). Right after I ripped it off the printer and was proof reading it, KRLD kicked in w/ their EBS tone and did the warning. It was less than a minute later when I faded the program I was playing, and did the EBS TORNADO WARNING.

IM>Emerson College in Boston is the only college in America which is ALL
IM>communications (not just a department) - Everything from sign-language
IM>to film, tv, radio, fiction, screen-wrtiing, journalism... I'm a
IM>graduate and for someone who wants to go into communication, I would
IM>recmmend it without hesitation.

I'll have to second that recommendation. When I was an Emerson student
the school offered a no-nonsense schedule that was based on a liberal
arts education. Their concentration was on what you brought to the air
rather than how you did it.

Many Emerson students were working full or part-time at Boston stations
while going to school. Not as interns, as employees. It's agreat school.

If in fact there was one. I have to question how trustworthy the original poster was -- when I check out the latest trends and find that 12+, in the *Boston* market, 'AAF checks in at #13 with a 2.9 share...ahead of Boston Class Bs WBOS (2.5), WBCS (2.1), and WCLB (2.0), not to mention rimshotters WFNX (2.2) and WEGQ (2.0). Doesn't sound much like a failing station to me.

But then what do I know...'BZ was at the top of the heap with a solid 8.4, well ahead of 'RKO's 7.4, Kiss 108's 6.1, and BCN's 5.4. Not that I'd want to brag or anything...

Source record: 33427

>>They have been positioning themselves as a Boston station, and they don't even buy the Worcester Arbitron anymore.<< When you have the signal that WAAF has, you don't have to limit yourself to just one area. They have the luxury of a most powerful signal...how large is your coverage? WAAF is not a "Boston wanna be", it is a "New England FM". I grew up in Weymouth listening to the station...they sounded as crystal clear as any Boston station I ever listened to...it never crossed my mind that they were way out west in Worcestor. Apparently it has not "crossed the minds" of the many Boston advertisers either. You can't argue with a strong signal and huge coverage area. >> As a wanna-be-Boston station, they have been going nowhere fast for quite a while.<< If being the most successful radio station in the area is "going nowhere", then XLO is doomed. Do I detect a bit of jelousy in your note? Funny, I've been in radio since 1980, was CE of WBCN, worked at WEEI and WBZ...can't say I've ever heard of XLO though. Where are you on the dial? AM or FM? Is WLXO a "Worcester wanna be?" "How big of a market is Worcester"? >> The eviction notice is no surprise. <<

It would certainly be a surprise to me. My wife is the business manager and I am a contract engineer for them...we're building bigger studios and renting more space. It would be a surprise to AAF's clients as well, all of whom are reaping the benifits of a superior product by joining in their success.
superior product by joining in their success.

Mark, thanks for the trip down memory lane. Those strong Buffalo media personalities had such an impact in my life that they inspired me to study media at Medaille College, finish up at the University of Houston, and work in public television today. My favorite was Bud Ballou - sorry to hear that he's not around anymore.

What ever happened to ex-WYSL personality Kevin O'Connell? Is he still a weatherman? Did he ever get a successful game show host stint? Seems I remember seeing him on a few short-lived oned over the years.

2272. Buffalo/Toronto Radio Watch(3/28)

Newsgroup: rec.radio.broadcasting
Date: 1995-03-29 05:40:28 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <3larsc$jge@vixen.cso.uiuc.edu>
Source record: 33430

Happenings in the #40 market:

*WBLK(93.7;urban)is modifying its format a bit,changing it from a traditional urban contemporary format to one that also emphasizes classic soul tracks.(As Jim Fink put it in the Mar.27 Business First,"In layman's terms that means less Snoop Doggy Dogg and more Smokey Robinson.") Station owner Frank Lorenz(yes,son of the "Hound Dog" George Lorenz of WKBW fame) said that the change,16 months in the making,is designed to give it more of an adult flavor. GM Mark Plimpton emphasized that 'BLK is not an oldies station,just that it's going to incorporate more of those songs into its format.
PD Eric Faison says that currently,WBLK is playing about 3 classic soul tracks per hour,giving it a 70-30 mix between current tracks and classic ones (when the fine tuning began,it was an 80-20 mix). Faison adds that the goal is a 60-40 mix.
However,rap music isn't being abandoned. Certain contemporary acts will remain in rotation(getting,at most,30 plays/week),and its Saturday night program geared to rap will remain-it airs from 10pm-2am,

*WGR(NewsRadio 55)just continues to make news.

A story by Tony Violanti in last Friday's News noted an incident involving Mary Davis,the station's community services director who also hosts a Sunday morning talk show(simulcast on WGRF(97 Rock)and WUFX(103.3 the Fox)). On the Mar.12 edition,Davis-normally the voice of reason-seemed to be combative to callers,at one point going into a long talk about food stamp cutbacks after a screamfest with a caller. Some callers wondered why Davis had changed. Davis said-on air-that it was due to a meeting with WGR GM Jim Meltzer. Davis said in a phone interview on Thursday that,"Jim Meltzer said to me,'Don't be little Mary Sunshine anymore,you might be better being Mary the Bitch'". Meltzer didn't hear the show and refused comment;when he was asked if he gave Davis that advice,he asked,"On a Sunday morning show?" Davis,for her part,said-at least 3 times during the interview-that Meltzer did indeed do that. Also of note:

-Jim Pastrick,ex-97 Rock PM driver,is now WGR's new PD and operations manager. The 44-year-old Pastrick said his "immediate plan is to stabilize this station."(Two words,Jim:Good luck.)
-Jeff Morrison returns for a third tour of duty as a sports reporter;he's doing sports updates in middays as well.
-Bisons analyst Darrian Chapman adds sports director duties.

*CISS(92.5,Toronto,new country;92.5 CISS FM)GM Sandy Sanderson got sent to the beach last week. The firing was announced to CISS staffers. No word as yet who will replace Sanderson(who,I believe,has also worked for 680 News).

*Regina "Reggie" Keaton died on Feb.26 in Indianapolis,a month after suffering a stroke. She was 81. Keaton had moved to Indy last fall to be closer to her son,Wilfrid,a professor at Indiana University.
The New York City native,who attended New Rochelle College,was an award-winning Irish step dancer-then became one of the Rockettes at Radio City Music Hall. She met her husband,William,there(he was Fred Allen's understudy as its MC). Soon after they married in 1940,they were asked to come to Buffalo for a 13-week stint on WGR as a husband-and-wife team. The stint, called the "Mr. & Mrs. Show",lasted 17 years.
Keaton later hosted a talk show for Amherst Cable(later,International & Adelphia International)from 1972-94.

*Send something blue to WHTT PD Tom Schuh-he and his wife recently became first-time parents(Brian Joseph;7 lb.,2 oz.). Some advice from Robin Williams: "You don't need drugs when you have a kid. You're awake,you're paranoid,you smell bad-it's the same thing!" :)

Here's a still better solution -- install a $49.00 weather radio with tone alert somewhere in the station where it is likely to be heard, and put the on/off switch and volume control out of reach of the board operator. In fact, all you need to do is install a remote speaker and reset switch (so that the alarm can be set to go off the next time it is needed) at the console position.

This apparently isn't much different from the current set-up at WEW (1 KW-D), St. Louis. Last week, the ear-splitting weather radio alarm in the studio went off for the usual 11:05 a.m. Wednesday test sent out by the National Weather Service in St. Louis -- while the local announcer was speaking into a live mike. Aaaaawhhheeeeeeeeeeee . . .

So now I know that I should tune to WEW during severe weather. (At least between sunrise and sunset, local time.)

The dutch local radio station radio mebora has been a pirate station for 14 years.
Since 1992 they are legal and allowed to earn money with advertising.
Only, advertising on local radio is new in Holland.Radioadvertising
was possible, on BIG radioststions, for BIG spenders.
Local businesses were raised with advertising in the newspapers.
And getting them over to advertise on local radio is difficult.
I am looking for any help you can get, sales features,sales pitches
agruments for businesses to advertise on local radio.
In short, anything helps. How do you sell in your place against papers.

would appreciate any reaction to westcoas@xs4all.nl

thx

With such a wide and varied array of source material (lp,cassette,etc) it
would be hard to find one "magic box" that would fit your needed mastering
requirements. This also depends on what your current processing chain is
composed of. If you are a classic rock station for example, your processing is
set up much differently than a country station.

My opinion is that you should find out what type of eq,compression, and
limiting are occuring in the stations processing, and experiment with your
mastering process. (what amount of limiting and compression are very important
also.) And when ever possible use the best source material available.
Late night listening will probably be the best time for your test,
and try to use a car radio or speakers that you are very familiar with for
your critical listening.

Best Regards,

Rick Cruz
The Ohio State University

2282. Industry Job Wanted: 24 years experience

Newsgroup: rec.radio.broadcasting

Goal:
To re-establish presence in the recording industry following a
successful two year stint with ALESIS STUDIO ELECTRONICS.
Would prefer to re-locate back East, but am currently settled in LA.

Summary:
After a succesful transition from radio promotion (18 years) to A&R, where
in less than two years I signed four artists that had top ten records in
various formats: Kon Kan (pop/dance), Linear (pop), Terry Tate (R&B) and
King Missile (college/alternative), I entered the field of Personal Management
and orchestrated record deals for Meryn Cadell (Sire), Kon Kan (Hypnotic/A&M
Canada) and Tolga (Zoo) I also brought the Barenaked Ladies demo to Sire.
The group was subsequently signed and has sold over a million records
world-wide. Unfortunately, I had no participation in the deal, but I feel
a great sense of satisfaction over their success.

With the opportunity for an exciting career change, I was offered a sales
position with Alesis Studio Electronics, a well known and highly respected US
company that has revolutionized the recording world with its ADAT 8 Track
Digital Recording System. After ten months of sales, I was promoted to my
most recent National Promotion position, and relocated to Los Angeles.
During my time at Alesis I have been involved in all facets of Sales,
Promotion, Marketing, Publicity and Advertising. My new found understanding
of the studio/electronics part of our industry has served to re-kindle my
interest in working for a label. I bring to the table a wealth of knowledge
in the areas of radio, promotion, marketing, sales and A&R. My desire to
involve myself in the creative process can only be of tremendous benefit
to any company seeking to hire someone with a wealth of experience in a
multitude of areas in this business.

JOB HISTORY

October 1993 - March 1995:
National Promotion Manager - ALESIS STUDIO ELECTRONICS

January 1993 - October 1993:
Sales Manager (Canada) - ALESIS STUDIO ELECTRONICS

April 1991 - October 1993:
President - BETWEEN THE EARS MANAGEMENT

October 1983 - March 1991:
National Promotion Director - ATCO RECORDS
Associate National Promotion Director - ATLANTIC RECORDS
National Promotion Director - ATLANTIC RECORDS
A&R Manager - ATLANTIC RECORDS

April 1971 - October 1983:
National Promotion Director - AMPEX RECORDS (1971)
National Promotion Director - BEARSVILLE RECORDS (1972-75)
Regional Promotion Director - CASABLANCA RECORDS (1975)
National Promotion Director - CASABLANCA RECORDS (1976)
National Promotion Director - PLAYBOY RECORDS (1977-78)
National Promotion Director - MUSHROOM RECORDS (1978)
Vice President/Promotion - SIRE RECORDS (1978-79)
Vice President/West Coast Operations - SIRE RECORDS (1979)
Local Promotion Manager - RCA RECORDS (1980)
Independent Promotion Representative - IRS RECORDS (1981)
Assistant to the President - MODERN RECORDS (1981-83)

After a week of vacation, I came back to find that my vacation has been extended.
I was doing mornings at WQFM-Milwaukee (AOR). I'm looking for mornings, afternoons or programming in either AOR, CHR, New Rock or Hot AC. I've got a good presentation and very computer literate; with an strong emphasis on the Internet.

If you have something or know of something, please E-mail me at either RockmanO@aol.com or RMO@execpc.com.

Thank you,

Rob Olson

There's a good learning opportunity here. After thinking about it, almost anything can happen in a multi-element directional array when any "major event" occurs. The KCBS experience is a good example of what can happen when impedance transformations occur because of a dramatically mismatched load. Depending on the length of the line, a shorted 50 ohm line that is normally expected to feed 22 kw to a tower could present a rather high impedance at the phasor end of the line, causing the impedance of the power divider to shift a small amount, as apparently happened. What then happens to the 22 kw that got shorted out? Let us theorize a bit. A little of it no doubt heated up the shorted line and was dissipated, since that line was now acting as a shorted stub transformer, but was not passing any real power on to a load. Most all of it was accepted by the remaining three towers where real resistive components existed to dissipate the power. Since the dead tower was no longer in the act driving 22 kw into the array, the driving point impedances of the remaining towers all shifted due to the changes in the array factor mutual coupling. That then caused additional impedance shifts and mismatches throughout the system. Whatever new driving point resistance values then were present at each remaining tower base determined the new power distributions. One or more of these could have changed to values well beyond the existing maximum ratings of the various feedlines, which is what caused the burnout on the array Ron Cole described in a previous letter. Thats why its probably a good idea to run larger lines in a 50 kw system than nornally required. You can never predict what tower might fall or what LTU component will fail causing a complete reordering of driving point impedances and power distributions.

No, it's probably a Dutch MW pirate, even though these operate more often
in the 1630-1640 kHz region. I think these are mainly in the eastern part of
the Netherlands, but i'm not sure.

Radio Mebora is located near the west coast, like its email address
suggests...

>WBUR was kicking Jerry Williams' butt and he didn't even know it and

Boston has AccuRatings now. AccuRatings reports include everybody, even the 10-watt college stations if they pull enough audience to show up. WBUR does very well indeed; in some demos they come out #2 in the market behind WBZ.

A good test of AccuRatings is my old college station which is number forty-something in the market. The station I work for, WCRB, subscribes to AccuRatings and we get weekly faxes which include a four week rolling average. Now I've been looking at the college station's performance from week to week. The one week estimates are pretty "noisy"-- they show quite a bit of fluctuation-- but the four week averages are pretty consistent, showing a cume audience in the range of 25,000 and a core audience of six to eight thousand. Even the age/sex mix seems consistent, although I must add that AccuRatings consistently shows this audience to be a lot older than those of the other college stations I looked at (not what I expected). This makes me feel quite comfortable with the AccuRatings numbers for WCRB, which they list as ninth in the market 12 + with a pretty respectable core audience.

Another interesting feature of AccuRatings is their "recalled former share" number which can be used to whether your station is gaining or losing listeners and where they're coming from/going to. This includes the non-commercial guys; if WBUR is siphoning off your listeners you'll know it.

It's pretty simple, actually. The basic reason share numbers are important is because that's what advertisers base their buys on, right? Agencies don't look at non-comm numbers when running a media plan. Hence, when the PD's know that the only numbers they'll be competing against (and getting performance bonuses on) are those from other commercial radio stations, non-comm numbers really *don't* count.

A brief note: actually, in the late '60's/early '70's, FM album rock radio (still being referred-to in some corners as "underground" radio!), in N.Y.C., and elsewhere, WAS playing black ("soul") music; it was MUCH less segregated than it was to become. In fact, you wouldn't believe some of the stuff they played; I can remember 'NEW-FM playing everything from James and Bobby Purify, to "Good Morning Starshine" by Oliver !
The idea was simply to speak one-to-one, minus all bells & whistles, and play stuff that felt nice to people who weren't watching "Dragnet" and buying it. Later, this audience would fragment to AOR, Adult Contemporary, Smooth Jazz, Urban Adult Contemporary, etc... but, back then, it was all in one eclectic package, and, for my money, I miss it (I can see the big-time p.d.'s and consultants now, scratching their mustaches, and muttering, "Err-r-rr, that would NEVER work... how foolish!")
BTW, the jock lineup back then included: mornings, MONO AM SIMULCAST of Klaven & Finch, WNEW-AM; Jonathan Schwartz, Scott Muni, "Rosko", Allison Steele ("The Nightbird") ; weekends: Pete Fornatale (from Fordham University's WFUV) and Dennis Elsas. Hell of a station.
Must go now... I think I'm getting old... !

Message-ID: <3lart6$jiq@vixen.cso.uiuc.edu>
Source record: 33452

Yes! KPIG Radio _live_ on the Net with a 14.4k or better SLIP/PPP connection. No downloading files - no waiting forever for a grainy snippet of .au or .wav. This is the future, folks!

Check it out at http://catalog.com/kpig/

Go to _I-Phone Experiment_. You'll be able to download a massively cool program called IPhone that allows for 2-way (simplex) voice conversations worldwide over the net. What's even cooler is that the IPhone technology works at least reasonably well for music, too. I've listened to music feeds from Holland, the East Coast, & Canada that were perfectly usable - and I've received "reception reports" from new KPIG fans from Nova Scotia to Finland to Australia. I even have one listener in Russia!

This is VERY exciting stuff. The drawbacks: at present I can only accommodate one or two dialup listeners at a time, & I am only able to have the system up when I'm around to babysit it - about 5:45am - 3pm Pacific Time. Occasionally, I'll run it from home later in the day & on weekends.

I'd love to hear professional-grade feedback on the signal quality, etc.

> spot buy, if spots are preceded by a "support" announcement?
>
You are hearing "enhanced underwriting" announcements and yes, there are
voluminous rules about how it is to work, limits on what can be said, etc.
Any public radio PD in your area could explain them to you but they are
not spots in the commercial sense. For example, you can make no
comparative statements in underwriting announcements, such as "Joe's Gas
is better and more efficient in service than Ernie's Oil and Lube."
Get used to them because they are likely going to have to increase,
especially on major market stations, if the CPB cuts go through.

>> Are radio stations (and, in effect, all their DJ's)
>> restricted from just picking up a CD and playing it on the
>> air? Let's say I give a CD to a DJ and ask him to play it
>> for me -- and let's say the CD in question is something by
>> U2 (and I am not in any way affiliated with U2) -- can he
>> just play it?

I interpreted this question differently than those who have already answered it--I think the listener was asking about legality rather than strategy.
Radio stations pay big bucks annually to the three music licensing agencies (ASCAP, BMI, and SESAC) for the right to play the entire catalog of each of these agencies. So legally, if the song is licensed by any of these organizations the radio station can play the song if they choose. As has been explained before, they just don't choose.
And speaking of licensing agencies, does anyone know how the SESAC rates will be affected now that they've taken over all the music of Neil Diamond and Bob Dylan? Expect the rates to skyrocket? ---Dan

: miss a big F.C.C. rule change somewhere? Does the fact that a
: disclaimer-like "Joe's Gas Station supports WXXX"...followed by "stop in or
: call for good gas" make such an announcement an underwriting announcement,
: rather than a commercial?

There are very specific rules, but esentially they come down to allowing the Public Broadcasting Station acknowledge the support, but Not include a words that are a "CALL TO ACTION". They can include facts about the donor, but they can not brag or include opinion. Stations may add additional restrictions like number of words, prohibit some facts (Oregon Public Broadcasting did not allow the donor to say how long they had been in business), and some will not allow mention of a specific product.

I agree. Regulation of program content isn't the answer. What we need are broadcast licensees who take their role as public trustees more seriously. It should be the role of radio to inform as well as entertain, to leave the listener with a better understanding of what's going on in the world in which he lives. To the extent that today's broadcast journalism leans heavily on sensational stories that paint a distorted picture of our society and provoke fear and anger among members of the audience, broadcasters do the nation a disservice. While it can't be proved conclusively, it's hard to imagine that there is no connection between news stories that anger, frighten or disgust us and the fear, cynicism and intolerance that seem to be spreading in our communities.

Does anyone remember the old NAB Radio and Television Codes?

Weren't you watching? The Courts threw out the Broadcast Code years ago,
as "action in restraint of trade". No more 'We Subscribe to the Code'
promos...

The gates were thrown wide open for todays' tabloid tv, cartoonmercials,
and everything else.

|: And you don't feel regulation is the answer then. I remember the days of
|: regulation and remember that a discussion of whether talkshows prompted a
|: suicide and a murder never came up during those years.

Um, you missed the Reagan years also? Broadcast regulation was somehow
keeping the industry from being 'competitive'. The FCC was pretty much
told to stick to frequency allocations, and leave programming to the
marketplace.

Along with the Courts and the Executive (and now the newt Congress), the
marketplace has also changed: with so many program outlets, there's always
room for somebody to do something sleazier. And broadcast bean-counters
know that _in_the_short_run_, sleazy does better.

: WKKX (originally WJBM) has/had tower facilities in Jerseyville IL. The
: 106.5 site has a tower closer in to the St. Louis area making it better
: for competition against the other country station WIL.
:
The WKBQ tower is now in north St. Louis county (i.e., North County).
While the Q-104 signal is weaker in South County and on the fringes of the
metro, it does fine in North County, West County, and St. Charles county.

At my Columbia site, it actually came in *better* than WKKX. It seems to
be a clearer channel. WKKX and KKCJ in the Kansas City market hash it out
about midway between them--Columbia!

When KOQL came on the air last year, with a transmitter one mile from my
site, it put a crimp in my reception of Q-104, but I can get it
sometimes with my antenna pointed broadside to the signal (some
passive reflection somewhere?)

Furthermore, some Bible-thumpers have filed an application to put up a
translator of a Kirksville station in Columbia at 103.9. There also is a
rulemaking for a new class-A station at 104.1 in Jefferson City, about 35
miles south of Columbia.

So the channel won't stay clear for long.

City of license is still Jerseyville. Do you remember the old WJBM-FM?
Mono during the daytime, simulcasting the AM, then signing off the AM at 5
pm (even in the summer) and going into stereo for a show of traditional
country music until 7 o'clock and then "Ed and Alice's Old Rock 'n Roll
Show" from 7 until 10. This was when most FMs did not play oldies.
Sign-off was at 10 pm. This lasted at least into 1984.

I have a tape of "Busch's IGA Cover-All Bingo" from Memorial Day 1980
on WJBM-FM that is to die for.

Did you also know that 104.1 mHz was KFUO-FM's original frequency?
:

: Mark...Didn't Zimmer originally acquire WKKX in a recievership? I think
: the original idea that Zimmer had was to sell WKKX and its 104.1 freq but
: when the 106.5 deal came up they saw dollar signs and decided to stay in
: the market.

They did get it out of bankruptcy (KPNT was similarly acquired by River
City). As I understand it, Zimmer definitely wanted to make a run at the
St. Louis market, considering it underserved by country signals (really
only one other, WIL-FM).
:
: I never heard them refer to these call letters over the past several
: weeks. I might have not been listening closely (mainly cause Ken Hamblin
: started to bore the heck out of me). I'll keep an ear to this one over
: the next week and see what gives.

Let us know. KWK, KGLD, KASP, WKBQ, whatever you want to call it, is one
banged-up jalopy of a station by now.

2304. One guy's story

Newsgroup: rec.radio.broadcasting
Date: 1995-03-29 05:41:08 UTC
From: Tree2@ix.netcom.com
Message-ID: <3lartk$jjp@vixen.cso.uiuc.edu>
Source record: 33462

I'd like to give Bill Pfeiffer a virtual round of applause for making himself my editor a few weeks ago, when the rain in Northern California caused me to sink beneath the virtual waves, and for giving me the cue to vent some things that had been festering for years.

As a young broadcaster in the mid-sixties, I had no idea of the massive changes coming in society, and how it would affect me personally.

It did. In the undertow, I got swept out to sea -- forgot who I really was. I started with network-level news, went into the service, did stuff for AFN which was a creative dream, then returned to the U.S. to find reality -- top-40, Bill Drake, all-news, etc.

I always felt that on-air people were treated terribly in the 50's, 60's and 70's. They were constantly threatened, which did not serve to increase their ability in making warm and honest-sounding contact with the public. (We could use a Godfrey or a Garroway in these harsh days).

I frequently said during those working years, that I felt AFTRA should lead the way on helping broadcasters who were down-on-their-luck, ie. the Actor's Home, etc. These comments were tossed aside. Of course, I did not know, that since I was a child, I had Attention Hyperactive Deficit Disorder, and just recently diagnosed with Tourette's syndrome. I'm convinced now that is why a lot of great doors that were opened to me, closed before I could understand what was happening. I was hurt because this discovery was made as I reach toward 60, and I know what happens to old broadcasters.

In the 50's when I started in a small station in Erie, Pa, I would see formerly great broadcast talents come through because they weren't wanted anymore, because of drinking problems, etc. It was common to talk about older broadcaster veterans being forced to take jobs as used-car salesmen. I still loved the business, but grew to hate the lack of understanding between sales and programming.

Needless to say, I am not giving up. It part-truth to say that broadcasting is a lousy business. It is not true to say that we cannot fight for change enabling those of us who have worked the mikes to gain some measure of *respect* (not money, not power, not a skill in begging).

It is true that if any standard is challenged, then it is for all of us to be wary.

Treehouse2 will launch a new kind of public radio program on April 20th. It will be, I hope, the best I have learned from commercial broadcast,

and the freedom I know exists in public broadcast. But I have no illusions.

It is an appropriate time for those of us who care, to stand and be counted, doing whatever is *right*, wherever we can, for ourselves first, as professionals in this business.

This is not a sermon, it is a statement made out of years and years of misunderstanding, and confusion. B-T-W, ADD DOES exist (I'll be happy to discuss this with interested parties.

Hmmmmm....I always wondered why Jack Thayer kept bouncing back always doing better than his last job.

Individuals in this business don't often get singled out for the good they have done. I'd like to offer the names of a few: Norm Woodruff, who, even in his final days, showed a level of personal courage I have rarely seen; Bill Drake, who knew how to teach the impossible. John Catchings, a genuinely kind person. Norm Wain, who took me as a 18-year-old troubled kid as a "little brother" and helped me into the business; and many others whose names escape me at the moment in the passage of the years.

(Sorry, I was watching the Oscars last night, and I feel impelled to give an acceptance speech for no particular reason, except after this monster of a posting, I don't believe I'll ever have another chance). (laughing out loud, rolling on the floor) :))

Thanks, Bill, for helping.

B-T-W, in any replies to this, please do NOT include my text. It does take up unnecessary space which Bill has to suffer through.

> >In particular the good folks at MIX 102.9 Not one mention of the turbulant
> and violent nature of the storms rolling over Dallas. Finally about 10
> minutes before the (Tornado) warning was due to expire, I phoned the station.
> I asked them why they weren't announcing that we were under a TORNADO
> WARNING. The woman that answered the phone said that they may be announcing
> it soon... she said they would check into it.<

Most of the radio stations in town are terrible about this. Really, only news/talk KRLD-1080 "News Radio 1080" is the only good source for severe weather.

WFAA-8 also does a good job. During the storms, their warnings scrolling on the screen usually beat NOAA radio's warning by about a minute. I only wish they roll the "SkyWarn 8 Weather Summary" (alphabetical listing of counties and any warning and/or watches they are on and what time they expire) more often. Last year, they seemed to do about every 20 minutes or so. Over the weekend, there were long gaps of time between them (same is true with CBS KXII-12 Sherman which has a similar set up as WFAA).

2306. Burlington, VT-Plattsburgh, NY 1070 AM Back on air-new format

Newsgroup: rec.radio.broadcasting
Date: 1995-03-29 05:41:09 UTC
From: jtymecki@aol.com
Message-ID: <3lartl$jk0@vixen.cso.uiuc.edu>

1070 AM, a 5KW non-directional day-timer, has come back on the air in the last few days. They have been heard playing lots of songs and liners that refer to baby boomer oldies. Also heard a few national spots. Rumor has it that Barry Lunderville is running this operation. The station, which was called WNWX, was run by Hometown broadcasting (who own 1390 WKDR, Burlington) with a news format but it had been dark for months. I can not say if the call letters have changed because I have not heard any yet! I had hoped to catch sign off at sunset to hear the calls but missed them. This brings to three the number of stations running a gold/oldies format in the area. The others are WVMT (620) Butlington, VT and WMNM (92.1) Port Henry, NY.

Regards for now...Joe

>Unless I've missed it, no one has mentioned The Hound Dog (George Lorenz).
>I thought that he was the one who put WKBW on the map in the mid-Fifties

You're right, my large oversight. Lorenz went on to start up WBLK-FM in Buffalo in December 1964. The station has featured black/r&b music during its time, and the Hound's son, I believe, still runs the place. The Hound on KB predates me by a few years, as does Guy King on WWOL. I also didn't mention Russ "The Moose" Syracuse on KB in the early 60s, or Dick Biondi, who went on to more fame and fortune in Chicago. BTW, Biondi on KB is featured in the Crusin' aircheck LP series, featuring 1960. I also leftout Fred Klestine in error. Fred did middays on KB for many years, and in the 1970s played easy listening MOR music on the old WADV-FM, Buffalo's first FM stereo station (now WYRK, a top ratings country format). In the 1980s, he hosted soft rock on WBUF-FM. Fred passed away suddenly about two years ago, out of work and still in Buffalo.

Hi Joe...and everyone else who fondly remembers 'KB;

Kevin O'Connell returned to Buffalo a few years back,
after serving as KNBC/Channel 4's weatherman for several
years in LA. (He was replaced there by an ex-'KB late
evening jock, Fritz Coleman, who you may remember un-
der the airname Jay Fredericks...but he now uses his
real name on the air and in occasional guest shots on
shows like Perry Mason.)
Kevin's at Channel 2 as chief weatherman, feature
reporter, and host of a local home repair show remin-
iscent of This Old House which Channel 2 airs every Sun-
day morning.

How wonderfully cool it is to actually beat Mark Roberts to the punch on a Kansas City change.

It seems (unless this is just another hoax) that ex-country LAM partner KKCJ 106.5 in Liberty Mo (Kansas City) has dropped its polka format in favor of a NAC/Smooth Jazz format.

I heard the signal today and they are calling themsaelves "The City". The sound was fairly typical of a pop-oriented NAC. But what I heard was more of a jazzy AC than a true NAC.

Time will tell.

Hi ---

Found the following article posted on rec.antiques.radio+phono, and thought it would be of interest to our illustrious newsgroup. Enjoy (and better yet, followup if you have something to add to the story or perhaps correct in it) ! Kind of ties in with the NBC Monitor "sounder" thread, perhaps. I knew about the G-E-C chimes but had never heard about the 4th chime for "bulletins". Sounds like a manual precursor to CBS' NetAlert [isn't that what they called the 1960s scheme with the sequential beeps, where 1 beep was a station break ranging up to 10 beeps for national emergency --- and the decoder had kind of a mechanical counter/display that clicked off how many beeps it received] ? I'm sure there were others, too.

Of course, there's always the thread on where the "top 'o the hour" tone comes from.....

A History of The NBC Chimes

I am sure that most, if not all of you collectors of vintage radios, have heard the famous sound trademark of NBC, the three chimes. The announcer would say, "this is the National Broadcasting Company," and then you would hear the three note chime. I became interested in learning more about the chimes when I discovered a book in the library titled "The Fourth Chime" by NBC. I had never heard of a fourth chime so my curiosity was aroused. The book, however did not tell much about the fourth chime, other than it was used as an added fourth note to the three chimes to announce special news bullitens, but dealt primarily with the role that NBC played in reporting world events, mostly during World War II. I had to find out more about this fourth chime. After writing several letters, making phone calls, and inquires, I was able to gather the information I was seeking and even the history of the chimes and how they came about. I hope you find it as interesing as I did.

The NBC Chimes
America's first nation-wide network, the National Broadcasting Company, began broadcasting on November 15, 1926, with WEAF in New York as the key station, and ninteen affliate stations. The corporation was jointly owned by RCA, General Electric, and Westinghouse.
There was some confusion amoung the stations at the conclusion of net-work programs on the hour and half-hour and some type of coordinating

signal was needed to alert the network stations for station break purposes. Three men at NBC were appointed the task of developing such a signal for station identification on the hour and half-hour; Earnest la Prada, an orchestra leader; Phillips Carlin, and NBC announcer; and Oscar Hanson, who later became an NBC vice-president in charge of engineering. These three experminted on the air with a complicated seven-note arrangement (G-C-F-E-G-C-E) in 1927 and 1928. The announcers found that the seven-note chimes were too complicated to remember to strike consistently in the correct order so the number of notes was reduced to four (G-C-F-E) and that was reduced to three notes. On November 29, 1929 the three notes (G-C-E) that became the tradmark of NBC were broadcast. The chimes were struck at 29:30 and at 59:30 past the hour.

The chimes consisted of three note bars finely tuned to exact pitch, mounted on a wood sound box with leather bumpers padding the ends. The bars were mounted in striking order and the box had an aluminum handle on the side so the announcer could hold it up to the microphone while striking the chimes.

Beninning in 1932 the chimes were generated automatically by means of finely tuned metal reeds that were plucked by metal fingers mounted on a revolving drum, much like a music box operates. The reeds formed part of a capacitor in an oscillator circuit. The notes were amplified and then sent out to be broadcast. Now all the announcer had to do to sound the chimes was push a button.

The fourth chime was initiated to announce special news bullitens. It was first used to announce the crash of the Hindenburg at Lakehurst, NJ., in 1937, and used again during the Munich crisis in 1938, with the attack on Pearl Harbor in 1941, and during the D-Day invasion. The fourth chime was a second sounding of the note "C".

The chimes announced the beginning of NBC television broadcasting on April 1, 1941 with the sign-on of WNBT TV in NYC.

NBC registered the chimes with the U.S. Patent Office in 1950, the first audiable trademark to be registered. Below is the discription as filed with the Patent Office.

Serial Number: 72-349496
Type of Mark: Service Mark
Description of Mark: The mark comprises a sequence of chime-like musical notes which are in the key of C and sound the notes G, E, C, the "G" being the one just below middle C, the "E" the one just above middle C and the "C" being middle C, thereby to identify applicant's broadcasting service.
Owmer Name: (registrant) National Broadcasting Company Inc., The
Owner Address: 30 Rockefeller Plaza, New York, New York

The chimes were discontinued on both radio and television on September 12, 1971, but in celebration of NBC's 50th anneversary, the chimes were once again used following all broadcast from November 1976.

References:
The Chimes You Hear From Coast To Coast: A History Of The

NBC Chimes, by Rod Phillips, The Michigan Radio Chronicle, Vol. 6 #4, 1991.
The Fourth Chime, by the National Broadcasting Company
A Pictorial History of Radio, by Irving Settle

I am now trying to find a recording of the fourth chime. If any of you collect recordings of old time radio programs and might have a recording where the fourth chime was used I would like to hear from you.

Thanks,
Bill Harris

There are two streams of discussion going on about public radio - commercials and ratings - that are kind of related. Now that Accuratings which shows public radio stations is available in most major markets to both stations and media buyers I think agencies and sales folks are going to start buying and selling underwriting by looking at the numbers instead of pitching underwriting as a way for companies to foster goodwill through charity-like sponsorships. Underwriting started off as "donor acknowledgments", but with the enhanced underwriting rules and the increase realization through Accuratings that some public stations deliver a significant (and I might add desirable) audience the attidude that public radio's numbers don't count is going to change.

FYI...Public Radio stations have been aware of their Arbitron ratings for years through an independent company that processes Arbitron diary information on behalf of public stations.

On another public radio subject...
I would strongly recommend that anyone interested in distributing a program to public radio contact NPR. They administer the public radio satellite system. (Note: While National Public Radio, NPR is the administrator for the satellite, there are many satellite connected stations that may be members of PRI Public Radio International - formerly APR, or the Pacifica network, or even members of no network. NPR, PRI, and Pacifica are totally separate entities even though their programs are distributed over the public radio satellite.) NPR satellite services has publications that are available to all registered program producers that explain the distribution system.

> in morning drive has been an NPR station).

You're comparing apples to oranges. I wouldn't dream of underwriting a show on public radio for anything other than civic duty. Advertising is an art and, in some ways, a science that delivers measurable results. Underwriting is no way to run a serious public awareness campaign; no calls to action, no comparative phrases...half your arsenal is deadened by the rules regarding underwriting.

Are you saying that marketing managers should apply the same measurement criteria to their underwriting announcements that they do to their ads? CPP? CPM? Recall? Sales increase? Brand awareness? You'd get buried.

I'm not saying people shouldn't support public radio. But underwriting dollars should come from a different budget line item than should advertising dollars - they're two entirely different things, and should not be confused.

If you want to work in radio you don't have to go to school but depending on where you want to go it can help. For instance if you see yourself as a station manager, program director, news director, music director or any management position then education will give you an edge. Of course so will experience but with the two together you'll be a fireball.

The best thing to do is define your goals and figure out what skills you'll need to achieve them. If getting rich is one of your goals don't get into radio unless you know you're REALLY GREAT !!! Hard work and dedication is fantastic but skill and talent are keys.

Learn as much as you can along the way, we're never wise enough, there is always more to learn no matter how far to the top we climb. Knowledge is a privilege, something to be cherished.

Good Luck

2323. Re: Standards in media? Are there any? (was: Re:

Newsgroup: rec.radio.broadcasting
Date: 1995-03-30 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <3lf07b$4tk@vixen.cso.uiuc.edu>
Source record: 33379

IR>I have heard much of the WOR stuff and what I have heard does indeed have
IR>pretty high standards. Dr. Joy Brown is entertaining but I also think she
IR>provides some genuine substance as long as people who *really* need
IR>professional help eventually seek it and not rely solely on a radio show.

Roger,
Thanks for the good words. Most of the callers on Dr. Joy Browne's
show are asking relationship-type questions where there's no serious
disorder involved. We do our share of suicide prevention when a jumper
calls, but that's fairly rare.

Joy has a medical background as well as her Doctorate in Psychology
and Sociology. She's the only national psychologist with those
credentials. By comparison, the rest are quacks. :-)

IR>It's because I fear repression and the hypocrisy that comes with it, that
IR>I'm starting to think that the industry should once again draw up its own
IR>voluntary code. Anyone remember the NAB "Seal of Good Practice?" By
IR>today's standards, it was pretty repressive, but at least the broadcasters
IR>made some effort to say, "we're not going beyond this point."

I fear it, too. Yet I fully expect it to happen. "The new majority
party" is a great friend to the radical religious right. Once Jimmy
Swaggart is appointed minister of culture in the Gingrich cabinet, we'll
see repression in every quarter.

The impetus for the repression won't come from the populace. It'll
come from self-righteous politicians who have favors to pay back to
those radical religious groups who got them elected. Unfortunately, it
won't be the local clergy expressing their concern. It'll be the
gargantuan direct mail machines that manufacture issues of fear that
enhance their fundraising prospects. "Send money, quick, before those
Gays recruit your children." "Send money, quick, before One World
government destroys your country." Send money, quick, before
__fill-in-the-blank__ offends the Lord." The key here is "Send money,
quick."

IR>come up with standards that will protect children and other innocents as
IR>we enter the 21st century while allowing adults to make independent informed
IR>decisions is not going to be easy. But I'm starting to think that we as an
IR>industry at least need to make the effort, or the standards will be imposed
IR>us, which would be a disaster for everybody concerned.

Every receiver has a curious device that can be used to "protect the
innocent." Actually, each one has two of them: an on/off switch and a
tuning dial. "Liberal" use of such things does wonders to protect the

squeamish. Even Conservatives can use them.

I'm getting very tired of parents abdicating their responsibility to teach and protect their children. Instead of paying attention to what they're doing or hearing, they rely on the destruction of the source to cure "the problem." Unfortunately, that solution deprives others of the right to pick from a variety of programming.

2326. Re: Tornado warning

Newsgroup: rec.radio.broadcasting
Date: 1995-03-30 00:00:00 UTC
From: robert573@dallas.relay.ucm.org
Message-ID: <3lf07i$4ua@vixen.cso.uiuc.edu>
Source record: 33382

Dave Hoeffel <hoeffel@aol.com> writes:

>Before bashing a station involved for not reporting that a tornado warning was in effect, I think it's important to investigate just what happened. Normally, when a weather situation of this type arises, the National Weather Service issues an alert, and activates the Emergency Broadcast System.

Perhaps there was a breakdown somewhere in the EBS chain...<

Dave, I would second those comments, to a certian degree. In all my years in broadcasting (well, OK, in my 4 1/2 years) I have seen this happen over ande over again. All too frequently, an EBS alert retaining to weather will be sent out, but hardly anyone responds.... I have never seen "a" Dallas radio or TV station, actually execute EBS alerts, with the exception of such stations as KRLD, and the one I work for... I have NEVER seen a TV station actually use the EBS tone, during foul weather... Oh sure they use it for tests, but not for weather.

HOWEVER, I recall reading in the FCC rules... that activiation of EBS in "local" situations, is on the terms of "at your descretion". A co worker and I brought this to the attention of our employer, because during a storm that was passing through, we had EBS alerts off the wall... He and I both felt that maybe it wasn't necessary to repeatedly use the EBS tone, after the first few uses.... Because by this time, most of everyone should know what's going on, and they'll stay tuned and wait for us to start talking on the air.

What I find scarry about all this, is that it seems to me, TV and radio is putting this "at your descretion" policy in place, at all times! this is merely my own opinion... and I would love to see some folks from Dallas radio jump on here and tell us that they do use EBS in severe weather. But until I see TV stations actually use EBS, and hear more stations use EBS.... it is IMHO that they just care about profit... not the community which they serve.

NOW, with that in mind.... I do think that TV stations ARE doing weather coverage... they interrupt programming and talk about weather... I have seen that!!! But I have not seen them use EBS, when they do it. They jsut break in, do the update, and break out.... Perhaps it's not quite as necessary to use EBS on TV... because TV does have picture, which can catch your attention a lot easier than radio can.

Scott Cleveland writes with:

"and the only monitering equipment you have is a Radio Shack Weathercube (tm). How the hell is the jock supposed to know what the National Weather Service has issued a tornado warning<

Simple... we have new weathercubes such as Radio Shacks, which will sound an alarm.... when the NWS uses their alert tone... This should be a simple way to provide the on-air staff continuous coverage of the NWS, without having require them to sit there and listen to the NWS all day...

If I am not mistaken.... this is exactly how the new EAS system is supposed to work....

Jim Grey (jimgrey@iquest.net) wrote:

: But once or twice, when it was
: warm and sunny when I began my shift, the weather shifted violently, watches
: were issued, I didn't hear about them, and listeners were calling me to ask
: what was going on. It should NOT work that way.

Apparently, a lot of people think that the lack of tornado warnings on the radio is new. This is not necessarily the case.

Back in the late 1960's, my family got our first stereo system and installed it in the basement. This system had an FM *only* radio, and, in fact, it was one of our first FM radios (although not the only one). Sometimes, it was used to listen to what was then KMOX-FM (St. Louis). Perhaps more often, it was used to listen to KCFM, which had live announcers.

One afternoon, there was a tornado warning, and the static from the thunderstorms on AM was extremely troublesome. So, I went into the basement and turned to KMOX-FM, expecting to hear news about the warning. After all, they carried the *entire* CBS news hourly report -- all 10 minutes of it back then -- each hour. (Even then, KMOX-AM was chopping off the last minute of CBS news.) And KMOX-AM was not only the station with the most news, it was "The Voice of St. Louis."

Guess what? There was absolutely *no* mention whatsoever of the tornado warning on KMOX-FM. But I *was* rewarded with stereo reception that was crystal clear and static free.

Not long afterwards, KMOX-AM (1120) had an "At Your Service" call-in segment featuring Jack Buck (the sportscaster who was also host of some of the call-in shows) and a spokesman for the St. Louis Weather Bureau. The topic of the segment, not surprisingly, was St. Louis weather. I called in, explained what happened during the tornado warning, and asked whether KMOX-FM (103.3) carried tornado warnings at all.

Jack Buck's answer: No.

No equivocation at all. In fact, he said he couldn't answer why they didn't, and seemed to be genuinely puzzled by the situation.

While that problem was probably corrected decades ago, it does illustrate from a listener's standpoint that, when you listen to low budget stations (which almost all FM stations in St. Louis were, at the time -- and KMOX-FM was almost entirely automated with 50 minute long prerecorded tapes), you shouldn't expect to get a lot of service. That may explain why many of these stations do poorly in the ratings.

2328. Buffalo/Toronto Radio Watch(3/29):WBUF format to change

Newsgroup: rec.radio.broadcasting

Message-ID: <3lcudr$q9n@vixen.cso.uiuc.edu>
Source record: 33469

Something that has been long rumored in Buffalo radio shall finally come to pass.
WBUF(92.9,AC;B93)has,apparently,given up on its AC format. A promo running on 'BUF today(heard by me at about 11:10am today)says that WBUF will unveil its new format at 2pm tomorrow. No specifics,except that it will,in the promo's words,"write the next chapter" in Buffalo radio. As of yet,I have no idea if any staff or management will get blown out.
Speculation had been running since last year,when Pyramid bought WBUF from the Syracuse,NY-based Lincoln Group,that a new format would be put in place. It's possible that a dance-based CHR will land at 'BUF,though-as previously stated-I don't know what the format will be. WBUF has long been the third wheel in a 2 AC market,finishing well behind AC leader WJYE(96.1)and hot ACer WMJQ (102.5;Q102)-it finished 12th in the fall Arbs.

2329. Sacramento Radio Update

Newsgroup: rec.radio.broadcasting
Date: 1995-03-30 00:36:15 UTC
From: MLennartz@aol.com
Message-ID: <3lcudv$qam@vixen.cso.uiuc.edu>
Source record: 33470

PROGRAMMERS SCHUFFLE:
Don Daniles departs as Operations Manager at KXOA-FM & AM/KQPT-FM (70's oldies and NAC, respectively) after little more than one year at the post. Daniels moves to OLDIES KQQL-Minneapolis. He will be replaced by two Programmers.
Brown Broadcasting has already hired J. Trapp to handle programming duties at KQPT/FM (NAC). They should announce who will take the programming title at KXOA/FM (70's) soon.

Meanwhile, at KRAK-FM/KNCI-FM (Country duopoly) no word on who will replace departed Larry Paregis (to San Francisco's country KSAN). The post has been open since December, and according to sources will be filled shortly. KNCI-FM maintains strong numbers across the board, but "Young Country" KRAK-FM has slipped to deep in the pack in recent books.

MORNING SHOW UPDATE
KCTC (Nostalgia) announced they were going LIVE in morning drive (on the bird 24 hours to date) and hope they will announce a new morning show host this week. The hunt for a personality was put on temporary hold by corporate (Tribune Broadcasting) for no announced reason earlier this month. Rumors of a sale of the station and it's FM sister (Adult Contemporary KYMX-FM) may have something to do with it. Speaking of those rumors, they've been rumbling for over a year. However, street talk has become more intense the last few weeks. And if you believe these rumors, format change to Modern Rock would be in the FM's future.

PROMOTION MAN LEAVING
Roger Deshi departs #1 rated KFBK (News) promotion director post.
No announcement on his destination. There is talk that the post will be filled by another promo director from one of Chancellor's two other market owned stations (KGBY-FM, AC and KHYL-FM, Oldies).

Trends arrive Friday, hoping we can post some for you early next week.

PS. It finally stopped raining. Felt like Seattle around here for 3 months.

2330. Upcoming Radio Broadcasting Project for South Africa

Newsgroup: rec.radio.broadcasting
Date: 1995-03-30 00:36:18 UTC
From: rm@delphi-int.org
Message-ID: <3lcue2$qb8@vixen.cso.uiuc.edu>
Source record: 33471

Delphi International is preparing a proposal for a program to be sponsored by the U.S. Information Agency, "Professional Development of South Africa Radio Station Owners and Managers." The program is intended to help the owners and managers of South Africa's new community-based radio stations to develop skills to manage their broadcasting operations and assist them to developing strategies to operate stations as successful business operations.

Background

With South Africa's transition to nonracial democracy, the broadcasting industry in South Africa is changing from a centralized, government-owned system to a decentralized system of independent broadcasting ventures. South Africa's Independent Broadcasting Authority (IBA) was established in 1994 to grant commercial, public service, and community broadcasting licenses to enable a wide range of independent radio stations to begin broadcasting for the first time. The USIA-sponsored program is intended to assist the owners and managers of these new broadcasting operations by focusing on fundamental broadcasting management practices to help enhance the prospects for the long-term viability of their stations.

The program will be a two-way exchange. Phase I of the project will be a two-to-three week program in the United States for 9-12 South African participants (station owners or managers); this program will probably take place in autumn 1995.

Phase II will be a training program conducted by American specialists in South Africa for a larger group of station owners and managers. Phase II will take place in early 1996.

Both phases of the program will be designed to

- Introduce participants to fundamental business management skills applicable to station management, including financial planning, cash management, and staff development;

- Analyze income resources for radio stations including advertising, and examine strategies for survivingthe intial stages of launching a new broadcasting service;

- Examine marketing strategies aimed at attracting advertisers and study the interrelationship among programming content, objective news reporting, and maintaining advertisers as clients;

- Develop strategies for implementing improved station management practices;

- Examine media-government relations and demonstrate how the independent reporting of political and economic developments helps shape public opinion and government policy;

- Provide an overview of journalistic ethics and the standards of professional journalism; and

- Establish informal ties between South African station owners and U.S. counterparts, providing a resource for ongoing consultation and advice on station management concerns.

Part of the Phase I program will be several days of "professional shadowing," in which the South African visitors will be paired up with American radio station owners and managers. Each visitor would accompany his or her host during the host's normal schedule, allowing the visitor to observe the day-to-day activities of broadcasting management.
In order to give the visitors exposure to the widest possible range of professional activities, shadowing would take place over several days, with the visitor accompanying different managers at the same station on each day; for example, one day might be spent with the general manager, one day with the business manager, one with the program manager, and one with the news director.

As we develop our proposal for this project, our immediate concern is to identify

- radio stations whose management staffs are interested in hosting South African broadcasters for the professional shadowing experience described above

- recommendations of academic institutions that are particularly known for radio broadcasting programs; and

- highly qualified specialists in station management and operation, particularly those with interest or experience in South African, who could conduct training there in Phase II.

Delphi International is a private, nonprofit organization that arranges a range of international professional exchange programs and management training for overseas professionals.

Expressions of interest in taking part in this project are encouraged, as are ideas on substantive content of the program. Please phone me at 202/898-0950, or use e-mail. I look forward to hearing from you.

We got the Peabody applications awhile ago. I think the due date was sometime around January 15. We just got a note that our application has been accepted, etc., and that the announcement of winners will come out in April. Sorry you missed the process. It was kind of strange, in fact. Our Peabody application was sent to our Chief Engineer, although we know we're on the mailing list by virtue of our winning a Peabody a few years ago (brag, brag).

Allison Steele, aka "The Nightbird," was on WNEW-FM (I believe) in its glory days. The last I heard, she was on WXRK in New York (Howard Stern all morning; classic rock and roll all day), and you can hear her voice on some of the zippers on Howard's show here in Philly. Her big love (again, last I heard) is/was a store she owned in New York dedicated to cats and cat stuff! Truly one of the big influences on a lot of women (and others) in radio.

I hope they're true. WTHT (a smokin' station in the mid 80s) went down the tubes fast in the late 80s after they did a frequency swap with WBLM. They had a killer signal here in central N.H., now 102.9 is just another wasted signal.

We interrupt the Jay vs. Rich thread for additional comments on broadcasting schools...

If taking a course at a broadcasting school will teach a candidate enough to make them ready for any emergency, I say go for it. Need a fill-in news person? I can do that! Graveyard shift guy just dropped dead? Let me at the mic! The point is that job candidates need to know a little bit of everything in order to (at first) fake their way into a job.

For me, it wasn't broadcasting school that taught me that. I volunteered at WBAI in New York and did everything I could, from running the elevator (we were on the 19th floor) to putting together the community bulletin board to filling in on-air for hosts who just didn't show up for their shifts. In order to pick up the knowledge to be ready to do anything at a moment's notice, I practically moved into the station. I learned improvisational skills that no school could teach, and 15 years later, I'm still benefitting from that self-training.

HOWEVER, in defense of broadcasting schools, I did take a brief course in getting a job in radio. It was taught by someone between gigs at the time, and it was my first glimpse into what "real" radio was like. I learned about getting out of New York in order to get back into New York, visited a couple of commercial stations, and benefitted from the teacher's experience. I guess what I'm trying to say is that broadcasting schools may be a means to get to the same end. But the candidate has to have a certain amount of fire in her belly to get anything out of it.

On another topic...WFUV at Fordham has been churning out excellent engineers/production people/on-air talent for years. I was glad to see a mention of them here. For awhile at WNYC in New York, everyone had come out of either WBAI or WFUV.

We now take you back to the Jay & Rich show...:)

Grim changes on Boston's radio news front. WRKO (American Radio Systems) is letting go more than half its news staff (down to 2 from 5) RKO's Morning newsman Rod Fritz and Mid-day anchor Pat Carroll have been let go, as has the news person for WBMX. (They are being picked up by Metro Traffic News, and will be heard on ARS' WEEI 850 AM, & "Eagle" as well as ARS "Cousin" station WBMW 590AM) What's sad is that here are 3 former powerhouse AM's that a few years ago had great news staffs. Now there are only 2 news staffers left(Listo Fisher & Mary Blake). (Thank you deregulation and duopolies!) Metro Traffic is just getting into the news business in Boston, and doesn't even subscribe to a wire service yet!

I remember hearing Joey on WKBW/Buffalo, as well as WIBG in my hometown of Philadelphia. He also did the Royal Order of Night People thing on 'IBG. As I remember it, listeners were instructed to remove all clothing, turn off all of the lights in the house, light a single purple candle, tilt the candle toward the radio, letting the wax run down the dial, sealing the tuner in place at 99 WIBG, and then chant, "I will not be a dial twister, or I will get a Wibbage blister."

Pretty radical stuff in the early '70s...

Positions Vacant - Sydney, Australia Only

RADIO ANNOUNCER

Third Network, a satellite radio broadcaster, is currently looking for radio announcers to fill a variety of vacant on-air positions.

The requirements are that you have had previous experience on-air in the radio industry, that you are prepared to work any hours and that you have, if needed, your own musical material (CD's).

Those people interested please email back for further details and possible interviews.

If you have a Quadra 840AV or 660AV, you can use Alaska Software's Digitrax as an 8-track or 6-track (respectively) recorder/editor/mixer.

OSC's DECK II will also work on the same sorts of Quadras. Both softwares cost around $300, and neither require any additional sound cards.

AP's NewsDesk is among the most powerful yet simple pieces of software out there. The user-interface is kind of klunky: commands are less than intuitive...but, because of its raw power and flexibility, it's worth looking at.

Among other things, it's one of the few programs that--probably through an oversight--allows you to send codes to your dot-matrix printer; if you know what your printer needs to generate a page-break, or to begin or end underlining or italicizing or to switch between near-letter-quality/draft printing, you can set it up with NewsDesk--although the codes tend to be complex...which is why...

I *do* recommend anyone who uses NewsDesk also buy a macro-writing program called ProKey (from CESoftware). It lets you assign a complex (user-unfriendly) series of keystrokes to a single key or key-combination. (E.g., Control-U for underline; Control-P for print, Control-A for select-all; Control-* for save this newscast, open a new one.)

I just happen to have written all those macros myself--and, sad to say, have little use for them now we've switched to UPI--forcing us to give up NewsDesk.

If you get NewsDesk and ProKey, let me know. I'll be glad to help.

One little-known loophole about commercials on public radio is that while the wording restrictions apply to profit-making underwriters--Exxon, Joe's Garage--they don't apply to underwriting from non-profits--501(c)(3) tax-exempt organizations.

This means that a non-commercial station can legally run commercials for non-profit organizations, such as symphony orchestras, museums, etc. These spots can legally use "calls to action" and comparative language not found in "normal" underwriting messages, e.g.: "Attend the Smallville Symphony Pops--it's the best tune in town." Perfectly legal, according to the FCC.

Source record: 33498

I have heard much of the WOR stuff and what I have heard does indeed have pretty high standards. Dr. Joy Brown is entertaining but I also think she provides some genuine substance as long as people who *really* need professional help eventually seek it and not rely solely on a radio show.

I guess maintaining some degree of standards is why I went into public broadcasting, although I did work for a couple of years in the commercial end.

What frightens me about so much of the sleaze is what is being discussed in this thread--how far does this go? And if it goes too far, is the pendulum going to swing back toward the kind of censorship we used to have when no one could say "damn" or "hell" on the air or movies couldn't show even married couples in the same bed?

It's because I fear repression and the hypocrisy that comes with it, that I'm starting to think that the industry should once again draw up its own voluntary code. Anyone remember the NAB "Seal of Good Practice?" By today's standards, it was pretty repressive, but at least the broadcasters made some effort to say, "we're not going beyond this point."

Coming up with standards that will protect children and other innocents as we enter the 21st century while allowing adults to make independent informed decisions is not going to be easy. But I'm starting to think that we as an industry at least need to make the effort, or the standards will be imposed on us, which would be a disaster for everybody concerned.

Any others with ideas on this topic? Or do I worry too much?

RW: David, I'm not in a position to dictate standards to Tabloid TV. I
RW: can only set the standards for my own network. Those standards are very
RW: high. We don't do hate. We don't create victims.

ID>I understand this, but I am thinking more in terms of a voluntary
ID>standards organization, sort of NABish. With the respect you must
ID>have from being everywhere important in talkradio I was hoping
ID>there were some professional standards. Not hearing your network
ID>locally at the moment I had no idea what direction it's going.

David,
My network is going in the same direction it always has. We don't do
hate.

I guess we have to define "professional standards." While I disagree
almost 1000% with Rush Limbaugh, I don't see it as any violation of
professional standards (though the inaccuracies bother me).

I did see J. Paul Emerson (formerly of KSFO) as a splotch on the
landscape, but he's a rarity.

If there is a breach of "professional standards" I see it as a
disregard of basic journalistic standards to bolster one's argument. No
need for accuracy if it furthers the cause.

ID>And you don't feel regulation is the answer then. I remember the days of
ID>regulation and remember that a discussion of whether talkshows prompted a
ID>suicide and a murder never came up during those years.

No. I don't feel regulation is the answer. Whose standards will be
applied? Jesse Helms? Jimmy Swaggart? Let the market determine if
something is appropriate.

I remember the days of regulation, too. I remember the waste and the
changes in that regulation. It varied according to who was in office.

Who's talking about talkshows prompting suicides? Tabloid TV.
Newspapers, etc. The very same people who weep and moan about our
"standards." It sells papers and gets ratings. So much for their
standards. Frankly, I'm tired of people shooting messengers. If some
homophobe was driven to kill a man, I suspect he would have killed
someone even without the catalyst of a TV show. The problem isn't with
Jenny Jones. The problem is with the killer.

We cover stories about abortion. Does that mean we're responsible
when some berserk jerk kills a doctor? If that's the case, we need to
ban those all news stations because they give folks ideas.

It's a great sport to blame someone else for one's failings. If I kill someone, I deserve to rot in jail, regardless of which talk show I watched or how I was abused as a kid or who looked at me crosseyed or who kissed me on the lips. What ever happened to taking responsibility for one's actions?

The last time I read the law the penalty for expressing male to male affection didn't carry a death sentence. Rearranging one's face is about as far as the law might allow. He killed a man, not in self defense. Go directly to jail. Period.

Rich

As Jay Marvin pointed out in an earlier post, Howard Stern has indeed returned to the airwaves in Chicago. Howard has resurfaced at classic rocker WCKG (FM-105.9).

Howard was dumped from WLUP-AM (1000) (now WMVP) when the station decided to go with an all sports talk format.

Howard ripped Evergreen Broadcasting in general ("Infinity wanna be") and station VP Larry Wert in particular for the handling of his previous stint in Chicago. He vowed to continue pursuit of a lawsuit against Evergreen for breach of contract. In his discussion, he noted that he would pursue his suit regardless of cost.

He also found time to taunt current morning talent at the main music competitors. Howard went after Mancow Muller (WRCX-103.5) for his reliance on "goofy names" (Mancow and Turd) and his "false gimmick of being a regular guy". He also lambasted WLUP morning man Kevin Matthews and WMVP morning personality Steve Dahl.

WCKG's morning show finished 14th in the Fall Arbitron book with a 3.0 share of adults between 25-54.

IS>number of nationally syndicated talk show hosts is falling.

IS>Calling it quits are:

IS>Ross Perot saying it is taking too much time to prepare for his
IS>weekly show. I think he does his last show in early June.

IS>Pat Buchanan has to quit so he can run for President.

Steve,
Those rumors are wrong. For every Ross Perot who quits because he didn't get the proper ego strokes and every Buchanan who quits because it wasn't his day job to begin with, there are dozens more getting into the the fray. Every Talk Show Host with an ego wants to "go network."

I met with a major New York bank the other day. They want to get into syndication. There's more money in their petty cash drawers than they'll make.

"We got this great cookin' show hea in Bangoa. We just know it'll make a killin' in syndication." It won't.

I have a standard line I give to the 5 or 6 callers a day who ask me how to get into syndication. Buy a steak. Haul out your barbeque grill. Fill it with money. Light the money. The end result will be the same as if you went into syndication, with one exception: you'll have a great meal.

There are very few shows in syndication that make much money. Satellite distribution companies and bankruptcy attorneys are the real winners in this game. Most of them end up selling "Will Kits" and "Country Line Dancing" tapes.

Stations like the former have become entirely too common, especially in minor markets. As far as I'm concerned, if a station doesn't pass along this kind of critical information to its listeners, then it shouldn't be on the air!

This kind of negligence doesn't rest solely with the jock on duty, either. Management must provide the leadership and the tools to make sure that, in the event of an emergency, information is provided to listeners. For example, one station I worked for ripped out the AP service one day. "Cost too much," the management grunted. Suddenly, my link to the outside world, especially on desolate weekends where I was the only employee in the building, was gone. I did what I could to keep on top of weather conditions -- if the clouds looked even a little threatening, I turned on the TV to watch for bulletins and frequently checked out the back door. I caught several severe weather situations this way. But once or twice, when it was warm and sunny when I began my shift, the weather shifted violently, watches were issued, I didn't hear about them, and listeners were calling me to ask what was going on. It should NOT work that way.

2367. Re: Dallas/Fort Worth radio - WE DESERVE BETTER!

Newsgroup: rec.radio.broadcasting
Date: 1995-03-30 00:37:11 UTC
From: hoeffel@aol.com
Message-ID: <3lcufn$qgc@vixen.cso.uiuc.edu>
Source record: 33358

Before bashing the stations involved for not reporting that a tornado warning was in effect, I think that it's important to investigate just what happened. Normally, when a weather situation of this type arises, the National Weather Service issues an alert, and activates the Emergency Broadcast System. Perhaps there was a breakdown somewhere in the EBS chain... a likelyhood, considering the problems that EBS has had over the years.

What Rob said was true. However, if you work at a station without
an AP or UPI teletype (or modem), and the only "monitoring'
equipment you have is a Radio Shack Weathercube (TM), how the
hell is the jock supposed to know that the National Weather
Service has issued a tornado warning? Isn't it the prerogative
of the EBS primary to "fire the tone" if a twister is touching
down somewhere in the metro area?
FYI: This happened to me back in 1987, the first time I worked
at WXRL. A tornado touched down "near Buffalo airport" and the
EBS primary, WBEN, sat on its hands. I just happened to put on
the weather radio and pick up the warning, which we immediately
aired. About 15 minutes later, my then-fiancee (now wife) called
me- the twister touched down across the street from her house!

Sorry, Bob, but the FCC insists that you have clear and written permission to use any site you propose, and if you don't your CP is pulled and you can be subjected to sanctions, including fines. Case in point: a few years ago a station which was about to begin construction lost a zoning case, and failed to notify the FCC. Even though there was no license, the FCC successfully imposed a $25,000 fine on the permittee for abuse of process, for failing to report the change in status of the proposed site. I have heard of a few similar cases. In this case it seems clear that FCC rules do not necessarily override local statutes and ordinances.

Back in 1980 I was hired by Iowa Western Community College in Council Bluffs, Iowa to serve as PD for KIWR, a new 100KW noncom FM. Since we were in the Omaha (NE) market, we were going to co-locate with WOWT, channel 6, located in a tower farm about 11 miles air distance from our studio.

The first thought was to handle the signal via telco loops, but in those early deregulation days, the cost of fully equalized loops across a state line was expensive. So we decided STL was the way to go.

The problem was that no one had really done any research on the site. The station was located in an old house on an edge of the campus. Needless to say, there was no line-of-sight to the channel 6 tower, so we had to "double hop" it by building a 200' tower on another corner of the campus and have two STL's--one from the studio to our tower, the other from our tower to channel 6.

This thing took months to work out--environmental impact statements, FAA documents, etc. Then we had to work with the Bluffs city council's zoning board, first to establish what was called a "tower overlay district", which simply enabled us or anyone to build a tower on the site, then we had to get a special zoning permit to build the damn thing in the first place--after a few people's objections were dealt with.

Putting a station on the air is a long, involved process that involves not only the FCC but many other levels of Federal and local government.

2371. WAAF in trouble ?

Sorry friends, I find it very unlike that WAAF in Worcester (yes, folks WORCESTER) is in need of being bailed out. But, WAAF will never truly be a BOSTON station. Their transmitter is too far out of Boston to give a solid city grade signal. They are located on the WHSH-TV Channel 66 tower in Hudson. Their signal is such that it just provides its' City Grade signal to its' city of license, WORCESTER. That is all fine and legal. The idea is to come as close to Boston as is legal possible while still providing a City Grade signal to WORCESTER. Nothing wrong with that.

But, be real....WAAF cannot come any closer to Boston due to the close proximity of WXKS-FM (107.9) and WMJX (106.7). I have to give them credit. They are providing something that simply doesn't not exist in Boston proper. To tell you the truth though......they were a hell of a lot better when they WERE a WORCESTER based radio station (circa 1975-1981) from the "Cocaine Realty Building" on Mechanic Street in WORCESTER.

Why do I bold face WORCESTER.....simple.....WAAF is still a WORCESTER licensed station. PERIOD.

See ya !

Yvonne's last on-air position was as morning host at WNUA-FM (95.5 FM) in Chicago. She was hired away from Chicago's WGCI-FM by our then-GM, John Gehron--her old boss from her days at WLS--in the fall of l989, shortly after I was hired as news director here.

Unfortunately, cancer had already by then limited her mobility; and her condition worsened over the next two years, until her death in 1991. I had the honor of serving as her last newscaster. But through the efforts of her successor, Dean Richards, the city of Chicago has named a stretch of LaSalle Street in front of her home at Marina Towers in her honor: Yvonne Daniels Way.

For the 2nd time in 3 months, one of the local tv stations has asked me
to come up with a tv show for them. I'll write produce and host.

The problem is....I don't want to do a simple "here's a video" show.

Are any of you hosting television in addition to your radio gig?
Or, is there an entertainment-based local show in your market that you find interesting?

if so, could you reply with some details on the show...plus the tv station that airs it?

if not, please excuse the intrusion.

thanks-

: Really enjoyed reading Mark Scott's posting about Danny Neaverth and his
: son Darren.

: I remember Danny from the early/mid 60's, when he had the afternoon drive
: shift on WKBW radio in Buffalo. I lived in New Jersey and could get KB's
: blowtorch skywave signal. I would tune in during the winter months, and
: listen to the "Danny-Joey changeover" at 7, and then the Joey Reynolds
: show until midnight. Since KB did the news at "20 after and 20 of" in
: those days, Danny and Joey were able to develop that shift change into
: quite an art form. Does anyone remember Joey's "Loyal Order Of The Night
: People" club? At one point, Joey even claimed - due to KB's skywave -
: that he was "number two in Baltimore".

: After Joey left KB, I think he was at WXYZ in Detroit for awhile. He also
: turned up about 12 years ago doing the overnight shift at KOA in Denver.
: Anyone know his whereabouts today?

: Jeff Chandler
: Columbia Falls, Montana

I last heard Joey doing morning talk at WBZT in West Palm Beach,
Florida. I think he still lives in the South Florida area but I haven't
heard him on the air for about a year now.

Till about June 1965 I lived 2 miles from the mighty WKBW transmitter.
On most radios we couldn't listen to the station at 1520, they would
overload and sound garbled. However the station came in just fine around
640 KHz. An interesting fact about the transmitter site is that it's
shared with WGR 550 (5KW) using the same tower but with a different
directional pattern.

Those Jock changeovers were legondary! They were my goal at stations I
worked for. Never did them as well as Danny and Joey but at least I got
to try before the P.D. made me stop (in Charlotte at WSOC-AM-93). The
night guy Jim Wall was very quick, we were good friends and we had fun on
a station that was on it's last legs.

A minor correction "KB Pulse-Beat-News" was at 15 and 45. Buffalo didn't
get 20/20 news till WYSL-1400 hit the air. They never could compete with
just 1KW!

2378. WJOL/WLLI Joliet Ill. R.I.P.

Newsgroup: rec.radio.broadcasting
Date: 1995-04-01 00:00:00 UTC
From: airmarty@aol.com
Message-ID: <3lih2b$3lb@vixen.cso.uiuc.edu>
Source record: 33302

[Moderator's Note: This article was found in chi.media (Chicago Media) and I forwarded it here because it is so typical of the fate of local radio in America. Bill]

It's another sad day in a long line of sad ones for Chicago area radio with the virtual destruction of two locally-owned broadcast operations. What were once two of the more popular and dependable suburban outlets, WJOL & WLLI have joined the all-to-large ranks of broadcast stations serving merely as a ground stations for non-descript satellite services.

Last weekend, control of the stations were taken over from bankruptcy by Barden Broadcasting (owners of WKBM in Coal City and WKOT in Marsellies), the local, LIVE programming was dropped and are now simulsucking a "hot AC" format. Gone is a source of local information and community identity. Just 10 years ago, WJOL was a very prosperous operation. The story is very similar to that of WMRO (now WBIG). When that station was purchased by Beasley Broadcasting, community service took the back seat to short-sighted, greedy owners with little to no concern for the station's integrity and the needs/interests of their respective loyal listeners.

In WJOL's case, the blame is not totally the fault of Barden and new GM Ralph Sherman, but the result of 8 years of total mismanagement by Uno Broadcasting. Former owner, Robert Tezak (now a resident of a federal correction facility somehwere) bought this fine facility to shut it up, and now down. He resented the unbiased political coverage attacking him, then the coroner of Will County, and proceeded to milk station revenues and resources.

There were great hopes that new ownership would restore the station's lacking integrity, but it became apparent after the sale last Fall that this wouldn't be the case. Gone are virtually the entire staff, including longtime local personality Frank O'Leary, Music Director Derrick Brown, General Manager Jody Sebee, News Director Randy Bunger, Production Director Julie Fox and air staff members including Lenny Svoboda, Lou Anne Lenzie and others.

According to sources, WLLI, better know to listeners as adult-rocker 96-7, I-Rock will be a total satellite operation with an Adult Contemporary (just like WJKL, WJTW, WZVN, WKKD, WSZR and too many others). There will be some local origination programming on WJOL, but, like WBIG, WRMN and WCGO will be mostly a turn-key station featuring satellite talk. The stations will be operated jointly with Barden's other properties in Coal City and Marsellies with the bottom line being the top priority.

Gone is also a vital local source of information that served it's community very well. I was there the day the tornados roared through

Plainfield and Crest Hill. WJOL was the only live local station that broadcast warnings of the impending storm and followed up with continuous coverage and information for the next week. Too bad the FCC ,NAB and Sen. Larry Pressler refuse to take these things into consideration in their crash and burn policy of catering to the large broadcasting and communications conglomerates through increasing duopoly, LMA and deregulation.

To my good friends who now are searching for new jobs and new lives...I wish you the best of luck and toast to the memories of a great local station. Now...I wonder which station will be next...

WARNING: Politicans are hazardous to your wealth....Kato for President

2379. Dawson out, North in at KOGO

Newsgroup: rec.radio.broadcasting
Date: 1995-04-01 00:00:00 UTC
From: Chris Carmichael <CCHRIS@cei.mhs.compuserve.com>
Message-ID: <3lih2b$3lf@vixen.cso.uiuc.edu>
Source record: 33303

Dave Dawson, KOGO's 12 to 3p.m., host has left the airwaves of San Diego again. The former KSDO San Diego, WABC, New York, and KCMO, Kansas City, Mo., talkshow host said that the strain of flying every weekend from Kansas City to San Diego was too much.

PD Peter Weisbach said today [March 30], that for the past three weeks Dawson's show were based at his home in Kansas City. KOGO has been advertising a talkshow talent, and rumors of Dawson's outtage was first reported here in January.

Never afraid to speak out to his critics, Dawson took a press beating for talking about anal intercourse in front of school children at a live remote from the Del Mar Fair. San Diego, a mostly conservative town, reacted with letters to the editor and to the station.

Weissbach said today that as of next Monday, KOGO's entry at 12 p.m. would be Ollie North. This leaves the 'hot-talk' station with one local live show: Weissbach from 3 to 6 p.m. It is not know at this time if another local live show will find its way to the KOGO airwaves.

[Thanks to Keith [cmarvel@aol.com] for assisting me on this story]

>the San Francisco AES Convention.

>Any information or other sources of information would
>be useful and appreciated.

CBS Labs conducted extensive research into subjective loudness, and the measurement of it in the late 60s, early '70s. The outgrowth was a 'loudness meter' and a 'loudness controller', the latter being a more wide spread product. Neither was a huge commercial sucess.

The Loudness Monitor proposed in 1967 by Messers Bauer, Torick, Rosenheck, and Allen in their IEEE paper was comprised of a sets of 8 bandpass filters followed by rectifiers, and a summing amp with ballistic control driving a meter. There was also a loudness contour equlaizer ahead of the device.

The Loudness Controller was a somewhat simplified version of the filter/detector networks found in the monitor, but instead of driving a meter, the output was fed to a "Variolosser" attenuator, closing the loop between loudness monitoring and level control.

Both devices worked fairly well, but did not proliferate. The CBS technique remains the only available metering system aproximating true loudness. The so-called Loudness Meter found widely today from Dorrough is in actuality a true peak and offset VU meter ballistic combined in a rather attractive display. Unfortunately, it is not a true loudness meter.

To my knowlege, Innovonics has the only current license to produce the CBS loudness meter commercially, which is sad because of its unique display of a quantity grossly misunderstood today. Most still use VU and think it shows loudness (nope) or think they are even closer with peak, or PPM (actually peak or PPMs are farther from reading true loudness than a VU meter).

I would be curious as to the interest level in such a device. Anyone's thoughts would be most welcome.

>I believe that I read in Popular Communications that she is all
>German now, changing the format from Top 40 sometime back.
>
The first months they broadcasted an AC format. The program
was partly done in Luxemburg an in Stuttgart, Germany
(by RTL-Baden-Wuertenberg, a german company of RTL). Couple of years ago,
RTL-Germany created a second "network" with a brand new radio format,
called "RTL-Der Oldiesender"(including oldies from the 50s/60s and 70s)

Lately all two programs AC and the Oldies were done in Stuttgart and
not any longer in Luxembourg, mostly supporting german local stations in the
South-West of Germany.

The Oldie format, according to RTL-press releases, was so succesfull,
that they put their Oldie Prg. on the AM dial (1440AM) and on the Astra
(don4t know the frequence !) ,broadcasting there 24h a day. Later on, they
stopped producing their AC-Format.

RTL - Germany was also closing ther SW Freq. on 6090kHz and gave it to
the french service of RTL. I dont know if they (RTL-Der Oldiesender) are
still broadcasting on 15350kHz (which is not avaliable in Central
Europe).RTL-Der Oldiesender ,which is on 1440 AM, is avaliable
in all cabel networks in Germany in full stereo.

(and SMPTE sync, if you need it) on any nubus Mac. Just get a NuMedia
audio i/o card.

Unlike the digi, the NuMedias use the same AT&T dsp chip as the a/v Macs.
They're fully ARTA-compliant, so the software is happy as a clam.

I'm running Digitrax on an old Mac IIfx that way. (Just not for my pro
broadcast work... there are _much_ better workstations on the market*).

Besides, the NuMedias are _cheaper_ than the digidesign, sound great, and
have better filters.

I worked with Michael O'Brien in the early 80's at KQFM which
became KKRZ. At that time he was our morning guy (natch) as
Oregonians loved their own more than outsiders. Gene Autry's
compnay Golden West went about tyring to sell the station at the
death of Autry's wife. AS we awaited a buyer, Golden West decided
to put the bean counter in as interim general manager. His first
move ws to fire the entire FM airstaff EXCEPT M.O. on Valentines
day 1984. That's the last I saw of Michael.

We had a portable one at the station I worked at and I thought they sounded pretty good. At least good enough to master al our spots on. They are a little difficult to edit on though. Overall, out of 10, I would give it an 8. They are a bit pricey for the professional models though...I think the station paid 800 for it.

>> in morning drive has been an NPR station).

I don't think that this is really something that advertisers can use terribly effectively, especially since the more ``commercial-like'' underwriter announcements get, the more irritated the listeners often are. However, it does seem to me rather odd that commercial stations would not want to know that people are listening to non-commercial radio if it takes away share that they could have.

When I last visited the Bay Area, it took only ten minutes of listening to KPIX for me to say to myself, ``Aha, long(er) form! They must be trying to appeal to the NPR crowd...'' Clearly someone at Westinghouse must have noticed the numbers that Bay Area public radio gets, and decided it was an audience they might try to steal.

} From: talk1370@aol.com (Talk1370)

[regarding the limited scope of non-comm underwriting versus a full commercial]

} It might be
} a lousy way to sell Preparation H or pimple cream. But
} PBS/NPR underwriting soft-sell can actually be a PREFERRED
} strategy for other types of accounts and demos.

Example of the above is in the Chicago Classical radio wars.

WFMT, the dominant classical station in Chicago, has undertaken a policy of 'all live read' commercials on their station. No jingles, no hype. True they are commercials and they can contain the proverbial 'calls to action', but ehen read live by professional fine-arts announcers, rather than by hucksters, they take on a very non-comm. underwriting feel.

WNIB, by comparison, will air any pre-recorded spot they are handed, even those with loud, rock/pop oriented music and 'in your face' style of read. The result is that WFMT has a much more consistant sound, pleasing and easy to stay with than WNIB... wvwn though WNIB is far less 'high brow' and much more accessible in their overall presentation.

I am a person who likes almost all forms of music from Bolero to Bon Jovi to Bing to Beatles. But I can understand that when I wish to enjoy classical music, I dont want to be blasted from my chair by some compressed pop-rock and a screaming announcer who is as genuine as a 3 dollar bill exhorting me to go out and buy that new ????.Maybe on the CHR outlet, but not on the classical station.

This brings me to the question of why advertisers fail to take into account the format they are advertising on when they produce a spot. I dont expect them to make a different spot for every variant of radio format, but are the marketing gurus so out of touch with the audience that they feel a scream-fest commercial will fo over after 15 minutes of Mozart, or an extended set of Dave Brubeck?

One more note on non-comm advertising. There will have to be a re-write of all those restrictions if Newt has his way with public radio. This will have to include a removal or softening of the non-commercial restrictions on stations in the 88 - 92 mhz range too. Making all those low-end allocations much more valuable as potential commercial outlets.

Thoughts?

Has anyone done any research into the effectiveness of public radio underwriting announcements as advertising? It's true that a 15 second description of an underwriter's business is a far cry from a one minute spot trumpeting bargains, but the flip side is that the underwriter's message stands alone whereas the advertiser's message is often buried in a five minute commercial clump.

How much more effective is a long,loud,slickly produced spot proclaiming superlatives about a product or service than a simple unadorned statement of who we are and what we do?

An undisputed advantage of the commercial broadcaster is that he/she can offer OES schedules. What stops me from "underwriting" every piece of music in a public radio program and airing an announcement for each?

>You're comparing apples to oranges. I wouldn't dream of underwriting a show on public radio for anything other than civic duty. Advertising is an art and, in some ways, a science that delivers measurable results. Underwriting is no way to run a serious public awareness campaign; no calls to action, no comparative phrases...half your arsenal is deadened by the rules regarding underwriting.<

We're talking about reaching a desired market. First, if your target is available only on or preferably on, say, your nc classical station, why waste money on a less desirable commercial station *only* because you can use all the bells and whistles? That would truly be a waste of money (try some creative copywriting here for the nc and they'll never know the difference). Second, if, for example, your target is perfectly happy listening to classical music with a traditional nc-style, they don't want/expect full-blown ads. So enhanced underwriting credits are better suited to their sensibilities, and more appropriate. And you mentioned "a serious public awareness campaign." I don't mean to nitpick, but awareness can be attained without a call to action and other nc underwriting no-nos! Having said all of that, I agree with your opinion about underwriting being nothing more than civic duty; I think there is something super-sleazy about a noncommercial soliciting advertising under the guise of underwriting. It's even worse when they actually *illegally* air true commercials!
Question: anybody at a commercial station (that can legally sell time) ever have to deal with a nc that was airing actual commercials and infringing illegally on your legal income? How did you react to it? What action, if any, did you take?

"Some of the most basic and effective advertising techniques
are prohibited."
I'm in partial agreement with this, but it really depends
very much on the account and its target market. It might be
a lousy way to sell Preparation H or pimple cream. But
PBS/NPR underwriting soft-sell can actually be a PREFERRED
strategy for other types of accounts and demos.
Especially for prestige and big ticket accounts (like banks,
home builders and remodelers, luxury car dealers and the
like) the institutional "soft sell" that public radio underwriting
represents, can be the most effective approach they can take.
Ever notice how subtle the spots for Cadillac are? This is
what works when you are selling upscale products to upscale
accounts. Some advertisers (SAAB comes to mind) have
found their standard ad campaigns actually meet the public
broadcasting guidelines for underwriting. Others, like Ford's
Lincoln-Mercury division, have found that while they have to
soften the pitch, it's been a highly effective way to move Mark
VIIIs and Continentals out the dealers' doors. GM opens its
checkbook wide every time Ken Burns has a new film to broad-
cast, for the same reason.
Unfortunately, affiliate stations have been intimidated, in
some measure by their commercial competitors, from going
after these accounts as aggressively as they should. And
because the Arbitron results get covered over, a lot of ac-
counts never get the message of what kind of an audience
they're missing. It's not for everyone...but if you have big ticket
merchandise to sell, it may be for you...

: mike

True the message the company can put on a PBS station is not
very flashy and is restricted by FCC rules, but then you don't have to
pay an advertising agency to write that stuff. Donations from Business
to PBS comes out of the same budget as advertising to commerical stations.

If you give it to PBS, it is spent... SO the PBS station is really a
competetor for revenue as far as the commerical station is concerned and
the Program Director would really prefer to belive that PBS Stations
do not count, at least when the sales staff is out beating the bush.

Do you recall how quickly I got jumped when I suggested that Radio Talk
Shows that try to select callers by demographics were really a good reason
to support Public Broadcasting??? Did you think that was merely professional
pride, or something more basic, like money at stake??

2398. Polka party ends at Kansas City's KKCJ

Newsgroup: rec.radio.broadcasting
Date: 1995-04-01 00:00:00 UTC
From: transvox@interstate.net
Message-ID: <3lih30$3o9@vixen.cso.uiuc.edu>
Source record: 33322

Written March 30, 1995

After more than 250 hours of polkas over an 11-day period, the junior partner in Kansas City's latest duopoly installed its new smooth jazz format at 7.15 am Thursday, March 30. A report on KMBC-TV confirmed the permanent switch to the new format.

KKCJ(FM) has not changed its call letters, but now identifies itself in its liners and sweepers as "The City." The music is light, pop-oriented jazz in the relatively bland genre of Kenny G.

"The City" has so far shown no signs of appreciating Kansas City's extensive history in the development of jazz, unlike programming on the city's primary outlet for jazz, University of Missouri station KCUR(FM). KCUR programs jazz only during the evenings and some weekend time periods.

Kicking off the KKCJ format change at 7 o'clock was a 15-minute lecture by chief engineer Mark Lucas on audio quality. The emphasis was on the crisp sound quality made possible by extensive digital processing.

Over the past 11 days, KKCJ programmed an all-polka format. According to one published report, all the music came from a set of 35 CDs.

KKCJ and buyer Heritage Media, owner of KCFX(FM), misled local media by saying earlier this month that the station would unveil its new format in May. The true format plans were not announced until Wednesday evening, March 29.

In addition, the station programmed a 2 1/2-hour parody of modern-hit station KISF(FM) from 4 to 6.30 pm on Friday, March 24. The station played the same heavily grunge-oriented tunes and ran a positioning statement that said, "KKCJ -- we're not the innovator -- we're the imitator!"

Before Heritage took control of KKCJ under an LMA-to-buy, former operator Sconnix ran continuous 15-minute promos for the country stations in its new duopoly, KFKF(FM) and KBEQ-FM. Sconnix formerly programmed KKCJ as a country station. The terms of KKCJ's sale will include a provision that prevents a country format from being programmed on KKCJ.

KKCJ went up for sale after EZ Communications and Sconnix reached an agreement to form an LMA between KFKF and KBEQ, with EZ buying KBEQ and having one year in which to buy KFKF. During that year, Sconnix will operate both FM stations as well as People's Radio Network relay KBEQ(AM).

My school club had been captivated by polka, only to be lost when kkcj starts out with their crappy kenny g! I posted to a local group about the polka, uknowing that it was a ploy to drive listeners to other similarly owned outlets. I was amazed at the positive responses that I recieved. Kids my age like polka, it is fun and we fell in love with it. We are all know depressed that we cannot find anymore polka on our radios, is there anyone we could contact in order to find the name and address, phone #, e-mail address, or whatever, of someone that might send us a list of records and songs that were played on this short lived polka stunt, we would love to purchase them for ourselves.

I have never heard a music that put such spirit into, I was ready for this town to turn into a eat, drink, and raise hell burgh, but now we will have to settle for mr. losing his hair, how come he cannot afford apolla, we wish that someone would stick that grammy up his but, the corpse of Charlie Parker and Gene Krupa are turning in there graves to have the pap that is termed "smooth jazz" pawned off on this great town. it is too bad that a town which is quickly surpassing lawrence, ks., in pure love of music will now have yet another hope of fun music listening squashed.

Thank You,
Tim Nance

Question to listeners of "the river", CIDR:
Does the station ever give a "legal ID", Including Calls & COL, like the stations in the US do? I collect station ID's and I don't have a tape of this new one yet. This times I have listened (from 15 before the hour to 15 past) I have come up 'empty-handed', so to speak.

Thanks

2402. Question about hard rock/pure rock stations

Newsgroup: rec.radio.broadcasting
Date: 1995-04-01 00:00:00 UTC
From: tonyyee@merle.acns.nwu.edu
Message-ID: <3lih35$3ol@vixen.cso.uiuc.edu>
Source record: 33326

I just got back from New York City after a week long vacation and spent a lot of time listening to WAXQ-FM (Q-104.3). WAXQ is a pure rock station which is basically another term for hard rock. Anyway, as a big fan of hard rock, it seems to me that pure rock stations I like are always going off the air. For example, legendary pure rocker KNAC, Long Beach, CA recently went Spanish. KDZR, Z-Rock's Dallas affiliate is no more. WWBZ "103.5 The Blaze" in Chicago is also history.

I was wondering, is the pure rock format just too narrow to appeal to enough listeners in order to make a station profitable? Or is there some hope for the format?

: professional standards (though the inaccuracies bother me).

No, I didn't mean Rush, nor did I mean Pat Buchanan or Gordon Liddy. I was speaking more about hate TV. I see lots of crossover between TV and radio, what with several cable networks sticking cameras in radio studios to catch the Howard Sterns and Tom Leykises (Leykii?). I also note that Larry King feeds (fed?) his TV show to radio, too, and many radio feeds of news events emerging as similar if not identical to the TV feeds.

This could potentially mean that hatetalk TV could come to talkradio, leaving the nice guys by the side of the road. Oprah announced she wouldn't do sleaze any longer and her ratings dropped. I can see a time in the not-too-distant future when nicetalk, or even people as tame as Limbaugh are the exceptions, not the rule...and THAT's what I'm afraid of.

Talk hosts: Do you have a favorite "evergreen" question or topic that's been a lifesaver on slow news days, or when -- for no apparent reason -- phones are just plain deadski? Do tell! I'm writing a piece for a trade publication, and will attribute you...and send you a copy of the finished piece. E-mail your sure-fire phone- lighters to cookeh@aol.com. THANKS! Holland Cooke.

2409. WXTB in Tampa

Newsgroup: rec.radio.broadcasting

Source record: 33333

I was recently in the Tampa area. Charlie Logan, formerly of WLUP in Chicago is now handling the morning drive on WXTB(FM 97.9). Mornings used to be the domain of a jock who went by the name "Sea Bass". Anyone know what happened to him? Was he dumped by the station or did he leave for a better deal elsewhere? Any info appreciated.

Joe

Here some more info:

The liners say "AM 1070, Baby Boomers Rock and Roll."
The call letters are still WNWX.
Programming is orginating from the transmitter site in NY.
The station is still owned by Hometown Broadcasting.

The music appears to be everything from 1950's goldies through to disco
and Cheryl Crow with some AOR cuts in there too!.

That's the latest!
Regards, Joe

Really great guys, glad to hear the AM's going back on but for real fun
ask them about how WFTQ had 3 up books in a row and they went the LMA route.
At the time they said the station was losing money, but what they did was
bill the operating costs on Foster St. to the AM and WAAF 'got free rent'.
Now they're committed to their AM...right.

2413. Weather alerts via email... Free

Newsgroup: rec.radio.broadcasting
Date: 1995-04-01 00:00:00 UTC
From: cwhitman@ix.netcom.com
Message-ID: <3lih3j$3pp@vixen.cso.uiuc.edu>
Source record: 33337

When I first got on the net the first thing I did was check out all of the different types of weather information sites. Some are good some you can't get the info when you from when you need it. Some don't update at when you need it.

I found a small way around this. If you are in a tornado prone area Texas, Oklahoma. You can subscribe to the weather watch via email. GEt the updates in your mail when they are posted.

I could not use the tornado warnings watches so I unsubscribed but for those of you can. Here is the info.

FYI
First you will be using the listserv@vmd.cso.uiuc.edu

For a list of the lists on that server send email to the above no subject, just put the word list in the body of the message.

if you want to subscribe send email to that address no subject in the body of the message type <name of list to subscribe to>

list name what it is
WX-LSR Local storm reports and other local weather
WX-MISC Miscellaneous WX products
WX-NATNL Nation WX summary and Selected city forecasts
WX-PCPN Percipitation WX products
WX-SUM Summary weather products
WX-SWO SEVER weather outlooks
WX-TOR TORNADO WARNING Dissemination
WX-TROPL Tropical Storm and HURRICANE WX Products
WX-WATCH WX Watches and Cancellations
WX-WSTAT Watch Status and Storm Reports

Hope this helps you out. Most of these reports are very good.
We keep getting comments from the morning show on how we can report better weather conditions than the local tv weather mysters. The other day they called for 3 inches of snow my report said 6 to 8 we got 7.

In a previous article, jtymecki@aol.com (JTymecki) says:

>In the early 80's, Jack Armstrong was doing evenings at KFRC in San
>Francisco...I found that out by literally running in to him at the San
>Jose County Fair in 1983. KFRC had a mobile "walrus" with a beautiful
>Pacific Recorders studio inside and "Jackson" was doing his show live. It
>stood there for about an hour...it was AMAZING to watch him work! I was
>able to talk to him for a while and he remembered his 'KB days very
>fondly!
>
I had a similar experience...except it was the San Francisco Christmas
Festival at Fort Mason in November or December of '82. The mobile unit
was a late-70's GMC motor home...the one with the huge side windows and
two sets of rear wheels. The jocks nicknamed it the "sturgeon"..I guess
because of its pointy nose. At the time, the truck was only two or three
months old...in fact, tape exists of its debut. PD Gerry Cagle put
Armstrong(who was doing 12Noon-3PM until Bill Lee was fired in '83),
Dave Sholin(9-12Noon), Marvelous Mark McKay(3-6PM), Bill Lee(6-10PM),
Sue Hall(nights), Thom O'Hair and Sandy Louie(weekends)in the sturgeon...
and drove it to Sausalito and back. An airplane flew slowly above the
sturgeon...relaying the signal back to KFRC. With stops(including giving
a guy driving ahead of them with a KFRC bumper sticker $500) the trip
took two hours...and produced one of the most entertaining afternoons
of radio in KFRC or anybody's history.
BTW, does anyone know what happened to the sturgeon...who has it now?

2418. African radio on the rise

Newsgroup: rec.radio.broadcasting
Date: 1995-04-01 00:00:00 UTC
From: Bruce Girard <resystom@web.apc.org>
Message-ID: <3lih1n$3jk@vixen.cso.uiuc.edu>
Source record: 33384

AFRICAN RADIO IS ON THE RISE

The spoken word is everything
It can do anything
It cuts, bites, grates
It molds and modulates
It can make you happy, unhappy
It can make you crazy
It can produce radical cures or kill you
It amplifies or diminishes depending on its charge.
- Excerpt from a song by Komo Dibi da Koulbours, from Mali

The audiovisual scene is changing quickly in Africa, particularly where radio is concerned. A boom is on: new radio stations on the air, projects in the making - the situation is reminiscent of that in Europe in the early 1980s. Creativity, taking the floor, national languages assuming their rightful place. Things are humming in Africa: people are talking and listening in this world of oral expression and discourse.

Radio broadcasters in West African countries do things their way, according to their own timetable and with the same conviction: that pluralist expression is a gauge of real democracy.

At a conference on pluralism of information held in Bissau, October 25-29, 1994, some observers said they were surprised to see so much progress. Thanks to the determination of radio broadcasters who put such a lot of effort into their work and thanks to support from different organizations, a new generation is now being heard in radio. Taking advantage of the legal framework that is now more conducive to pluralism, new independent media are appearing every day.

These purely African experiences now serve as reference points. Western models are fading into the background, leaving African experience in the forefront. Mali is at present in the vanguard with its many community radio stations scattered across the country, its legislation and its recent regulations. Niger has also modified its legislation following the Etats generaux de la communication. Senegal, meanwhile, authorized its first independent radio station just a short time ago and now Sud-FM is the station most listened to in the whole country.

In the light of the Bissau meeting, it is now possible to define the conditions that will facilitate the rapid development and consolidation of pluralism in information. First, the subject of

pluralism in information should be expanded to encompass pluralism of the spoken word, songs and music. Some of the conditions required in consolidating recent African experiences are: a legal framework adapted to the context, which is forever evolving; rooting of experience in the setting to be served, which is the only way to ensure cultural, gender and ethnic pluralism; quality work by radio broadcasters and regularity of programming, which allow credibility to build in the eyes of the population; and media networking at the national, regional and international levels.

Participants at the Bissau meeting also raised the importance of training radio broadcasters and access to better adapted and more economical technical equipment.

- Michel Delorme

2419. Buffalo/Toronto Radio Watch(3/31)

Newsgroup: rec.radio.broadcasting
Date: 1995-04-01 00:00:00 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <3lih1o$3jm@vixen.cso.uiuc.edu>
Source record: 33385

Happenings in the #40 market:

*As expected,WBUF(92.9)switched format yesterday afternoon at 2pm. And, some might say,it's gone "smooth".
WBUF switched from an AC format that had gotten them third place among the AC stations to an NAC(or,as it's more popularly known,smooth jazz)format. All three(WJYE/96.1;AC and WMJQ/102.5(Q102);hot AC)being the other 2)go after the 25-54 audience,with the emphasis on the female 35-44 demo.
Ron Rice,GM at WBUF and co-owned WHTT-AM/FM(1120/104.1;Oldies 104),said that 'BUF was "stuck in the mud." (Well,no kidding,Ron! :>) He believes that the smooth jazz format-with artists ranging from Anita Baker,George Benson and Sade to Grover Washington,Jr.and Spyro Gyra(both area natives)-will go over well with baby boomers.
The switchover to "Smooth Jazz 92-9" was not without casualities. AM driver Dan Kelley(who had been back for less that a year,in his second stint at 'BUF)and PM driver Jerry Reo were both blown out,as were the entire sales staff-the latter,according to one of my tipsters,occuring last week. Chris Whittingham moves from middays to AM drive,while Dan Catone steps into PM drive (he had been doing weekends). Mid-morning'er Lynn Bradley stays put.
Speculation had been running rampant ever since Pyramid bought WBUF last year. Recently,it was hinted that a dance-based CHR format would be installed, taking aim at WKSE(Kiss 98.5)-which,in itself,is starting to slip. Pyramid does have experience with NAC-its Chicago station,WNUA,runs that format and holds its own.
(For those interested-yes,airchecks are available. Leave me a message and I'll get in touch.)

*The other major story involves Keymarket,owners of WBEN(930,N/T)/WMJQ (102.5,hot AC;Q102)& WWKB(1520,hot talk;The Big 1520)/WKSE(98.5,CHR;Kiss 98.5)-plus it now sells ad time for Rich Communications' two AM stations,WGR(550,N/T; NewsRadio 55)/WWWS(1400,business/talk;3WS-Your Money 1400). Keymarket was acquired by St.Louis-based River City Broadscasting on Wednesday;it's likely to net Keymarket in the vicinity of $125-150 million. If approved by the FCC, River City will own 9 TV and 24 radio stations with a combined $900 million in estimated value.
Keymarket's properties will become a division of River City,with its current management team of Kerby Confer,Donald Alt & Barry Drake being kept on to head up the division. Confer said in a prepared statement that River City's roots were in radio,"so this move is a natural extension of the sharing and mutual respect we've enjoyed between the two companies for years."
River City owns a number of TV stations(most in the Midwest,South and Southeast). It has Fox affiliates in Des Moines and San Antonio,a CBS affiliate in Sacramento,plus ABC affiliates in Columbus,Ohio,Asheville,N.C. and Anderson, S.C. Besides its Buffalo stations,Keymarket owns station in New Orleans, Memphis,Nashville,Los Angeles and the Scranton/Wilkes-Barre,Pa.area.

*In reference to an article that was recently posted in response to Tony Violanti's recent article in the Buffalo News's Gusto section on Buffalo's morning shows,someone who I've had e-mail contact with(not the message poster, BTW)told me what happened after it was posted. Darren Neaverth(WHTT's sales manager),who the message was directed at,called Mark Scott(WBFO's ND,who posted the reply)last week and,according to the message I got,said that the call was much like the letter in the March 17th Gusto,i.e.not well thought out and pretty inflammatory.

*Dick Lucinski,who's had 2 tours of duty at WGRZ(ch.2)in the 70's and 80's, was heard yesterday doing traffic updates for Metro Traffic. Talk about a blast from the past.

TTYL...

Source record: 33386

San Diego trendsS: [15th market]
12+ 6am-mid.

FALL 1994 Dec-Jan-Feb 1995
KSON-FM 5.8 6.6 Country
KKLQ-FM 4.7 5.0 Top 40
KSDO-AM 5.2 5.0 Talk
XHTZ-FM z-90 5.5 5.0 Urban
KYXY-FM 4.5 4.5 AC
KGB-FM 3.8 3.9 Rock
XTRA-AM 3.8 3.8 Sports
XTRA-FM 91x 3.6 3.8 Modern Rock
KBZT-FM 4.0 3.8 Oldies
KIFM-FM 3.1 3.7 NAC/Jazz
KFSD-FM 3.3 3.7 Classical
KPOP-AM 2.7 3.4 70s oldies
KCBQ-FM 3.1 3.3 Rock
KFMB-AM 3.0 3.2 Full Service
KJQY-FM 4.0 3.1 AC/now Mix
KFI-AM 2.7 2.6 LA's talk
KIOZ-FM 3.1 2.4 Rock
KCLX-FM 2.4 2.3 Clas. Rock
XHKY-FM 1.9 2.2 Espanol
XHRM-FM 3.0 2.2 Mod. Rock
KFMB-FM 2.7 2.0 Star FM
KOGO-AM 1.4 2.0 Talk
KNX-AM 1.1 1.8 LA news
KOWF-FM 1.3 1.4 Country
KCEO-AM 1.0 1.2 Talk
XLTN-FM 1.5 1.2 Spanis rom.
KURS-AM 1.0 1.1 Espanol
KSPA-AM 1.4 1.0 Adult
XEMO-AM 0.8 1.0 Espanol talk
KPRZ-AM 0.5 0.9 Christain

Par Broadcasting: KOGO, KKLQ A/F, & KIOZ: 9.4
Midwest: KFMB AM and KFMB FM: 5.9
Nobel Broadcasting: XETRA AM, XETRA FM: 7.6
KYXY/KJQY: 7.6

Mark Larson's changes at KPRZ [1210] San Marcos, is showing results:
nearly doubling the audience.

KOGO's first year has gone from null [music format] to 2.0 [talk].
KFI Los Angeles continues to out distance KOGO with a 2.6.

Missing in action: KKOS, Carlsbad, hampered by a limited radius of 95.9. That is expected to change to 95.7 by summer and up ERP.

Surprised by KOWF-FM Escondido: the station is a kick-a** country format, and continues to do strong. There are rumors on the street that the parent company will sale/or make it a full time espanol outlet.

Thanks to those unnamed sources who helped with this.

2421. San Diego Radio Watch 3.30.95

Newsgroup: rec.radio.broadcasting
Date: 1995-04-01 00:00:00 UTC
From: "Christopher O. Carmichael" <75353.1264@compuserve.com>
Message-ID: <3lih1p$3jr@vixen.cso.uiuc.edu>
Source record: 33387

Here's what is happening in the 55th market: Escondido, Vista, Carlsbad, San Marcos and Carl's Diner on I-15:

KOGO's changes previously announced changes go into effect on Monday, April 3. The San Diego Tribune noted that three staunch conservatives now fill the air:
G. Gordon Liddy (9 a.m. to 12 p.m.), Oliver North (12 to 3 p.m.) and Michael Reagan (6 to 9 p.m.)

Plus, the Roger Fredenburg show from 9 - 11 p.m., followed by Art Bell until 5 a.m., only leaves the I-man as a [somewhat] moderate voice. Weissbach, who now has the only local live non-syndicated show on KOGO has publicly said he is a Libertarian.

IMHO: The Hot Talk format is on par with KSFO's [San Fran] entry into the rightwing conservative war that is fought on the airwaves. Frankly, I didn't like Dave Dawson,
who departed last week, because of his roughness around the edges. As I stated before, the bright spot for San Diego radio in the afternoon is Stacy Taylor, and Ted Leitner on 760 KFMB. Taylor, whose show is from 12 to 3 p.m., and Leitner, until 5 p.m., is a one-two knock-out that will show in the ratings. And, don't count out 'often-in-the-press' Roger Hedgcock, on 1130 KSDO. Ollie North will play well in Washington, but I don't think he'll do as projected here. Too much conservative radio in this market.

Ross Perot and Pat Buchannon out: As previously announced in Airwaves, Ross Perot's afternoon radio show is slated to end in July. It was carried in San Diego by KOGO [600]. Pat Buchannon, on 1000 KCEO replacement hasn't been announced yet. Buchannon's radio show was carried [I believe] by Westwood One.

Bright spot. Reading between the lines from a press release of KOGO, the trial of the century in LA will be carried "when appropriate" to make way for Liddy and North. I suspect that the ratings are good, but too much revenue is being lost or made up. During the day, I will hear national ads that would be in the syndicated Liddy show. In all, I believe it's best to resume some sort of normalicy with the rantings of Liddy, and North.

Home page: KPBS is [I believe] the first San Diego broadcaster to have an .html page. Point your browser to: http://www.kpbs.org It's still in the "construction" phase. [But the best radio home page is KPIG! Try it, you'll like it!] In San Diego, KGB-FM is slated to jump on line soon, but haven't seen or heard any thing.

Coffee Crew: KKOS [95.9, 3.8kwERP] will once again give away free coffee, danish, and a copy of the Oceanside Blade-Citizen. Sites will be announced, and it's damn good coffee!

KUSA reception in San Diego County. Today, I called the broadcast site in Las Vegas to comment on the reception here. I was told that anyone receiving the 10kw signal to e-mail a QSL report. The address was in a previous Airwaves Journal. On March 30, I couldn't hear any audio, but an intermintent sound on a carrier wave. The crew did say that call letters and other annoucement will occur during 'regular' broadcast for NAB.

And last item: I too, will extend an offer for NAB passes. E-mail me at: cchris@cei.mhs.compuserve.com and I'll send them on your way. [I have two to give away].

And that, ladies and gentlemen, is the way it is for Thursday, March 30, 1995.

I may be the only WAMU listener who tuned in to the old Saturday morning bluegrass show from both New Jersey and North Carolina, using an old KLH tuner and a Finco FM-5 directional antenna. In both cases (Fredon Township, NJ, not far from the NY border in the far northern corner of the state; and Chapel Hill, NC) I was 220 air miles away. That was in the mid-70s. I assume it's just as good today as it was then.

Doc (now in the Bay Area, and a bit farther out of range)

--
With the proliferation of the "ARROW" 70s format all over the dial, I would like to offer my observations on the subject if I may.

Here in South Florida, the 70s format is on WBGG ("BIG 106"). When I listen to the station I tend to get confused at the way the sound is formatted. I can hear "Don't Fear The Reaper" by Blue Oyster Cult, a track that I can hear on the AORs here. That is followed up by "Piano Man" by Billy Joel; a good track, but somehow, it doesn't seem to fit in with what you would expect to hear if you had turned the station on cold not knowing beforehand what the format was. Later on, you can hear "Turn The Beat Around" by Vicki Sue Robinson followed by "Foreplay/Long Time" by Boston. Somehow, this seems like a way to turn off listeners, the Rockers from the 70s will tune out when they hear a Disco track, and vice versa. Those who prefer the softer sounds (Billy Joel, Elton John, Linda Ronstadt, et. al) will probably tune to a Soft AC format (God knows we are ABUNDANT with those down here).

While living in Pensacola, I heard WWRO ("The ARROW") play what they called "Rock & Roll Oldies." Most of the tracks were 70s oriented, but occasionally I would hear a 60s tune, "California Dreaming" by The Mamas & Papas, and that was not unpleasing to the ear. Somehow, the way WWRO is formatted as opposed to WBGG would be the way to keep a audience.

The ratings have just come out here in South Florida. WBGG will have good numbers, but those are in the morning thanks to Stern. I won't be surprised if the post-Stern shares are low.

Basically, what I would like to know is this: What IS the ARROW format that I have read about? Is it what I currently hear on BIG 106 or what I tuned into up in Pensacola the "true" format?

I just wanted to put in my two cents worth on this. Any comments would be appreciated.

Thanx,

Scooter

2426. Help CD Players Last 3 months start skipping /or should I say HELP!

Newsgroup: rec.radio.broadcasting
Date: 1995-04-01 00:00:00 UTC
From: cwhitman@ix.netcom.com
Message-ID: <3lih1u$3k8@vixen.cso.uiuc.edu>
Source record: 33392

I have a problem that I cannot seem to get rid of. CD players that only
last three months. Now these are not broadcast quality CD players but
the consumer stuff off the shelf at your local electronics outlet.

2-Optimus cd-2470
3 months old/problems already

2-Sony cdp-211
4 months/so many problems had to be replaced

2-Sony cdp-291
no problem until after 1 year in service

Pioneer actually the best of them all.
4 years old
I have taken this jewel apart for cleaning and have made it work for
several months. Up and walked away. That's why I do not have model
number. The pioneer is made internally so that each part associated with
the cd slide mechanism the reader and such, come apart in peices that
can be cleaned, greased lubed or just replaced other cd players in the
commercial market that I have seen cannot be taken apart so easily so it
is harder to make problems go away once they happen.

Anyway does anyone have a resolve for me???
What can I do? I have a hammer but I do not dare...:)
Can and will broadcast quality equipment the kind you pay 3,000 bucks
for, last more than a year. I worked at KRGQ-FM and the expensive Sony's
that they had only lasted a year before needing to go back to the
factory for service.

Do I get a new job??? I don't like being put against the wall. It
doesn't work fix it! How can I fix something that doesn't want to be
fixed???

Thanks in advance.

How well I remember the chimes when I was a kid. Several
years ago when long-time NBC affiliate WAVG (formerly WAVE) in
Louisville celebrated their 50th anniversary, I suggested to
then-owner Ed Henson that he use the chimes after the news. I
had heard them slip through on the air a couple of times when
someone wasn't quick enough on the switch. So, he did add them
after each NBC/WAVG newscast. It was a neat touch. Later a new
owner dropped NBC, then when Charlie Jenkins bought the station
a few years back, he added CBS. Since then WAVG has again
affiliated with NBC, but I'm not sure they are using the chimes.

==========

I recently took over management of the video production organization at Argonne National Laboratory, and find a number of clients asking me to record broadcast news programs for later viewing by Laboratory top management, duplicate copyrighted videotapes (often to preserve the master, but not exclusively so), perform format transfers (film to tape), and perform standard transfers (PAL to NTSC, etc.). It seems to me that a strict interpretation of copyright law will prohibit all such activities, but there are reasonable arguments to support some of them.

Is there any resource available that you know of which can provide an authoritative interpretation of copyright law as it applies to the small industrial production operation? I would be very grateful for any advice you can offer.

I can be reached by return e-mail (RDNIXON@ANL.GOV) or by telephone at (708) 252-5600. Thanks for your help.

2432. David Lennox' Comedy Classics

I am writing this in the hopes that someone can help me with a problem.
A while back, there was a show broadcast from CHRE-FM in St. Catherines,
Ontario, called David Lennox (sp?) Comedy Classics. After suddenly being
cancelled, I contacted the radio station and a woman there told me that he
was an independent operator out of Toronto, but she had no way of contacting
him. A while later, I heard him doing a classical music show from a Toronto
radio station. I am not sure whether he is still broadcasting from there, but
if anyone could help me find out if the Comedy Classics show is still being
broadcast somewhere, or where I could find Mr. Lennox, I would be
very greatful. Thank You for your help. Please either post a message here,
or e-mail me at vp2452gw@ubvms.cc.buffalo.edu.

2434. Critiques wanted for WRUF-FM web site

Newsgroup: rec.radio.broadcasting
Date: 1995-04-02 00:00:00 UTC
From: bpm220@nervm.nerdc.ufl.edu
Message-ID: <3ll769$mq2@vixen.cso.uiuc.edu>
Source record: 33250

Hello.

My name is Eric Marcoullier and I am the general web guy for WRUF-FM in Gainesville, Florida. They are a 100,000 watt AOR station with decidedly "alternative" influences (but after the Pollack conference, I think most AOR and classic rock stations will head that way)..

I have just revamped the site with some new layout and graphics. It is located at the following URL:

http://www.jou.ufl.edu/about/stations/rock104/

I would like to get some feedback from you regarding (but not limited to) the following points:

1) Overall impression of the site.
2) Is the site easy and intuitive to navigate?
3) Is the information presented efficiently?
4) Do the graphics enhance the site? Do they make up for the bandwidth used?
5) Does the sight create or increase interest in Rock 104?
6) Does (would) this site enhance or detract from your view of Rock 104?

I am soliciting any and all replies to these questions. Positioning is key in this brave new world, and you are either positioning yourself as a good or not-good station. If it is not effective, I need to know what can be changed to make it better... if it is effective, I _STILL_ need to know what can be changed to make it better.

You can send me E-mail at the following address:
bpm220@nervm.nerdc.ufl.edu

or use the mailto link at the site.

Thanx in advance,
Eric Marcoullier

Although we don't have a BBE, I know many other studios that do and have used them for their main purpose - an exciter for music masters. The whole goal is to make their mixes stand out on the air. And some of the songs that I know were mixed with it do have a certain something - not that it couldn't have been achieved by other means. I don't think that one could therefore make a generalizaiton that the enhanced master will not sound good on the air. I seldom use an exciter. I feel more secure with a really good eq and comp/limiter.

2440. April Fools!

Newsgroup: rec.radio.broadcasting
Date: 1995-04-02 00:00:00 UTC
From: rene@igs.net
Message-ID: <3ll76e$mqa@vixen.cso.uiuc.edu>
Source record: 33256

(also posted to the National Capital Freenet Radio & Television SIG)

CHXL-FM (XL-103.7) in Brockville, Ontario played the ultimate radio April Fools joke on its listeners today.

All morning, up until 9:00am, they were announcing that there would be a special announcement from the programming department right after the 9:00 news. The announcer claimed not to know what was going on. These announcements were supplemented by recorded promotions in a country accent saying "The Cow cometh!"

Just before the news, the announcer (Tom Everett, I believe) came on and said:

"We have a special programming announcement for you, just after Sandra's news in a sec. And I have been informed, as of right now, that it is a format change to the radio station and unfortunately, it may be the end of Rock and Roll -- it may be the end of Rock and Roll on CHXL -- I cannot tolerate that..."

At the end of the news, Sandra Plegakis (sp?) said:

"And now from the programming department, a very special announcement regarding a format change here on CHXL-FM 103.7."

In country accents:

"Hi, this is Cleavis."

"And I'm Billy Joe Beanpole."

"And here it is, the moment we've been waiting for all mornin' long. We've been teasin' you about `The Cow cometh' and now it's time for the big announcement."

"That's right, Cleavis. Well, after exhaustive phone telemarket, television, and newspaper research -- and we even talked to a few people in cabs and bus shelters -- we've decided to make a big change here at the radio station."

"Yes, right. My buddy Billy Joe tellin' you the truth. We are changin' format to a brand new COUNTRY FORMAT."
.
.
.
"Ladies and gentlemen, for the first time ever, you are now listening to The New 103.7, The Cow!"

The station then played "Thank God I'm a Country Boy" by John Denver.

After about 1 minute of that, they made the sound of a needle being scraped across a record, and Tom Everett, the Program Director, came on and said, "No one consulted me; I hardly think so. We are still the home of Rock and Roll. [ID: XL-103.7] Happy April Fool's to ya, and don't get fooled again...", followed by "Don't Get Fooled Again" by The Who.

By the way, "103.7, The Cow" seemed to be mocking "106.9-FM, The Bear" (CKQB-FM Ottawa), because each ID was followed by a cow mooing (similar to The Bear's growl).

Before 9:00am, I thought of the possibility that this was an April Fool's joke, but I never thought they would do something as drastic as a format change as a joke. Most of it sounded very realistic; they did a great job. I should have known that they wouldn't switch to Country because that would require an application to the CRTC and I haven't seen anything in the Canada Gazette. Oh well, don't get fooled again!

2441. Hartford, CT ratings (70's!!!)

Newsgroup: rec.radio.broadcasting
Date: 1995-04-02 00:00:00 UTC
From: rentadj1@aol.com
Message-ID: <3ll76g$mqe@vixen.cso.uiuc.edu>
Source record: 33257

Hot off the presses, the some of the latest ratings for Hartford, CT

13.2 WZMX (from 9.6), #1 12+, #2 25-54, recently switched to the 70's station
12.8 WTIC-AM

Top 40's
6.3 WTIC-FM (from 7.3)
6.1 WKSS (from 6.3)

Rock
3.4 WHCN (from 4.9)
2.8 WCCC (from 4.3), lost their morning guy Sebastion to WZMX, the 70's station

Interesting stuff, will the 70's format have long term appeal? WZMX has to like the ratings now, but can they sell it? They've already been accused by one potential advertiser I talked to of quoting them a very high price (his words I believe were "a f**k you price"). Don't like seeing major rate increases based on one book, you're just telling everyone that you're as good as your last rating book. Should be stressing results NOT ratings! (stepping off the soapbox now)

This is no joke. A folksinger (politically correct, even), Ron Romanovsky, wrote a song about how he really wants to polka. It's been well-received on the Romanovsky & Phillips tours. Myself, I used to listen to a local station in Silicon Valley, KLOK, during the 1960s when Polka Party was a daily event. I remember the show drawing lots of sponsors, too. When I hear DJs talking about "world beat" I laugh because they ususally mean African or Caribbean beat. Just for once I'd like them to include some polkas.

There is an unofficial home page at:
http://www.webcom.com/~only/RadioNet/mb.html

The people who are doing this are (a) doing it for free and (b) are not
very creative ... so expect the worst. There is also a usenet group
alt.fan.mark-brian. If your news server doesnt have it, just ask them
to get it. You can also be put on a mailing list by sending mail
to MBList@aol.com.

IM>have to deal with a nc that was airing actual commercials and infringing
IM>illegally on your legal income? How did you react to it? What action, if
IM>any, did you take?

Any advertiser that limits his campaign to a single media is a fool. A
good campaign has a mix of Radio, TV and Print. Each one offers a unique
advantage.

"Advertising" on PBS isn't a threat. It's strictly "image" promotion. GM
or Ford is hardly foolish enough to use PBS as their exclusive
advertising vehicle. They use PBS for one purpose and commercial
networks for another and local media for still another.

Rich

2452. Re: Non-Comm's and Ratings

Newsgroup: rec.radio.broadcasting

From William Pfeiffer:

I am a person who likes almost all forms of music from Bolero to Bon Jovi to Bing to Beatles. But I can understand that when I wish to enjoy classical music, I dont want to be blasted from my chair by some compressed pop-rock and a screaming announcer who is as genuine as a 3 dollar bill exhorting me to go out and buy that new ????.Maybe on the CHR outlet, but not on the classical station.

This brings me to the question of why advertisers fail to take into account the format they are advertising on when they produce a spot. I dont expect them to make a different spot for every variant of radio format, but are the marketing gurus so out of touch with the audience that they feel a scream-fest commercial will fo over after 15 minutes of Mozart, or an extended set of Dave Brubeck?

Yes, they are. On my country stations, the soft drink companies and fast food restaurants run spots using rap music. The ad agencies don't care, they're just buying our numbers, and probably don't even know what the format is. Our sales people don't care, they just want the money, and never even hear the spots. By the time the PD even knows about the spots, they're already running.

One more note on non-comm advertising. There will have to be a re-write of all those restrictions if Newt has his way with public radio. This will have to include a removal or softening of the non-commercial restrictions on stations in the 88 - 92 mhz range too. Making all those low-end allocations much more valuable as potential commercial outlets.

For a lot of non-comms, especially the religious ones, the restrictions haven't meant much anyway. Some of them are even out on the street with salespeople and rate cards for their "underwriting announcements." They're al so hitting up non-profits for paid spots, which is perfectly legal, while we in commercial stations are expected to give our time to those same non-profits for free.

Which brings me to the next post, from mHz@bitstream.mpls.mn.us

I think there is something super-sleazy about a noncommercial soliciting advertising under the guise of underwriting. It's even worse when they actually *illegally* air true commercials!
Question: anybody at a commercial station (that can legally sell time) ever have to deal with a nc that was airing actual commercials and infringing illegally on your legal income? How did you react to it? What action, if any, did you take?

When I worked in Cincinnati in 1986 and 1987, I was told that WVXU-FM, owned by Xavier University and running a jazz format, was on the street with a rate card, actively selling spots in the guise of underwriting announcements, in direct competition with commercial WNOP (AM), Newport, Kentucky. I never saw this rate card personally, but certainly what I heard on 'VXU pushed the limits of what was acceptable as underwriting announcements. WNOP was (is?) a struggling 1kw daytimer owned by a rich beer distributor who happened to love jazz, and just wanted the thing to pay for itself, but thanks to WVXU he couldn't even accomplish that. I don't know that he ever did anything about it, but I often said in those days that if I were him, I'd be screaming bloody murder to the F.C.C.--not that it would have done any good.

It is simply unfair for a tax-supported enterprise to compete with one that is not tax-supported. In today's world of too many stations and too little ad revenue, it's even more unfair. If the non-commercial stations are going to compete with me, let's do it on a level playing field. If they're going to be subsidized with tax dollars (or receive tax-deductible charitable donations, which is the same thing), then they should not be taking any of the revenue that supports my job!

At the '94 Gavin in San Francisco, a guy from Windham Hill Records showed overhead charts of Arbitron numbers for Boston, Los Angeles and other cities. The results were amazing. Here were stations with serious numbers in 12+ and much higher numbers in other demos that matter. Even the 52-watt station at Cal State Northridge had a credible listing.

Noncommercial stations have market relationships with their audiences that commercial stations do not. This is driving up listening to these stations, and setting a growth model for commercial stations that publishing this data can only help.

There is no good excuse not to publish noncoms in the Arbitrons. The numbers are there. They matter. The default, in their absence, is zero, and that's a serious error.

I thought the polka stuff was pretty funny and an interesting change. The station that I am on, KKLO in Leavenworth, used to play polka music a lot on the FM side. Large Polish population here. Great people.
What about a polka show on KKFI? They are supposedly "multicultural" (oh that word....) community radio. They will be hurting for money when public radio funding is cut I think.

2456. Canadian Station ID/versus US (was": Re: 93.9, The River...)

Newsgroup: rec.radio.broadcasting

From: talk1370@aol.com
Message-ID: <3ll76v$mrt@vixen.cso.uiuc.edu>
Source record: 33272

My friends and colleagues across the border tell me
the legal ID rules in Canada are very different from those
in the US. Stateside, we have to give a legal ID plus or
minus 5 minutes from the top of EVERY hour. It has to in-
clude the official station call and city of license. You CAN
insert dial position in between the call sign and city of
license, but nothing else should come in between the two.
"WXXI 1370 Rochester" is a legal ID, "WXXI 1370 your
first choice for news in Rochester" is probably not, though
it contains all the necessary info and probably would not
get you in trouble with the FCC in practice. (After you get
the call, dial position and city of license out of the way,
or beforehand, you can throw any slogan you want into
the same break, of course.) You can do the ID either
verbally or sung in a musical jingle as long as it's clear
to the listener.
In Canada, you only have to give that official info on the
air a few times a day...I think it's the start and finish of the
broadcast day for stations that don't stay on around the clock
(or about 6 AM and late at night for those that do) plus one
or two other times during the broadcast day. A few stations
do more...CFRB in Toronto ID's its call, dial position and lo-
cation at the top and bottom of every hour going into the
news; if memory serves it goes something like "CFRB 1010
Toronto's news source." That's actually a legal ID even under
the stricter US rules because it has call sign, dial position
and city of license directly in sequence. I know of no other
station in Canada, not even CBC, that does that...most do
the bare minimum and just ID by their slogan and dial pos-
ition the rest of the time. (That's especially true of stations
just across the border from major US markets like Detroit
and Buffalo, which want to establish a "local" image on both
sides of the border and appeal to cross-border listeners.)

I've never seen so many Cookie Cutter Conservatives in one posting! Dave Dawson is out for no other reason than his show sucked. Beyond that, he wanted to do the entire show from his Missouri home, which, to a radio station that can barely hold a 1.5, isn't feesable. San Diego now has a glut of pumped in party line talk that won't make a dent in a town that treasures it's own. This move to Ollie should actually help Stacy Taylor on KFMB, as his show is becoming one of the hottest programs on afternoon radio.

As for KOGO, well, we all know what happens to stations that go the cheap route.

In Buffalo, WBUF "B-93" has also gone to "smooth jazz". They officially changed at 2PM Thursday 3/30 (see Carl Gorney Buffalo Radiowatch post). First half hour included Sade's "Smooth Operator", George Benson, music like that...IMO, hardly "jazz"...how about some Coltrane? :-) . Is it a satellite format? Have other markets picked it up too?

Not to worry...I don't think that CKG is in the position of having Stern on one station competing with their OWN highly-promoted program on their OTHER station.

I never understood the logic of putting Stern on the FM Loop up against Steve and Garry on the AM Loop....only one of them can "win", and it would look pretty poor to have this Noo Yawk boy trounce their homegrown talent in ratings. Wound up being a pissing match between the two shows....

>From Long Island, it's the Howard Stern Radio List - short form!

Here's what we've got for this month...

New stations in the past 30 days:

Arizona - two new stations jumped come to the Stern network,
KHOT-FM 100.3 (Globe) and KGME-AM 1360 (Phoenix).

Hello, Chicagoland! Howard's kingdom retured to Chicago
this month on WCKG-FM 105.9.

Changes to current stations: -None-

The long form of this list, which includes phone numbers for all markets
plus the fax number, is posted to alt.fan.howard-stern.

If you do not have access to the alt heirarchy, e-mail a message to me,
drchuck@netusa.net, and I will e-mail a copy to you.

This list is also available at the Howard Stern FTP site (I don't put it
there myself). This FTP site is accessible through the Airwaves WWW Page
via the following URL:

http://radio.aiss.uiuc.edu/~rrb/

The path is:
OTHER COMMUNICATIONS RESOURCES -> Personality Page -> Howard Stern

Alternatively, you may take the direct route:

http://krishna.cs.umd.edu/stern/
ftp://krishna.cs.umd.edu/pub/stern/

While you're at it, check it out my web page too :)
http://www.netusa.net/~drchuck/

Please mail me any info for the list that needs to be added and/or changed,
it will be appreciated. Catch you next month!
--Chuck

** This list will self-destruct November 1995... maybe.

Can't say I've ever had a dead phone day (people in my market do love to talk!) but there is one topic that is guaranteed to raise audience temperature every time...the behavior of the Congress.
Back before the most recent election, it was anger with the way special interests bought influence to kill health care reform...and anger with their hypocrisy over campaign finance reform. Now it's anger with the special interests' influence over tax policy and spending priorities, combined with Congressional hypocrisy over term limits. Republican or Democratic, we still have the best Congress money can buy... plus ca change, plus c'est la meme chose, as the French say...

With the change over from EBS to EAS many of the problems in the EBS systems will dissapear. The Tones will be shortened this June and that should help. There is not a biger tune out factor in Radio than an EBS test. 20 Seconds is a long time to sit through that dual tone test signal. The new 8 second tone in my opinion is too long to, but it's a start in the right direction. Perhaps in 96 when EAS is un full operation the Tornado Warnings will finaly get to the listeners.

On a related note the local Cable System has started Promoting an "New Emergency Broadcast System". It seem that since under the EAS rules the Cable TV systems has to comply with the local Emergency rules they are turing it into a "New Service" Even though it's required by the FCC.

Message-ID: <3ll77c$mt1@vixen.cso.uiuc.edu>
Source record: 33285

Thank you for the information on E-mail weather. If I were a station owner, I would provide this inexpensive communication tool to my station personel.

I have learned from all of this DFW TORNADO warning experience, that if the station operators and on-air staff don't feel a need to alert their listeners to eminant danger, then we, the listening public will be treated to another 30 minutes of continuous hit music from the 60's, 70's, 80's and 90's while our houses blow down.

The whole experience reminded me of when I was a school age youngster experiencing Tornado Warnings in Michigan. Our local daytime AM - WION - would stay on the air as long as threatening weather was in our area. They would even sign on after dark if conditions warranted. At least I knew that someone was there providing a link to the residents in our area.

2470. Re: The late WKBW Buffalo (Jack Armstrong)

Newsgroup: rec.radio.broadcasting
Date: 1995-04-02 00:00:00 UTC
From: mhtv3@aztec.asu.edu
Message-ID: <3ll77e$mt6@vixen.cso.uiuc.edu>
Source record: 33286

In a previous article, ZAAA48F@prodigy.com (Angela Allen) says:

>Lest we forget... around '83, '84... Jackson Armstrong did Afternoon
>Drive in L.A., at the late, great (everything good is dead, dammit !! *)
>KKHR, Hitradio 93 in L.A.

And, since Bob Gowa at KGO reminded us of Jackson's stint at KTNQ,
let me toss in his time at KFI, when John Rook had taken it top 40
outside the Lohman & Barkley morning show(1977-1980).

>He never sounded better. Of course, you don't
>wanna mention this to his ex-p.d., who blames Jack and the Go-rilla for
>the demise of KKHR. On the other hand, Mr. Armstrong says the same about
>the ex-p.d. (notice I'm not naming names here !!)
>
I agree with Angela about Jackson's sounding his best at KKHR. No disrespect
intended for Jack or the ex-p.d., but the real blame for the demise of
KKHR rests with CBS.

KIIS was Goliath, KKHR was David, but corporate wouldn't even buy it a
slingshot. The talent (Armstrong, Christopher Lance, The Slim One), was
fine, the music and audio processing downright electrifying, but at a
time when KIIS was giving away Porsche 944s with $10,000 in the glove
box, KKHR was giving away Honda 50 motor scooters(and that was when
the station still believed it could do it...later, Slim was reduced to
giving away cans of creamed corn because the station wasn't doing
anything of its own).

Tragically, for a legendary talent like Armstrong, and for all of us who
love great radio, KKHR's was not the only PD who didn't appreciate
Jackson's act. Neither KFI's Rook nor KFRC's Gerry Cagle(who other than
underappreciating Armstrong I consider to have been absolutely tremendous
as PD there in the early 80's) would allow Armstrong to do the "Gorilla".
KKHR's did...for a while.

>Just an interesting little story about the era in which L.A radio sounded
>better than it had in a long time... think about it... KIIS-FM, p.m.
>drive: Big Ron O'Brien; KKHR, p.m. drive: Jack Armstrong. In a moment of
>true radio mediocrity, THAT is one neat memory.

If this is the Angela Allen from KOOL-FM, you've explained why(besides
talent) you've always sounded so good on the air...great influences!

2471. WMVP Question

Newsgroup: rec.radio.broadcasting
Date: 1995-04-02 00:00:00 UTC
From: rbd8400@exodus.valpo.edu
Message-ID: <3ll77f$mt9@vixen.cso.uiuc.edu>

Does anyone know what's up with WMVP (1000 kHz), Chicago? Their signal has been absolutely terrible here in NW Indiana, both during the day and at night. I've listened on both my DX-440 and my car radio to make sure my radio's not at fault. Sure enough, terrible signals on both! Their poor signal started a few weeks ago. If my memory serves me correctly, their power is 50,000 watts, non-directional during the day and directional to the east at night. They had a powerhouse signal here day and night, but now their signal reminds me of how their signal is at night at my home in the SW suburbs of Chicago to the SW of their tower. Thanks in advance for any info anyone can provide.

Roger Diercks
rbd8400@exodus.valpo.edu

[Moderator's Note: WMVP is directional day and night with a much more restrictive pattern at night. But you are correct that they do beam mostly east. Why not call them and ask? Bill]

2472. News Flash: FCC to Legalize *pirate* Radio

Newsgroup: rec.radio.broadcasting

[Washington DC] In a surprise move, which has all of the
broadcasting industry stunned, the Federal Communications Commission,
the federal agency which oversees and licenses all radio and
television stations, has made an announcement that it will no longer
be dedicating any man-hours to the location and prosecution of
low-power, unlicenced radio transmitters, known as 'pirate radio.

This move has left the NAB, and other trade organizations seachless as they

Fallout from the Howard Stern return to Chicago:

A game of musical chairs-two players lose their seats.....

With the return of Howard Stern to Chicago radio, Patty Haze moves from mornings to middays on WCKG. Kathy Voltmer, who had just signed on as news/traffic person, moves from CKG to WXRT. Kathy will initially handle afternoon news but will migrate to the mornings. She replaces Mary Dixon who is trying her hand at television reporting.

Bob Stroud, long time Chicago radio guy, is looking for work. Also, Jim Volkman, probably best known for his impersonation of Harry Caray, was bounced from his morning sports reports on CKG.

Although contract terms were not revealed, it is thought that Howard will be earning between 750,000 and one million for his stay in Chicago. He also reportedly gets 5% of advertising revenue on his program. The station needs ratings higher than the 1.9 he was drawing at WLUP-AM during his last stint in Chicago.

Revolving air personalities:

Denise Walker-Jordan, formerly at smooth jazz WNUA-FM(95.5) has resurfaced at WVAZ afternoons. She replaces Gino Walker who is now looking for work after 18 months at the station.

Wendy Snyder, who had been doing the 7-11 PM shift on WLUP-FM (97.9) moves to the 11pm to 2am shift with the arrival of Liz Wilde. Wendy, who had been teaming up with Tony Fitzpatrick (drive-in movie review fame with Buzz Kilman), is now paired with comedian Bill Leff.

Danae Alexander has signed for another year at WNUA.

Don Hayner and Tom McNamee are out after 5 1/2 years as Saturday morning hosts on WLS AM and FM.

Allan Fee (Gump), producer of the Mancow Muller morning show on WRCX-FM (103.5), reportedly is leaving the show to become program director at KLYV-FM in Dubuque Iowa.

Tom Miller, PD at KOAI-FM in Dallas has landed in Chicago at WNUA as assistant program director and music director.

Station sold or for sale....

Heftel Broadcasting, which owned WLUP from 1979 to 1987, has purchased WOPA-AM (1200). Heftel purchased the right to buy the station from former WBBM-AM (780) GM Wayne Jefferson. The deal was reportedly worth 4.5 million

dollars. Heftel, based in Las Vegas, is expected to continue 24 hour Spanish language broadcasting.

WABT-FM (103.9 serving the Northwest suburbs) has been sold to M&M broadcasting.

WDND-FM (105.5) serving the Southwest suburbs) has been sold to LBR Enterprises.

Pyramid Broadcasting confirmed that it hired Goldman Sachs to "explore strategic alliances". The owner of WNUA in Chicago noted that they may decide to do nothing or may decide to divest some of its holdings.

I've been wanting to answer this question for actual "pro" (be sure and use quotes!!) CD players, but i've not seen any, so i don't know whose mechanisms are being used...(sigh).
Homestyle players most often stutter (dirty CD/dirty lens/foonkee laser pickup/lamea** disc motor) or self-loop with approx. 30 sec. long jumps back (sled/feed problems). The problems are almost always mechanical (or optoelectromechanical, if one includes the laser p.u.).
I'd need more information to help further: time axis jitter on the eye pattern? Eye pattern amplitude? Laser Pickup model (i.e. Sony KSS-150A, usu. on a sticker on the pickup)?
I frequent this newsgroup almost never, so for best results, post e-mail queries/hatemail to Sonic Pure@aol.com, and i'll eventually (may take a month!!!) respond.

>of read. The result is that WFMT has a much more consistant sound,
>pleasing and easy to stay with than WNIB... wvwn though WNIB is far
>less 'high brow' and much more accessible in their overall
>presentation.

I know WFMT only from Ray Nordstrand's presentation at the 1991 NAB Radio Show, some industry gossip and what I hear on the radio when I visit Chicago, but I have the impression that they're run by people who care more about music than profit-- this is NOT a criticism-- and that the ban on pre-recorded spots is more an ideological statement than a carefully calculated marketing decision (please correct me if I'm wrong).

At the Boston classical station where I work the majority of spots are pre-recorded; of these my perception is that more than half of them are agency spots over which we have no control. If we adopted a policy like that of WFMT we'd have to give up virtually all national business-- some 40% of all net sales-- and cut our costs drastically to keep our heads above water. I think such a policy would boost time spent listening, but not enough to make it pay.

My suspicion is it is cume, not TSL, that is our problem. The people who know us like us, perhaps despite some of the spots we have to carry, but we need to find a way to get more people to sample our station, especially younger listeners burned out by the wars among the various rock stations. These people are quite used to ads far more obnoxious than anything you'll hear on our station.

What does WFMT's audience look like? Do their listeners tend to be older or younger than those of WNIB? Is WFMT gaining or losing listeners, and from whom? And how effective are live, as opposed to pre-recorded, spots?

Mind you, we've never done any real research on the effect of different types of spots on TSL. If anybody out there knows of anything I'd appreciate hearing about it.

Rob Landry
WCRB Classical Radio Boston
umar@tiac.net

[Moderator's Note: WFMT has a lock on the wealthy classical community. They have trailed slightly in the ratings, some feel because of the fact that rival WNIB runs an overnight blues show. However, FMT is hands down the cultural leader in Chicago, with all the people who matter. You are correct that 'FMT's 'live read' has cost them some agency buys, but they have gained much in the bargain. Classical listeners are pretty finicky, and fiercly loyal. Bill]

1440 at night is used by RFI (Radio France International) I don't know
the location of the Tx. Otherwise I heard a Canadian or US station here
during transatlantic DX conditions. Unfortunately, due to RFI I could
not id what station it is.

Today I was surprised when I heard a program announcement on Capitol Gold,
London that Alan Freeman is back on weekends. Great to hear him back,
unfortunately Capitol comes in here only during the gray-zone time.

Mark Roberts (transvox@interstate.net) wrote:

: :
: : Other than the higher power it was the positioning of tower facilities.
: : WKKX (originally WJBM) has/had tower facilities in Jerseyville IL. The
: : 106.5 site has a tower closer in to the St. Louis area making it better
: : for competition against the other country station WIL.
: :
: The WKBQ tower is now in north St. Louis county (i.e., North County).
: While the Q-104 signal is weaker in South County and on the fringes of the
: metro, it does fine in North County, West County, and St. Charles county.

I know there had been talk about moving it to another site but never
heard what had come of it.

: When KOQL came on the air last year, with a transmitter one mile from my
: site, it put a crimp in my reception of Q-104, but I can get it
: sometimes with my antenna pointed broadside to the signal (some
: passive reflection somewhere?)

: Furthermore, some Bible-thumpers have filed an application to put up a
: translator of a Kirksville station in Columbia at 103.9. There also is a
: rulemaking for a new class-A station at 104.1 in Jefferson City, about 35
: miles south of Columbia.

I know there was a station in Montgomery City at 103.7 at one time. Had a
friend look at it when it was not on the air about 8 years ago for
possible purchase. They want to shoehorn a station at 104.1 in Jefferson
City? Good god what ever for.

: City of license is still Jerseyville. Do you remember the old WJBM-FM?
: Mono during the daytime, simulcasting the AM, then signing off the AM at 5
: pm (even in the summer) and going into stereo for a show of traditional
: country music until 7 o'clock and then "Ed and Alice's Old Rock 'n Roll
: Show" from 7 until 10. This was when most FMs did not play oldies.
: Sign-off was at 10 pm. This lasted at least into 1984.

Yep, listened WJBM quite often in the early 80's. KSGM (now KPNT) did the
same type of format thing I do believe. There are several stations here
in the heartland that have done two differant formats depending on the
time of day. A remember a station out of Litchfield IL (106.1) that had a
country format all week and then on Saturday night from 6P til signoff it
was rock.

: Did you also know that 104.1 mHz was KFUO-FM's original frequency?
:
Amazing what never makes it into the pages of Radio Rates and Data books :).

: :
: : I never heard them refer to these call letters over the past several
: : weeks. I might have not been listening closely (mainly cause Ken Hamblin
: : started to bore the heck out of me). I'll keep an ear to this one over
: : the next week and see what gives.

: Let us know. KWK, KGLD, KASP, WKBQ, whatever you want to call it, is one
: banged-up jalopy of a station by now.

It has definitly gotten sloppy in the past decade hasn't it

2483. Dallas/Ft. Worth Market

Newsgroup: rec.radio.broadcasting
Date: 1995-04-04 00:00:00 UTC
From: Davradio@aol.com
Message-ID: <3lqep8$s1i@vixen.cso.uiuc.edu>
Source record: 33203

This is to continue with the thread of what is going on in the Dallas/Ft. Worth market.

Over the last few months... (6 to be exact) the FCC has yet to decide or approve of the sale between TK Productions out of FLorida and Infinity out of New York for the property known as KLUV 98.7 FM.. and oldies station in Dallas/Ft. Worth. The only reason we can figure out is that there is a group of people in California who petitioned the FCC not to allow the sale to go through since Infinity also ownes Howard Stern and they felt that Infinity is irresponsilble to own stations elsewhere... THIS is rediculous...

First of all.. Infinity has stated long ago that Howard would never grace the airwaves of one of their own station... for obvious reasons. and Second, do you blame them.

I also am curious to know if the FCC is going to approve the sale of KTCK the TICKET to SFX which has news radio KRLD in Dallas without any delay. I don't see why there should be, it is a pretty easy deal. Both are "talk"stations with very little controversy on the air and that the TICKET is doing the best showing of any radio station in the market for its audience.

It seems that since the TICKET 1310 is doing so well.. that KLIF 570 has decided to add to its Mid day line up with the addidtion of Channel 8 Sports Director and Dallas Cowboy radio annylist.. Dale Hansen to do an hour show from 12 to 1 on Monday and Friddays. That alone is a coup... Dale is a good interviewer.. (as long as it is not Barry Switzer)...

On the FM side... no new changes over the last few weeks.. every thing seems to be going along without any problems.

The Baseball strike has thrown a curve though to some local TV stations. Independent station KTVT Channel 11 who normaly would carry the Texas Rangers Baseball games has stated that they are not going to as long as there is replacement players.. so NBC affiliate KXAS Channel 5 along with their LMA partner UHF Channel 39 KXTX have stepped up to the plate and offered to carry the games instead. Of course all of this could be for naught if the strike is settled and everything is pushed back to a later date.. oh well the joys of being in broadcasting.

> are ABUNDANT with those down here).

In my opinion, they (arrow) are just a bit softer than what I used to
hear on top-40 radio in Chicago back in the '70's...I guess they took
the mix that made up the top 40 and just play more of the AC crossover
stuff since the folks who grew up in the '70's are now in their 30's
and god forbid we couldn't handle Slow Ride by Foghat followed by
Rock'n'Roll All Nite by Kiss without some Lionel Ritchie in between...

Give me a screaming jock playing the Stones, Donna Summer and Queen
back to back to back...*THAT* was the '70's *I* remember...

>
> Steve

No kidding! 'BLM's numbers have been sliding steadily in the past several books. Did you notice WTHT's numbers (as country), they jumped from almost a no-show to about a 5 share. I started right after the frequency switch and worked for them in their last days as "Thunder 107." I really think it was a bad move to drop CHR. The problem was that the owners (Beacon) had no patience (or clue!).

But again, the market could support a CHR. WHYR is such a disaster. They can't even pull in the CHR audience...notice when Thunder changed format, that's when Ocean 98 began to take off. Hope you're right Dallas!

I've been there myself with professional units too! First of all Consumer units used for broadcast use MUST be viewed as expendable. When it breaks buy a new one. It will be cheaper and less hastle for everyone involved. Professional units are a lot better, but still take some maintenace. I spend two year babying alsong some old Denon DN-950F's in Ft. Wayne, IN. They were three years old, worn out and I could not get new ones. Let me tell you what we found.

1. Try to keep the machines as cool as possible in the studio. I found that all CD player are less prone to skipping when they are cool (under about 90 degrees ambient)

2. Keep an eye on the spindle bearings. On Denons especially, these can wear out causing lots of tracking and skipping problems.

3. Just becasuse it's "Digital" does not mean it does not require maintenace. This is a HUGE misconception all too many managers have and equipment manufactures do litte to help us engineers with this. They sell "Digital" as no maintenance required. You still need to keep it clean and tweaked.

Incidentaly, we swithced to the Audiometrics CD-10's (About $900 from Harris Allied) and the year that I was there after we got them they were trouble free. If you must use a consumer CD player I have found the Technics SLP-300's to be real good (About $ 150 with rack mount kit) and last about 1 1/2 to 2 years with continous use. You can modify them for remote control pretty easy, and they cue to music. Hope this helps!

Thank you deregulation and duoplies??? You actually think it's better for the government to REQUIRE stations to carry news, despite the fact that they may lose money doing so, due to the community's apparent lack of interest?? I am sure that Boston will be well served by radio news, to the extent that there is any demand for the same. But to presuppose that it would be better to regulate, and force-feed certain programming because the government thinks we should have it, is the kind of thinking that led to some pretty boring broadcasting (albeit, perhaps, intellectually rewarding). Deregulation has been a GOD-SEND to the radio industry, which was dying because of an overabundance of signals and operators, and a host of regulatory requirements that created a situation such that even today, only slightly more than one-half of all broadcast stations have positive cash flow...much less make a profit.

2491. How to get latest info on FCC regs?

Newsgroup: rec.radio.broadcasting

In RadioWorld magazine this month there's an article regarding the codification of rules regarding the placement of cellular base stations within a certain distance from AM broadcast towers/arrays.

Is there any paper or electronic source from which one can get the latest information "from the horse's mouth"--direct from the FCC? The article was published March 8, 1995 and I would have expected to have seen it on the FCC WEB server but no such luck.

Or does anyone on the list have any info or comments regarding the codification? To me, it's interesting that the FCC is going to require some sort of before-the-fact demonstration that the proposed cellular base station doesn't affect the performance of both non-directional and directional stations. I can understand the directional aspect of the problem, but what exactly is the non-directional? Does it involve the potential de-tuning of the tower or something else?

Thanks for any info or comments. Feel free to comment directly to me.

Oh my, here we go again...

> My friends and colleagues across the border tell me
> the legal ID rules in Canada are very different from those
> in the US. Stateside, we have to give a legal ID plus or
> minus 5 minutes from the top of EVERY hour. It has to in-

"As close to the hour as feasible, at a natural break in program
offerings" 73.1201 (a) (2).

This means that when a musical item, commercial, or other "unit"
of program ends at the top of the hour, the ID belongs there.
Recently, I have received a message from an FCC engineer verifying
what was stated by the head of the MMB at the Atlanta NAB show:
ID's at :47 are *not legal* according to the intent of the Rule.
What constitues a "natural break"? "A blink of the eye" is one
of the phrases used. The desire to segue two musical cuts does not
override "natural break".

> clude the official station call and city of license. You CAN
> insert dial position in between the call sign and city of
> license, but nothing else should come in between the two.
> "WXXI 1370 Rochester" is a legal ID, "WXXI 1370 your
> first choice for news in Rochester" is probably not, though

The name of the licensee is also permitted. 73,1201 (b)(1)
, which says in part, "no other insertion is permissible".

> In Canada, you only have to give that official info on the
> air a few times a day...I think it's the start and finish of the
> broadcast day for stations that don't stay on around the clock
> (or about 6 AM and late at night for those that do) plus one

That is interesting. Can any Canadian readers verify this?

Source record: 33214

On Friday night, March 31, I heard KUSA's "experimental digital broadcast" while driving my Saturn through southwest Washington state. The signal was pretty clear, with some fading. I particularly remember they played Bach's Brandenburg Concerto #3, but for some reason the third movement (rondo) was played first, followed by the first movement and second movement.

More, more! Not bad for only 10,000 watts....and it reminds me how the FCC's policies have ruined medium-wave (AM) broadcast reception at night. There are far too many stations competing on the same frequency, hence inaudible reception. That KUSA was received clearly some 800 miles away is largely attributable to a CLEAR CHANNEL - no interference or "jamming".

1440 at night is used by RFI (Radio France International) I don't know
the location of the Tx. Otherwise I heard a Canadian or US station here
during transatlantic DX conditions. Unfortunately, due to RFI I could
not id what station it is.

Today I was surprised when I heard a program announcement on Capitol Gold,
London that Alan Freeman is back on weekends. Great to hear him back,
unfortunately Capitol comes in here only during the gray-zone time.

2497. Dallas/Ft. Worth Market

Newsgroup: rec.radio.broadcasting
Date: 1995-04-04 00:00:00 UTC
From: Davradio@aol.com
Message-ID: <3lqen0$rqt@vixen.cso.uiuc.edu>
Source record: 33288

This is to continue with the thread of what is going on in the Dallas/Ft. Worth market.

Over the last few months... (6 to be exact) the FCC has yet to decide or approve of the sale between TK Productions out of FLorida and Infinity out of New York for the property known as KLUV 98.7 FM.. and oldies station in Dallas/Ft. Worth. The only reason we can figure out is that there is a group of people in California who petitioned the FCC not to allow the sale to go through since Infinity also ownes Howard Stern and they felt that Infinity is irresponsilble to own stations elsewhere... THIS is rediculous...

First of all.. Infinity has stated long ago that Howard would never grace the airwaves of one of their own station... for obvious reasons. and Second, do you blame them.

I also am curious to know if the FCC is going to approve the sale of KTCK the TICKET to SFX which has news radio KRLD in Dallas without any delay. I don't see why there should be, it is a pretty easy deal. Both are "talk"stations with very little controversy on the air and that the TICKET is doing the best showing of any radio station in the market for its audience.

It seems that since the TICKET 1310 is doing so well.. that KLIF 570 has decided to add to its Mid day line up with the addidtion of Channel 8 Sports Director and Dallas Cowboy radio annylist.. Dale Hansen to do an hour show from 12 to 1 on Monday and Friddays. That alone is a coup... Dale is a good interviewer.. (as long as it is not Barry Switzer)...

On the FM side... no new changes over the last few weeks.. every thing seems to be going along without any problems.

The Baseball strike has thrown a curve though to some local TV stations. Independent station KTVT Channel 11 who normaly would carry the Texas Rangers Baseball games has stated that they are not going to as long as there is replacement players.. so NBC affiliate KXAS Channel 5 along with their LMA partner UHF Channel 39 KXTX have stepped up to the plate and offered to carry the games instead. Of course all of this could be for naught if the strike is settled and everything is pushed back to a later date.. oh well the joys of being in broadcasting.

> are ABUNDANT with those down here).

In my opinion, they (arrow) are just a bit softer than what I used to
hear on top-40 radio in Chicago back in the '70's...I guess they took
the mix that made up the top 40 and just play more of the AC crossover
stuff since the folks who grew up in the '70's are now in their 30's
and god forbid we couldn't handle Slow Ride by Foghat followed by
Rock'n'Roll All Nite by Kiss without some Lionel Ritchie in between...

Give me a screaming jock playing the Stones, Donna Summer and Queen
back to back to back...*THAT* was the '70's *I* remember...

> signal.
>
> Steve

No kidding! 'BLM's numbers have been sliding steadily in the past several books. Did you notice WTHT's numbers (as country), they jumped from almost a no-show to about a 5 share. I started right after the frequency switch and worked for them in their last days as "Thunder 107." I really think it was a bad move to drop CHR. The problem was that the owners (Beacon) had no patience (or clue!).

But again, the market could support a CHR. WHYR is such a disaster. They can't even pull in the CHR audience...notice when Thunder changed format, that's when Ocean 98 began to take off. Hope you're right Dallas!

I've been there myself with professional units too! First of all Consumer units used for broadcast use MUST be viewed as expendable. When it breaks buy a new one. It will be cheaper and less hastle for everyone involved. Professional units are a lot better, but still take some maintenace. I spend two year babying alsong some old Denon DN-950F's in Ft. Wayne, IN. They were three years old, worn out and I could not get new ones. Let me tell you what we found.

1. Try to keep the machines as cool as possible in the studio. I found that all CD player are less prone to skipping when they are cool (under about 90 degrees ambient)

2. Keep an eye on the spindle bearings. On Denons especially, these can wear out causing lots of tracking and skipping problems.

3. Just becasuse it's "Digital" does not mean it does not require maintenace. This is a HUGE misconception all too many managers have and equipment manufactures do litte to help us engineers with this. They sell "Digital" as no maintenance required. You still need to keep it clean and tweaked.

Incidentaly, we swithced to the Audiometrics CD-10's (About $900 from Harris Allied) and the year that I was there after we got them they were trouble free. If you must use a consumer CD player I have found the Technics SLP-300's to be real good (About $ 150 with rack mount kit) and last about 1 1/2 to 2 years with continous use. You can modify them for remote control pretty easy, and they cue to music. Hope this helps!

A follow-up on the recent pieces (starting 03-18-95) re the Chicago-reported rumor that Pyramid was shopping itself and the denial by their CEO Richie Balsbaugh:

The Boston Herald now reports that Balsbaugh has more or less confirmed what he had previously denied, even to the extent of the reported involvement of investment bankers Goldman Sachs to shop them around.

One rumor involves Group W as buyer, which would fit that company's hope for a Boston FM (Pyramid has two) to match their successful WBZ[am].

One of the most interesting questions is, what happened to
WTIC-AM?
It's been the market leader probably since it signed on the
air 70-odd years ago...has it EVER been bested 12+ before,
even in WDRC's CHR heyday 25 or 30 years ago? Is this a sign
that talk is beginning to wear a little around the edges? Or that
the brand of talk being purveyed on most stations (i.e. an amen
chorus for Newt) is getting a little stale and monotonous? As
a talker myself I worry about these things, I must admit...the
spring book, I suppose, will tell whether this is just a fluke or the
start of a trend...

2513. Dallas Radio Watch & Howard Does It Again

Newsgroup: rec.radio.broadcasting
Date: 1995-04-05 00:00:00 UTC
From: Tom Desmond <wsu@mimi.itg.ti.com>
Message-ID: <3lv9vh$ech@vixen.cso.uiuc.edu>
Source record: 33218

Something of interest to those following Howard Stern's career appeared in today's (4/5) Dallas Morning News. Apparently, Howard made a number of jokes regarding the recent murder of Tejano performer Selena, as well as some other comments offensive to Hispanics ("...Spanish people have no taste in music. They don't have any depth", etc). The result is that some Dallas area Hispanic leaders have vowed to organize to get Howard Stern removed from local affiliate KEGL 97.1. Boycotts are being threatened, and the article reports that "hundreds of callers expressed anger toward Mr. Stern" at a local Spanish language station, KRVA-AM. As the Hispanic community is the fastest growing component of the Dallas population, this could be a potential headache for Howard Stern. It will be interesting to see what happens...

A couple of unrelated notes on items that have appeared in the Morning News in the last month or so, related to radio:
- The owners of Urban KKDA-AM/FM are in the process of acquiring Country formatted KSTV 105.7 in Stephenville, TX, and will be moving it into the Dallas-Ft. Worth radio market. I believe the new format is supposed to be Urban AC. I have no idea, however, of when this will happen (if anyone knows, please post this info). This station will have to transmit from the edge of the market to avoid short spacing KYNG at 105.3 or KHKS at 106.1.
- The owners of Spanish formatted KRVA-AM/FM will be putting a "new" station on the air at 104.9. Again, the article didn't specify when this was supposed to happen. A couple of interesting notes regarding this item: the "new" station is actually a Denison, TX station that has been off the air for several years. The current owner successfully petitioned to get the city of license for this station moved from Denison to Pilot Point, TX (which is somewhat closer to Dallas), and has an application for a CP to move the station (don't know if it's been granted yet). This will be a C2 FM broadcasting from about 60 miles north of downtown Dallas, so I don't imagine the signal will be particularly good.

Just north of Dallas, in the Sherman-Denison market, the former KDSQ returns to the air as soft rock "101.7, the Dove", with new call letters KDVE. The programming all appears to be satellite delivered. If anyone has any additional information on any of these items, or anything else related to Dallas-Ft Worth or North Texas radio, please post it.

Tom Desmond, Texas Instruments
(Looking at the broadcasting industry from the outside, at least for the time being)

Here's the latest from the 55th market, and Carl's Diner on I-15:

They're Back: The broadcast team of Mike Berger and Jeff Prescott are now setting up camp at KFMB. They will host a weekly Saturday talk show from 2 - 6 p.m. Also, the SD Tribune reported that the team will fill in for the morning team of Hudson & Bauer, afternoon's Stacy Taylor, and new kid -- but seasoned -- Ted Leitner.

Berger and Prescott were last heard on XETRA-AM. Prior to that on XETRA-FM and legendary station KGB.

A Towering Decision: Nobel Broadcasting has began construction of 7 [SEVEN!] new broadcast towers in Rosarito Beach, Baja California. The project, which is slated at $1.5 million is set to be completed in July. The Tribune reported that the AM station will be 77,000 watts [77kw], making it the most powerful station in 'North America' on the AM [medium-wave] band.

[Isn't there others outside of Canada/USA with more power on AM?]

The Fabulous Sports Babe is now on in southern California via KAXX, KMAX, and KBAX, all at 107.1 FM. The stations, which have lately been catering to foreign language broadcasts, has been shifting over to an all-sports format. The Sports Babe show is on from 10 a.m. - 2 p.m., according to promos on the station.
[Thanks to Brian Nunes for pointing the format change; and to my wife who exclaimed, "No more Japanese on radio!" when she couldn't find her favorite radio show!]

Just Asking: "Ask Mr. KFI" is where I spend six hours every weekend! Last Saturday night, San Diego's own "Rugburns" got to 'hang' with Mr. KFI from 8 to 9 p.m. The eclectic band, long a staple on KKOS [95.9, 3.8 ERP] did an acostic set on the radio. The show, heard in the 14 Western United States, airs from 6 - 9 p.m. on Saturday and Sunday on KFI AM 640 [50kw - U].

Pointers on pointing: Thanks to Bill [lipis@mail.cts.com] for clarifying a previous post: KPBS and other San Diego County media can be found on the web! A good starting point to America's Finest City is:

http://godric.nosc.mil/planet_earth/sandiego.html (do exactly!)

There, you can jump to the fourth and fifth estates. XETRA-FM [91X] has the lamest home page, and KGTV-TV has one of the best I've seen on the entire web [and you could win a T-shirt!]

The San Diego Radio Log is undergoing a radical change. William
Pfeiffer pointed out a great error: While I have the power of the AM
stations correct, I have the direction in a confusing manner between
day and night. As such, starting Monday, I'll have a new log ready to roll
out! If you would like a copy, send an e-mail and I'll put you in the que.

Only a humble worker bee, not a queen; but, the management I've worked under generally looked at prices, guarantees and working life and chose to purchase equipment designed for home use, assuming it was short-lived and disposable for the price.
Run numbers for yourself: get costs and warrantee times from manufacturers for the bigtime units, ask a bunch of real working people how long studio brand equipment REALLY lasts, then figure out how many Pioneer units you could buy and throw away over that time period for the same price. Write your choice into the budget.
No longer the days of turntables so long-lived, you could tape a quarter to the tone-arm and use for another ten years; we live in the age of planned obsolescence! And you still have the occasional employee who will A) walk off with half the music library and any equipment not nailed down, and /or B) spill a Coke on top of it.

LIFECYCLE OF A MAJOR MARKET FM RADIO STATION

1. The owners of a local station decide the present format of easy-listening elevator music isn't working and they change to a new, untried format.

2. Unlike the other stations in the market which have corny morning drive-time programming, the new station plays nothing but cool tunes in the morning and rapidly attracts a word-of-mouth following among listeners.

3. The ratings book comes out and the station starts to attract ad revenue. There are more commercials.

4. The program director, desiring to compete with the leading stations in the market, starts to construct a morning show.

5. Although the single DJ is doing fine, a second personality of the opposite sex is brought aboard for "balance." A newscaster and traffic reporter are added.

6. The station is now leading the market and the program director reduces the size of the playlist. The station starts accepting annoying spots with honking horns, sirens, and ringing telephones in them.

7. The two morning show hosts are given lots of cutesy slogans and other insipid material they are told to read on the air.

8. Eventually, the listeners tune out as there is now rarely any music, just the airheaded skits and banter of the hosts.

9. The radio station falters in the ratings and the owners decide to switch back to elevator music.

10. See #1.

(Los Angeles residents remember #1-8 happening on KLSX (they went with Howard Stern); currently, KSCA 101.9 has reached #6.....)

airheaded skits and banter of the hosts.

9. The radio station falters in the ratings and the owners decide to switch back to elevator music.

>but once your station's limiter
>clamps down on those extremes, you've go very little midrange left on th
>air.

This would depend on what limiter you are using, and how it is set. I suppose that if you are processing heavily, this situation could occur. But if the BBE is being used to restore the fidelity of old tapes that lack highs and lows, and it is used *just* to do that (and not abused), there should be no problem.

As a 17-year broadcasting vet, this is a problem that I often encountered. The BBE can be a big help. The secret is to use just a slight amount of processing. The temptation is to crank the thing up!

Kenny Everett is actually known here in the US as well...his
BBC-TV show was run for several seasons on public TV in
the US and Canada, as part of a comedic "British Invasion"
that also included Monty Python, Dave Allen (what's HE
doing these days) and Benny Hill (who appeared mostly on
commercial TV in the US). He was popular, then (like Allen,
unlike Python or Benny Hill) just disappeared from US tele-
vision about 10 years ago. Was he off the air, and ill, all that
time? In any event, sorry to hear of his passing, he was a
real talent...

I heard that too, last night about midnight; and thought it was some kind of local RFI.

FWIW: they are using the nondirectional 160-foot tower of an abandoned AM transmitter site. It might be KORK's at 1460AM. They have a CP to go up to 20kw with a new directional system, and maybe they've done that at a new site.

It can be done, but it's a bit involved. But it ain't that hard.
You'll need to identify the capicitor trimmers(antenna and the oscillator
trimmers) , the oscillator coil adjustment, and if the antenna loopstick
coil can be slid on the ferrite rod.

First, tune in a station near the top of the AM band. Now tune the dial
a bit (5 to ten KHz, that is, so you hear the "raggedy bottom edge of
the ststion). See which direction to turn the oscillator capicitor
trimmer to get the station sounding normal. (Note: the width of an
AM station is 10KHz). "Walk" the station with this procedure ten
times and this should be close to 100KHz. The station probably gets
weaker as you do this, adjust the antenna capicator trimmer to get the
station stronger.
Now check to see that you didn't loose the 540KHz end of the dial. If
you did, tune in a station near this 540 end. Then tune to the Upper
edge of it, and adjust the oscillator coil to get it tuned in. Check
to see if the bottom end of the band is back. repeat if needed. If
the coil of wire on the antenna loopstick is built so it can be moved,
then move it slowly while listening to a station around 620KHz.
Then check to top end of the AM dial to see that the stations there
didn't migrate too much upward. Basically, the coil adjustments
have most effect on the low end of the band, the capicators have
most effect on the high end. tune in a station around 1500KHz, adjust
the cap trimmer to maximize signal. You may need to iterate the above
process a few times to get things nicely tuned up.

The stations on the upper end of the dial will now appear about 8 to
10 KHz lower than they used to be. And the radio should be able
to tune in up to 1700KHz.

2531. KWND-FM Springfield Mo to return

Dark noncomm Christian AC station KWND (The Wind 88.3 12.5kw @ 600 feet) was testing its programming yesterday. It has been dark as long as I have been in the market, despite new studios and equipment, because of some scandle with the previous owners.

Station is being purchaced and will return to the air some time soon with a similar Christan AC format. During the tests, station engineers werwe tweeking their Unity 2000 processor to find the best sound. It has a ways to go yet.

I am sure someone (Maybe Terry Knab) can fill us in on all the details of how and why KWND went dark.

"Deregulation has been a godsend to the radio industry, which was
dying because of an overabundance of stations and operators..."

Beg to differ with you, but the proliferation of stations (especially on
FM) has only INCREASED as a result of deregulation, with bad
(but cheap) programming driving out good stuff in a broadcasters'
equivalent of Gresham's law.
What's more, it's hard to argue that the business is anywhere near
as healthy now as it was 20 years ago. Back then, most stations in
the US were at least making the nut, if not hugely profitable, and the
best and most successful stations were literally rolling in dough.
Now, a large majority of stations are not generating a positive cash
flow, revenues and employee salaries have not kept up with infla-
tion, and in qualitative terms, there's really less diversity on the air
now than in 1975. I hardly think six different ACs, three country sig-
nals, five talkers and four rockers in one particular market of 1.1
million is a lot of variety...there was more competition in more formats
in this market in 1975 than there is now, and that's equally true of
New York, Buffalo, Chicago, Cleveland, LA, Atlanta, or any market
you can name. This business wasn't perfect by any means 20 years
ago, when I was first making a living in it...but more stations were
more competitive and profitable back then, than today.

I'm sorry you consider my statement "puerile", but I have owned radio stations, and I do have some sense of what the financial requirements are. And you have simply proven my point...Apparently Boston IS well served by WBZ, but it does not need the FCC requiring that all the other stations try to be little WBZ's, with full news staffs.

Stations with full news staffs were able to make a healthy profit because they were protected from competition by the government. Moreover, the host of other media advertising opportunities were not available to potential advertisers.

Precisely my point. Do you think that the government, rather than management, can make a more intelligent determination of what will make a station worth listening to, and thus more profitable? Sorry, but I'll place my chips on the independent owner, rather than the FCC, any day.

Finally, ask ANY owner if he thinks duopoly has hurt or helped the industry. I would venture a guess that not one owner in 100 believes it has been detrimental to the business. It has attracted capital, enabled owners to once again make money, it has reduced or eliminated marginal properties, and enabled radio to recover from what had become a financially disastrous business.

Incidentally, Mike, you going to NAB? I'll buy you a drink and we can discuss this further!

Ministry at the Front Lines

Ecuador and Peru recently made headlines around the world as they fought a month long conflict over their common undefined border. But there is another side to the story, the side involving ministry and caring by the church. You can hear about one pastor's trips to the border, his opportunities to minister, preach, pray and share with troops left alone in the jungle in the face of their hostile neighbors. Hear Southern Baptist missionary Steve Thompson share his experiences as he recently presented them to the congregation of First Baptist Church in Quito. This special will air on "You Should Know", Monday, April 17th on missionary shortwave radio station HCJB. Broadcast times are: 8:00 UTC to Europe, 9:30 UTC to the South Pacific, 17:30 UTC to Europe and the Andean Region, and 1:30 and 5:30 UTC (9:30 p.m and 1:30 a.m. Tuesday) to the Americas.

HCJB - THE VOICE OF THE ANDES - QUITO, ECUADOR

HCJB is a major international Christian shortwave radio station broadcasting from Quito, Ecuador in South America. Thanks for listening to The Voice of the Andes.

ENGLISH FREQUENCY SCHEDULE : Effective 1 March 1995

AMERICAS:

0030-0500 UTC on 9745 kHz to eastern North America
0500-0700 UTC on 9745 kHz to western North America
1100-1500 UTC on 12005 kHz to The Caribbean
1130-1430 UTC on 15115 kHz to North and South America
1430-1600 UTC on 15115 kHz to South America

EUROPE:

0700-0830 UTC on 6205 kHz
1700-2000 UTC on 15490 kHz

SOUTH PACIFIC:

0700-1130 UTC on 6135 kHz

ANDEAN REGION:

1330-2100 UTC on 6080 kHz

GENERAL NOTES: The Single Side Band frequencies of 21455 kHz in 13 meters and 15540 kHz in 19 meters also carry English.

> was WOR-FM in the middle (98 or 99) of the dial. Rosko was there before
> moving to WNEW-FM.

Murry the K, Scott Muni and Rosko let the way with progressive radio on
WOR-FM, (98.7). They were forced to quit, (Rosko did it on the air), when
the Drake-Chenault oldies format was forced on them by RKO. Ironically,
Murry later went on to do oldies on the weekend on WNBC about 2 years later
and Rosko went into doing disco on WKTU after a forced hiatus.

> I thought Allison Steele was there too, but I'm not sure.

Allison came into NY radio on WNEW-FM in 1966 when they killed the
automated evelator music and tried a female hosted version of the
programming on AM. She was the only survivor, and the youngest of the
hosts, when WNEW-FM decided to go AOR.

> They started off playing ligher tunes (e.g., by the Fifth Dimension) but
> eventually moved to music by Richie Havens, Hendrix, Janis Ian, Blues
> Project.

It was an interim change format while they decided exactly what way to go.
They were also bringing in Pete Fornatale from NCE station WFUV. Pete had
started his original show with a mix of "WNEW(AM)" and CHR. He progressed
that into a new CHR release program and was phasing in AOR at the time of
the format change at WNEW-FM. They simply took his format as it was at
that time and continued the phase in.

> BTW, what's become of Jonathan Schwartz?

Schwartz went to WNEW-AM, his father was pop composer Arthur Schwartz and
he had a better relationship with that "old fart" music and his father's
contemporaries and fit in very well. He was fired a few years later and
then brought back subsequently when the ratings went through the floor.

Just before the end of WNEW-AM, he was the primary mover in getting
WQXR-AM, (now WQEW), to take over the format. His original plan was to get
a group together to buy another NY station to do it. For his signing on
with WQEW for a job after WNEW-AM would go out of business, WNEW-AM fired
him while he was on vacation.

Schwartz is doing afternoon's Tues-Fri and mornings, Sat & Sun on WQEW.

He is at WQEW - 1560 AM in New York City. This was the old
WQXR-AM that picked up the Big Band/Singers & Standards format
when WNEW-AM became WBBR [Bloomberg Information Radio].

In AIRWAVES 1241, afn09595@freenet.ufl.edu (Wyatt V. Cox) wrote:
}
}In <3lih30$3o9@vixen.cso.uiuc.edu>, transvox@interstate.net (Mark Roberts)
}wrote:
}
}MR: After more than 250 hours of polkas over an 11-day period, the junior
}MR: partner in Kansas City's latest duopoly installed its new smooth jazz
}MR: format at 7.15 am Thursday, March 30. A report on KMBC-TV confirmed
}MR: the permanent switch to the new format.
}
}Oh boy! Another one. You may remember that Kansas City was the
}first affiliate of Satellite Music Network's "Wave" format, a
}NAC/Lite Jazz format, back in the late 80's on 98.9 with the call
}letters KCWV, patterned after LA station KTWV.

More of a "new age" station, as I recall. Changed to KRVK,
"The River" in 1989 after the Milwaukee Journal bought it.
Became a "male AC" station, whatever that means.
It had enough sense NOT to air commercials every morning at :50 and :20 the
way every other station did/does, plus there was no funny morning show,
just an announcer.

(If regular readers haven't figured it out by now, I will reveal that I
basically DETEST most morning shows. I liked Jay Charles on KLZR but he's
going to waste on KISF. KISF needs to let Jay go solo and be himself.
We won't talk about some of the other clowns that try too hard to be funny
in the morning. Mornings are not inherently funny. So stop it.
End of grump-o-rama.)

In its last two weeks in the format, KRVK was moving toward an AAA format
when the owners twitched (as WTMJ, Inc. has the reputation for doing)
and put on its present hard-rock (current-oriented AOR w/ modern
crossovers) format as KQRC in 1992.

}In talking to several old friends in Kansas City it seems that
}there was actually a nice little audience for the polkas, though!
}
Are these friends who happen to be old, or longtime friends? (ducking)

Perhaps there is *yet* a future for KNHN (1 kW, 1340 kHz,
weak news/talker). Can you see it? The "Voice of Strawberry Hill"?
(Slavic ethnic area of Kansas City, Kansas.)

Or maybe they could try it on WHB (10/5 kW, 710 kHz) for *regional*
coverage. Then, WHB wouldn't stand for "The World's Happiest Broadcasters".
Instead, it would stand for "We Have Beer".

>> format in favor of a NAC/Smooth Jazz format.
>
>In Buffalo, WBUF "B-93" has also gone to "smooth jazz". They officially changed
>at 2PM Thursday 3/30 (see Carl Gorney Buffalo Radiowatch post). First half hour
>included Sade's "Smooth Operator", George Benson, music like that...IMO, hardly
>"jazz"...how about some Coltrane? :-) . Is it a satellite format? Have other
>markets picked it up too?

Mark,to answer your second question first:the Vox Jox column in the April 8
Billboard says that 4 stations in the top 50 markets have switched to NAC/light
jazz in the past month. Besides Buffalo & K.C.,a station in Norfolk,VA jumped
to NAC(there was a 4th,but I don't know which city it was in).
As far as the first question:no,Chris Whittingham,Lynn Bradley and Dan Catone
are still on staff,but for all the talking they do between tracks,it might as
well be. Also,PD Steve Wiersman is still there. Interesting note:WSJZ(ne WBUF)
is being consulted by the same people handling KKCJ in K.C.:Broadcast
Architecture. Usually,the jazz becomes more intensive during night(if WNUA in
Chicago can be used as an example).

Rich Wood (richwood@comspec.com) wrote...

} I'm getting very tired of parents abdicating their responsibility to teach
} and protect their children. Instead of paying attention to what they're doing
} or hearing, they rely on the destruction of the source to cure "the problem."
} Unfortunately, that solution deprives others of the right to pick from a
} variety of programming.>>

Roger Dobrick replies...

} Of course you're right--in a perfect world. I have a twelve-year old
} daughter and my wife and I have always monitored what she watches or reads.
} Unfortunately, we're living in an era of disfunctional families, in which
} one or both parents are mostly absent, either physically or emotionally.

Yes, we are living is a world of increasingly dysfunctional and absentee families. And it is this 'who gives a damn' attitude on the part of parents which is building a generation of 'who gives a damn' young adults. Lack of love, guidance and real communications in families is what is creating the current crop of violent, non-responsible, live-for-the-moment teens and young adults, not the exercise of free media.

} I used to hold the view, "just turn it off" if you don't like it. The
} problem is too much TV viewing is unsupervised. I don't want to see us
} using libertarian and market place arguments--which may apply to adults--
} being applied to un- or under-supervised minors who may not be in a
} position to judge what's right for them.

Too much unsupervised TV is *a* problem, for sure. But it is not *the* problem, it, like drinking, drug abuse and other 'escape' activities are the 'result' of the problem, the symptom of the problem, if you will. The problem is deeper and much harder to face than excessive TV or anything else. The *problem* stems from a lack of inspiration, guidance and basic hope. It stems from that 'absentee' family you speak of, from an emotional and cultural vacancy, which sensational media, like euphoric drugs, is a temporary escape and relief from. It stems from a world where the only thing that matters is the almighty dollar, where human needs are all solved by the newest 'product' from a new car to a 900 sex line.

It is much easier to blame it all on television, or Howard Stern, or any of the other 'escape goats' in our culture than to face the hard, sad and bitter truth that we, as a nation, have abandoned our offspring. We offer, as parents, restrictions, limits, rules and punishment, but fail to offer enough positive direction, guidance,

love and real quality time to our kids. When the rules fail us, when the kids out smart the punishment-based parenting, and seek out sensationalist programming, or worse, we scream to the legislators to 'restrict and regulate' the media 'for the good of our kids'. Grandparents say "In my generation, we didn't have this crap on tv and kids didn't behave like this... " What granny fails to notice is in her generation we had something called a family unit. A structure of love, warmth and guidance, along with the rules and responsibilities. Something we seem to have lost track of in our mad rush to personal gratification and self-centered life. Most parents (and for that matter most people) are not willing to look that hard in the mirror, and would instead blame the symptom for a problem whose roots go deeper than we care to admit.

We have become a nation of "weed-eaters'. Instead of dealing with the root of the offensive 'weed' we spend our whole lives trying to invent a better 'weed-eater'. More laws, more cops, more jails, more regulation, more frustrated people. We choose not to look at, or deal with the roots, because those roots are entrenched in our own psyche's, in our own actions and choices as a culture. To examine the roots of this problem means to examine our own failures as a culture, and we would rather embark on the fool-hearty attempt to destroy an infestation of cultural weeds by 'cutting off the tops of the weed' whenever it becomes visible. . When the weed springs up someplace else, we say "bring on a bigger weed-eater'. Herein lies the futility of the argument that 'we will have a more caring society by passing laws against that which is uncaring'. More people are inspired into virtue than are bullied, or punished, out of their vice.

So I say, to all who scream about how media is corrupting their kids... Offer something better. Take the time, patience and effort required to actually raise your kids. Allow them to become themselves, even if it means they become something different than you think they *should become*. Be your kids best friend, confidant, and mentor, not merely their superior officer, censor and judge. You will find that the more love and involvement that comes from the family, the less addictive your children will be toward TV, drugs, booze, and other 'escapes' from the mundane and predictable world we now find ourselves in.

You may close your hymn books now.

And S&G completely trashed him in the ratings. For CKG, bad move.
Mornings are already too competitive in Chicago. Stern will be lucky if
he beats out Magic 104. All the advertising in the world doesn't make
good radio.

[Moderator's Note: Compared to what I have seen in the trends, 'CKG
cant do too much worse than they are doing in AM drive. And the
Stern-a-holics might stick around for the dinosaur-rock the rest of
the day. Bill]

Close: 103.9. It's not much of a factor. Presently KMCR(FM), =Moberly's
KZZT(FM), a repeater of a station that carries a satellite-delivered
format. Might be more useful if it transmitted bird farts.

>They want to shoehorn a station at 104.1 in Jefferson
>City? Good god what ever for.
>
Max...here's the beauty, the secret behind BC Docket 80-90...
BECAUSE IT'S THERE!

Mr. Moderator can tell you what 80-90 did to Springfield, and it's coming
to Columbia/Jefferson City to work its magic with all sorts of drop-ins
(102.3, 93.9, soon 104.1, a 94.3 move-in, ad inf.)
>
>Yep, listened WJBM quite often in the early 80's. KSGM (now KPNT) did the
>same type of format thing I do believe.

Yes, KSGM was a simulcast with the AM (now silent due to flood damage)
licensed to Chester, Illinois at 980 kHz. Both went off the air at 10 pm.

>A remember a station out of Litchfield IL (106.1) that had a
>country format all week and then on Saturday night from 6P til signoff it

Then again, KFUO-FM didn't turn commercial until the 1980s sometime.
When I was in high school, it just ran tapes from Parkway with loud
unfiltered cue tones that would rumble my speakers.
>
>: Let us know. KWK, KGLD, KASP, WKBQ, whatever you want to call it, is one
>: banged-up jalopy of a station by now.
>

>It has definitly gotten sloppy in the past decade hasn't it
>
Too bad Rich Gould (whom I knew in college) wasn't able to get the money together to buy out KASP, which he was running as a sports format. I think that would have been the station's best hope, much as I don't care for sports formats. Then again, the 1993 floods might have bankrupted an owner who was heavily leveraged, since one of the two 1380 transmitter sites flooded.

I work at WRCX...MVP is our sister station with all the same engineers. They have had problems for the past year or two and have finally decided to replace the entire transmitter. The problems you're having now picking up the station are due to the new transmitter needing to be adjusted, tuned, and all that other tech stuff. Give it a little while and you won't notice a difference between the old and new.

(tie)
22.KSUN(1400-Spanish) 0.3--->0.8
24.KOOL(960-Oldies) 0.8--->0.7
(tie)
24.KCWW(1580-Country) 0.6--->0.7
26.KZRX(100.3-ZRock) 0.8--->0.6
27.KUKQ(1060-Alternative)0.3--->0.5

Summary:
The country race is as hot as ever...
with KNIX and KMLE
tied(as they were in the Nov-Dec-Jan
trend).
The rocket ship may have turned
into a rollercoaster for
KSLX...the station that went 2.2--->5.1
in three books last

year is down nearly a point and a half
in this trend.
This is the first trend reflecting
Bonneville's switch to
70's oldies at KHTC(former KPSN),
leaving the 60's
oldies to competitor KOOL-FM...but
neither station's
ratings appear to have been affected
much.
News-talk KTAR sees nearly a point
and a half jump...while competitor KFYI
drops almost a full point.
AOR KUPD loses nearly a full point,
while AAA KZON, after several flat
trends in the low-2's jumps 0.7 to
a 3.0. ..one of its best numbers ever.
This is also the last full trend for KZRX...
which flipped in early march to hot talk
KHOT. The station hopes to improve it
and sister KGME's numbers with the
Howard Stern simulcast in AM drive.
Finally, as a postscript, here are the
commercial stations that pulled less
than an 0.5, and in most cases, did not
get a number at all this trend:

KIDR(740-Radio AAHS)
KVVA(860-Spanish)
KXEG(1010-Religious)
KRDS(1190-Religious)
KHEP(1280-Religious)
KXAM(1310-Talk)
KOPA(1440-CNN Headline News)
KFNN(1510-Business)
KASA(1540-Spanish)
KMEO(93.7-NAC)
KAHM(102.1-Beautiful)
KAZR(103.9-Cls Rck)*
KRIM(104.3-Country)
KRDS(105.3-Religious)
KVVA(107.1-Spanish)
KCRZ(107.5-Country)
*KAZR is now KBZR "The Blaze",
"Contemporary Hot Rock", with
an improved signal since late
March.

Reply-To: toddtheb@aol.com (TODDtheB)

Here's additional information on the WRQI-FM (95.1/95.5) format switch from Classic Rock to Modern Rock. As reported in the Rochester Democrat & Chronicle on Wednesday, 4/5 (paraphrased)...The format change took place on Saturday, 4/1/95 @ Noon, after playing ELEVEN straight hours of THE DOORS 'The End'. "Alot of people thought it was an April Fools Day Joke, which it was" said WRQI Operations Manager Orest Hrynak. WRQI's new Program Director is Erick Anderson from Boston. New calls will be installed this week, pending FCC approval, WNVE.

2549. Any radio stations at the NY Auto Show?

Newsgroup: rec.radio.broadcasting

Does anyone know if any radio stations will have boths at the New York Auto Show next week at the Javits Center? I remember a couple years ago Z100 and WPLJ were there giving out shirts, calendars, and bumper stickers. Just curious...

Thanks for you help.
CHARLES.

2550. Weekly Beatles show..free on DAT

Newsgroup: rec.radio.broadcasting

Message-ID: <3m2ps3$bgn@vixen.cso.uiuc.edu>
Source record: 33156

Reply-To: btlebrunch@aol.com (BtleBrunch)

I produce "Beatle Brunch", a weely, one hour radio show that is currently airing on 18 stations in the U.S. and Canada. The show has been in synd. three years and is the number one rated hour on Sunday on Miami's Majic 102.7 and does extremely well (I don't have the numbers) on the others.

The show is available free on DAT to stations (plays best on Oldies or AOR) and runs 52-minutes.

Stations interested in carrying the show, (the Spring book is here!!) please E-mail me back and I'll send you a recent show and demo.

Currently airs: Miami, Baltimore, Charlotte, Sacramento, Indy, Nashville, and many more!

Joe Johnson
Host/Creator
Beatle Brunch

2551. Bill Brown hospitalized.

Newsgroup: rec.radio.broadcasting
Date: 1995-04-07 00:00:00 UTC
From: bigsteve@dorsai.dorsai.org
Message-ID: <3m2ps4$bgp@vixen.cso.uiuc.edu>
Source record: 33157

I was informed by a friend, long time NY radio watcher Steve Thomas, that senior WCBS-FM air personality Bill Brown suffered a heart attack approximately one hour into his air shift on Saturday morning, April 1st, about 7AM. Luckily he was not alone, overnight personality, Max Kinkle was still at the station and took over his air shift, and so was weekend newsman Jeff Allen.

Steve first found out about it when he heard a get well message that was given by Dan Ingram at the end of his air shift that day at 3PM.

I have no other information as to the severity of the coronary he had, what hospital he is in, or the prognosis on his recovery.

Steve was told by a newsperson at WCBS-AM/88 that they were going to announce it as a news story but could not get clearance from CBS management.

I have not contacted any one I know at CBS for more details as there may be a confidentiality policy at CBS about disclosing staff personal problems.

Humm, doesn't sound too far fetched to me. Send the voice segments down in either fixed lengths or with a total time limit per hour. Begin the feed of each at a preplanned time. Every PD will know that x minutes total will be the feed for that half hour and he plans the music and spots for the balance of the time.

Each affiliate stores the feeds in a computer and plays them back, in sequence, after the stopset, just like old fasioned voice tracks. The advantage is that by using a computer you get not only immediate playback, you can also record and playback at the same time on the same media. You can also adjust the playback "speed" to make up for the few seconds you were short or long on with the local portion.

Sending down the feed digitally means that control signals can be added. Use them for cues, inserts and edit in's of custum made ID's for each station.

I guess you can call it "almost live".

I am very sorry I have not replied sooner ... life has been kinda busy .... first working full time for Metro Traffic, now being out of work .... Top 40 is my love.. and now it is time to get back in it .. if you can help, feel free to send any leads you hear or read about <hint> :) thanks .... Greg, I am forwarding a copy of my response to rec.radio I hope you don't mind .. my reason for doing this is at the bottom. Jon

> I appreciate your comments about top-40. I'm sort of new to the format
> from working mostly full service and talk radio. I guess with all of the
> different top 40 formats around the country, it just depends on what area
> you are in and what works best for your station.
>
top 40 is so different depending on where you are ... our top 40's in denver are differnt then anywhere else i have been ... ks104 ... rap/black leaning ... and alice is mainstream no rap... their liner is "the most mixed up station of the 80's ... 90's ... aand the 70's ..... " that tells you something there...

> I wouldn't say the whole top 40 format is a mess. Most Top 40 stations are
> playing the Mainstream top 40 hits during the day, but at night the
> dayparting takes over. That's when the format seems to break apart. We are
> a Mainstream 40 during the day with an Alternative edge at night.

that is very true .... some stations more than others! .... some just sound a mess all the time .... ((no names)) ... look at plj/ny - arnt they 70's at night ... and we are talking about market number 1 ... the part of top 40 that is a mess is the talent wise .... there are still some great talent out there and great new talent .... I look up to these people and love listing to them ... but they defintly sound different then they did in the era of great radio (top-40) stations like, y-100/miami - old hot-97/ny ... etc.... that was when it was so fun to listen to the radio ... jocks still sound good, in a different way ... doing more 'bits' and phoners ... but maybe it is just the feel of fun that is gone?

-----**** The quoted part above is from a letter Greg Allen/WIFC/Wausau, WI wrote me and I thought part may pertain to those talking about Top-40 radio ... please reply to me via AIRWAVES/rrb or Email if you want ...

Charlie is doing mornings...don't know how Charlie sounds down there-haven't heard him as yet. But talked to him about 3 weeks ago. He loves it down there. He spent a lot of time as Program Director of the old WYNF in Tampa. He told me he couldn't figure out why he ever left Florida in the first place.

Don't know about Sea Bass. My guess is that Charlie is a huge name in Florida. (Worthy of front page news in the St, Petersburg Times when he came back) I'll bet that when 98 rocks got a chance to get Charlie...Sea Bass became a sacrificial lamb.

I'm still at WRCX for the time being as permenent fill-in/weekends. Still looking for something in Orlando, Tampa, or West Palm Beach. Had an offer at WHTQ a while back but the $$ was too low. In retrospect...I probobly should've taken it. Cost of living in FL is dirt cheap and FL stations typically pay in Sunshine.

Talk to you soon!

Mr. Green deserves a big "THANK-YOU" from all of us Metro Boston commuters who listened to him on WBZ 1030 AM for all these yeqrs. I can clearly remember his rescue attempts of people and I think a dog (on the icey Charles River?) a few years back. It is not an easy job being up there in the cold and sometimes less than desirable weather. Good luck Mr. Green. You are a pioneer and good neighbor. Our best to you and your family!

A little sameless plug for me...

I will be talking at this year's NAB on "Internet and It's use for Broadcast Facilities". I will be on the panel that Bill Ruck (KFOG/KNBR) is chairing called "Computer Technology for Broadcast Support: BBSs, LANs, WANs, and the Internet." The session runs from 1pm till 3pm on Monday April 10th in room N109/110.

My talk will be aimed at the basics and and introduction to the Internet. It will include resources that broadcasters could use to promote their stations and use from the Internet for programming and technical support.

Come on down or send your GM to visit to convince them to connect to the Internet.

Tim

Perhaps I missed this on the WRKO thread but...

What did happen to Cat Simon on KHJ, formerly Johnny Williams on WRKO ?

I believe his real name is/was Bill Todd.

Years ago I heard him on a few network radio commercials (Wrigley's Spearmint gum ?).

jgallagh@interserv.com (John Gallagher/Boston)

The other missing link from WRKO was Joel Cash. He was the mid-day man for quite a few years. Anyone know his
whereabouts?

2561. KHJ Jocks(1970-1974)

Newsgroup: rec.radio.broadcasting
Date: 1995-04-07 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <3m2psf$bif@vixen.cso.uiuc.edu>
Source record: 33167

Part two of our "where are they now?" thread:

Scotty Brink

Shadoe Stevens: NOW: As answered in the WRKO
thread of last month, Shadoe is a regular on
CBS-TV's Dave's World...and hosts American
Top 40. (1970: KHJ; 1970(about 30 days
after KHJ):
KRLA; 1973:KROQ)

Chuck Browning: (I know he's been to K-101
and KFRC
San Francisco since.)

Walt "Baby" Love: NOW:Urban Contemporary
editor at R&R.

Dick Sainte:

Mark Elliott: Lotsa voice-overs(I think including
most if not all of Disney's trailers).

Charlie Van Dyke: Voice-overs for TV and radio
stations in at least 100 markets. Based in
Scottsdale, Arizona(1972: KHJ middays, after
Robert W. Morgan returned and Charlie Tuna
left to run out his non-compete at KCBQ, San
Diego. Later 1972:WRKO, Boston; 1974: KHJ
morning drive(became PD later that year);
1977: KLIF(or was it KNUS?)Dallas; 1980-ish:
KOY, Phoenix; 1983-ish: KTAR, Phoenix.
1985: KFYI, Phoenix; 1991 or 92: KTAR;
1993: KPSN, Phoenix.).

Jerry Butler: The WRKO thread said he had
committed suicide...was he still at KHJ at
the time? I thought I remembered him following
Morgan and Steele over to Bill Drake's KIQQ
(K-100) in 1973, but I could be mistaken.

Jimmy Rabbitt: Last known contact was with
radiobob during the 80's in Aspen. Was at
KHJ only briefly...playing top 40 with a very
laid-back FM jock attiude(and great pipes!)..
the L.A. Times said he had started bringing
records from home. On to KROQ from there...

I think a turn at KMET again, too.

Larry McKay: He spent several years at KMPC
in the 80's.

Cat Simon: Was Johnny Williams at WRKO..
KHJ already had someone by that name.

Captain John:

Bobby Rich: NOW: Mornings at KKLD, Tucson.
(1973: KHJ; 1974:KFMB-AM, San Diego;
1975: Program Director, KFMB-FM(B-100);
1979: PD, KHTZ, Los Angeles(now KLSX);
80's: Seattle(not sure which station) and
back to San Diego (first at B-100, then I
believe another station).

Machine Gun Kelly: NOW: Afternoons at KOOL-
FM, Phoenix. (1973: KHJ; 1978:KTNQ, Los
Angeles(10-Q); 198?:KOST, Los Angeles;
1989: KODJ-FM(later KCBS-FM), Los Angeles)

Danny Martinez: Last I heard, was on KTWV-FM
(the Wave), Los Angeles.

Barry Kaye

Tom Dooley: Fired at KHJ, when minutes after
Nixon resigned, he went on the air(back-
announcing "Rock the Boat" by Hues Corporation)
, said "well, we've all gotta rock the boat
sometime"...and then said he believed Nixon
should be investigated for his role in the
political assasinations of JFK, RFK, Martin
Luther King and the attempted assasination
of George Wallace. Did he ever work on the
air again?

As with the first batch, I'm anxious to see how
we fill in the blanks. To keep these posts
short(Okay, Bill...this one really isn't), I'll
hold the 1975-1980 jocks for a few days.

Andy Potter (potter@emily.emba.uvm.edu) wrote:

: Dear Mr. Hobbs,

: Unfortunately, I don't have an answer for you, just a
: question. You mentioned KNX on 1070. I work in Burlington, Vermont,
: where we had an AM on 1070--at 5000 watts and limited to daytime operation
: only. That's because Canada has at least a couple of stations on the same
: frequency, one in New Brunswick, I think, and one in western Ontario.
: Do you happen to know what KNX's power and day/night configurations are?

I don't know how much power KNX uses, but I have driven quite extensively
in the West and KNX is audible in the daytime about as far away as Las
Vegas, Santa Barbara, or Needles. At night I have heard KNX in central
Oregon and Colorado. At night KNX is easily heard anywhere in CA (as is
the other western CBS O&O, KCBS San Francisco which probably uses
slightly less power as it is a bit harder to hear in the boonies.)
Winter propagation is of course greater than summer...

You could call them at 213-460-3000....

Hi Riku,

As far as I know is the German Program of RTL totaly done
by RTL-Baden Wuertenberg in Stuttgart, Germany.
The program is called "RTL - Der Oldiesender" including
international oldies from the 60s,70s,80s.

RTL-Baden Wuertenberg its a company of its own with
shares holded by the RTL Headquarters in Luxembourg.

RTL-Der Oldiesender can be heard as a 24h Program on
the Astra Satellite and in all cable stations in Germany
also on low power Medium Wave in Berlin and
on the EX-208 freq. 1440AM till midnight.

Some local or regional FM stations in the Southwest of Germany
take over this program for several hours (e.g. during the night)
Sometimes this stations including the name RTL in their Station ID.

This stations have also financial shares holded by RTL-Baden Wuertenberg.
(But I4m not shure if I am right.). But they are stations, who
have to earn their money by advertising.

Of course this stations must have the same radio format.
In my opinion the music selection is done by RTL Baden Wuertenberg
Music Computers.

But in Berlin there4s a FM Radio Station called RTL-104.7 Berlin(?)
They are playing a 24h CHR format. Totaly produced in Berlin.
(beside the regular low power AM of RTL-Baden Wuertenberg)

The German program of RTL (RTL-Television) is is produced in Cologne,
Germany. Shares are holded by RTL Headquarters, Luxembourg.

Theres another german Program called RTL2. This is located in Munich,
Germany. Some shares are also holded by RTL Headquarters in Luxembourg.

But within german law, they are two different companies. !

If you have more questions about this or other subjects, please

Thanks, folks, for your e-mail and replies to my original query. The reason I asked is I may pack up and move my base of operations to Riga, Latvia, from where, if all goes well, I would be doing a 5-10 minute "magazine" type show on Swedish/Scandinavian activities in the Latvia and the Baltic. As things now look, I hope to be able to scrape together enough for what is called a Performa 630 8/350 CD TV here on the European market (I'll sell my 450 in Latvia, where such computers are still pretty rare and fetch a better price than in Sweden. I also read Apple just launched a Power PC Performa in the States (the 630 is a 040 that can be upgraded to PPC).
Do you have any references, articles on the Net, professional magazines, etc that may have how-to articles and suggested equipment mixes (on the Mac side) for this kind of lower-end home office studio?

Regards,
Juris Kaza

PS: Know of anyone who might need a radio stringer in the Baltics? I now string for ABC and Monitor Radio. Speak fluent American English as well as Latvian, Swedish, German (the latter two not really for broadcast purposes).

>intellectually rewarding).

I TOTALLY DISAGREE! You probably don't remember the 60s and 70s, when radio
stations were required to carry news and public affairs. Programmers were
downright innovative in top40 and other formats...and had newscasts that
were listenable...and were also profit centers. Every newscast was a money
maker...sponsored...and well-listened to in spite of the general belief that
they were tune-outs (no legitimate survey of newscasts during that era
showed people tuned them out...in fact, stations looked for news on their
stations and expected it at certain times - and still do).

Sounds like you've bought the line that's killed off personality programming bit by bit...as soon as the Sterns and the others are too old or too dead to be on the air, there's noone to replace them...since there are too few stations with truly creative programming and too many with database manipulators instead of program directors. Same with news...with no training ground for young reporters, the networks and operations like Metro will slowly degrade into mediocrity.

>Deregulation has been a GOD-SEND to the radio
>industry, which was dying because of an overabundance of signals and
>operators, and a host of regulatory requirements that created a
>situation such that even today, only slightly more than one-half of all
>broadcast stations have positive cash flow...much less make a profit.

Whoa....please revisit this statement , How the heck can de-reg have helped de-clutter the bandwidth??? You also didn't read the financials during the last decade...most of the stations now struggling were bought as speculative ventures or just gutted in corporate consolidation...not by regulation.

<<<Murry the K, Scott Muni and Rosko let the way with progressive radio on WOR-FM, (98.7).>>>
WOR-FM's programming separated from the AM in 1966, due to new FCC rules about AM/FM simulcasting that were due to go into effect.
The original lineup:
10:00 - 14:00 Johnny Michaels
14:00 - 18:00 Scott Muni
18:00 - 23:00 Murray the K
23:00 - 05:00 Rosko
05:00 - 10:00 John Gambling (simulcast from the AM)
I think Jim Lounsbury, a rock'n'roll TV host from Chicago, did news and a weekend DJ shift. One of the more amusing transitions in radio that I remember was "Rambling with Gambling," with his light talk and occasional Sousa march segueing into WOR-FM's format at 10:00am. WOR-FM also had a great jingles package, from CRC in Dallas, called "The Sound is . . . "

> was WOR-FM in the middle (98 or 99) of the dial. Rosko was there before
> moving to WNEW-FM. I thought Allison Steele was there too, but I'm not sure.

I remember one jingle well:

It's happening on FM
In stereo on FM
The hits never quit
On Ninety-Eight Point Seven
Eff-Emm
Double-you Oh Are Eff Emm Rocks!

Hard to know what was more novel: the FM band, the stereo, or the
breathtakingly fresh no-reverb'd, non-manic talent -- a hell of a change
for those of used to Dan Ingram and and the Good Guys on 'MCA.

My recollection -- and this is many moons ago -- is that
Alison Steele was at 'NEW-FM. I interviewed her for a high
school radio show I worked on ("Mainstream '67," WMTR, Morristown NJ).
She showed remarkable patience with a gawky kid from New Jersey who
was awed to be in the presence of such remarkable talent, not to
mention such stunning beauty. I seem to recall that 'NEW's air talent
were all women. Most I think were ex-models since there were few
women in radio in those days. I think it was just a marketing
thing to distinguish them from the original FM rock station down
the dial.

eb795@cleveland.Freenet.Edu (Eric Matthews) writes:

>Are your antennas vertically or horizontally polarized?

Most FM's today use circular polarization. Horizontal or vertical antennas
should work equally well.

However:

If you're not within line of sight of the FM antenna, what you receive is
likely to be randomly polarized, having bounced off God knows how many
buildings, hills, etc. Fiddle with the antenna until you get maximally
good reception. Use a directional antenna if you can; that helps with
multipath.

Also:

A theoretically circularly polarized transmitting antenna side-mounted
on a metal tower can be anything but, and the ratio of vertical to horizontal
power is likely to be different depending on where you are.

Most broadcast stations in the U.S. are both horizontal and vertical polarization. The FCC regulates stations based on horizontal polarization and the station can add up to an equal amount of power in the vertical plane. Most stations operate with equal vertical and horizontal power.

The main reason for the vertical component is that is the way most car antennas are polarized. My guess as to why roof antennas are horizontally polarized is so they won't look "funny" when compared to regular TV antennas. Also, there's less interaction between the horizontal antenna and the vertical metal mast holding it up.

BTW, there's one exception to the FCC's rule of vertical power not exceeding the licensed horizontal power. TV channel 6 is on the lower edge of the FM band. Non-commercial stations in the lower part of the educational band in areas where channel 6 TV exists are sometimes licensed for vertical only polarization or for operation with more vertical than horizontal power, to minimize interference to channel 6's horizontally polarized signal.

Usually, FM stations today use "circularly polarized" antennas. This allows for maximum signal penatration to homes (horizontal) and cars (vertical). In most cases the power out is the same in both directions. The most notable exception to these guidelines are translator stations, which sometimes are vertical only .

Circular polarization will often times also help with multipathing, especially if you're forced to "side mount" the antenna on to the tower.

I too saw that commercial for Pizza Hut. I literally saw it
because I was at a local Friday's and was too far away to hear it.
In fact, I was looking around, looked up, and saw Rush! I had no
idea what he was doing until I saw the words "Pizza Hut" on the screen.
My reaction? A loss of respect for Rush. I have always admired
him and used to love his radio program since hearing it on a charter
station, WNIS 850 Norfolk. Politics aside, I admire him greatly because
of his eventual phenomonal success in the face of successive failures. He
is personally responsible for getting millions of people to switch their
band selector from FM to AM.
IMHO, I don't take his politics TOO seriously. I will not boycott
Pizza Hut, orange juice, or anything else associated with Rush. That's
overeacting, again IMHO. I'm just disappointed that Rush has to stoop to
doing personal appearances in commercials. Yes, I know that Michael
Jordan makes millions doing endorsements, but I sort of have always felt
that Rush was above the fray.
Of course, Rush' commercial for Big Ass ham on Letterman was
absolutely hilarious!

Robert:

As an old radio salesman I might be able to give you a few pointers. First, newspapers and radio have only one thing in common, they both are seen as advertising media. The similarity ends there.

Think about how the human mind learns. When you were in school and had to learn the multiplications tables, did you simply open the book to the correct page and read once , 5 times 8=40? Of course not. We all learn by SPACED REPETITION, and that is the only way the human brain commits to memory. You cannot have spaced repetition in the newspaper. You can achieve it easily and economically on the radio. In the United States, we banned cigarett advertising on the air in 1972, but today, if you were to walk up to anyone in the USA and ask them to complete the sentence - "Winston tastes good.....", the vast majority of them would shout "Like a cigarett should!" The spaced repetition of the broadcast commercials made people remember that slogan for 23 years. Winston advertises in magazines and newspapers today. Does any one know the current Winston slogan?

People move through a continum that we call the buying process. They move because we use our marketing efforts, including advertising, to create a force to move them from the point of non-recognition of the product, to the point that they purchase the product. They don't, however, move at a study pace. They leap forward and stop, sort of jumping from one tank to another tank, and we don't ever know when they are ready to make the leap. The tanks are Unawareness, - I never heard of the product, Awareness - I know about it but I don't see how it is of value to me, Comprehension- Well, it might be of value, Conviction, I am going to buy that product someday - Action, when the sale takes place. To move them through these stages you need to know exactly when the individual is ready to move to the next stage, or you must keep a constant force on all the individuals so that you and your product are there when they are ready. That's what radio does best.

One last point. Get a copy of a large newspaper. Take each page apart, and spread it on the floor of a large room, so that the paper covers the entire floor. Take a picture of it. Now show the picture to your prospects who proudly say they are in the paper and say "Where!". Be sure to point out that half of that paper is facing the floor!

Radio is a terrific way to communicate. Handled correctly, radio advertising can make even the small merchant successful beyond their dreams. Make sure it is purchased deep enough, and be sure that the copy is good enough. A good piece of copy isn't twice as good as a bad one, its 1000 times as good.

Hope this brief pep talk is of some help. Leave me Email on AOL or here and I will be happy to chat with you any time.

Folks . . . I wonder if we've all missed the point. The question isn't whether or not there's value in Broadcasting Schools. The talent comes from the student. Inevitably, with qualified and proper encouragement, what one gets out of a broadcast school usually reflects what he/she put into the course.

I've seen grads from Connecticut School of Broadcasting go on to major markets, and I've seen grads take the bus back home. Talent can't be created, but it can be molded by the proper instructors and program directors.

The only negative I have toward the broadcast schools is the "criteria" for which students are selected. We've all heard the ads about "if you've got what it takes, we'll accept you." Too often, I found, "what it takes" is green money. I found kids and young adults in the classes I taught barely able to speak English; yet they were led to believe they would be a jock in just a few short months. I found mothers looking for additional income being told they could find a job in their home town (how likely is that folks?). The problem, at least when I tought long ago, was that school directors worked on a double commission system...paid on class enrollment and paid again on graduates. That leads to if it can pay, it can graduate. That just hurts everyone.

Just a thought.

>The problem also with a broadcast school is that the industry changes so
>fast a lot of the time the instructors don't keep up. When the student
>gets out he finds that things are a lot different than they were at
>college radio station X.

I don't really know how to refute the above statement, so I won't.
However, I will say that as a College radio DJ I found that I have greatly
improved over the past three years since I started. I believe the Major
reason is due to College Radio's flexibility and daring to let DJ's
experiment. I believe that if you work hard enough on perfecting your
show on a college level, making the transition to commercial will be easir.

However, I'm glad I going for an English/Writing degree (I'm
minoring in Communications) at a State school instead of going to a
broadcasting school. This will give me something to fall back on when
radio doesn't come through.

I have friends who worked at Stations about Ten years ago (WBFL,
107.1 FM, Bellows Falls VT) it was a dinky station but they had their fun
and moved on to other things.

I have a friend of mine who gradutates this coming January who has
a job lined up at station down south (a p2 i think). He started out at
WPCR a year befor I joined and has made the jump from College to a
respectable commercial station in about three years. Another friend of
mine just took his first commercial aircheck over the weekend. I'm
planning to make my run sometime in 97. That's when I'll graduate.

My point is, don't underestimate the value of College radio. The
two friends who I mentioned before, I feel are much better than I am, but
in a few years, with lots of practice, I might make it.

I don't believe in Broadcasting schools (to me they are like Art
schools for aspiring Comic Book Artists) but I do believ in college radio.
Without it, I'd probably be getting a 3.5 and be a very bitter individual.
As it is, I have a 2.5, and am a very outgoing, bitter individual.

Jester

PS- WPNH the local commercial station up here in Plymouth have told me
they'd rather work at WPCR (my college station). Trouble is, a few of
them belong on WPCR.

There was an article a couple of months ago on such a setup used in the 70's by a Michigan school district. I think it was in Radio World. Maybe someone saves some back issues or you could call them in Falls Church VA.

In article <3ltnfb$gj6@vixen.cso.uiuc.edu> HWND53A@prodigy.com (Homer Hillis jr) writes:

>I am interested to know if anyone has any information about sub carriers
>being used to transmitte video via PC's? Slow Scan video pictures etc?
>A couple of friends of mine are working on a software package that would
>send/receive Slow Scan TV over sub carrier or SAP channels..possible
>applications---weather radar, stock quotes, traffic reports...any ideas
>or comments would be appreciated...

Slow scan television using FM subcarriers was tested and developed in the late 70's or early 80's. WOSU Radio in Columbus, Ohio conducted such tests for the developers who had planned to use the service for educational purposes. The developers marketed this equipment for a short time but met with less than raving acceptance. At this point I would assume that the technology was patented, and may be proprietary. One critical consideration of sca is the the bandwith limitation. SCA's also tend to suffer from intermod artifacts from the main carrier. SAP carriers are becoming more useful to broadcasters these days for desciptive audio services, weather services, and etc. I believe that Sony uses SAP for the automatic time set information on their new vcr's.

Rumor has it that a local radio station here in Seattle has been working with Microsoft on something similar to this. I don't have any specifics, but my understanding is they're transmitting small packets of information such as artist, title, where to buy, etc.

Robert:

I read the S. Africa project with interests. My wife and I go way back in similar work. In the 1960's we trained producers, and produced ourselves hundreds of television shows for an instructional network in Colombia. More recently we did seminars in Sweden under auspices of our compay, SMARTS Broadcast Systems, to sell our automation product and impart expertise to fledgling Swedish stations that grouped together and formed the countries largest radio network.

We are interested in challanges, both from a commercial as well as a humanitarian standpoint. We are lifelong broadcasters and proud of it. If you think of any way we can be of help in your project, leave me Email on AOL (JohnSchad) or give my company a call (800) 747-6278

2593. Mass: WAAF clarification

Newsgroup: rec.radio.broadcasting
Date: 1995-04-07 00:00:00 UTC
From: jgallagh@interserv.com
Message-ID: <3m2ptj$bm5@vixen.cso.uiuc.edu>
Source record: 33199

To clear up matters over the financial status of WAAF, licensed to Worcester, Mass but heard clearly through the
six state New England area...

WAAF is in very good financial shape with substantial positive cash flow I am told.

The concern came about because WAAF had problems with their landlord in Wesboro, Mass which resulted in legal action or the threat of.

It seems WAAF had a very favorable lease but the building's owners were foreclosed on and as is typical in
these situations, the new building owner attempted to void WAAF's lease.

The building was a FDIC foreclosure from the now defunct Bank of New England and whoever bought the note
attempted to put pressure on the radio station to raise the rent, etc.

Since I had heard from two different sources that eviction papers had been served on the station, I raised the
question that things might not be well in FM 107 hard rock land.

WAAF's owners are Zapis Real estate developers out of Cleveland who acquired the fm and am stations
in a tax free swap with Dick Ferguson for an Atlanta suburban station five years ago. Former WAAF Minority partner Steve
Marx is well known in broadcasting circles as a Consultant for Radio Sales Staffs and has since relocated
to Florida from where he operates his consulting business.

I am told the landlord problems are resolved for the time being and WAAF is planning on staying put at that
suburban Boston location. Many many many talent people came through WAAF and WAAB Worcester in
the 70's and 80's under the ownership of George Gray, and later Ferguson/Marx group.

2594. Buffalo/Toronto Radio Watch(4/7)

Newsgroup: rec.radio.broadcasting
Date: 1995-04-08 00:00:00 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <3m56en$kio@vixen.cso.uiuc.edu>
Source record: 33102

Reply-To: ag365@freenet.buffalo.edu (Carl K. Gorney)

Happenings in the #40 market:

*WECK(1230;licensed to Cheektowaga,adult standards)has dropped Sid Ehrenreich's weeknight jazz program. According to Tony Violanti's column in today's Buffalo News,a possible reason could be that it didn't fit in with the station's format;Violanti adds that the "smooth jazz" format just put in place at WSJZ(92.9;formerly WBUF)could also have contributed.
Ehrenreich moved to WECK in late 1993,when WNED-AM(then WEBR;970;public; news/talk)moved away from a news format during the day(up to 9pm),then moving to jazz at night with its "Jazz in the Nighttime" show,hosted by Ehrenreich, Jim Berryman,Zoe Pittman,Bill Besecker and Al Wallach(among others).

*To amend some notes on Smooth Jazz 92-9:
-WSJZ's sales staff was retained,not blown out,as previously noted.(Chalk it to bad info. Happens.)
-Dan Catone(now in PM drive)was doing nights 7pm-midnight,in addition to weekend duty.
What can I say but...homina,homina,homina.

*Recently,a good thread has been recurring here on Pyramid Broadcasting and its future. Today's(April 10)Business First has a report on this done by Jim Fink.
What we do know:
-Pyramid has hired the Wall Street investment firm of Goldman Sachs & Co. to investigate several equity options. Pyramid CEO Richard Balsbaugh said it could include:1.buying more radio stations,2.sell the company,3.go public with a stock offering,4.merge with another media group,or 5.start a leveraged buyout with Vestar Equity Partners(which happened at about the same time Pyramid bought WBUF,now WSJZ).
Balsbaugh was quoted as saying that "it behooves me to do something sooner rather than later. I can't just sit on my hands and wait for something to happen."
He added that the decision to look at Pyramid's options came after a failed attempt to buy Park Communications last year.(It was later bought by a Southern-based investment group for over $710 million. Pyramid showed interest in Park(which also has radio properties-the closest being in Syracuse,WHEN (620,news/talk;Talkradio 620)and what was WRHP(107.9,country;Country 107.9)), but backed off when they learned of the price. J.T.Anderson,editor of the Radio Business Report,was quoted as saying that if Pyramid tested the market, "they'd have no trouble finding a buyer and getting a good price."
Back to WSJZ(ne WBUF):Balsbaugh was quoted as saying that the new NAC/ light jazz format "isn't(a)Band-Aid approach for 'BUF. This is something I think can work well there.(IMO,even though it's not for me....yet :),I agree

with Richie.) He added that the format has done well at WJJZ in Philadelphia (which was WEGX-Eagle 106 many years ago)and Chicago's WNUA. Anderson said the format change won't necessarily get big numbers,but will give Smooth Jazz 92-9 some appealing audience profiles.
(The above was briefly noted in a Buffalo News article on Keymarket's sale to River City Broadcasting last week,but not expanded on. Which is why, for my money,Jim Fink is the _best_ radio reporter going,at least on the business end of it. If I want personality stuff,that's what Tony Violanti or my own 2 ears are good for.)

2596. Phoenix Corporate Arbitrends

Newsgroup: rec.radio.broadcasting
Date: 1995-04-08 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <3m56eo$kiq@vixen.cso.uiuc.edu>
Source record: 33104

Given the rash of duopolies around the country, I've put together the 12+ numbers from the Dec-Jan-Feb Arbitrends as combined shares for duopoly or co-owned stations.

1. Sundance 11.3--->12.2
(owns KOY,KISO,KYOT & KZON)
2. Pulitzer 10.1--->11.4
(owns KTAR & KKLT)
3. The Broadcast Group 12.2--->11.0
(owns KFYI & KKFR)
4. Sandusky 9.7--->9.0
(owns KUKQ,KDKB & KUPD)
5. Buck Owens Productions 8.8--->8.0
(owns KNIX & KCWW)
6. Shamrock 6.6--->7.3
(owns KMLE)
7. Media America Corporation 4.8--->5.4
(owns KESZ, but provides sales and engineering for Newmountain's KTWC...buying KTWC spot time wholesale and selling as a combo)
8. Nationwide Communications 3.8--->4.2
(owns KVRY)
9. Citicasters 5.1--->3.7
(owns KOPA & KSLX)
10. KOOL-AM/FM 3.5--->3.6
11. KGME/KZRX/KEDJ 3.8--->3.6
12. Bonneville Int. Corp. 1.9--->2.3
(owns KIDR & KHTC)
13. KMJK-FM 0.8--->1.1
14. KPHX-AM 1.0--->0.8
(tie)
14. KSUN-AM 0.3--->0.8

With the only duopolies being Sundance, Pulitzer and the KGME/KZRX(now KHOT)/ KEDJ groups, this is a market ripe for more marriages. Sundance leads the market with a combined share of 12.2... but hypothetical combos could nearly double that...for example, a duopoly between Pulitzer and the Broadcast Group would make their share 22.4(and give whichever took over

the other both News/Talk outlets in the
market...easing the competitive pressures,
plus an AC and a CHR on FM)
Marrying Pulitzer and Owens would make for
a combined 19.4 and cover News/Talk,
AC and Country.
The Broadcast Group and Owens would be
a 19.0...and Pulitzer/Shamrock would result
in an 18.7 with room to add one more AM
station later.
Market sources say it's only a matter of time
before owners either inside or outside the
Phoenix market find other owners' prices and
duopolies start happening in real numbers here.
With the above kind of shares at least hypo-
thetically possible, it would be hard to resist.

While I agree with you that we should be careful to assure as much
accuracy as possible, please realize that AIRWAVES/rrb is a public
discussion forum and as such is governed by different rules than, say,
a Radio World. As Moderator, I do my best not to post what appears as
simple competitor jealousy, but then again, I cannot accurately verify
everything that is posted, nor would I want to.

Another way to look at this is that WAAF has had much more publicity
because of the original post than it probably ever would have seen
otherwise. I don't see that the post you mention has done any harm to
WAAF and may actually have provided WAAF with a platform for self
promotion which it may have never have had otherwise.

In conclusion, yes, let us all do our part to keep the posts to this
group as accurate as possible, but lets also allow room for people who
post in good faith and merely make errors, for people who are less
informed than they think they are, and for those who merely are
desperately seeking a clue. At some time in out lives we have each
been all of these.

IT>Something of interest to those following Howard Stern's career
IT>appeared in today's (4/5) Dallas Morning News. Apparently, Howard
IT>made a number of jokes regarding the recent murder of Tejano performer
IT>Selena, as well as some other comments offensive to Hispanics
IT>("...Spanish people have no taste in music. They don't have any
IT>depth", etc). The result is that some Dallas area Hispanic leaders
IT>have vowed to organize to get Howard Stern removed from local
IT>affiliate KEGL 97.1. Boycotts are being threatened, and the article
IT>reports that "hundreds of callers expressed anger toward Mr. Stern" at
IT>a local Spanish language station, KRVA-AM. As the Hispanic community
IT>is the fastest growing component of the Dallas population, this could
IT>be a potential headache for Howard Stern. It will be interesting to
IT>see what happens...

Tom,
While his comments were in incredibly bad taste, any boycott or demonstration would be a promotion director's dream. Such things, almost always, generate so much free publicity that the ratings go up.

In the greater scheme of things "hundreds of callers" are a drop in the bucket.

In this instance, the person with "no depth" is Howard.

2601. FCC EEO Rules

Newsgroup: rec.radio.broadcasting
Date: 1995-04-08 00:00:00 UTC
From: robert573@dallas.relay.ucm.org
Message-ID: <3m56et$kj4@vixen.cso.uiuc.edu>
Source record: 33109

A rather interesting question has surfaced to my mind, and I felt it needs to be answered. The question is this:

As I currently understand it, the FCC says if your station has 4 full-time personel, you must recruite and hire women / minorities, if you want more than 4 full-timers...

Does this rule apply only to COMMERCIAL operated stations, or dues it also apply to NCE stations?

Also... If an NCE station is owned and operated by a public school system, does the fact that the school system already hires women / minorities, exempt the radio station from this rule?

If there are any FCC reps reading this, I would encourage them to reply!!!

Thanks!

Rob Bass

2602. Info on Edwin Armstrong (Mr. FM)

No.

73.1201 (a)Broadcast station identification announcements shall be made:
(1) At the beginning and ending of each time of operations
(2) Hourly, as close to the hour as feasible, at a natural
break in program offerings. (revised 72-967, 12/15/72)

(b)CONTENT:
(1) Official station identification shall consist of the
station's call letters immediately followed by the
community or communities specified in its license as the
station location: Provided, That the name of the
licensee or the station's frequency or channel number,
or both may be inserted between the call letters and
station location. No other insertion is permissible.
(Revised 76-656, 7/22/76)

[I believe the channel number applies to TV stations...]

(2) A station may include in its official station identification
the name of any additional community or communities, but
the community to which the station is licensed must be named
first. (Revised 83-487, 12/8/83)

I think this should end any confusion.

BTW--If you think burying the id between two spots at :45 qualifies as "close
as feasible at a natural break in program offerings" I have three notices of
violation to show you from KOY-FM circa 1988. Yes, they do enforce this
stuff.

Not just Polish or even not predominantly so -- but there is a Balkan
presence in Kansas City, Kansas. KCLO-FM (later KTRO) also did a lot
of Spanish-language programming. The FM is now KQRC -- yes, a Kansas City
move-in.

> What about a polka show on KKFI? They are supposedly "multicultural" (oh
> that word....) community radio. They will be hurting for money when public
> radio funding is cut I think.

KKFI seems to exist primarily to feed the egos of a small cadre of
burned-out hippies. You never hear much about it. Every time I tune over
there, it seems to be playing one of:
a) Scratchy doo-wop oldies
b) Spanish ranchera
c) Dixieland jazz in mono

I went sour on the station when it tried to eliminate alternative music
programming. That effort failed, but what's left isn't very good.

At best KKFI is bicultural during most hours:
Culture #1: Mexican-American
(and this *is* a population served nowhere else)
Culture #2: Polemical 1960s "underground" trapped in time

Then dk@crl.com (David A. Kaye) wrote:

} Myself, I used to
} listen to a local station in Silicon Valley, KLOK, during the 1960s when
^^^^
Rearrange the call letters and you get ....KKLO

} Polka Party was a daily event. I remember the show drawing lots of
} sponsors, too. When I hear DJs talking about "world beat" I laugh
} because they ususally mean African or Caribbean beat. Just for once I'd
} like them to include some polkas.

That was a different time, too. KFRU in Columbia played march music during
the lunch hour, country and western in the morning, and rock and roll at
night, with lots of talk programming in-between.

The time-brokered station doesn't seem to exist in very many places any
more, but if we still had one in each major market, it could be a valuable

place for quirky off-the-wall programming. The community access station was supposed to fulfill much the same function, but as in anything else where ideology isn't tempered by the pursuit of money, the True Believers took over and, in the case of KKFI, the station became 100,000 watts of poorly funded irrelevance.

The same phenonemon nearly killed Columbia's KOPN and KDHX in St. Louis but the NACB "Healthy Station" project seems to be reviving them. For these stations to survive and be listenable, some type of format with a carefully controlled mix of specialty block programming seems to be required.

But back to the polkas. Why isn't KKLO playing them now?

(Polkas might also be the highest and best use for KNHN or KBEQ(AM).)

Michael Stone (mbstone@crl.com) wrote:

I don't know how much power KNX uses, but I have driven quite
extensively
in the West and KNX is audible in the daytime about as far away as Las
Vegas, Santa Barbara, or Needles. At night I have heard KNX in central
Oregon and Colorado. At night KNX is easily heard anywhere in CA (as is
the other western CBS O&O, KCBS San Francisco which probably uses
slightly less power as it is a bit harder to hear in the boonies.)
Winter propagation is of course greater than summer...

KNX and KCBS are both fulltime 50kw signals with directional patterns protecting Canadian clears. KCBS protects CBL, Toronto. Its night pattern is almost straight south, meaning its nighttime signal in much of Southern California is actually better than that of KNX. KNX protects CBA, Moncton, New Brunswick, as well as some stations in the Southeastern U.S. Both KNX and KCBS are audible over huge areas on a good radio like the GE Superadio III or a good Delco car radio. KNX broadcasts with an AM Stereo pilot, KCBS does not. My knowledge comes from a stint as a reporter/anchor at KCBS about ten years ago, and from the World Radio TV Handbook.

About 6 PM, Friday 4/7, I tuned into KUSA on my Saturn car radio and the station was loud and clear with no fading or distortion. Sundown here is now about 7:15 PM so there was still plenty of light. Bit of a head trip/flashback. The music was Top 40 from about 1985-1987. I worked at KDON/Salinas from 1985-89 and this music was definitely reminiscent of our format in the mid-80s. In my home, I'm tuning it in on my GE Superadio and there is a fair quality signal with a lot of fading. I live in a noisy apartment so it's possible that my car radio out in the parking lot is a much better pickup than the GE.

Love the station and I'm sad to see that it is only an experiment. What's going to happen regarding the future of KUSA after the NAB? I'm no longer in radio but hoping to resurface someday. This format, mixed in with some 90s CHR, would be my ideal station if I were to program it. I wish the 70s/80s days of more free form Top 40 would return. I'm not saying go and play everything but a little variety like this would help.

Robin,

There is a great thread on this subject in Compuserve's Broadcast Professional's Forum, if you can find your way over there.

The station is set up to demonstrate in-band digital AM to attendees of the NAB conference that will take place next week in Las Vegas. They are broadcasting from an abandonded AM station's facility about 5 miles out of town, nondirectional with 10kw on 1660. They are going by "KUSA," and have no set schedule yet. I assume that their schedule will be very set for the show.

To explain the chugging sound, here is part of a post from the Compuserve forum (by somebody apparently involved in the project):

> Unfortunately the only receiver is in Las Vegas. It would be nice to see what > happens on skywave. What you are hearing (the noise) is slope detection of
> the multiple fm subcarriers due to the rounded edges of your receiver
> passband. The amount of "noise" you will hear as you tune across the signal
> will depend on the shape of your passband filter.
>

>
> Here in Cincinnati, I can not hear any digital "noise" at all - it is

covered > up by other noises - static etc. Not sure if any digitial demod could make > > any sense out of the signal from 2000 miles away or not..

Meanwhile, it's an AM DXer's delight, since the station is on an utterly "clear" channel.

>From ix.netcom.com!howland.reston.ans.net!news.moneng.mei.com!uwm.edu!reuter.cse.ogi.edu!hp-cv!hp-pcd!news1.boi.hp.com!hpax!featock Fri Apr 7 09:23:14 PDT 1995

I heard this station from Las Vegas into Cupertino, Ca on Tuesday evening, 4/4, with a pretty good signal. Unfortunately, the digital sideband hash from the station extends +/- 22kHz away from the main carrier frequency, and is VERY noticeable. The normal audio channel appears to be about +/- 4kHz wide.

I think it will be VERY unfortunate if the FCC approves of this transmission mode, as it will definitely interfere with other weak stations on adjacent channels.

Fred

2614. More on KUSA Las Vegas

This was posted on rec.radio.shortwave:

Info bits taken from "DAB Goes Live at NAB '95" by Alan Carter in the
April 95 issue of _The Radio World Magazine_. Quotes are taken without
permission.

Attendees at NAB '95 this month will have the opportunity
to hear both AM and FM Digital Audio Broadcasting live
during USA Digital Radio's first public mobile demonstration.
"We're going to go completely digital on AM from the studio
to the receiver," says Jeff Andrew, project manager for USA
Digital Radio.

AM programming will originate live from the show [April 10-13]
exhibit floor [Las Vegas Convention Center] while the FM will
simulcast on KUNV-FM (91.5MHz) by digital microwave to the
transmitter. The final signal will be 20kHz stereo.

The AM demo will combine live and automated programming from
a digital studio in the LVCC Radio Hall organized and set up
by Harris Allied. The 15kHz stereo program will be broadcast
on the expanded AM band on 1660kHz during the show's exhibit
hours.

...The AM broadcast will use a Harris DX 10 standard
transmitter with "a couple of minor modifications," says
Harris Allied AM Product Line Manager John Delay.

...the AM transmitter site just south of the famous Las
Vegas strip...

We're getting to the point now with OnLine Tonight where we have enough advertisers that keeping track of the traffic for the two hours a week that we're on the air is more than a text file type thing.

I'm looking for an inexpensive program for Macintosh (or a Filemaker pro template) that will handle taking the raw buy (i.e. 40 spots across 13 weeks) and place them, then summarize for our affadavits. It needs to handle all lengths, and work with an ever changing programming wheel.

I'd buy one of the major packages, but damn, we only have two hours (maybe three later this year) to schedule.

Any thoughts?

2617. Tech Feedback of Minidisc for broadcasting

Newsgroup: rec.radio.broadcasting
Date: 1995-04-08 00:00:00 UTC
From: ai227@detroit.freenet.org
Message-ID: <3m56fc$kjs@vixen.cso.uiuc.edu>
Source record: 33125

Reply-To: ai227@detroit.freenet.org (Terry Carr)

I would like to get some feed back on the useage of Minidisc in
broadcasting. Emphisis on encountered problems.

I really think the format has a great deal of potential, especially for
the replacement of cart machines. We use them at WYSS for our phones
and on-air recordings and for the most part they work very well.

Technically, they have some fallbacks though. My favorite use for these
machines are for the storage of production elements and recorded drops
(snippets). But I find, if a recorded segment is less than :08 seconds
in length, it will not be fully deleted (in a sense) from the disc. It
is only erased from the TABLE OF CONTENTS. The deleted file still
occupies :08 seconds of storage space. This becomes a problem after
adding/deleting many segments.

It also becomes a problem when editing segments. Each time an edit is made
to a file that may create a segment less than :08 seconds in length, then
wasted space follows. We constantly get a DISC FULL error whil simultaniously
showing :50 minutes of free space and only 10 tracks used. (you're allowed 255
tracks using :74 or :60 minute discs)

I also have many problems with editing. It's all too frequent that an edit
cannot be performed because of some unknown limitation.

Maybe as another note, I would like to discuss Digital Editing Systems. I've
researched 11 of them and purchased the SPECTRAL SYNTHISIS AUDIO Engine. The
SADIE was 1st runner up, followed by PRO-TOOLS. I'm kinda curious how well
we can adapt our production unit with our newly purchased SCOTT SYSTEMS for
on-air though.

Thanks,
-Terry Carr, Program Director

IB>Stations with full news staffs were able to make a healthy profit
IB>because they were protected from competition by the government.
IB>Moreover, the host of other media advertising opportunities were not
IB>available to potential advertisers.

This statement is very interesting! How were they protected from competition by the government? I never remember the government preventing advertisers from advertising anywhere they pleased.

When I lived in Boston WBZ had a full news staff, as did WRKO, WHDH, WEEI, WEZE, WMEX, WGBH, WKOX, etc. Even WJIB (FM) had a News Director. No one prevented anyone from competing.

IB>Finally, ask ANY owner if he thinks duopoly has hurt or helped the
IB>industry. I would venture a guess that not one owner in 100 believes it
IB>has been detrimental to the business. It has attracted capital, enabled
IB>owners to once again make money, it has reduced or eliminated marginal
IB>properties, and enabled radio to recover from what had become a
IB>financially disastrous business.

Boston is probably the market where you'll find those who feel it's detrimental. With 2 of the 50kw AM signals, a 5kw AM and soon to be even more, Boston has such a concentration of ownership in American that they're very concerned about their ability to compete.

Not hard at all! You FULLY deregulate, and let stations buy other stations and TAKE THEM OFF THE AIR! All Docket 80-90 did was add a ton of stations...duopoly has effectively consolidated the radio band, and, if one looks at the financials today, one would think it has created much more efficiency.

And let me point out that I DID indeed read the financials...I owned stations in the late 1980's.

Thanks. I was beginning to think I was the only one with memory long
enough to recall the day when stations accepted a news responsibility and
did it well and still made money. And your comments about the recent
trends in ownership and "management" are equally accurate. It will not
take the death of Stern and/or Imus to kill institutional memory. It is
dying by the day as radio people leave the field in disgust at what's
being done to it by the "database crunchers" who are masquerading as
programmers. In some cases, even the database crunchers can't read their
own numbers. <g>

Relevant to the ongoing discussion about non-commercial radio,
I have three items to note.

(1)
The following advertisement has been appearing in the Columbia (Mo.)
Daily Tribune (this one in the 15-Feb-1995 edition):

The results from the recent Media Audit are in...
KBIA RANKS FIRST AMONG RADIO STATIONS
for affluent, working women over 18 with an annual
family income over $50,000
[]
Call the KBIA sales department today at 882-xxxx to find out how you can
reach this important audience
[logo: KBIA 91 NPR News and Quality Music]

Yes, a sales department for an NPR affiliate owned and operated by
the University of Missouri.

(2)
The following two announcements were airchecked from KJHK(FM), 90.7,
Lawrence, Kansas, at 9:20 pm 27-Feb-1995:

[music bed (Pogues)]
This portion of KJHK programming is sponsored by CopyCo. For color
copies, oversized copies, for copies for that special occasion, think of
CopyCo. CopyCo offers more than just copies. If you need a fax, desktop
publishing, or even business cards, think of CopyCo, located at 1401 West
23rd in Lawrence. CopyCo, it's more than just a copy center.

[music bed (Ultra Vivid Scene)]
Attention all musicians with production needs. Mercy Records Studios has
24- and 16-track recording, including live recording from the Bottleneck
stage. They offer hard-disk computer editing, CD and cassette packages,
including quick turnaround, real-time cassettes, and single CDs. Mercy
Records features comfortable rooms and a friendly, professional
environment. Conveniently located in downtown Lawrence with studios at 735
1/2 New Hampshire, next door to the Bottleneck. Mercy Records Studio is
a proud sponsor of KJHK and can be reached at 843-xxxx.

If those aren't commercials, then I have seven toes on each foot.

KJHK is a noncommercial station owned by the University of Kansas.

(3)
Excerpts from a letter written by retired University of Missouri
agricultural economics professor Harold Breimeyer, as published in the

Columbia Daily Tribune of 26-Feb-1995:

| KBIA has now turned to huckstering. It bids for donations to the station
| with its giveaways of coffee mugs, T-shirts, and more valuable items.
| ...I am not protesting so much as asking a question? Is all this
| gimmickry smart? Does it turn off those of us who have contributed
| because of the worth of the programs? ...
|
| It is true, though, that KBIA's pitch fits the times. Everywhere,
| sleight of hand replaces substance. Let riverboat gambling finance our
| schools. Shelter your income away from the tax collector. Do anything
| except put hard money on the line to get solid value in return--which, in
| the case of KBIA and university concerts, might be the only dependable
| way to keep both going.

(me:)
It should be noted that the University of Missouri does operate a
commercial television station, NBC affiliate KOMU-TV, which leads the
market with a solid news product and even some locally originated
programming other than news. It has honestly been a commercial station
from the start because, in 1953, the FCC would not let the station be
half commercial and half noncommercial.

For many people radio means "commercial radio," so it was probably
inevitable that the commercial approach would influence
and eventually overtake the non-commercial piece of the spectrum.
Our present-day climate of political selfishness and purposelessness--
marketed as a "conservative ideology" whose *only* idea is to grab
what you can get without regard for other people in our
society--is accelerating this process. As are public radio stations that
open up "sales departments" and run thinly disguised commercials.

Forget the elaborate justifications and the pleas of poverty.
A creature cannot be both a dog and a cat but that's what public radio is
trying to do when it embraces a wholeheartedly market-oriented approach.
If public radio had honestly stayed non-commercial, I suspect it wouldn't
be facing the dilemma it now faces.

Dear Jack...
Re your message about undewriting regs on public radio stations...
I'm a PD at a public news/talk station in Rochester, NY (WXXI-AM). I don't actually solicit underwriting, but I provide support to the people who do and am pretty familiar with it.

As I understand it, stations have pretty substantial leeway in what they may broadcast as "noncommercial" underwriting messages. The basic rule that divides "commercials" from "noncommercials" is "there shall be no call to action." That's a pretty thin line. Basically it means that you don't urge people to get up and go on down to Joe's Gas right away. That's the only difference as far as I can see.

Some stations I know of are very strict: name and address of the business only. WXXI allows a statement about what the business does, or some other message which the underwriter wants to deliver...ie: "Car Talk is made possible by the Brewers of Genesee and Genesee Light Beers...reminding listeners that for people like you, it's public radio!" (that's an actual sample).

There's another category of message called a "GSA"...or "General Service Announcement." This is a flat out commercial (my opinion)...but for a non-profit organization. These are specifically allowed for by the FCC, although some public stations refuse to accept them because their core audience finds them offensive (we do accept them, but have had backlash from listeners on several occaisions). This can include a phone number (which our regular underwriting can't), and it can urge people to do something. We have a long-running example of this with our regional non-profit theater group, GEVA Theater, which supports "Morning Edition" on WXXI.

Hope this clears things up a bit. We have stepped up underwriting sales by 40% this year even in advance of expected CPB cutbacks. Yes...drivetimes are beginning to sound a little cluttered.

The story so far.....
In the continuing battle between WLZR and WQFM...

WLZR morning team Bob and Brian, whom are (the last time that I checked) the #1 morning team in the market, have lost Mark Patrick (of Channel 8 WISH Indianapolis) to WQFM. 'QFM paid a hefty 88,000$ for Patrick's morning commentary on sports. I can't say that I've had the chance to hear this, but as I understand the magic that existed between B&B and Patrick just isn't there with MC and the Sports Guys. People tell me that the jokes that are passed just aren't funny.
To my knowledge there hasn't been any grumblings about canning MC and the SPORTS GUYS. For WQFM they are the highest rated show they have...and have a faithful following.
As to Gary Meir, formerly from the LOOP, I heard that he was working at WGN TV for the Bozo Show (entertaining for kids and college kids who are up IMHO).

More to come as I gather more News from this market.

Hi. This is post for any of you out there who might wanna collaborate on writing a half-hour radio show. No, it's not for money. See, a while back I wrote a couple half hour scripts and I was trying to get radio stations interested in them, but nothing. Had to have a demo tape. Here's the deal. If you've got that kind of Monty-Python-vaudeville-absurdist-humor streak in you, and can lay your hands on some kind of recorder unit (like a 4 track), then I think we may have something. I'm not an actor, so if you fancy yourself one, or know of a couple guys you can round up, then voice them on tape, and I can copy and distribute the tapes. If a radio station doesn't bite, I'd like to send them around or sell them as kind of comedy albums. I've Always wanted to start a company like that. You know, comedy records. Not that this is starting a company (I'm as poor as a zinester, but for the worthwhile shtuffs, I'm willing to go without Ramen noodles and generic cola to save the money for this kind of thing), but I think if we work together, it can be done. (There's a market for everything.) You handle the recording, I'll handle the distribution; and we'll both think up the funnies. Okay? Even if you don't want to do an ongoing thing, just want to try 1, email me. I'm rarin' to do this!

Source record: 33139

In a 04/05 posting, rrb@clm.ai writes:

<<Too much unsupervised TV is *a* problem, for sure. But it is not *the* problem, it, like drinking, drug abuse and other 'escape' activities are the 'result' of the problem, the symptom of the problem, if you will. The problem is deeper and much harder to face than excessive TV or anything else. The *problem* stems from a lack of inspiration, guidance and basic hope. It stems from that 'absentee' family you speak of, from an emotional and cultural vacancy, which sensational media, like euphoric drugs, is a temporary escape and relief from. It stems from a world where the only thing that matters is the almighty dollar, where human needs are all solved by the newest 'product' from a new car to a 900 sex line.
>>

I agree with this--to a point. TV is certainly not the only problem, but it *is* a major part of the problem. One analogy may be a high fever caused by an infection. You certainly need to take care of the cause of the fever--the infection itself--in order to have any long term recovery. But it's also true that taking care of the fever itself and its negative discomfort is also going to have a beneficial effect.

Granted, "fixing" TV--if there is such a thing--is not going to solve everything, but I reiterate that we as an industry can no longer afford to take the attitude that we shouldn't do anything--that we're just "reflecting" society rather than influencing it. The reality is far more complicated than that. And again, I prefer that if it's going to be done at all that we do it ourselves and not wait for the pendulum to swing so far that we are left at the mercy of forces beyond our control rather than trying to control those forces ourselves.

> Subject: Re: IDs
> From: jammProd
>
> To be frank an honest I haven't seen the rules.....I'm just going on the
> fact that at the last station I was at we decided to put our ID at the
> bottom of the hour rather than the top because our cunsultant had told us
> that the rules had been relaxed.

Unfortunately, there are a lot of broadcasters that don't read the Rules.
Some consider a NOV like a speeding ticket, an unfortunate event in
"normal" operations. This has led to "modulation wars" and a sad
grunging up of the radio dial. Far too many PDs and consultants think
the Rules are little more than an impediment to their lives.

There are a lot of consultants (or, often more accurately, insultants) who
think they are just smarter and cuter than the latest fad. They usually
get away with it because,
1. The FCC has virtually no funds for doing anything but react
to immediate interference problems.
2. No one in the market will take the time to file a complaint
with the regional field office.

That doesn't make it right. And sometimes ... sometimes ... well,
John Davis said it best with the benefit of factual experience:

> BTW--If you think burying the id between two spots at :45 qualifies as "close
> as feasible at a natural break in program offerings" I have three notices of
> violation to show you from KOY-FM circa 1988. Yes, they do enforce this
> stuff.

Like an EBS test, the schedule or log is not the deciding thing. It is
when it is played.

> I'm not saying that the jock can just DECIDE to play the ID. It has to be
> scheduled at the same time every hour.

It is the station's responsibility to *ensure* it is run at the right time.

> I'f I'm wrong I goofed......Whoooops....I guess I won't add my .02 this
> time. (Cuz it's not worth anything)

I have two old peso coins ... well ... never mind.

On the other hand, Gary Barrett writes:

> >Perhaps you need a new copy of the Rules.
>
> So do a lot of other programmers, Barry, who try to shove their legal in

> at :45, :46 and the like. Why? I don't know. People expect an ID at the
> top of the hour...it's a way to let them know who they're listening to and
> good for diary maintenance. But maybe I'm just dreaming.....

The usual reason is to hide the city of license. The identification of the
station is usually secondary to the programmer. And to an extent, one
can understand that they want you to remember the logo. But, if
we are to be considered professionals, perhaps following the Rules would
be a good start.

Am I correct in recalling that the legal ID must also be given immediately at sign-on and sign-off?

If so, someone might want to mention it to good ol' WBMA "WBPS" 890 Dedham-Boston. "Boston's Only 24-Hour All-Sports Station" has been in the habit of signing off sometime after 1am, and signing back on at 4:30 am simply by turning on the transmitter and bringing up the Prime Sports satellite feed. No ID until the legal trips at 5:00! Hello, FCC?

And I don't think anyone has heard a legal on WHAV(AM) Haverhill MA since those guys switched to Spanish-language programming a few weeks ago.

Surprised? Nah, not really...

Source record: 33057

Sorry to have been away for so long. I spent most of the last month wrapping up a hellacious project. I make my living editing books now.

As usual, lots is brewing at WIBC.

***WIBC Locks In All Major Sports Franchises for the Fall; Becomes City's Major Sports Voice: Last fall, WIBC (1070) signed a deal to air Indianapolis Colts football games, taking the honor away from WNDE (1260) and WFBQ (94.7, Q95). Last week, WIBC took another gem away from WNDE, landing Indianapolis Pacers broadcast rights for the next four years. This year, WIBC also lured the ESPN Radio Network away from WNDE.

***Changes in the WIBC News Lineup: I can't figure out why, but afternoon news anchor Leigh DeNoone (eeeGad, I don't know how to spell her name! -- but that's what it sounds like) has moved to mornings, where she co-anchors with News Director Stan Lehr. Joe Wombaugh (again, I have no idea how to spell this name) assumes the afternoon anchor duties. It seems unnecessary to me to have two anchors in the morning -- this change doesn't seem to add any value. All I can figure out was that it was well past time to promote Leigh and Joe.

***WIBC Afternoon Host Jeff Katz Leaves for KST in Sacramento: Jeff Katz makes a move to a larger market when he begins a noon-to-3pm shift April 24 at KST-AM (650) in Sacramento. According to today's Indianapolis Star, Katz began looking for a new job when WIBC began moving from issue-driven talk radio to "good neighbor" talk radio. Recent format tweaks, including more frequent traffic and weather reports, made it difficult for hosts to discuss topics for any length of time. Katz is reportedly also upset about WIBC's recent firing of late-morning host and friend Dick Wolfsie. Katz also reportedly did not work well with WIBC Program Director Bobby Hatfield. Katz will do a conservative, issue-driven talk show at KST, but the tape that landed him the gig was from the day that Katz's entire show focused on a malfunctioning candy machine. Katz even supervised the repair live on the air. KST Program Director Ken Kohl is looking for Katz to evoke memories in Sacramento of Rush Limbaugh's days on the air there. Kohl calls Katz "a radio guy who knows how to entertain through the medium."

***Q95 Has Its Annual "Live Day": Hootie and the Blowfish, Toad the Wet Sprocket, Blues Traveler, Great White, Tommy Shaw, and Jack Blades all came to Indianapolis on March 30th for the annual "Live Day" marathon broadcast. The program, hosted by morning men Bob and Tom, ran from 6 a.m. to 4 p.m., and included local musicians Henry Lee Summer and Duke Tumatoe, as well as live renditions of favorite songs from their popular CDs. I heard the performances from Hootie, Toad, and Blues Traveler. Hootie and Toad played several of their songs together, as one huge band, and sounded great. Blues Traveler did a *hot* set -- wow, what a talent.

***Jeff Katz Comments On His Job Change: WIBC (1070) afternoon host Jeff Katz today commented on the air about today's Indianapolis Star story that reports that he is moving to a new position in Sacramento. Katz regretted that the article appeared today; the Star's Radio/TV reporter had agreed to delay the article until Monday. Katz also wanted to clarify that, contrary to the article, he does *not* dislike WIBC Program Director Bobby Hatfield, and that while he was disturbed by the firing of Dick Wolfsie, he was *not* angry or upset by it.

KMAX also carries ESPN sports and the Sports Babe, I believe. The station is interesting, in that it is actually several stations: KMAX in Arcadia, KBAX in Falbrook and KAXX in Ventura -- all on 107.1. There may be one more. I'm not sure.

2650. Advent of Independent Commercial Radio in South Africa.

Newsgroup: rec.radio.broadcasting
Date: 1995-04-09 00:00:00 UTC
From: Michael Mayer <mish@aztec.co.za>
Message-ID: <3m7nf4$6or@vixen.cso.uiuc.edu>
Source record: 33060

Well .. here we go ... I turned 50 in '93, and although it Is I suppose rather late in time, my partner and I are planning to open (if we get the license) a radio-station in Cape Town, South Africa. The advent of private local/national independent commercial radio in this country is actually quite thrilling .. (if you really start to think about it) because fully independent 'open-competition' commercial radio has hitherto never existed here. So .. we were wondering ... if you happen to be someone who
can see the overwhelming thrill of the potential of this late-in-time-event, and mayebe you are a creative announcer/DJ/presenter/producer/manager/station-owner or the like who might possibly be interested in some discussion on how/what/why/when/where in this regard, and you're shall we say, somewhere between 40 and more with a goodly slice of experience .. well then, my partner and I would really love to hear your thoughts and opinions.
So ... thanks and hope to talk soon.

>locally owned and less "formatted". What do you think?

I'm not holding my breath. Direct satellite radio, if it even catches on with anyone but audiophiles and similarly anal retentative types, will, in all likelihood be ultra-niched, which is, pretty much by definition, bland. Listen to your average satellite format today, that's what DSB will probably sould like, only a lot more really narrow formats.

As far as local radio becoming more locally owned, and less formatted, I don't think it will happen, and don't necessarily see that as bad. Rave reviews of KPIG notwithstanding, there just isn't a big demand among the great unwashed for eclectic radio, and there never really was. I'm old enough to remember the early days of AOR that "everyone" is so nostalgic for. People tend to forget these stations got 1 shares! You can't support a station with advertising from head shops alone, and it's not unreasonable for someone to expect a good return on their investment. This means reaching as large an audience as possible, and you ain't gonna do it playing a lot of music no one's heard of. The station I work for spent about 3 years doing exactly that... a weird hybrid of AC, Modern Rock and AOR. A good book was a .7 share. A year ago we dumped that for pretty standard Hot AC...listenership is up, sales are up, and we sound good.

You can't get away with bad radio anymore, not even in a small market. The listeners aren't stupid (well, not most of them :-)). They know what they like. They don't want to be "educated" about all this "great music that never gets on the radio (TM)". Be it rock, country, AC, whatever, people want to hear their favorites, and songs that will be. Formats developed for a reason. They'll be around long after we're gone.

> moving to WNEW-FM. I thought Allison Steele was there too, but I'm not sure.

I believe Rosco was. Also Scott Muni, Murray the K, Zacherly and other
legends. Allison first hit the big time on WNEW, though, I think. WOR-FM
(as a progressive station) didn't last long, but boy was it great. They
started, I believe, in the summer of 1966, playing nothing but music and
IDs, for months. No jocks. Scott Muni (in the only conversation I ever
had with him) told me this was due to some kind of union thing.

> They started off playing ligher tunes (e.g., by the Fifth Dimension) but
> eventually moved to music by Richie Havens, Hendrix, Janis Ian, Blues
> Project.

Yep.

> BTW, what's become of Jonathan Schwartz?

I believe he's still a driving force's at WQEW (the old WQXR-AM at 1560),
which is the best "standards" station in the world -- heir to the old
WNEW, where Jonathan worked for many years.

In a previous article, Zs00002@uabdpo.dpo.uab.edu (Rob Miller) says:

>Reply-To: Zs00002@uabdpo.dpo.uab.edu
>
>I'm looking for a program (shareware, of course) that will compile
>program logs, or one that will at least manage my playlist...
>Windows is preferable, but Dos or Mac will work...
>
>I'm not really sure just WHAT I'm looking for, but I saw one (probably
>NOT shareware) at a station and I need something similar...

---Good luck trying to find a shareware version, they are such unique programs, that there is not much call for shareware. But most can be demo'd. They vary in expense from $300 to $5000 and beyond (or commonly leased on a per month basis- approx $200)

If you want to just experiment, so you can learn, then I would suggest getting a working demo. NOTE: If you are a learning institution, some offer a slimline version free of charge, you'll have to ask.

Brands:
*RCS-Selector ..... (914) 723-8567
*Powergold ..... (501) 221-0660 (800) TM-Century
*Music Scan ..... (205) 987-7456 (don't know if still selling)
*A Ware-Music Master ..... (800) 326-2609
*Auto-Jock ..... (304) 232-1783
*M.O.M. ..... (702) 651-9119
*Radio Music Services ..... (800) 883-2847
*TM Century-Super Schedular. (800) TM-Century
*Halper & Associates ..... (617) 786-0666
*Generation III ..... ???

There are a handful of others. Some of these are really lame, but each serves a purpose I guess. RCS are the big boys and are the most widely used. POWERGOLD is a pretty good program too and offers a full working demo for a limited time. I was told MUSIC SCAN sold to A-WARE, don't know if that's true. The rest are inexpensive solutions to getting away from card files.

It's difficult trying to learn these systems when you don't have access to them. This is one area that Broadcast courses are very relaxed with. It is too bad! A lot of positions require SELECTOR (or other) experience. Your best bet (If, in fact, you just want to learn it) is to intern, work, or become friends at a station implimenting a scheduler.

All are DOS (some are working on Windows now).
Good luck with your search, hope I helped,

2658. Re: Public Radio Observations

Newsgroup: rec.radio.broadcasting
Date: 1995-04-09 00:00:00 UTC
From: rdobrick@omnifest.uwm.edu
Message-ID: <3m7nfc$6qi@vixen.cso.uiuc.edu>
Source record: 33068

In the case of the KHBJ (?) copy cited, if indeed that is the copy that aired on a noncom, it definitely violated even the liberalized FCC rules for noncommercial underwriting messages. In the case of the KBIA radio newspaper ad, as long as the station does not *air* commercials, it's still, strictly speaking, a noncommercial station.

As to the remark that public radio would not be in this dilemma if it had stayed away from marketing, I don't think so. I think you are right when you point out the cynical nature of today's political/economic climate. But in an economy in which most services are valued on the basis of their appeal in the marketplace and their "bottom line" contribution to individual and national wealth, public broadcasting is in a "Damned if you do, damned if you don't" predicament: if pubbroadcasting remains "pure" and, as some want it, elitist, obscure, and "Educational" with a capital "E", then no one will use it, so why should tax money support it? If, on the other hand, public broadcasting becomes more "user friendly" (which it has) and is regarded as more "market-oriented", then its tax support is unjustified because it's "competing" with the commercial broadcasters.

The truth of the matter is that significant numbers of people don't like the idea of any "public" sector involement in broadcasting at all, just as many folks don't like the idea of public libraires, public education, and a host of other things. And no matter what the public broadcasters do in the eyes of these folks, they will find some argument to justify bashing public radio and TV.

Very well. I personally think there should be *some* tax involvement in noncommercial broadcasting, be it from general revenues, spectrum fees on commercial users, or whatever. But I'm also a realist. I'm not going to waste my breath arguing the question. If survival is the name of the game, I'm going to see to it that my station survives. If that means "going commercial", I'll do everything *legal* to see that we survive in that environment even at the expense of offending the "purists." I'd argue against it, but trying to survive the current trends is better than rolling over and dying trying to fight windmills.

2659. FM broadcast monitor receivers

}
} In a 04/05 posting, rrb@clm.ai writes:
}
}<<Too much unsupervised TV is *a* problem, for sure. But it is not *the*
}problem, it, like drinking, drug abuse and other 'escape' activities are the
}'result' of the problem, the symptom of the problem, if you will. The problem
}is deeper and much harder to face than excessive TV or anything else. The
}*problem* stems from a lack of inspiration, guidance and basic hope. It stems
}from that 'absentee' family you speak of, from an emotional and cultural
}vacancy, which sensational media, like euphoric drugs, is a temporary escape
}and relief from. It stems from a world where the only thing that matters is
}the almighty dollar, where human needs are all solved by the newest 'product'
}from a new car to a 900 sex line.
} >>
}
} I agree with this--to a point. TV is certainly not the only problem, but
} it *is* a major part of the problem. One analogy may be a high fever caused
} by an infection. You certainly need to take care of the cause of the fever--
} the infection itself--in order to have any long term recovery. But it's
} also true that taking care of the fever itself and its negative discomfort
} is also going to have a beneficial effect.

Yes, Roger, an interesting analogy for sure. But it is the same as my 'weed-eater' analogy. Taking a medicine to cure a fever caused by an infection may bring the illusion of well being for a short time, but at the same time the cause of the fever is raging out of control, possible infecting new hosts and definitely deteriorating the overall health of the organism. Concentrating ones efforts on cutting off the visible parts of a weed, or on breaking a 'symptomatic' fever, are efforts wasted in the long run if the health of the organism is what you seek.

Bringing this back to media, we can bang our collective heads against the wall and decry the vile programming on TV or the ramblings of a Howard Stern, and blame the availability of such programing for the state of disrepair we find our society in. But to do that is to miss the real cause, and to seek the quick-fix which never can succeed as long as the infection continues to ravage the organism from within.

Then there is the issue that Rich Wood brings up so well. Who will make the decisions that effect all of us? Everyone believes that the decisions should be made along the lines of their personal beliefs. In fact that is exactly what is happening now. What you are suggesting is that things be regulated by someone more in keeping with

your beliefs. What Jesse Helms might feel is OK may be different from what you might like and Larry Fling (Hustler mag) may have a whole different perspective.

Therein lies the regulatory rub.

} Granted, "fixing" TV--if there is such a thing--is not going to solve
} everything, but I reiterate that we as an industry can no longer afford
} to take the attitude that we shouldn't do anything--that we're just
} "reflecting" society rather than influencing it. The reality is far
} more complicated than that. And again, I prefer that if it's going to be
} done at all that we do it ourselves and not wait for the pendulum to swing
} so far that we are left at the mercy of forces beyond our control rather
} than trying to control those forces ourselves.

Of course media influences culture. All propaganda has its influence from Married With Children to Rush Limbaugh. Those in the influence chair, though, are claiming they do not influence, merely reflect or entertain, but we know that it does influence, it has to, people respond to entertainment and information on media. If that were not so, commercials would be ineffective. So don't buy it when you hear that this stuff doesn't influence.

However, to bring it back home to the original point, that is not an excuse to shift the responsibility for the 'corruption of our children <tm>" onto the purveyors of mass media. No matter how you slice it, garnish it, or season it, the responsibility for the direction of our children lies with the primary care givers and instructors. Primarily parents. If a parent sticks his teenager in front of the tube as a babysitter, then that parent is just as responsible as if (s)he had been the conveyor of the message. Parents simply do not take the time, patience and love it requires to raise a healthy, emotionally strong, wise and happy child anymore. It is that simple.

Any attempt to distort that reality to blame a radio or TV personality is an excursion into projection, scape-goat-ism and flawed logic, pure and simple. Parents, get back to the job you applied for when you gave birth. Get back to the loving and wise raising of your offspring. You will find that to be the only truly effective medicine against the effects of cheap media panderings and the increasing trend toward sensationalism and insipidness on todays media.

>that part of the reason it was dark on that freq til Doubleday but WGNU
>(106.5) in '77 as well as the 1380 freq?
>
WGNU-FM wasn't purchased by Doubleday until late 1979 or early 1980. It was one of two big rimshot sales that year...the other was WOKZ-FM in Alton hooking up with St. Louis' KATZ(AM), finally giving then-owner Laclede Radio an FM outlet. KWK first came back on in 1979 as an AM standalone.

I believe it was Dick Castanie who posted the info about the flooding. It may have had a role -- I don't know -- but far and away, the biggest delays were caused by wrangling over the license and challenges to Doubleday's acquisition by one (if I remember right) minority-principal potential owner.

In AIRWAVES 1253, mikanie@access.netaxs.com (Mike & Annie Fields) asked:

:Can anyone comment on KPNT????
:
Haven't you been reading? :-) Regular readers will know that I comment quite a bit on KPNT whenever I'm within range of the signal.
It is a station for which I have considerable regard.

I rarely submit items about who's working where, though, simply because of time constraints and the general interchangeability of so many personalities. (Especially those on morning shows, as I previously have ranted.)

:A long-lost friend of mine works there (last I heard) We started out
:together 6 years ago in New England, and we've lost touch over the
:years... Her name is Sarah Clarke, and last I read in R&R she was
:supposed to be doing mornings and I think either APD or MD...
:
She is doing morning drive.

FYI, KPNT has an AOL address (from a Missouri media list):

}KPNT FM-105
} kpnt@aol.com

2664. TCI Cable Dropping FM Stations

Newsgroup: rec.radio.broadcasting
Date: 1995-04-09 00:00:00 UTC
From: dk@crl.com
Message-ID: <3m7nfh$6ri@vixen.cso.uiuc.edu>
Source record: 33074

TCI Cable is dropping its FM service as of May 1, 1995 in the San Jose area, and possibly other areas they serve. Apparently they want to use the spectrum to sell other services. If you think you will miss the alternative radio voices available via cable, it might be a good idea to write your local TCI cable outlet and tell them, or contact the national headquarters of TCI. There is a possibility that this dropping of FM services may happen *systemwide* on TCI's other cable systems.

>or even come close to experiencing a station like Hitradio sense. I find
>it interesting that people still talk about...
>
Mark: First, my apologies. I remember you and enjoyed your work
at KKHR. It was an oversight not to include you with Armstrong,
Lance and Slim in my earlier post. KKHR was incredible...and with
KFRC having begun its shift first to a softer approach, then to
"the Game Zone" and beyond, KKHR could, in '84, '85 and '86,
have laid claim to the title of most exciting CHR in America.
As I said in that earlier post, it's a shame CBS, with all its
resources, didn't commit to what it takes to dethrone, or at the
very least, compete with, a legend like KIIS.

2667. TOTALLY UNATTENDED RADIO NETWORK

Newsgroup: rec.radio.broadcasting
Date: 1995-04-09 00:00:00 UTC

[Moderators Note: Well here it is, people. The futurre of radio is now in operation in Sweden. This will make Duopoly look like nothing. Better dust off those resume's. Air Talent? We dont need no steeenkin Air Talent... Bill]

Submitted by John Schad, President, SMARTS Broadcast Systems

The world's first unattended radio network is now broadcasting in Sweden, with help from an American Broadcast Equipment Company.

Z-radio, operated by the Pelora Company of Stockholm went on the air in October for the initial shakedown of the system, and is now in full operation.

The system was designed by SMARTS Broadcast Systems of Emmetsburg, Iowa, and their Swedish Representatives, TTT, AB of Stockholm, and represents the first time that an entire radio network, including the network hub and the affiliate stations, have all been designed and constructed at the same time.

The innovative plan involved all phases of the broadcast operation from technical matters through time sales. The entire structure of the network and affiliate stations was designed around the use of cutting edge technology to produce a radio network that provides high quality service with very little operating costs.

There are 12 different radio stations situated in cities throughout the heavily populated Southern end of Sweden. The 12 stations cover about 90% of the Swedish population. The stations were built after the Swedish government awarded frequencies to private individuals who bid on them last year. This was the first foray into private radio for Sweden, which up until that time had only government operated stations.

Each of the stations, exclusive of the transmitter, is built in a single equipment rack, and is totally unmanned. Another Swedish firm, Terecom, leases transmission facilities to Pelora in all 12 cities. Time sales on the network, and for the individual stations, are being contracted through yet another Swedish company to keep labor costs to a minimum.

The system operates using a combination of digital hard drive storage in SMARTCASTER systems in each town, and a single satellite link from Stockholm.

During the daytime hours, the satellite is used in a conventional manner to feed programming to all network stations, automating

local breaks through the Smartcasters. However at night, each of the local stations splits away from the network, and feeds both music and all spots directly from the hard drives of the SMARTCASTER units. Each station has sufficient capacity to store all commercial material plus an entire music library.

Each music library is identical, and backup libraries are maintained so that they can be quickly replaced if there is any equipment failure.

At night, the satellite network is used to feed new music selections, as well as newly produced local spots to the network stations. These feeds are automatically dumped into the Smartcasters at each location. All locations are individually addressable from Stockholm via the satellite network, or via backup telephone lines, so that spots and other audio can be sent to specific locations, multiple stations, or the entire network at the same time.

Each remote station is interconnected via two dedicated phone lines, and the satellite downlink. One phone line is used to receive daily program logs, music playlists, and other pertinent data from Stockholm, and to transmit back to the network hub at Stockholm verification logs for the previous day's activities.

A second phone line is used for emergency control of the system in the event of a satellite failure, and to trigger a notification in the event of a failure at the station or its transmitter.

Since Sweden is a Northern European country, (Indeed one of the cities served by the Network is almost on the Arctic Circle), satellite transmissions are not entirely reliable. The satellite dishes must be aimed low to the horizon to acquire the satellites orbiting in synchronous orbit over the equator. This required a complex backup system to insure that all stations would remain on the air in the event of a failure.

A second computer, separate from the SMARTCASTER system is used to provide interface connections between the phone system, the satellite network, and the SMARTCASTER. In the event of a satellite failure, the system will switch to playing a backup music playlist from the Smartcaster hard drive storage, then notify TTT, who is handling technical support, that the station has a problem.

In the event of the failure of equipment at the local station, the equipment will switch on a video tape that contains 6 hours of stereo music as well as a generic format for the station. Again, TTT is notified by the station that there is a problem, and help can be summoned before the tape ends.

As an additional backup measure, Pelora purchased an entire backup station. Since the entire station is in a single rack, it can be taken to any city on the network, set up, and be operational in a

matter of hours. The same concept exists when adding additional stations. Since the towers and transmission facilities, owned by Terecom are already in existance, adding a station is more a contractual than a technical matter. Contracts can be executed with Terecom for an additional signal, and the station wheeled into place. In a few minutes the facility can be connected to a satellite dish, telephone lines, power and studio transmitter link, and the station is ready to go on air.

The telephone modem interfaces also allow SMARTS personnel to control the network or any station directly from their headquarters in Iowa, if the need should arise.

The network allows centralized control of both the operational and the business ends of the operation. All production, including network and individual station production is either done by the network hub in Stockholm, or provided by advertising agencies. All logs, music playlists and other traffic information is generated at the hub by SMARTS Billing, Accounting and Traffic Systems, and by the SMARTS Music Generation Program. The system also generates all account billing, statements and affidavits of performance. Individual stations do not have the responsibility to send their own bills!

The heart of the hub system is a dispatching network developed by SMARTS. All production is done on a Smartcaster production system, then transferred via LAN network to a SMARTCASTER audio storage server. This computer is one of the largest in the world, with over 32,000 megabytes of storage. The unit has 24 drives (C through Z) and can store over 4,000 separate song titles as well as production for every station on the network.

Audio routed to the stations is then transferred via a Lan network to a dispatching computer. This computer sends digital information across the satellite network to address specific stations that are to receive audio files, then sends the files to the stations. The same computer uses standard dial up phone lines to send critical logging and music playlist data. The dial up lines are used in this application so that the stations can confirm reception of the files. This is not possible over a one way satellite link.

The Sweden operation began over a year ago, when SMARTS installed a pilot station in the town of Sundsvall, in the North part of Sweden. That station went on the air in February of 1984. The station originally carried automated programming only from its own audio storage, but later was integrated as the first pilot station on the network. The remainder of the digital automation systems were constructed in Iowa then flown to Sweden in August for final assembly.

Dane Roach, Product Development Director for Smarts Broadcast Systems sees the Swedish installation as a prototype for similar

systems both in the US and Abroad. Roach says "This philosophy discards pre-conceived notions of how a broadcast station should be constructed, and instead approaches the problem from the standpoint of using new but proven and available technology to build an entirely new kind of radio network, one that requires no one at the affiliate stations." Anders Neilson, Operations Manager for the Pelora Network, says that the system has resulted in the lowest operating costs for any operation in Sweden.

"Yet", Roach adds, "the Pelora Network, which operates under the name Z-Radio, is able to maintain localism in all their markets by virtue of the individually addressable stations on the satellite. Fully integrated networks, such as the Pelora operation, have many advantages over the more conventional operations prevalent in the United States."

SMARTS Broadcast Systems sees the design of the Sweden system as applicable in smaller domestic situations, and may offer low cost alternatives for group stations in the United States.

Individual stations for the Z-radio network are either owned by Pelora, its parent company, individuals, or some combination of the three. They are all leased back to the network in arrangements similar to LMA agreements in the United States. This gives the network the control needed to provide a good sounding format in each community without the costs normally associated with such an operation.

Roach said that the system got an acid test on day one of its shakedown operation, while SMARTS installers were still airborne on their way back from Stockholm. The Kopernicus satellite that serves the network experienced guidance difficulties and left its orbital position, taking the entire network down. "Each station," roach says, "fell into the emergency mode of playing a preselected playlist from the computer hard drives. The only problem was that only one test song had been recorded, and that song was repeated on each of 10 network stations for hours before the satellite signal could be restored. That song must have been at the top of the charts in Sweden that day!"

For more information on this or similar systems contact SMARTS Broadcast Systems at 800 747-6278.

2668. Phoenix Radiowatchers 4/8/95

Reply-To: bc348@freenet.buffalo.edu (Michael J. Hagerty)

Miscellaneous stuff:

KYOT(95.5)has changed its positioning slogan from "Smooth Rhythms"
to "Smooth Jazz". The music and presentation appear unchanged.

Tribune newspapers(Mesa/Tempe/Chandler/Gilbert/Scottsdale) media
critic Bruce Christian wrote in Friday(4/7)'s editions that Phoenix-
based Trendata(the company that measures FM listening in cars by monitoring
antenna leakage at remote locations) has seen an increase in cars
tuned to KHOT(100.3) since the Howard Stern show began in early March.
However, Christian quotes Earl Baldwin of Trendata as saying
that the former KZRX's numbers had been so low, anything would be
considered a significant increase, and cautions that realistic
measurement of Stern's impact probably won't come until the second month.
Stern is also simulcast on KGME(1360), which being AM, cannot
be measured by Trendata.
Former KPSN(Sunny 97-now 96.9 K-Hits) morning newswoman Pat Powers
was teamed with former KSAZ-TV morning weatherman Pat Flanigan last
Saturday(4/1)for a morning drive show. No word on whether something
permanent is in the works, or what. Powers has a 3-night per week
feature slot on CBS-TV affiliate KPHO's 6PM newscast.
Still no afternoon drive jock at K-Hits. Market legend Steve Goddard
was let go on November 28, the day of the switch from Sunny 97 to K-Hits,
and was replaced by weekend jock Phil Abbott. Abbot lasted about a
month before running into a dispute with management over taste and
content(the station is owned by Bonneville...a division of the
Mormon church). K-Hits moved APD/midday jock Alan Cook to afternoons
on a temporary basis...shifting evening jock Greg Burns to middays.
Now, more than three months later, Burns is back in his 7-12 midnight slot,
Cook continues to handle PM Drive, and PD Joel Grey is in middays.
But this is said to be temporary...as K-Hits continues to look for
a permanent PM Drive jock.
Phil Abbot is now weekends at Oldies KOOL-FM(94.5), where morning
talent Danny Davis and producer Tony McGraw landed after the Sunny-
K-Hits massacre. Goddard is still(incredibly) on the beach.

***** Rumor has it that Don & Mike WJFK's afternoon bad-boys-gone-national, will soon be on their own Fox TV show. There has been much speculation about this since both mentioned on the air that they began having discussions with Fox last year.

On April 7th, Don mentioned during the Washington/Baltimore pre-show that he has been sworn to secrecy about something "very important to them both." He then held back from discussing their little secret on the air any farther. I've heard that their show will be on the air by the fall of '95. Stay tuned for developments on this in the near future.

***** As of April 8th, X-tra 104 has yet to put live voices on the air at their new all-70's format station. The station on FM 104.1 in Washington and simulcast on FM 103.9 in Frederick and Montgomery counties in Maryland, is still playing taped bumpers between songs and commercial breaks.

Initially, the local papers reported that the station would go to live jocks after about two weeks of music with taped voices. The station, which changed format on March 2, has only one live jock on their station now and that's Wolfman Jack each Friday night.

As far as I can tell, all of the former on-air voices are still working at X-tra 104 pushing all the buttons on the CD and tape machines. Hopefully, upper-level management will soon take the plunge and decide who stays and who goes and get some live voices on the air. The station as it is sounds good. Live talent will only make it better.

***** Dick Cerri is back on the air in Washington! Cerri's popular "Music Americana" folk show left the air back in 1993 when FM 94.7, then known as W-Lite, began making changes while preparing for it's eventual change to the ARROW format. The "Music Americana" show is now heard Saturday nights on WQRA FM 94.3 at 6 p.m.

Host Cerri, who spent more than 13 years at W-Lite, expects to have a two hour syndicated show ready for distribution by this summer.

If Pepsi wants to hire Rush to do spots for Pizza Hut, that's O.K. by me.

But this brings to mind something that Rush himself has played fast and loose with: Is he primarily providing entertainment or is he a political commentator?

When you compare the number of entertainment personalities that have done endorsements with the number of political commentators that do, I think by accepting the job in the Pizza Hut commercial, Rush is saying that he sees himself as an entertainer, for whom conservative politics is a shtick.

In 1985 we moved from a town with cable to a town without it. With much less "chewing gum for the eyes" to distract our teenagers from family, school, community and the rest of life, they went on to enjoy learning, raise their SATs by several hundred points apiece, get into top-notch colleges, obtain scholastic honors, and have a great time along the way toward becoming productive, interesting adults.

I don't know how much not watching TV had to do with all this, but I suspect it was a lot.

Oh, and for what it's worth, their radio listening didn't change a bit (except for greater intake of public radio and KPIG).

Thanks for the essay!

Most of you owe Howard Stern for making your job
a little easier, by opening a path for you. His
progressive ideas have made a lot of you popular
by providing you with material and ideas. Plus
he has set a basic management acceptance policy
through a correlation of shock value vs ratings.

He now faces a censoring battle beyond anything
the FCC ever tried to impose. It sure will be
interesting to see who wins. Remember, whether
you like him or not, it could be you in battle.

I'm looking for pointers to manufacturers of disk or R-CD based
real-time audio recording equipment.

My customers currently use banks of multi-track reel-to-reel analog
tape decks to record all of their incoming telephone calls. What
I'd like to do is replace the tape decks with the disk or CD stuff.

Features I'd like:

a. doesn't have to be super-fidelity, since we are recording just
voices (and possibly a separate 'track' for time hacks)

b. easily expandable to handle a large number of incoming lines
(expandable in terms of both disk space and simultaneous A/D
capability)

c. compressed on-disk format, so that the disks don't have to be
"dumped" often

d. when the disks DO fill up, the contents must be retreivable for
archival storage on computer (not audio!) tape or CD

I have cross-posted this request to a number of groups. It may not
be totally relevant to some of those groups, but I'm targetting the
places where I suspect someone with knowledge of what I need may
lurk. My apologies to those who are offended, and my thanks in advance
for any information.

None in Canada, but plenty in Mexico and elsewhere. The old "Border Radio" stations were upwards of 250,000 watts, and many are still greater than 100,000. XEWA on 540 in Monterrey is 150,000. XEX on 730 in Mexico City is 100,000 (but originally licensed for 500,000, which it never enjoyed). XEW on 900 in Mexico City is 250,000. XEROK on 800 in Ciudad Juarez (across from El Paso, TX) is 150,000. PJB (Trans World Radio) on Bonaire in the Netherland Antilles is 500,000 on the same channel, and is audible on the entire East Coast of the U.S. at night. It has, I believe, the legitimate claim for the biggest signal in the Hemisphere.

I assume this new transmitter will be for Noble's XETRA on 690, which is currently 50,000 watts, with an impressive signal -- though less impressive in LA than LA's KFI is in San Diego. Seven towers says "highly directional" (by contrast, KFI is non-directional, with one tower). If this signal originates from close to the ocean (which it probably will), and is directional toward the Northwest, count on a big signal into the whole LA area, since AM signals travel best over sea water.

Sort of. Armstrong did indeed build a station on Mount Asnebumskit
in Paxton. The station went on the air as W1XOJ, and soon became a
commercially licensed operation as W43B, 44.3 MHz. When FM was moved
up the band in 1947, the station became WGTR (for "General Tire and
Rubber," which by that point had purchased the Yankee Network, which
had built the Asnebumskit station and sister station W39B atop Mount
Washington in NH). WGTR operated first at 101.7, then on
103.1. In 1950, General sold WGTR, in large part because the FCC
had apoted new guidelines limiting the power output of FMs, making
a mountaintop site 50 miles from the center of the market much less
attractive. General shifted its FM interests to WNAC-FM 98.5 in
Boston, which I believe was co-located with WNAC-TV 7 on a hill in
Malden, barely 10 miles from downtown Boston. WGTR's new owners,
the Eastern Broadcasting Corp., operated WGTR on 99.1 with 20kw
for several years, then shut down the station for lack of funds.

The current WAAF is the descendant of WAAB-FM, which went on the
air in June of 1961 on 107.3 (after WHRB-FM in Cambridge had
been moved from 107.1 to 95.3 to accomodate the new allocation).
The only connection between the current WAAF and W1XOJ/W43B/WGTR
is that both were related to AM station WAAB, the Yankee/Colonial
Network outlet licensed first to Boston and later to Worcester.
WAAB became WFTQ-1440, then WVEI, and is now WWTM, still a sister
station to WAAF.

>WAAF was built as a Boston radio station and serves a dual market
>audience.
>We are listed above the line in Boston, because WAAF has more listeners in

>the Boston Metro than it does in Worcester.

True -- in fact the only listener line that's announced on-air is a Boston phone number, 617-931-1AAF. I've heard some truly frightening estimates given for what WAAF pays for the FX line from the Boston CO to the studios some 35 miles away in Westboro.

And a question about the transmitter location -- if WAAF is still up on the mountain in Paxton; what are the FM bays on the channel 66 tower in Hudson? They don't seem to match any of the coordinates I've seen listed for any Central Mass. FMs.

2680. WTIC Hartford N/T

Newsgroup: rec.radio.broadcasting
Date: 1995-04-10 00:00:00 UTC
From: pd1080@aol.com
Message-ID: <3ma5c6$aaj@vixen.cso.uiuc.edu>
Source record: 33010

Reply-To: pd1080@aol.com (PD 1080)

WTIC am 1080, more stimulating conversation, is on line to exchange
feedback with radio listeners in Connecticut.
If you're among those who listen regularly, thanks, if you haven't
discovered
wtic, there's never been a better time to sample the station.
Ray Dunaway anchors our morning show, featuring award winning news,
weather and traffic every ten minutes.
Colin McEnroe, columnist/humorist from the Hartford Courant handles
middays, along with Rush Limbaugh.
Dr. Laura Schlessinger and Bruce Stevens inform and entertain from 3 to
6pm and then the Dean takes control of wtic sportstalk.
Gil Gross and Bruce Williams are on from 8-10 and 10-1a respectfully.
WTIC can be reached on Prodigy at fvfy15f, aol at pd1080 and compuserve at
cis: wtic am 1080.
Thanks for listening.

2682. New England Radio Watcher: Long Time, No Post

Newsgroup: rec.radio.broadcasting
Date: 1995-04-10 00:00:00 UTC
From: fybush@world.std.com
Message-ID: <3ma5b3$a7a@vixen.cso.uiuc.edu>
Source record: 33079

It's been just a bit too long...and in my absence, seems like most
of the big stuff (WRKO going to Metro for news, Matty in the Morning
going syndicated, WBZ's Joe Green retiring) has been covered.
So just a few quickie notes:

*The new calls at 104.1 Waterbury-Hartford CT are, as noted,
WMRQ -- calls that have a New England history behind them. WMRQ
was the incarnation of Boston's 103.3 FM just before the
current WODS, "Oldies 103." WMRQ - "Quality Rock Q103" lasted
less than a year circa 1987-88, if memory serves. It was
a sort of adult-oriented rock format -- I guess CBS's attempt
to take on 'BCN and the then-new WZLX.

*Noted in the Westerly (RI) "Sun", Sunday April 2, 1995, this
odd little advertisement:

"Attention Dunn's Corners: Listen to the Paul B Show, Monday-
Friday from 2:00-5:00 pm for the best music from the 50's thru
today, on AM1580, WCTD, our variety station."

A check of my map shows Dunns Corners (sic) as a bump in the road
on US1, a couple miles east of downtown Westerly. There is no
licensed station on 1580 anywhere nearby (the closest is WLIM,
Patchogue Long Island), so it looks as though this could be
a pirate -- or conceivably a legal low-power operation.

*WRKO 680 (50kw DA, talk) is now live and local from 5:30am
to midnight, except for Rush, with the addition of a weeknight
"Sex Talk" show from 10pm-12mid. It's hosted by Phyllis
Levy, who comes to WRKO from Chicago, where ARS's John
Gehron heard her while he was working for Pyramid at WNUA.
Rumor has it that 'RKO will want to syndicate the show eventually.
Rumor also has it that Levy will do the show some of the time from
her home in Chicago. The WRKO lineup now:

5:30-10am Majorie Clapprood and Pat Whitley
10am-12noon Jerry Williams
12noon-3pm Rush Limbaugh
3-7pm Howie Carr
7-10pm Charles Adler (8-9pm simulcast with WABU-TV 68)
10pm-12mid Sex Talk with Phyllis Levy
12mid-5:30am Reruns of Rush and Howie

Sex Talk bumps Bruce Williams off WRKO and over to WBNW-590,
which will run him earlier in the evening, 7-10pm I believe.

*Two new TVs: In Boston, Telemundo has turned on LPTV W32AY, with a *very* good signal from the Prudential Tower. LPTV W19AH had been running Telemundo up till now...I can't see them here so I don't know what they're doing now. And in New Haven CT, after more than 35 years as a CP, WTVU(TV) channel 59 has signed on at long last. The station is owned by K-W Television of Skokie IL, and is being operated as an LMA by LIN Broadcasting's WTNH-TV 8, the ABC affiliate in New Haven. WTVU is running a paltry 100kw or so from WTNH's site in Hamden CT. WTVU gets the WB affiliation, the same week indie WTXX-20 Waterbury picks up UPN.

*Opie and Anthony from Long Island (WBAB I think?) have taken over the afternoon duties at hard-rocker WAAF.

*And speaking of misinformation about Worcester FMs: An article in the Globe a couple of months ago talked about noncomm WUMB 91.9 Boston, and mentioned WUMB's new satellite station, WBPR in Worcester, also on 91.9. The article erroneously stated that WBPR operates on a 3-second delay from WUMB. That erroneous bit of information has now surfaced in Bruce Elving's "FMedia!" newsletter for this month. 'Tain't so. WBPR's only delay is the speed-of-light delay on the 8khz mono line from Boston. You can hear the two signals fight it out as you drive along the Mass Pike approaching Worcester. WUMB has full-fidelity audio and stereo...WBPR cuts off at 8khz and is in mono.

And I think that clears the backlog from this end...

2686. St. Louis Media Fax

Newsgroup: rec.radio.broadcasting
Date: 1995-04-10 00:00:00 UTC
From: becnel@crl.com
Message-ID: <3ma5b8$a7p@vixen.cso.uiuc.edu>
Source record: 33083

Does anyone out there keep an updated listing of fax numbers to Media (radio) outlets in the St. Louis metro market? I use this for press releases and sometimes it is difficult to stay up to date with the numbers. Also, I would like the current person at that station in charge of compiling the news.

I find that the larger stations don't change (ie. KMOX), but the smaller ones are either changing news directors or fax numbers often. A format suitable for importing into a DBF compatible database, spreadsheet or WInfax v4.0 is preferable, but any format is accepted.

THanks alot,
Bob Becnel

2687. Re: What Happened to Garry Meier

As I understand it, the law does not forbid the running of legal ID's at
any other time. Just as long as there is at least one at the required
time.

I agree. But who says that a diverse play list is *bad* radio?

> The listeners aren't stupid (well, not most of them :-)). They know
what they > like.

I disagree. If listeners know what they like, why do record lables spit
forth large quantities of $$ to get there records into a stations heavy
rotation? Answer: Because they know that with in a given format, heavy
air play = "Ooo I like that" = sales.

> They don't want to be "educated" about all this "great music that never
gets on the radio (TM)".

They don't want to listen to advertisment either, but that never stoped anyone.

Realy, what is the difference between HOT AC in Rochester, NY and HOT AC
in Washington D.C. The homoginization and catagorization of radio formats
is only going to make it easier for DBS to creap in unnoticed by the
listener. If the listener knows what they like, then the large
conglomerate who operates the DBS station is far more financialy equipt to
determine (or is it dictate) what people like. Infact, how many radio
stations today are owned by such orginizations? Think of the money they
could save by running one DBS station and still maintainging the same
listenership they had with 8 stations scattered across the country.
Let the big guys have there DBS. Last I check there was no shortage
orginizations seeking to put a broadcast station on the air. Infact,
their is far more "licensing activity" for noncomms than comercial
stations right now. DBS may increase the opertunity for such
orginazations to get their station, once the big guys bail out.

[Description of Swedish automated radio network deleted]

I'm not particularly impressed by this. Having acquired some recent experience at teaching computers to do radio shows, I can say with some authority that there is a hidden cost to broadcast automation that takes the form of a lower quality of service than that provided by eeven a marginally competent human operator. For example, the traffic department at one station where I used to work once scheduled a dating service spot back to back with one for an abortion clinic. The dj on duty discovered this before the spots aired and moved the second one to the next break, avoiding an embarrassing mistake that could have offended either advertiser. A computer in the dj's place would not have detected the mistake, and the damage would have been done.

At WCRB, which is all-classical, we sometimes have to play spots with loud rock or rap music beds, but our policy is to place them where they give the least offense-- in a newscast, say, or as the middle spot in a large clump, as opposed to airing them right after a Mozart symphony. Often a day's log must be printed before some agency spots have been delivered, and by the time they arrive there is only the announcer to insure they do not air in the wrong context. In a competitive market it is little details like this that mean the difference between a happy customer and a dissatisfied one; one mistake by a machine can cost thousands of dollars.

I have never yet met a computer that does not occasionally freeze up when a power glitch or some combination of circumstances not foreseen by the designers of its software changes a bit in the wrong memory location. When that happens the result is always catastrophic; the best a machine can do (assuming that there is a second one on the site that hasn't frozen up) is to throw some backup programming on the air and call for human intervention. Now imagine this happening in a network of two or three hundred stations that are programmed from a central point, where no one is monitoring most of the transmitters.

Or worse, let's say a transistor dies in an op-amp that feeds audio to one of the transmitters. Odds are the listeners will hear horrendously distorted audio for hours or even days before someone at the central control point finds out about it. Is there a computer in the world that can tell distorted Michael Jackson from the real thing, or that local teenage pirates have taken over one of your transmitters to play sex tapes?

The more time I spend working with computers the more I wonder just how much money they have actually saved businessmen compared with what they have to spend on software development, customization, debugging, consulting fees, etc. Most people tend to see computers as miracle machines that never get sick, take vacations or develop attitude problems. In fact they are incredibly stupid machines that are very good at doing exactly as they are

told, and have to be told in excruciating detail how to do the simplest task. They are by nature incompatible with one another; that traffic system you have running under Windows can't talk to the database your consultant has developed for you; if you want them to talk you'll have to pay someone $100 an hour to develop a Rube Goldberg interface, and some of those $100 hours will be spent educating him on how your business works and explaining exactly what you want and how it relates to your business goals. And he will still not get it right the first time.

And what if your general manager likes Macintoshes, but your traffic system (which supplies the reports he needs), developed in BASIC in 1979 for an old Wang minicomputer and running on a PC clone using some sort of emulator, won't give his Macintosh the time of day?

There is a lot of software out there that was developed in C or Pascal in the early days of microcomputers and has become omnipresent in the radio industry. So much time and money has been put into developing the old code that the developer can't afford to re-write it, even though by doing so he could give you an infinitely more useful product. The traffic system described above, used at more than a thousand American radio stations, is a prime example, as is one of the more popular qualitative analysis programs and a very popular music scheduler.

Did I ever tell you folks about the phone call I got at one o'clock in the morning on Christmas Day, 1993? It seems someone accidentally erased the contents of the hard disk in our digital audio storage system-- every commercial in the building!-- and somebody else hadn't bothered to back it up for three weeks. Thank God it was Christmas, most of the contracts having run out the previous day, and not Halloween!

Finally, those of you who are about to invest in the latest state-of-the-art PC with 16 MB of memory and a 90 MHz Pentium processor that runs like greased lightning should bear in mind that in three years that machine will be useless junk, unable to handle tomorrow's business software. I've got 286's and 8088's sitting in my closet that will testify to that.

No, the fewer computers you trust with vital aspects of your business, the better off you'll be and the better you'll sleep at night.

>
Try this on for realism: When the public system has thoroughly commercialised itself, Congress will have the justification for ending the reservation of certain channels for non-commercial use. The frequencies will go into speculative play with the rest of the spectrum and the system will have pulled the plug on itself.

You of course, will be replaced by a consultant hired by your new owners. You will deserve it. But all the rest of us, inside and outside the public system, who know that the present pathetic state of American broadcasting has been brought about by the precious market, will be the real losers.

So much for your "realism."

Why does the idea of advertiser-supported "public" radio make so many people uncomfortable? It would seem the ideal way to keep art and culture on the radio out of the hands of Newt and his Visigoths. I am aware that every advertising dollar spent on "public" radio is a dollar not spent paying my salary (since I work in commercial radio), but surely a university or community-based non-profit organization cannot be much of a threat to a marketing-driven commercial broadcaster.

I have for a number of years been a champion of commercially-sponsored college radio. I sit on the board of trustees of the organization that runs such a station in the Boston area. It is staffed by college students and a few alumni, all of whom are volunteers, and reaches an audience of some 30,000 people with music ranging from Parker to Prokofiev to punk, as well as honest-to-God public affairs programs, live concerts, college sports, and a live sermon each week by the Plummer Professor of Christian Morals. The station receives no support from any government body nor from the college where it is located, but pays its bills by running commercials just like a "real" radio station. The programming is almost all locally produced-- the only syndicated shows carried are recorded concerts by the Cleveland and Chicago Symphony orchestras-- and nothing goes on the air but for its artistic and intellectual merit. There is a sales department, as there is at any commercial radio station, but no marketing department and the only target audience is people who like programming that challenges the mind, whatever be their age, sex or income. This station achieves much of what the creators of "public" radio had in mind; it does so without a dime of taxpayer support and threatens no one's livelihood.

Reply-To: tonywalkfm@aol.com (TonyWALKFM)

I am in the market for 66 3B punch blocks. The 3B blocks are 3X2 accross
and 25 down. I also need the mounting stands for these blocks. If you
know of a good source for these blocks please drop me a EM at
tonywalkfm@aol.com
I have sound a source in the S.E. but they seem high in price. (17.00 each
plus 2.50 for the mounting).
Thanks
Tony Gervasi Jr

Richard Karlquist (rkarlqu@scd.hp.com) wrote:

: I would like to get information on FM broadcast
: receivers used by radio stations to monitor their
: own signals. I know of two, the Magnum Dynalab
: PRO-101, and the Day-Sequerra (model # unknown).
: Anyone have an opinion on this unit? I would also
: like to hear about other units. I am especially interested
: in receivers with composite out and multipath detectors.

Unfortunatley I no longer see real monitors in a staiton. They just pick up any old FM Tunner/Receiver and plop it in the rack and connect it to the console. Many don't even have Modulation Moniotors to measure the actual signal leaving the station. They just set the level on the Exciter's LED VU and hope they don't get caught.

In Airwaves Journal 1256 the following was published:

> This required a complex backup system to insure that all stations
> would remain on the air in the event of a failure.

Ok, so it's approved in the United States: I'll set the seen:

On July 13, 1997, due to a solar flare, a satelite mix up causes the
following to happen.

The citizens of Needles, California, scramble out of their homes to
look for an incoming tornado [they've never seen one].
The population of Meade, Kansas, meanwhile, hear that it's going to
be 122 degrees today with seven percent humidity -- while dark clouds
roll into town . . . . . .

I've seen elephants fly, buffalos with wings, and dinosaurs roam the
earth, but I'll never, ever, ever listen to an unattended, no person
needed station.

[excuse me, all fed network of hits from Dallas is on the air. . . .]

anybody out there have information on this station. I am doing some historical research and know that it was America's first commercial Shortwave station. did some simulcasting with WRFM in NYC where it originated, though transmitters were in Scituate, Mass. [Some of you old time purists may doubt the first claim I cited saying that CBS used shortwave for an international service in the 30s--OK,] But if anyone's got anythingon these guys let me know. Thanks. Marty LoMonaco

Check out our ever-expanding web page - http://radio.aiss.uiuc.edu/`rrb/

The AIRWAVES Radio Journal (Formerly published as the Internet Radio Journal) is a periodic email digest dedicated to discussions of broadcast radio, from a professional and quazi-professional perspective. Subscriptions to Airwaves are free, and available via electronic mail (email). Subscription information follows later in this document.

In addition, all articles in AIRWAVES are ported to and from the Usenet newsgroup rec.radio.broadcasting (r.r.b) which was founded in April of 1992, as a means to further discussion of topics pertaining to 'domestic broadcast radio'.

By domestic, we mean broadcasts which are intended, primarily,for reception in the same country/nation in which they originate. AIRWAVES and rrb, are international in scope, and the term 'domestic' should not be taken to imply 'USA' or even North American. Readers in other nations are encouraged to participate.

```
____ _ _ _
/ ___| _ _| |__ (_) ___ ___| |_ ___

___) | |_| | |_) | | __/ (__| |_\__ \
|____/ \__,_|_.__// |\___|\___|\__|___/
|__/
```

Appropriate topics include (but are not limited to)..

) Formats and programming.
) Engineering & technical matters and interests.

) Community broadcasting.
) Pirate broadcasting (especially non-shortwave, domestic pirates).
) Legislation affecting the industry, and its 'offspring' industries.
) Technologies affecting the industry, and its 'offspring' industries.
) General station information. Who is going on and off the air, and why.
) Radio's historical and cultural significance.
) DXing (long distance reception) on the standard broadcast bands.
) Radio's current and future trends.
) Political and news coverage and its impact.
) Job openings and help to those seeking work in the industry.
) Information on equipment and techniques involved in transmission and reception of broadcast radio signals.
) The International Scene and how broadcast radio is shaping up in the various nations of the world.

****

One of the main goals of AIRWAVES/rec.radio.broadcasting is to act as a bridge between the radio broadcast professional, the listener, and those who are up-and-coming broadcast Professionals. Groups who often lack any real insight into each other's "world".

1) The radio professional. S)he lives *inside* the walls of radio. While dependent upon the listener (or more accurately the overall number of listeners) the Broadcast Professional (BP) is somewhat separated from the end user by virtue of his/her "point-to-multipoint" position. AIRWAVES offers the BP a glimpse into the real-world of the listener, un-filtered by consultants, ratings, trend-reports, trade pubs et-al. Sometimes that world is a little rougher than the broadcaster is used to, but that is the reality of 'the real world' sometimes. We do try to maintain a civilized environment, though, and filter out the most offensive brainless or off-topic posts (more on this below).

2) The radio listener. The listener is also in a similar (albeit inverse) position. The listener has relatively little actual input into radio programming. They often have only a vague idea of what makes a radio station tick. By communicating directly with broadcast professionals (and para-professionals) the listener gains some insight and understanding into the world of the broadcast professional.

3) The 'wannabe' broadcaster. AIRWAVES/r.r.b gives those with a strong interest (but little or no experience) in the industry the chance to interact with, those who have made it in the business. We also post resumes and 'help/positions wanted' ads for interested parties.

AIRWAVES/r.r.b is loosely moderated, as alluded to above.

Our philosophy of moderation is to 'err on the side of permissiveness'. We do not believe in censorship and never kill a post because We don't believe in the poster's opinions. We take great pains not to unduly

restrict dialogue or the poster's right to express him/herself, while
at the same time attempting to provide a professional-level
environment free of unnecessary noise (a daunting task).

```

|___/
```

Matters that may cause an article to be rejected, include...

* Articles which are not on (or reasonably near) the group's charter.

* Articles that are too long for submission as-is. We have a soft
limit of 8000 bytes (*kbytes) and a fairly hard llimit of 10,000 bytes
(10kbytes per article for the Digest. We will post longer files in
the newsgroup, but all sites may not carry longer items.

* Articles which are merely multiple repetitions of an identical answer which
has already been offered several times.

* Articles which contain 'miles' of quoted and multiple quoted text followed
by a few lines or less of original text. Please edit quoted text to a
minimum and try to adhere to the *50% rule*, that is 51 (or more)
percent of original text to 49 (or less) of quoted text.

* Articles that solicit for funds or contain blatant commercial content.

* Articles which are unwarrantedly offensive, abusive or contentious for the
sake of contention. Personal attacks and ridicule are considered such.
Discussion, even argument, of issues and opinions are welcomed and
encouraged. However personal attacks on individuals (no matter how
justified you might feel they are) are not part of our charter.

* * * * * * *

```
_ _ _____ ____ _

```

AIRWAVES has a program called RadioWatchers, which is open to any
readers who are interested. Basically RadioWatchers are volunteer
staff reporters who write about the goings-on in their market or area.

RadioWatchers are expected to maintain at least one posting per month,
more as news warrants. For a complete file on the RadioWatcher
program, send email to radiowatcher@airwaves.com and tell us
about yourself.

```

```

Archives of past Airwaves Radio Journals are kept for retrieval via
FTP, Gopher or via the Worlkd Wide Web. Below are the paths for
these archives.

FTP - radio.aiss.uiuc.edu /misc/rec.radio.b-cast/
Gopher - radio.aiss.uiuc.edu 7070
W.W.W - http://radio.aiss.uiuc.edu/~rrb/

AIRWAVES JOURNALS (and the previous incarnation as Internet Radio
Journals) are stored in sub directories, each with their own index file.
Our archive site also contains files from a couple of our
other lists, as well as some interesting information not published
in AIRWAVES/r.r.b. Most files are compressed, so if you are using
FTP, use the binary mode to transfer.

Our Web Site has many other radio/media and general links in addition
to the archives for AIRWAVES publications. Do check it out. Let
us know if you have any other interesting links for us.

We hope you enjoy the group. Remember, it is only as good as it's
contributors. So don't be shy :-). If you have a question, or answer,
even if you are not sure, post - post - post.

We are open to suggestions on how to improve this group.
Send them via e-mail to wdp@airwaves.com

Thanks to all who have, and continue to, participate.
We now return you to your regularly scheduled newsgroup :-).

William Pfeiffer Moderator - rec.radio.broadcasting - Airwaves Radio Journal
Maintainer - AIRWAVES World Wide Web Media Resource Page.

2710. NYC Radio Watcher's Report 4/10

Newsgroup: rec.radio.broadcasting
Date: 1995-04-11 00:00:00 UTC
From: TRRadio@aol.com
Message-ID: <3mdlck$dmf@vixen.cso.uiuc.edu>
Source record: 33012

News and notes from the #1 market--

PD Quincy McCoy is out at WBLS--the first casuality of the KISS-FM format switch/rating boost. McCoy is a market vet who's been with them since 1983.

WABC has withdrawn it's $10 million lawsuit against the Yankees and it's play ball when baseball opens later this month. The station wanted a rebate on it's rights payments with replacement baseball on the horizon and didn't air the contracted number of spring games because of the replacements.

Dick Oliver is the new 10-11a host on WABC. He's been the host of the Daily News On The Air for many years on different stations and works for FOX 5 TV in New York as a reporter. The station wanted Mario Cuomo for the slot, but he opted for a three hour weekly show. WOR and WABC have been quoted as 'not interested', but we'll see.

NY's radio bad boys took center stage last week--
Imus was at the center of the Al D'Amato/Judge Ito controversy--Al made his comments on the Imus show. Got alot of play on local TV, however, WNBC-TV wouldn't mention the I-man or his show by name in their reports. Everybody else did. and Howard Stern's comments about Selena's death received alot of TV coverage, but not alot of local reaction.

CBS-FM Midday Man Bill Brown is on the mend from a recent heart scare on the air just over a week ago. He should be back soon. BTW--He was also one of those at WOR-FM in the late 60's before joining CBS-FM in 1971. He's the only air personality who been with the station since the switch from T40 to oldies.

FYI - Ross Brittan, former Z-100 and WABC morning team member, has a radio prep sheet he's doing called THE ROSS BRITTAN REPORT, it's a great source for show prep. and IT'S FREE (for now) over the internet. Contact him at RSBRITTAN@AOL.COM.

Till next time--

2711. WHTZ - Z100 Radio - To Move Soon

Newsgroup: rec.radio.broadcasting
Date: 1995-04-11 00:00:00 UTC
From: "Weatherboy / New York City ~ Weatherboy@aol.com" <weather@raven.cybercom.com>
Message-ID: <3mdlck$dmh@vixen.cso.uiuc.edu>
Source record: 33013

Today's New York Times reports the following...

WHTZ-FM, the pop music station known as Z-100, hopes
to move its headquarters to Manhattan from Secaucus, N.J., as
soon as possible.

"It will help us lure on-air guests if we move to Manhattan," said
Kingston. "Sometimes it's hard to get the big names to go through
those bridges or tunnels."

The station, owned by Shamrock Broadcasting Comapny, a Walt Disney
Corporation concern, currently has its sales offices in midtown
Manhattan.

"We want to consolidate the whole thing," said Mr. Kingston, who said
the station is looking for a 15,000-square-foot space in mid-Manhatan.
But before it can commit to a deal for space there, the station must
sublet its 12,500 square feet of space in Secaucus. The landlord is
Hartz Mountain Corporation. "We'll do it," Mr Kingston said. "We want
to move quickly." He declined to discuss the company's rent in
Secaucus."

2712. Sacramento RadioWatch

Newsgroup: rec.radio.broadcasting
Date: 1995-04-11 00:00:00 UTC
From: MLennartz@aol.com
Message-ID: <3mdlcl$dmi@vixen.cso.uiuc.edu>
Source record: 33014

All of a sudden, lots going in the the California Capitol:

CANNED DJ's: Friday (April 7), KRAK-FM (Country) fired their 3-month old morning show hosts Brian Chase & Monica Lowe. Sister country station KNCI's evening host Dan Cheatam was immediately named permanent morning show replacement. This while the EZ communications trombo (also owns KHTK, Hot Talk 1140) awaits the appointment of a new director of programming, expected to be announced this week. Chase will look at other opportunities while Lowe is rumored to be returning to KQPT (AAA) where she jocked for several years prior to moving to KRAK-FM. Meanwhile, Dave Diamond is out at KSEG-FM (CR). No word on the 7-midnight replacement for the "Diamond Mine" shift.

SALE...OR: Tribune Broadcasting's Soft AC KYMX(Mix 96) is sold...rather, traded to Henry Broadcasting for another Henry property. Exact details TBA.

PROMO OF THE CENTURY: KHYL-FM (Gold) pulls out all the stops with the market's biggest radio promo in years, maybe ever. A giant cash giveaway, driven by a "calendar" distributed through the market, of up to 100 dollars cash 9 times a day. The contest culminates just before Memorial Day when one lucky listener scores $100,000.00 cash. Yep, wins it ALL. It's called "Get a New Life" from station promo master Ken Kashan. Can't think of a radio (or TV, for that matter) promo with that big a payoff. If you remember one bigger, let me know. Seems Ken married the Spring/Summer promo budget together for one memorable shot at blowing a hole through KNCI (Country) and KGBY (AC) to get to be the #1 music station.

SACRAMENTO SHADOW: John Davison, ex-KHYL-FM GM (lost in the Chancellor Communications takeover) takes the reigns at the help of Shadow Broadcast as President and General Manager based out of the Bay Area. The traffic, weather, and news supplier to hundreds of radio station across the country gets one of the best in the business. In less than a year at KHYL, Davison inspired the ex-American Media outlet to jump from 10th in the market to fourth.
Prior to KHYL, Davison was VP/GM at San Jose TV's KICU, innovators of some of independant TV's most enjoyable moments in the bay area.

THE OJ STATION: KSTE (Talk 650, KST) licks its lips at a shot inside the Top 10 when the winter book is soon published. They continue to firm up for the Spring campaign, take advantage of the O.J. cume, and philosophically align their air staff at the same time. 9a-12p host Geoff Metcalf's contract was not renewed, and Jeff Katz, from WIBC, Indianapolis, is scheduled to start late April. Katz, according to station Ops Director Ken Kohl, will hopefully conjure memories of Rush Limbaugh's early days in Sacramento....(shame we have to go through that again).

Last, but not least. A 1995 programmer's Dream Format:
Howard Stern in the Morning, and O.J. The rest of the day

Will update in days.

Mark Lennartz
(MLennartz@aol.com)

2713. Advent of private independent commercial radio in South Africa.

Newsgroup: rec.radio.broadcasting
Date: 1995-04-11 00:00:00 UTC
From: Michael Mayer <mish@aztec.co.za>
Message-ID: <3mdlcl$dmj@vixen.cso.uiuc.edu>
Source record: 33015

One of the most exciting things to happen in South Africa this century (quite apart from the immense and wonderful change in the establishing of democracy here) is the advent of private commercial independent radio here. The Independent Broadcasting Authority (appointed last year) will be conducting hearings for the issuing of licenses for these commercial stations, it is HOPED, towards the end of the year. If you are involved in any aspect of commercial radio, and would like to comment or discuss any pa
rticular avenue in this regard,please do. Thanks.

>music. WRRW's audio is also very clean and processed just right. This
>combination really keeps me listening.

1) You'll be sorry to hear that Arrow 93 has flipped formats to a metallic-sounding AOR. Well done, better produced than the previous Arrow (their new PD, I understand, was a Prod. Dir. somewhere big out west), but no longer an "Arrow" format station.

2) Another choice next time you're coming through Memphis would be Star 98.1 (formerly Target 98.1, until Target Dept. Stores had a word with them :). Same format, no royalties to CBS.

3) The best Arrow I've heard so far is Arrow 104 in Nashville. They even beat out D.C., IMHO. After they flipped from straightforward Classic Rock, they kept a lot of the jocks...they're more laid-back and less "happy" than any of the others I've heard. It's a pleasant change for li'l ol' Gen. X me :)

Reply-To: peterafish@aol.com (PeterAFish)

I'm posting this message in hopes that some of you can help me out. I am a writer for Sunset Magazine in Menlo Park, California. We're researching an article on the West's best radio stations, so that as people travel this summer they can find stations that will both entertain them and give them an insight into the parts of the country through which they're travelling. We're looking for quirky, interesting, out-of-the-ordinary stations--commercial, public, college, whatever--ideally with a strong regional character. Some that seem to fit our criteria include KPIG in Santa Cruz County, California (great selection of eclectic country and folk music), KCRW, the public station in Santa Monica, California (interesting music, and good current event coverage), and the Hawaiian music station KCCN. But we're looking for more good stations from California, Arizona, New Mexico, Colorado, Utah, Nevada, Oregon, Idaho, Wyoming, Montana, Washington, Alaska, and Hawaii. Any suggestions would be most appreciated. You can e-mail them to me at: fishp@sunsetpub.com or at PeterAFish@aol.com. Thanks very much.

On CFNY:exact time frames notwithstanding,about right. He also has done
some mix shows at CING(107.9,Burlington/Hamilton,Ont.,dance CHR:Energy 108),
which,given that some ex-'FNYers land here(see Scot Turner)landed here,could
be called CFNY West.
Years ago,he did some fill-in work at WMJQ(then Majic 102 as an CHRer),
when its then AM driver,Sandy Beach,was on vacation.

2721. EBS/EAS 8 Sec. Modification Help

Newsgroup: rec.radio.broadcasting
Date: 1995-04-11 00:00:00 UTC
From: came@rice.edu
Message-ID: <3mdlct$dmv@vixen.cso.uiuc.edu>
Source record: 33023

Greetings - I am the station engineer for KTRU 91.7 FM
in Houston. We are a small educational station licensed
to Rice University.

We are trying to modify our current EBS encoder/decoder
(an MTS Communications Corp. System 1000 EBS Monitor) to
comply with the new 8 second encode and decode regulations.

Our problem is that we lack any schematics for the unit,
and are unable to find the company (we believe they're out
of business...) that made it. No one here in Houston
has seen or heard of this unit before, and the local
SBE chapter has no references to it.

If ANYONE has any information on this unit, schematics
they'd be willing to share, or the necessary modifications
to make to change the tones to 8 seconds, we would be
most appreciative. We've opened the unit up, and the
circuitry is so compressed, that we'll probably have
to spend days tracing to figure anything out...

Cameron

2722. Radio e-mail

Newsgroup: rec.radio.broadcasting
Date: 1995-04-11 00:00:00 UTC
From: JPPritchrd@aol.com
Message-ID: <3mdlct$dn0@vixen.cso.uiuc.edu>
Source record: 33024

Management at KTRH (NewsRadio in Houston) is considering the pros and cons of soliciting listener comment, questions, etc., via e-mail. The concern, of course, is just how much work are we creating for ourselves. I'd really appreciate hearing from others who solicite e-mail feedback from their listeners. How much e-mail can we expect? How much time do you have to devote to answering the e-mail you get at your station? It'd be nice to get the listener feedback, but we really don't want to launch into a project that might require hiring another staffer. Perhaps others are considering the same kind of project and could also profit from your experiences.

Thanks
JP Pritchard, KTRH Radio

Rob Landry's story...Did I ever tell you folks about the phone call I got at one o'clock in the
morning on Christmas Day, 1993? It seems someone accidentally erased the contents of the hard disk in our digital audio storage system-- every commercial in the building!-- and somebody else hadn't bothered to back it up for three weeks. Thank God it was Christmas, most of the contracts having run out the previous day, and not Halloween!...

Reminds me of the time the PD at my station was formatting a bernoulli and erased every commercial in the air studio on Friday Afternoon at 4:45p in October. Needless to say, It took a monumental effort by the PD, AM Drive guy, overnight gal and myself to get them all back in the system by Saturday at 4 p. Ever since then, weekly backups are the norm.
P.S. As "thanks" for his efforts, the AM Drive guy was fired the following Monday.

2726. Irish broadcasting green paper

Newsgroup: rec.radio.broadcasting
Date: 1995-04-11 00:00:00 UTC
From: 91361516@vax1.dcu.ie
Message-ID: <3mdld1$dn8@vixen.cso.uiuc.edu>
Source record: 33028

Greetings from Dublin

The Irish government will shortly publish its long awaited Green Paper on Broadcasting, setting out its vision of the devolopment of broadcasting in Ireland over the years to come.

Already a number of leaks have emerged concerning the Paper and its contents. It seems likely that the Government will suggest moves to tackle the risks associated with state broadcaster RTE's monopoly on television news broadcasting. Although it's understood that officials of Ireland's Department of Arts, Culture and the Gaeltacht are in negociations with the TV3 consortium, interested in setting up a national commercial service, no decision is expected for some time. It seems likely that the Green Paper will recommend that the news service for one of RTE's two television channels be produced independently. It is also believed that one of the channels may be asked to relocate outside the capital, Dublin.

On radio, the Government will almost certainly recommend the reintroduction of the long defunct Radio License in a bid to prop up independent radio. Although Ireland has had legalised commercial local radio since 1989, a number of the 20+ stations remain in a precarious financial position. Those who are doing well argue that the playing pitch on which they compete with RTE radio should be levelled. RTE Radio is license fee funded and Minister Michael D. Higgins seems convinced that the Independent sector is entitled to some state assistance.

The reintroduction of the Radio License is already raising some eyebrows here, however it's expected that this will be done via a tax on car radios, rather than every home listener being charged for the priviledge to tune to their favourite station.

Barry Hennessy,
Anna Livia FM,
Dublin.

That makes a lot more sense. BTW, what's the
"Pulse of New England" doing now? Who is on in the
morning? Is Bob Steele still associated with the station?
Is Arnold Dean still there?

How is Rush doing in middays? What would the
station have done without the Red Sox at night?

Message-ID: <3mdld4$dnd@vixen.cso.uiuc.edu>
Source record: 33032

TOMLONSON@wmich.edu wrote:
: If Pepsi wants to hire Rush to do spots for Pizza Hut, that's O.K. by me.

Agreed.

: But this brings to mind something that Rush himself has played fast and
:loose with: Is he primarily providing entertainment or is he a political
: commentator?

As a frequent listener to his TV and Radio show, Rush has made no bones
about being an entertainer. Is he a political commentator? THat is a
title that the listener has to decide. SOme would think not. A majority
in his audience think he is a very credible conservative political
commentator. In political savvy, I would rank him with Buckley, WIll,
Charen and others. But he goes one step beyond, by adding irreverence
and humor to make a point. He always says that he likes to reveal
absurdity by being absurb. This make his commentary all the more
enjoyable.

Truthfully, as a devoted conservative in the political sense, I
sometimes find Buckley talking over me the first time around. But Rush,
brings the same ideas and points to the avg person .

: When you compare the number of entertainment personalities that have done
: endorsements with the number of political commentators that do, I think by
: accepting the job in the Pizza Hut commercial, Rush is saying that he sees
: himself as an entertainer, for whom conservative politics is a shtick.

I wouldn't use the word shtick. Shtick belittles conservative politics.
Whether Rush or R Reagan or Mr Newt or Charles Barkley speaks of
conservative politics, the content is to be judged by the audience as
credible etc. If Ted Danson says we have only 20 years to live (10 years
ago) the mainstream media never questions that, however, if RUsh
demonstrates to the audience with US Forest Service statistics that there
are more trees in the US now then the 1700's, he is shouted down and not
taken seriously.

Didn't mean to deviate from the thread.

Thank you,
Bob Becnel

Limbaugh has *ALWAYS* said that he is an entertainer/broadcaster
FIRST. [e.g., "the purpose of callers is to make the host look
good"] That his profound political convictions [I disagree with
some of them, fwiw] have proven overwhelmingly popular [1 in 8
adults in Southern California listen to his radio program for at
least 15 minutes/week ﷺ an incredible cume!] is something that
he seems to find delightful. However, even his detractors admit
He is a very TALENTED radio personality.
And why are the two (entertainer, politics) mutually exclusive???

ﷺ SLMR 2.1a ﷺ I remember his last words: "A truck!"

TOMLONSON@wmich.edu wrote:
: But this brings to mind something that Rush himself has played fast and
: loose with: Is he primarily providing entertainment or is he a political
: commentator?

By his own admission, all Rush wants is to get as big an audience as he
can and hold on to it for as long as possible.

: When you compare the number of entertainment personalities that have done
: endorsements with the number of political commentators that do, I think by
: accepting the job in the Pizza Hut commercial, Rush is saying that he sees
: himself as an entertainer, for whom conservative politics is a shtick.

A number of years ago, Rush spoke at NAB in San Francisco. He did point
out that as a radio host, he was an entertainer first. This philosophy
is carried on in his admonision to his audience that his show is about
HIS opinions, not the issues. Rush had a schtick shortly after going
national where he built up the first caller as someone with a profound
affect on the host's attitude, and hence the whole show. The bit would
end with a big drumroll and the question to the caller: "do you wish to
accept this awesome responsibility, or will you pass it to the next
caller?" Surprisingly, many callers fell prey to doubt and passed, but
after a few weeks noone passed, and the bit was quietly dropped. Hence,
when the bit became predictable, it lost entertainment value. Other bits
and updates have found similar fates.

Kev.

There's a little more than just propagation delay on WBPR's audio. That 8 kHz line they use is actually a 56 kbps data line carrying MUSICAM-encoded 7.5 kHz audio. The encoding and decoding process introduces some additional delay, although it's probably closer to 30 milliseconds than 3 seconds.

At any rate that's the way it was when I visited the WBPR transmitter site last year.

Rogers Broadcasting - one of the major players in Canadian bradcasting (including cable systems) - acquired Ottawa stations CKBY (FM 105.3 - New Country) and CIWW (AM 1310 - Oldies 1310) when they purchased MacLean-Hunter last year. In the last couple of weeks they have made notable changes at both stations. At CKBY they introduced New Country - as oppossed to plain old country - and removed Ted Daigle who had been PD since the station began in the 70s and who made CKBY into one of the leading country stations in Canada (Ted, himself, is a so-so country performer). The description of the change was that Daigle would be advisiong Rogers 'on projects', but Daigle was not really a fan of NC and probable didn't fit in well with the new format. At CIWW Rogers made more drastic changes this week going to a satellite oldies (Good Time Oldies) service except for 4 hours during the AM drive. Even there there were changes as Geoff (or Jeff, who knows) and Mary Ann are now just Geoff. There is still some local news (presumably this is needed for CKBY, although both have always made regular use of Broadcast News - the radio news service of Canadian Press - to provide newscasts outside the drive and noon hours. CIWW never did impact much on ratings in recent years - I think it was always the lowest rated English station other than CBC's stereo (mostly classical) FM service.

YES, free radio fans, IT'S TRUE!!!
Al Weiner and the RNI crew are going back on the air!

RNI will be on WWCR's midnight to 1 AM time slot (Eastern time) on 7.435 shortwave starting on April 30 (American date). Their program will be aired once a week every Sunday night/Monday morning.

Please tune in, pass this on to everyone that might be interested, and post it on any radio-related bulletin boards you frequent.

73,

Anita Louise McCormick

Boy, Noble (or whoever the actual Mexican licensee is) must have some
SERIOUS juice with the federal govt. down there...The Mexican FRB has
been extremely reluctant to allow anything like that near the border
since the 1970s, when US licensees in San Diego raised hell with
Congress to stop that "unfair competition" (insert crocodile tears
here!)

By the by, even those "50kw" stations may not be: When I worked at XEPRS
the crew in Rosarito routinely fed 150kw into those 3 towers.

Hello World.....

I have a friend who works for a small Radio Station, and they are looking for
Software that will enable them to print a daily radio programme
schedule with a listing of Songs , Play length, Style etc.....

Hardware Used : GENTNER AUDISK (Audio Disk System)
MSDOS 6.2
3 SCSI HDD (Total of 45hrs Audio)
Serial Link to another IBM PC (Used for scheduler Software)

The Scheduling Software has to be able to Automatically Select Songs from a
database by a given criteria style eg.. REGE , ROCK, R&B and be able to
extract to another level which is by play time.

For example if you have 30 minutes to fill with rege songs, Rock or Metal

The program will look for songs in those categories then pick songs that will
play to the required time available then print a hard copy.

One other thing that is required is to be able to insert News on the hour etc.

Alan Wichman....

II>Most of you owe Howard Stern for making your job
II>a little easier, by opening a path for you. His
II>progressive ideas have made a lot of you popular
II>by providing you with material and ideas. Plus
II>he has set a basic management acceptance policy
II>through a correlation of shock value vs ratings.

Spare us, please! Howard may very well destroy many of the advances we've been able to make. Talking about breasts and penises on radio is hardly a quantum advance. One of the signs of a mature individual is his or her ability to integrate those organs with the rest of the body and see them as part of a functioning whole. Howard does schtick. Period. Nothing groundbreaking.

Howard is very good at what he does, but he ain't my leader and he ain't my idol.

II>He now faces a censoring battle beyond anything
II>the FCC ever tried to impose. It sure will be
II>interesting to see who wins. Remember, whether
II>you like him or not, it could be you in battle.

Actually, by broadcast standards this is a minor censorship battle. It just happens that this one is against a relatively well-known performer. Past censorship battles have been waged against radio evangelists where stations have been refused renewals.

Remember: Howard is in relatively few markets. Large ones, but few by network standards. Outside those markets he's relatively unknown. So let's keep this in perspective. I suspect there are local talents who have accomplished far more in the way of "opening paths" for performers.

If the highest accomplishment in the industry is to pave the way for bathroom humor, we need to pull the lever and flush it away.

Rich

From: Chris Carmichael <CCHRIS@cei.mhs.compuserve.com>
Message-ID: <3mdldi$do1@vixen.cso.uiuc.edu>
Source record: 33049

In Airwaves 1255, David submitted about TCI dropping FM stations:

>There is a possibility that this dropping of FM services may happen
>*systemwide* on TCI's other cable systems.

Money sucking weasel cable companies are dropping the FM band to make room for expanded television -- ya right. They are -- as in the case of Dimension [now COX cable], Cox Cable, and Southwestern in San Diego -- offering the DMX - Music Choice full digital audio service. When I first moved to Oceanside, I lived in a terrian that wasn't favorable to FM reception, and listened to the band via cable. But, someone thought of: "Let's get them to pay for the service" and DMX - Music Choice was introduced.

This -- and the availability of 12 [twelve] VHF and ten UFH stations is why I cut the cable.

From: nhmas@gauss.med.harvard.edu
Message-ID: <3mg5nc$9a2@vixen.cso.uiuc.edu>
Source record: 32956

And down the dial we go....

* Pyramid for Sale?

Pyramid radio group is apparently looking to unload its
stations in Boston and around the country. The investment
firm of Goldman Sachs has been contacted to find a buyer for Pyramid's
outlets in Boston which include Churban WJMN-94.5FM, CHR WXKS-107.9FM
and Big Band WXKS AM 1430. Pyramid's other stations are located
in Buffalo,NY, Charlotte,NC, Chicago,IL and Rochester,NY.

A buzz around town has Group W, owner of Boston's powerhouse WBZ AM 1030,
being seriously interested in Pyramid's FM properties.

* Matty in The Morning Everywhere...

On Moday, April 10th, Boston's most popular AM-drive personality
CHR WXKS' Matt Siegal introduced his schtick to other markets thru
stations in Auburn,Me, Providence,RI and Charlotte,NC.

Unfortunately, the syndicated markets will not hear Siegal's sidekick,
traffic reporter Judy Papperelli who abruptly left the show last month...
She's been replaced by Hank Morse who does an adequate job
of covering traffic but not quite in the same mix as Papperelli was..

Siegal's show, syndicated by SuperRadio, is expected to be in 15 to 20
markets by summer's end...

* ARS stock anyone?

Boston-based American Radio Systems, 13th largest broadcasting
chain(21 stations) in the country will go public later this month.
ARS' owner Steve Dodge expects to bring in around $50 million dollars
with the stock sale. ARS will still keep 52% share in the company.
ARS expects to add more Top30 market stations with all the cash
raised from this stock sale...

* WEEI, WRKO, WBMX cutbacks...

Both ARS' AM-sister stations, all-talk WRKO AM 680 and
all-sports WEEI AM 850, as well AC WBMX-98.5FM suffered
some serious cutbacks in their news/sports departments. WRKO
has cut down its news staff to 2 people. In a special deal,
3 ARS' news anchors/reporters, including Rod Fritz and Pat Carrol,
have been hired by Metro Networks. Metro which is about to launch
24-hour news operation will supply WRKO/WBMX with news updates.
All-sports WEEI dropped Metro's news updates a couple of months
ago. WEEI let go former Red Sox announcer(on WRKO) Dick Lutsk who

provided sports updates during Imus' morning show. Couple of WEEI producers were also dismissed. WEEI dropped regular Monday night football show with local sportswriters...In other WEEI news, very capable and entertaining Celtics announcer Glenn Ordway has apparently signed a new deal with the station. However, the wacky Celtics management is ready to nix the deal because it's not too happy with Ordway's open on-air criticism of this year's awful edition of the Men in Green. Ordway's color analyst, former Celtic, Jerry Sichting will leave after this season for the same position on Minnesota Timberwolves radio broadcasts....

* Sports Update :

So, the sports franchie situation for the next 3 to 5 years looks like this :

WEEI AM 850 has the Red Sox and Celtics[Red Sox get shifted to WRKO 680 during conflicts]

WBZ AM 1030 has NHL's Bruins starting next season. Also NFL's NY Giants who have a huge following in the Boston area will also be added to Sunday afternoon slate.

WBCN 104.1FM has NFL's Patriots.

* Sex Talk in the Air...

Chicago's radio sex therapist Phyllis Levy has landed on WRKO AM 680 from 10pm to Midnite. She bumps Bruce Williams who relocates to cousin-station all-business WBNW AM 590 from 7pm-10p.
Levy is also talking about syndication deal with ARS. In the future, she plans to do the show from her Chicago digs.[I was going to make a joke here, but on the second thought...nahhh]

WRKO's current line-up :

5:30-10am Whittley and Clapprood
10-12pm Jerry Williams
12-3p Rushhhh
3-7p Howie Carr
7-10 Chuck Adler
10p-12a Phyllis Levy
12a-5:00 Rushhh+Howie rebroadcasts
5:00-5:30 Jim Bohonana morning news show

WBNW line-up now looks like this :

6am-9a Bloomberg Info Radio
9a-12p Money Experts call-in show with Bob Glovsky and Rick Schaffer
12-2pm New England Business with Jeanine Graff
2-4pm Bloomberg Info Radio
4-6pm Risky Business with John Napolitano
6-7pm Bloomberg Radio
7p-10p Bruce Williams(syndicated)

10p-5a Bloomberg Info Radio

* Official ruling : Old voices, new station...

Infinity's WBCN 104.1FM has made an official announcement that
WBZ's AM-drive sports personality Gil Santos will continue to
handle Patriots broadcasts on The Rock of Boston. Santos' analyst
partner Gino Cappelletti will be back in the radio booth as well.
WBCN is also promising a new state of the art stereo advances
during its broadcasts. Two mobile parabolic mics positioned
on each sideline will enable the listener to hear a QB calling
signals and all the crashes along the line of scrimmage...Oh boy!
I hope we get to hear the play-by-play somewhere in-between :-)

-Mark

PS Will somebody please tell the Boston Globe that AOR WCGY 93.7 has
been all-70's WEGQ 93.7FM since Fall '94. I tried but they dont
listen...:-)

Bill,

It is true that the original format (developed by The Research Group and CBS) was ARRO as an acronym for All Rock & Roll Oldies. However, they found in perceptual studies that the public made no connection between the word "Arrow" (as it was pronounced on the air) and the format acronym. After that, it seems that Arrow has been used rather cavalierly without the format connection, though as far as I know, "Arrow" in that usage remains a CBS trademark.

William:

As far as I know, ARRO is correct, but since it's easier to remember ARROW, and since that has been the name for so many of the stations with that format, I suppose we have all come to know it as the ARROW.

It could stand for All Rock and Roll Oldies, Wilma (if it's the Bedrock station). :)

I've been looking around and have not been able to find an online
database of radio stations. All I really need is call/freq/city, but
anything more would be great. Stripped down version of NAB Yearbook,
for example.

E-mail (and post) if you can help.

Thanks,
Brady
(former) radio type person

[Moderator's Note: I dont usually do this, but I am attatching a FAQ
on this subject for the benefit of the many others who are also
looking... Bill

Periodic Posting:

==
FAQ: Where can I find a free database of US radio stations?
Where can I get information on radio station facilities?
==

The information on radio stations in the US changes constantly.
New call signs and owners, along with changes in facilities are
constantly being updated in the FCC files. Consulting engineers and
communications attorneys need accurate, up-to-date information,
information more accurate than the FCC's database itself.

Often the question is raised as to where on the Internet one can
find such a database of US radio stations. Usually the one
asking means "free".

Since the maintenance of such a database requires *daily* attention
to the information pouring out of the FCC, it is easy to understand that
it is a labor (and therefore money) intensive endeavor. Several companies
do exist to supply such data. Some distribute it by mail, others by
on-line computer. Such access has costs, and the data compilation is
copyrighted.

Is there a source for data on stations? Yes, several.

==

1. M Street Directory. One of the best annuals, this book contains
station listings for the US and Canada, format information,
and several ratings reports. Current cost is $42.95 & $3 S&H
It can be ordered by phone at 800-248-4242.

2. NRC AM Radio Log. Put out by the National Radio Club, a DXer organization, the AM Radio Log lists all the AM stations in the US and Canada. It costs $ 19.95 & $ S&H.

The NRC also produces a book of directional patterns for the AM stations in the country. This book is not available at the moment ... apparently it is being updated.

The main publication of the NRC is the DX News, a magazine listing changes in AM stations, and information about how to enjoy the hobby of DX listening. A one year subscription is $24; a sample issue is available for $1.00. There is also a monthly cassette version, with some of the news, and several features including a dial scan from a different city, an historical feature, and taped questions and reports from the field; a one year subscription is $25, a sample issue is available for $3.00.

A catalogue of all current products is $1.00.

Contact the NRC at:
National Radio Club
PO Box 164
Mannsville NY 13661-0164 USA.

3. The Broadcasting Yearbook. Put out by Broadcasting Magazine. This heavy book lists all the radio and TV stations in the US, Canada and Mexico, listing personnel as well as other station data. Allied and Trade orgranizations are included. This publication is expensive, well over $100, but can often be found at public library and university library reference desks.

4. On-line services such as Communications Data Services or Dataworld provide current information on stations, emphasizing the the technical facilities and current applications.

Cost is usually by "record" request, and can be set up for remote interrogation or reports mailed to clients. CDS is at 800-441-0034. CDS also provides free access to registered Ham Operators for part of their topo database. (email to rich\@comm-data.com).

5. PRS, licensors of the ID LOGIC radio system (a superset to RDBS, which identifies every AM/FM station in the country by call, location and format), use the M Street Directory information on stations and formats, and have created a shareware simulator of a car radio. The current version, id_na4a2.zip, is available via ftp from ftp.hk.net in the /shareware/prs directory and should be available via Fido shortly.
The shareware fee is $45.00, good for one year of updates.

6. CD-ROMs

a) the Ham Call Directory, by Buckmaster is reported as
having lists of the AM stations in the country. About $50

b) PerCon sells a Master Frequency File for $40. This contains
all the freqs/calls/licensees name/transmitter loc/ for
over three million assignme. (713-387c6-6015)

Check out something called " The CARD". It is two boards that go in your
PC &
it is Windows based. It does wave editting and will do the job. Most
broadcast distributors have it. If you can't find it let me know via
Email.

2756. Toronto's CFNY Promotion Backfires

Newsgroup: rec.radio.broadcasting
Date: 1995-04-12 00:00:00 UTC
From: bl058@freenet.carleton.ca
Message-ID: <3mg5nk$9ao@vixen.cso.uiuc.edu>
Source record: 32964

Reply-To: bl058@freenet.carleton.ca (Dan Stark)

Those of us at Southern Ontario's HTZ-FM are used to some good rivalry from our AOR competitors Q-107 Toronto, Y-95 Hamilton, and the like. But in a surprising move, Alternative CFNY pulled a strange one we haven't quite been able to figure out. It's a funny example of how not to do a promotion...

The Edgesters announced this morning that the "secret" location for ticket giveaways to their Live concert would be at 12 Yates St. in St. Catharines, the address of HTZ-FM. And sure enough, 3 hours later they rolled in with their minivan and jeep, and set up a canopy in the park next door to our white mansion. Now we had been tipped off about this prank almost a week ago, and were fully armed with a front lawn barbecue, balloons and banners, station vehicles and our 30-foot motorhome blasting the neighbourhood with, you guessed it, HTZ-FM rocking loud & proud. So much for live cut-ins on The Edge. And while the CFNY's cruiser guy did have some Live tickets to give away, the crowd that turned out seemed just as interested in the Tragically Hip stubs we offered over our PA for their upcoming Buffalo show. We also invited visitors to fill out a ballot while they enjoyed our barbecue, one of which would be drawn for Hip tickets later in the day. They'd just have to listen to HTZ all afternoon to see if we called their name. And HTZ-FM t-shirts...they were everywhere. In fact we had some made up for visitors just for this occasion...the HTZ logo across the front, and on the back:

CFN-Why?
There's Only One
Southern Ontario Station That
ROCKS!
97.7 HTZ-FM

What really puzzles us is why CFNY didn't bring along any air personalities for this stunt. It seems they left them all back in Brampton with their sound system, food and drinks, which explains why patrons who had been waiting since 7am for 'NY to show up were so happy for the good eats and entertainment we provided. And we must thank The Edge for the Live tickets they handed out to the people we planted in the audience. Looks like we'll be giving those away in the morning!

Some of the most satisfied 'NY listeners of the day: How about the two guys who hitch-hiked from Buffalo to Toronto in anticipation of the secret location announcement, only to find they had to turn around and come back to St. Catharines. Or the listeners who took a GO train and then a bus here to get their stubs. Unfortunately, CFNY was a little vague on how they would be forming the queue, and these people all got nothing, except

for some food and promotional goodies from us. At least it gave those listeners a chance to sample our station first-hand!

My apologies for the shameless self-promotion here, but it left us all wondering just what those Toronto promotions geniuses were thinking. I mean, we wouldn't even do an on-site promotion like this under *normal* circumstances without food, tunes and air staff on hand. And upstaging another station on their own turf, we'd certainly go in with both guns blazing! The sad part is, the 'NY promotions staff who showed up for this probably went back to Toronto boasting of what a great job they did, which is partly why I posted this here, to help keep te record straight. Their timing is strange...we've never gone after CFNY like we have Q107 or Y95, but as they say, you shouldn't wake a sleeping bear! <G>

>to spend days tracing to figure anything out...

You have the joy of owning the only unit I have found that cannot be simply modified. MTS is still in business, and a quick call to them will net you a COD order of their new microprocessor chip loaded with new 8 second software for $125. You cannot, however, install the new chip until July 1, since you will be in violation of the current rules if you do so earlier. You may contact MTS (Multi-Technical Services) at 919-553-2995. When I called a week or so ago, they suggested those needing chip updates get them soon, as supplies are likely to deplete quickly.

Our EBS mod service has been quite busy modifying other units for EAS compliance. I have noticed that the published mod. info that has appeared in the trades is less than complete or not totally accurate. If you are an engineer, you can probably figure out most of it. Recall that the FCC decode timing window is 3-4 seconds, and note that some published mod data results in decode timing that does not fit this window.

There has also been a disturbing amount of incorrect info about the new EAS rules. I admit is is confusing. Everyone should be aware that even if equipment is modified early, no short tones may be transmitted until July 1. I have already heard a major market station transmit an 8 second tone, complete with a revised EAS script. Good thing I'm not an FCC inspector!

As I have mentioned before in another post, there are some advantages to having your equipment modified by a mod service. We test all equipment against FCC type acceptance specs following modification. You wouldn't

believe how many units don't meet type acceptance! Sometimes its a simple repair, and we notify the owner. Most people that try to do the mods themselves don't have the required test equipment for confirming all of the type acceptance specs, nor are many aware that there even are specs to meet.

We also have developed mods for TFT equipment that gets the generated tone down to 8.3 seconds, where the published mods result in a somewhat longer tone. We even have found a solution for the new TFT 886 that gets to a shorter tone than the built-in 12 secoere even are
specs to meet.

We also have developed mods for TFT equipment that gets the generated tone down to 8.3 seconds, where the published mods result in a somewhat longer tone. We even have found a solution for the new TFT 886 that gets to a shorter tone than the built-in 12 second limit, and adds no parts doing it.

I mention all this just to show that there are mods, and there are Mods. Those of us that make it our business out of helping to get the job done right do have a slight edge.

>might require hiring another staffer. Perhaps others are considering the
>same kind of project and could also profit from your experiences.

Hi, J.P.! I'm a reporter/editor/anchor for KFBK in Sacramento, and the guy responsible for the station's E-Mail address (kfbk@crl.com).

I probably end up getting about a half-dozen-ish letters per week, but keep in mind that we do NOT promote the address at all on the air. How much mail you get depends on how much you promote it, I'd imagine. If we had promos running and the talk and news hosts mentioning it, I might be swamped. ;) It's been mentioned on the air very infrequently, usually when I'm on with one of the hosts talking about computer stuff.

A few suggestions -

1) Have form letters at the ready. At this point, I haven't needed it, but if you promote the address at all, you will. Just have a text file on your computer or your storage space on the provider's computer (depending on what kind of account you have) for various circumstances. Someone wants to tell the PD that Rush Limbaugh drives him nuts? Send it along to the PD, and pull up the "Thanks for your comment on Rush, it's been passed along to our program director" letter you already have stored. That'll take about 10 seconds.

2) Maybe one of your more techno-literate (is that a word? :) reporters, editors, etc. would be willing to take on the job, so you wouldn't have to hire anyone just to answer E-Mail.

3) What I do - store all mail under the appropriate person/show/department, then transfer it to whoever needs to see it. Any programming suggestions get printed out and given in bulk to the PD. Any schedule requests get printed out and given to the promotions director. Show hosts and producers get copied in the internal computer (it works better that way, at least for us).

4) I see you're on AOL. Unless you can manage to get a free promotional account from them, it might be better to hook up with a local Internet provider at a flat rate, or perhaps a trade for spot time. If the Learning Curve is too great for whoever has to answer the E-Mail, that might negate the advantages of saving money.

I think it's an invaluable tool, even to us, and we haven't figured out what route to take to promote it on the air yet. We're the only radio station in the market that has a public E-Mail box... TV'ers KXTV/10 (ABC) and KVIE/6

(PBS) also have addresses.

Hi Mike:

Hope all is well in sunny fla. tic is doing well..Morning guy is
Ray Dunaway, formerly of KMBZ KC, WFAA Dallas, KHJ LA..great guy, real
talent..
Beleive it or not, Steele, now 80 something, works one saturday a month,
5:30-10, playing the hits, right, stuff from the 40's, even 30's, the
remaining 80 year olds love it.
The dean of sports is hanging tough, doing his sportstalk
weeknights 6-8p.
Rush is and has been doing well since his debut in Oct. 92, he
averages about a 13-14 share 12plus and a 9-10 share 25/54.
The baseball thing could have been a disaster, most stations
have/had contracts that would have required airing the replacement stuff,
fortunately that's not an issue now.
Hope all is well with you, was down in Lauderdale a few weeks
back meeting with my voice talent, Mitch Phillips.
Thanks for the post and all the best.

From: richw@mks.com
Message-ID: <3mg5np$9b5@vixen.cso.uiuc.edu>
Source record: 32969

While making a "cross-border" shopping trip in the Buffalo area a couple of weeks ago, I ran across a Canadian FM station which apparently does nothing but broadcast tourist info and "factoids" about Niagara Falls and the surrounding area.

The most amusing aspect of this station (CFLZ-FM, 91.9 MHz) was its ID. Every few minutes, the station would announce its call letters in one of the following ways:

"This is C-F-L-Zed."

"This is C-F-L-Zee."

"This is C-F-L-Zed. Or, if you prefer, C-F-L-Zee."

"This is C-F-L-Zee. Or, if you prefer, C-F-L-Zed."

All four of these forms were used -- presumably to give American tour-
ists the "warm fuzzies" :-} as well as to satisfy Canadian listeners and the CRTC (Canadian FCC-analogue).

Actually, I'm not really sure what the CRTC requirements on commercial broadcast station ID are. If Canadian radio stations are required to ID themselves with their call letters every hour on the hour, then there are an awful lot of stations around here in violation of the rules. The CBC's radio and TV stations never announce their call letters at all, as far as I'm aware. And I believe Global (a Toronto TV station with repeaters all over Ontario) announces its call letters (CIII) only at signoff.

>That is interesting. Can any Canadian readers verify this?
>
That would have been correct until about one year ago when our governing body, the CRTC, cracked down on all stations. Legal call letters MUST be delivered once per hour. I'm not sure if it has to be near or at the top, but most stations put it there. Probably not because we're blessed with Newfoundland which is one-HALF hour later than Atlantic time (which is 1 hour later than Eastern time). I digress.

There is a station in Vancouver (CFMI-FM, and it's in a burb called New Westminster) who have to do any hourly legal id in English and Punjabi due to licence Promise of Performance. Funny thing is they are AOR and don't have to conform to a block of weekly programming in Punjabi anymore. Sounds very strange indeed. We are over regulated, but it's getting better.

Quick item here.

KCFX-KKCJ general manager Bill Newman is quoted in the April 15 issue of "Billboard" as saying KKCJ, playing smooth jazz since March 30, had applied for the call letters KCIY. The station identifies itself on the air as "106.5 The City."

This was part of an article noting the sudden pop-ups of smooth jazz stations in several markets (including Buffalo). Billboard, in my opinion, misidentifies the format as "adult alternative."

>carrier frequency, and is VERY noticeable. The normal audio channel
>appears to be about +/- 4kHz wide.

The signals are wide for the test, yes. They are cramming a lot
of info into this signal, including a RDS feature.

>I think it will be VERY unfortunate if the FCC approves of this
>transmission mode, as it will definitely interfere with other weak
>stations on adjacent channels.

When approved, the signal WILL NOT interfere with normal
AM broadcasts, although there may be interference with AM stereo
signals. The system is designed to allow ordinary reception of AM
analog and reception of AM digital on old AM analog receivers.
New digital recievers will also recieve the old AM analog
signals as before, but the AM digital signals will be much higher
quality, with no fadeouts or static, and RDS data to boot.

Please give the system tests a chance. Believe me, neither
the FCC nor the NAB is going to let this or any other system affect
current AM broadcasters.
Ed

--
2nd post, same author:

Hello, everyone;

USA Digital will be testing its new digital In-Band On-Channel
(IBOC) AM transmissions this week at the NAB convention in Las Vegas.

The tests will be made on 1660 kHz, in the expanded AM band.
While the tests are actaully being made to determine the feasibility
and acceptability of digital in-band AM in metropolitan ground-wave
environments, the sky-wave transmissions may have an ENORMOUS impact
on the feasibility of this technology on HF or shortwave transmissions.

If anyone is able to receive and log this sky-wave signal, I
would very much like to receve any data you may wish to share. I will

pass this data on to USA Digital, giving full credit to those logging
the signals.
Please be aware that this is a *test* transmission. The signal
is currently about 20 kHz wide (which is one reason to test up in the
expanded bands), so do not be alarmed at the wide signal. It will be
trimmed down to fit the normal channel size when and if it becomes a
reality.
Thanks for all your help.

I was toying around with this idea for a while. Being a former radio guy who now works primarily with computers and data feeds, I thought, it might not only be feasible to set up a voice/talent data feed to stations across the country, but possibly profitable. The idea would be to get the station to send some local news info for the jock to work with and possibly the stop set info and have the jock record his 'localized' show onto disk in one session. Then the feed would be downloaded to the target station's computer along with the control signals, if needed. The talent could then move on to the next station, etc. Some of the generic bits could be easily prerecorded and integrated into all the feeds so that the total time allocated to local segments would not be too demanding.

I talked with most of the technical reps for the radio automation software companies at the LA trade show, and most of them agreed I could make it work with _their_ system. (Actually, it's pretty easy to get agreement from the technical types because _all_ software enhancements can be done "in a couple of days" It's an axiom of computer programming. Not, true, mind you, but you couldn't prove it by any software engineer I've ever talked to. (OK, that includes me, too)).

So I started to work on the software specifications and piece together the components when my 'real' paying software gig demanded my time. Suffice to say, it's digitally doable. (Plus, I think I've used up my lifetime quota of software spec work.)

Q101, the repetitive modern rocker in Chicago stopped playing music Sunday evening to devote the entire evening to talking about suicide...one year (more or less) after Kurt Cobain offed himself. They broadcast a 900 number for donations to a suicide prevention program sponsored by a local hospital (Rush Presbyterian St. Luke...they have an excellent reputation and a strong commitment to public service in the community). This was very unusual programming for the station, which usually features vaccuous jocks playing Green Day and Pearl Jam and Weezer 'til you want to puke (and I actually like this kind of music!).

Martin J. Slover (indigo@crl.com) wrote:

: The FM was definitly back in operation as of November of '78 as WWWK with
: Doubleday owning it. I can distinctly remember being in 8th grade at
: North Kirkwood Middle School and listening to it :). I'll do some
: newspaper research do verify this as well...

I can't vouch for the date, but I do remember the call sign --
apparently, it was an attempt to "sound like" KWK, but since the FM was
licensed to Granite City, Ill., they apparently couldn't get the call
sign KWK-FM (since the FM call would have had to start with "W"). That
led to some really ugly-sounding station IDs:

This is KWK, St. Louis, and WWWK, Granite City.

Try saying that one ten times fast.

On the other hand, it is apparently the case that the FCC no longer cares
which side of the Mississippi river the stations to which it assigns W and
K calls are on. For example, the old WRTH (590) is now KFNS, WOKZ-FM is
now KNJZ, the old WIL-AM (1430) is now the *new* WRTH, even though as a
St. Louis station, it should have a "K" call (as when, years ago, WIL-FM
briefly changed calls to KFMS), and what was KWK-AM (and is now KRAM) was,
before being KRAM, WKBQ-AM.

So when will we start seeing "K" calls sprout up in New York, and "W"
calls spring up in Los Angeles?

Lou, re:

> My guess as to why roof antennas are
> horizontally polarized is so they won't look "funny" when compared to
> regular TV antennas. Also, there's less interaction between the
> horizontal antenna and the vertical metal mast holding it up.

The horizontal antenna (or at least one with parallel elements) can also null better at 90 degrees from the signal, right?

I have been told that, beyond a short distance from any polarized transmitting antenna, the polarity pretty much goes away. One engineer told me they experimented with both horizontal and vertical polarization on their booster (which has a yagi antenna) and found little, if any, difference. I also believe the shared Mt. Diablo booster (for many SF FMs) is vertical-only, no?

> BTW, there's one exception to the FCC's rule of vertical power not
> exceeding the licensed horizontal power. TV channel 6 is on the lower
> edge of the FM band. Non-commercial stations in the lower part of the
> educational band in areas where channel 6 TV exists are sometimes
> licensed for vertical only polarization or for operation with more
> vertical than horizontal power, to minimize interference to channel 6's
> horizontally polarized signal.

I didn't know that. (Hmmm.) But I'm searching my database for vertical-only noncomm stations in CA. Can't find any that aren't translators or boosters.

I notice when I'm in Europe that many local "translators" for national "stations" on FM are vertical-only, too. Easier to get non-directionality, I suppose.

Can't let this post pass, either, without a positive word on diversity antennas in cars. We have one in our Infiniti and it's wonderful. I don't know if it has as much to do with polarity (the outside antenna is vertical, and the window antenna is horizontal) as it does with the electronics, but it sure takes a lot of the hash out of driving down, say, 280 on the Peninsula.

Things starting to dry a bit up at the transmitter? Can you ford (pun intended) the slough?

Doc

Here at KYCW-FM (96.5Mhz, Seattle, WA) we use a circularly polarized antenna with the power split evenly between the two polarizations. Years ago FM stations were allowed only horozontally polarized antennas (which are still legal). Then they were allowed circular or cross-polarized antennas. NO station is allowed vertical only polarization.

The reason most outdoor antennas are horizontal is a throw back to the old days when horizontal polarization is all that was allowed. The vertical polarization was allowed to be added when FM in a moving vehicle became more prevelant.

2779. The need for Unions in radio

Newsgroup: rec.radio.broadcasting
Date: 1995-04-12 00:00:00 UTC
From: jgallagh@interserv.com
Message-ID: <3mg5o7$9c7@vixen.cso.uiuc.edu>
Source record: 32987

Although I am very active in Republican Politics here in Mass., I am strongly of the opinion that there is still a place for unions (organized labor) in certain industries, like the radio industry.

Radio is a bizarre field and although I have been out of radio for more than a decade, I look around and see people in their 40's and 50's who are unemployed...often fired for no reason at all.

We all know there is little job security in radio, but it is a bit ridiculouse when people are fire indiscriminately...at some GM's whim.

The other day I heard of an FM in greater Boston who fired a chunk of their staff in one swoop. A female newsperson friend was recently canned after ten years at the same station (I guess they grew tired of her voice).

Compounding the problem of arbitrary firings is the trend towards syndication. Remember, for every station picking up a feed of Rush or Stern, or anyone, that's one less on-air job for someone locally.

I own several different businesses (non broadcast) employing over 200 people and I bet I haven't fired more than 2 or 3 people in the past five years. In radio, I have seen entire staffs fired with little or no severance.

I worked for a good number of years at WAAF/WAAB (14Q) in Worcester, Massachusetts until the early 80's. Under the ownership of George Gray in the 70's I saw literally, hundreds of people go through those two stations and most were fired for no reason at all. Even Forrest Sawyer of ABC News was canned in the owner's fit of rage. !!

The only solution for this b.s. is unionization among the air-staff and some sort of contract that provides for job security if the job is being done. I have seen too many lives ruined because of irrational behavior on the part of the GM or owner (or PD).

I still have a lot of friends all over the country in radio and not a month goes by where I don't hear about someone losing their job, often no fault of their own.

It turned out very good for me getting out of radio as I grew several businesses into multi million dollar enterprises. But I loved the business as a kid (listening to WRKO the big 68) and it's unfortunate that I had to seek my fortune outside the industry.

I have honestly never seen an industry where there are so many lunatics owning radio stations and which in turn control/ruins many lives.

It might be interesting to see about court suits in some of these cases where people have been canned due to no fault of their own. Just the

other day I heard from a very talented announcer in Boston who is facing foreclosure after being fired following a format change.

Since these licenses are so valuable, it seems they should carry with them a certain percentage of the sales price to handle severance pay to innocent people who wind up on the unemployment line as a result of the sale. Of course the true power in radio rests with the sales staffs, and secondly the advertisers, but unfortunately the latter are never organized and the former only rarely.

Back in Jr. High when I did a lot more SWLing than I do now (I'm 45), I used to listen to them quite a bit. Their first call stood for World Radio University for Listeners, although by the time I caught them (ca. 1962) they were music, news, and commercials.

I remember they had an ABC affiliation, although they subbed their own spots for the network ones during newscasts. They targeted to Europe, Africa, and S. America in English and a little Spanish with pop music, news, and programs for hobbyists.

It has been my (extensive) experience that stations which place their legal ID's at :45 or :50 and/or between spots are 'wannabe' stations, licensed to suburban locations and which don't have the 'central city' city of license to promote proudly at the top of the hour. Therefore they tend to bury it, or obscure their true city of license via the use of reverb or some other such audio hijinx.

After several days of receiving KUSA between 4 PM and 9 AM local time in San Diego with varying levels of signal intensity (ranging from very good to poor quality) I was quite surprised to be receiving a very faint KUSA signal here at HIGH NOON!! (actually 11:55am but close enough) I recognized the signal because of the music program. They played "Sukiyaki" by 4 P.M. (the group not the time) followed by "Money Doesn't Matter Tonight" by Prince. At that point I lost the signal completely again and as of this evening at 9:30 PM I hadn't heard anything from KUSA. I use a Saturn factory radio in my car (I assume is made by Delco).

: Quoting More crossposts of interest:

: New digital recievers will also recieve the old AM analog
: signals as before, but the AM digital signals will be much higher
: quality, with no fadeouts or static, and RDS data to boot.

I'd like to read between the lines here. "No fadeouts" might be true, but how about abrupt chopping as is typical with other digital services such as DMX, some satellite feeds, and CD players. How is it possible, given the tendency of signals to fade and pile up on the AM band, to offer a service which will work consistently except merely near the city of license? Or is it that the intent, to make digital radio a short-distance thing like FM?

On my kenwood TS930 the main carrier was 40 over 9 and the digital side
bands were S9 for about 20Khz above and below the main signal. One thing
I found interesting was that the digital noise dropped off instantly as
soon as the reciever was tuned 20Khz above or below. I also noticed that
selective fading of the carrier would cause a "wooshing" sound as the
digitial signal became audible during the fade.

Reply-To: mh5260@ARK.SHIP.EDU

This morning (4/12), I heard KUSA 1660 AM relatively clearly here in Central PA. They were talking about the fact that they were at the NAB and the\ sponsors of the broadcasts. They went into a classic rock song and then they were gone. This was at approx. 5 AM. I'm really glad that I finally got to hear the station, especially on the other side of the country (a little fading, but the signal was good)!!! My question: Is there a schedule for the station and when are they on the air? After 5 AM this morning, they just weren't there. Any help is appreciated.

Sincerely,
Mike Hale

From: searls@batnet.com
Message-ID: <3min7p$7ke@vixen.cso.uiuc.edu>
Source record: 32859

So how did it go?

There was an extensive report on the Broadcast Professionals Forum on Compuserve, which I'll summarize here:

1) The demos were "impressive" on the whole.

2) It was hard to do a qualitative evaluation of the AM system because the analog receiver was "awful," and on the FM because a home tuner rather than a more robust automobile receiver was used.

3) The presence of a spectrum analyzer display in the "bus" was very helpful.

4) One of the demonstrators said "AM doesn't have multipath," which the reporter found nearly unforgivable.

5) On AM, the analog sounded bad and the digital sounded good -- as expected -- but he would have liked a better-sounding analog tuner to make a fair comparison. He also would have liked a more challenging course, farther from the transmitter, and with more overpasses.

6) The different routes taken by the AM and FM demonstrations made him suspicious -- because the FM sought difficulties that the AM did not.

7) The FM demonstration was wonderful, with lots of challenging sites that provided difficult multipath to overcome, especially among tall buildings. Lack of "picket fencing" was a big difference from the analog. His only concern was that the analog receiver "sounded wider" than your basic car radio, making things sound worse than they might really have been. But he thought the digital system sounded very robust. In the worst cases, when the error rates were high, the bandwidth sounded reduced, like older analog "blend" circuits that would roll off the high treble. He also didn't like the way the mute worked when it crashed on a fade: the signal returned with a "honk." And he didn't think the demo showed whether or not the digitial information degrades analog performance on some receivers.

8) The "punch line" was that National Semiconductor already has a deal to make the chips.

Data: the AM was broadcast over "KUSA," a station set up just for this purpose at 1660 with 10kw, tranmitting from an old AM station's site about 5 miles out of town; and the FM was broadcast over KUNV at 91.5, which is 15kw at 1100 feet above average terrain -- a mountaintop site outside of town.

So. Responses? Any other input (or output, from folks at USA Digital)?

2792. Re: Rush Limbaugh for Pizza Hut

IB>I wouldn't use the word shtick. Shtick belittles conservative politics.

Bob,
Sorry. But what Rush does is schtick, pure and simple. There's nothing in Conservative politics that's sacred. It deserves the same politically satiric treatment any other abberation does.

IB>conservative politics, the content is to be judged by the audience as
IB>credible etc. If Ted Danson says we have only 20 years to live (10 years
IB>ago) the mainstream media never questions that, however, if RUsh
IB>demonstrates to the audience with US Forest Service statistics that there
IB>are more trees in the US now then the 1700's, he is shouted down and not
IB>taken seriously.

Rush has been shown to be very inaccurate when he relies on newspaper articles to support his point of view. There's no research done to authenticate the story. When confronted with an error his response is: "don't you people have anything better to do?"

As I recall, in the 1700's the US was composed of only a few states. Today, the US' land mass is far greater. However, the number of trees on that larger land mass in the 1990's, compared with the 1700's is less. Also, the regrowth isn't natural regrowth. It has far fewer species than would naturally occur.

As for Ted Danson, I doubt many take him very seriously as anything other than an advocate for the environment. I suspect most people take Danson far less seriously than dittoheads take Limbaugh.

Perhaps I'm just a natural cynic, but I can't see any political persuasion as unworthy of being belittled. We've come down to a situation where we feel there's only one way to solve a problem. That way seems to always fall squarely with our political persuasion with little room for other options.

An "us vs. them" mentality has never solved a problem. I don't expect it to work this time, either.

Rich

May I please add one thought, which has been eating away at me for some time?

Many Rush detractors have indeed said that you gotta admit, he's very funny.

Who thinks this? Political pundits and radio people. Not to mention the snarling, sneering, vicious, blue-blazered crowd in his TV audience, who guffaw 40% too loudly when Rush puts up a slide of Hillary, caught on the fly with eyes shut and mouth half-open.

NOT my idea of COMEDY critics.

>From a purely comedic standpoint, I DON'T THINK RUSH LIMBAUGH IS 'FUNNY' !

[Moderator's Note: Mr Limbaugh's 'humor quotient' has been on the decline for quite some time. In the beginning he was funny, and that made him popular. Now, the few jokes he does use are much akin to 'laughing at the cripples'. I agree that these things are not funny. He has become very predictible too. Sad, because he was an entertaining fellow. He has always regarded himself first and foremost as an
entertainer/broadcaster. He makes no secret of that. It happens that the
entertainment he provides is political commentary, satire, humor, parody,
etc.

I finally saw the commercial the other night. I thought it was great.
He/they poked some fun at Rush about always being "right" and then he eats
the pizza wrong. Nothing offensive at all. Ya poor lefties out here need
to lighten up and learn how to laugh; you're starting to sound like the
Don Wildmons of the world who get offended at every little thing....

>Because they know that with in a given format, heavy
>air play = "Ooo I like that" = sales.

Not always. Ever hear the term "turntable hit?" That's a record that gets tons of airplay, and sounds great on the air, but does not sell, despite the fact that it may perform well in call out research.

While lots of promotional dollars can expose a record to lots of people, it can't make them buy it. No amount of money can turn a stiff into a hit. Ther are many examples out there of artists who received big promo pushes, and went absolutely nowhere.

If it was true that lots of airplay guaranteed lots of sales for a record, you'd see radio research companies and consultants closing up shop all over the place. Radio wouldn't need them, as everything in rotation would immediately become popular.

For quite some time I have been interested in the possibilities in starting a new, or, purchasing an existing dark 3 - 10 kw FM. (I know of two dark ones in our area.) However, I have several obstacles, which I am hoping the readers of this forum can help me with.

First of all, experience. Since a major amount of experience in the field would, of course, be a prerequisite (since I would like to actively manage, instead of making this a speculative venture), is sales, on-air, or engineering experience preferable for management abilities at an ownership level in a small market station?

Are there any new allocations being made available by the FCC on FM? Are they by petition, docket, or are there any open existing allocations left?

Would 75 to 100k in financing get a moderate small operation off the ground, or, am I out of line?

And, finally, (before I loose your interest by rambling on), why can't I seem to get any information on broadcasting in the book stores or libraries that is less than twenty years old????? :) I would be interested in locating publishers / magazines / trade journals that would at least give me a good feel so I know if I'm even approaching this thing properly. I feel as if I'm wasting my time with the out-of-date information I've been able to accumulate.

>think on the air.

I don't agree. I have listened to many a Steve Dahl
show. And many a Steve and Gary show too. I have
heard this used as a basis for argument sake and
it is my opinion that Howard Stern is a completely
different type of Air Personality than Steve Dahl.

I am not here to defend or promote Howard Stern.
There is a seperate newsgroup for that. It just
irritates me to see his industry sluff him off
instead of respecting him for his achievements.

By way of fairness, Rich, it should be noted that you're in competition with him, not only with WOR itself but providing syndicated talk programming of a very different stripe. That doesn't make your opinion any less valuable or relevant, but for the benefit of those who aren't aware...

For what it's worth, I think Howard HAS broken ground, that he is a terrific satirist, and I'd prefer his show to the type of shows that you produce... but there's plenty of room for both, and no reason not to support the right of both to speak freely. No need to flush anything away...

>Past censorship battles have been waged against radio evangelists where
>stations have been refused renewals.

I'm not refering to Infinity's current battle with the FCC regarding
bodily functions and pubic shaving that were alledgedly discussed on
the air by Howard. The current battle involves a rather large group
of angry Hispanics who are going to do everything possible to have
Howard Stern removed from the airwaves. For what? For playing some
of Selena's music during a news story about her murder and additionally
dropping one gunshot sound effect into the mix. The Hispanics want
him removed for what they are calling an 'indecent and obscene act.'

>If the highest accomplishment in the industry is to pave the way for
>bathroom humor, we need to pull the lever and flush it away

A small percent of The Howard Stern Show is bathroom humor. The man is a
brilliant entertainer and interviewer. He is quick witted and
interesting.
Some of he best comics in the world consider Howard Stern a genius. You
may not enjoy his style and material, but the numbers prove that most do.

I agree...in fact Rush Limbaugh credits Lujack for shaping *his* style...
but I maintain that Lujack owes a debt to Biondi, who can *still* be
heard evenings at WJMK, Oldies 104.3 Chicago...and check out Cruisin'
1960 for some *classic* Biondi over WKBW, Buffalo (you can hear him
hawking Wardynski sausage "don't give me that baloney...I want Wardynski's"
and explaining how to shave during a Gillette commercial. This is
classic top 40 by one of the gods of rock'n'roll radio...and his pick
hit of the week was "Angel Baby" by Rosie & The Originals...gee, I
wonder if it'll be a hit? :) :) :)

Source record: 32874

jgallagh@interserv.com writes:

>We all know there is little job security in radio, but it is a bit ridiculouse
>when people are fire indiscriminately...at some GM's whim.

Radio is show business. Stations live and die by the ratings, and the people responsible for maintaining those ratings have to do whatever their instincts tell them. I agree that most of the time these people seem out of control, but someone has to be responsible for keeping the station's audience.

If it makes you feel any better, the owners enjoy no more security than anyone else. The employees are always in danger of losing jobs; the owner is in danger of losing his ass. Gone are the days when a radio station was an automatic parlay into instant wealth.

>The only solution for this b.s. is unionization among the air-staff and some
>sort of contract that provides for job security if the job is being done. I
>have seen too many lives ruined because of irrational behavior on the
>part of the GM or owner (or PD).

I don't understand how this could possibly work. If the ratings of the station are sinking precipitously and the owner or GM needs to freshen up the act, is he supposed to keep all of these "job protected" people on hand in the style of firemen on diesel-electric trains? If one wants "job security", the performer's side of the microphone in radio is not the place to find it.

>I still have a lot of friends all over the country in radio and not a month
>goes by where I don't hear about someone losing their job, often no fault
>of their own.

People lose their jobs all the time in every industry through no fault of their own. If a company does not "make it", all the union contracts in the world will not save the jobs that are lost. If a performer is not "making it", no GM or owner could possibly be expected to keep him on.

>It turned out very good for me getting out of radio as I grew several
>businesses into multi million dollar enterprises. But I loved the business
>as a kid (listening to WRKO the big 68) and it's unfortunate that I had to
>seek my fortune outside the industry.

Come on now! If this is true, then you know perfectly well that radio is not like any other business. I am a broadcaster, first and foremost, but I have my fingers in other pies. Anyone attempting to equate broadcasting to other businesses is either inexperienced or viewing the world through colored glass.

>It might be interesting to see about court suits in some of these cases
>where people have been canned due to no fault of their own. Just the
>other day I heard from a very talented announcer in Boston who is facing
>foreclosure after being fired following a format change.

So, hypothetically, what does one do with a classical music announcer when
the format changes to classic rock?

>Of course the true power in radio rests with the sales staffs, and
>secondly the advertisers, but unfortunately the latter are never organized
>and the former only rarely.

I don't know what stations you have been with, but at almost every station
I have come across, the sales department runs the show, first and last.
Talk to any sales manager (who is usually in an office with oppulence
second only to the GM's office) and you will find out that the sales
department IS the radio station. Oh, yes, they do like to acknowledge the
little people like the air staff and the office staff.

Engineering? What's that? Oh, you mean that expense we haven't figured out
how to eliminate yet...

Radio is a different industry. Unions are not an answer.

2807. The need for Unions in radio

Newsgroup: rec.radio.broadcasting
Date: 1995-04-13 00:00:00 UTC
From: tford1010@aol.com
Message-ID: <3min86$7l3@vixen.cso.uiuc.edu>
Source record: 32875

Hi John,

Ty Ford AFTRA and SAG member here. I worked at radio stations from 1969 to 1986. My last gig was at AFTRA-organized WIYY/WBAL in Baltimore. I now make my living doing voice and production work for radio, tv, ad agencies and for corporate/industrial video clients. All of my talent work is AFTRA or SAG.

The strength of these unions varies from market to market and from shop to shop. One of the biggest problems occurs when someone is hired from a small non-union facility to a larger market union facility. Once they get there they have to join AFTRA. Most have never had much to do with AFTRA before, and feel that the initiation ($750), is a lot to pay for something they don't know anything about.

Management is very helpful in saying things like, "We don't like 'em either kid, but you gotta pay the goons or you don't get on the air." What the new hire doesn't realize is that the great salary they got, the working conditions and the severance package has been due to YEARS of AFTRA negotiations.

Getting these folks to get involved in their own local is tough to do. Most people are really passive, and expect the union to do something for them, yet most people never bother to do anything about it.

The BIG SECRET is to get involved. You also need to have the entire staff to be willing to get involved. That's one of the reasons it's called a UNION.

Many anti-union people read this board and are prone to bad mouthing the union, and (in truth) there are times when there are some problems. The biggest problems usually occur when people expect AFTRA to read their minds.

Please let me know if you would like to know more, or talk more about it.

Regards,

Ty Ford

I'm sorry if this has already been covered here, but I was wondering what was up with WOWO-FM 103.1. About a month ago I was in Fort Wayne and was tuning around on the dial and heard what sounded like album rock on 103.1. Next stop at WXKE-FM 103.9 brought the exact same programming, so I figured that WOWO-FM had been sold or something since it was simul-casting WXKE. If this has already been covered, please e-mail me about any details. If not, please post. Thanks a bunch...

The station was WRUL (Radio New York Worldwide) and was a CBS affiliate during the 1960s. CBS, in fact, listed them in their network affiliation chart as their "worldwide affiliate". Later they changed call to WNYW. During the time I listened they seemed to have a fairly full load of spots, most notably cigar and soft drink accounts. The station now is known as WYFR and is now located in Florida, supposedly to serve Latin America (in English?)

Here are the ratings for fall 1994 for the Toledo Metro Market.

Arbitron Watch
Here are the top 10 stations, according to the latest arbitron
ratings results for the Toledo Metro market. The numbers are for PERSON
12+, Monday-Sunday, 6AM-Midnight, based on the results of the fall, 1994,
AQH ranking by share (IP means increase, DN means decrease since summer '94).

1. 99.9 WKKO (K-100) Country 12.8 [UP]
2. 92.5 WVKS (Kiss-fm) Adult Contempory 8.2 [DN]
3. 104.7 WIOT Rock 6.8 [DN] Tied
3. 1370 AM WSPD 6.8 [DN] Tied
5. 101.5 WLQR Soft-Rock 6.6 [dn] Tied
5. 105.5 WWWM (3WM) Soft-Rock 6.6 [UP]
7 94.5 WXKR Classic-Rock 5.1 [DN]
8. 93.5 WRQN Oldies 4.2 [DN]
9. 106.3 WBUZ 3.8 [**]
10. AM760 WJR Talk 3.8 [DN]

** Station, not previously rated.

I made a mistake at top. UP means an Increase.

I think ALL of us would not argue with the fact that it's what the listener HEARS and WRITES down...(those user-friendly diaries). Why mess with it? Why bother "training" a listener to write "ARRO" when *you know* they'll write down "ARROW" 999 times out of a thousands no matter how many times you tell them how its *really* spelled. "Arrow" insures you get the credit. Still...I'd love to see those diaries in Arrow markets...bet you there are a few people who pride themselves on writing down "arro" (We'll call them Straight Arrow's).

: signoff.

: Rich Wales <richw@mks.com>
: Kitchener, Ontario, Canada

In Vancouver, we have a TV station who goes by "BCTV" (it's our CTV affiliate). But, if you look in any international radio callsign book, you'll notice that Canada doesn't have any allocations for callsigns beginning with "B". (I believe we have CF-CK, VA, VE, VO, VY, and some X- calls, but not "B"). So, I wonder what BCTV's real callsign is? And, correct me if I'm wrong (it's been a while since I looked up anything like this), but most CBC stations use callsigns like CBUT (Vancouver) or CBLT (Toronto) or CBMT (Montreal), etc. Again, Canada doesn't have allocations for calls beginning with "CB" (at least, the last time I check, which was admittedly several years ago and things may have changed). What's up with that?

Hi Terry,

Most of the "edit problems" I ran into were the result of a disk that was too full and had been used a lot. Like a regular hard drive, the disk can require optimization at some point. Even if there is a minute of space, it's spread out in tiny chunks all over the disk. The hardware can't keep up.

Best thing to do there is to stream the good cuts over to a fresh MD, reinitialize (erase) the old one and start over.

Regards,

Ty Ford

You have an opportunity every Sunday from 4:00pm to 6:00pm PST to promote your music in the Pacific Northwest. If you are from the Pacific Northwest or will play in the area any time soon, call in Doc Wilson's Local Music Show: 503-222-5539. The 2 hour show is dedicated to promoting and supporting music in this area. The show includes talk and music. It is carried live by KKEY 1150 AM which primarily covers the Portland, OR and Vancouver, WA areas.

triadradio@aol.com wrote:

"Does anyone know how the Arrow in LA is faring? The station that started all this brouhaha should be a heck of a barometer."

The original Arrow in LA (KCBS-FM) has performed decently in our recent surveys, although not nearly at the level it did when it debuted. Our Winter 1995 report shows Arrow as the number 15 station on a Persons 12+ basis, garnering a 2.6 share. On a 25-54 basis, KCBS comes in at number 8 with a 3.8 share. (Please note that when the format debuted, we reported that the station tied for first place 25-54 after its first book.) Hope this helps...

If my arithmetic is correct on American Radio Systems' planned public stock offerring, that puts a value of only $ 100 million on the entire chain.

Seems awfully low when I heard that an am-fm combo in Chicago is reportedly going for $ 60 mil.

Of course, if they're laying off newsmen, it tells you something about the bottom line (or lack thereof).

Rumors are rampant that Whitley-Claprood are about to be jettisoned although no-one knows who or what will replace them (probably something syndicated no doubt to cut costs).

Hottest rumor (which I predicted long ago), Boston is soon to lose one of its two FM country stations.

Hint: the one on the right side of the dial will be the one to meet the Grim Reaper. Who the hell's crazy idea was it to take two outstanding announcers like Loren and Wally and have them play cowbody music?

Note: Harry Nelson from the other country station (the one which I predict will survive) is an outstanding radio talent and a great great guy. I met him recently with Reba McEntyre. Radio fans will remember him as a 23 year old rock jock on the Big 68, WRKO back in the 70's . Radio needs more people like Harry.

Note 2: Would somebody please tell WBZ (newsradio) that Paul Harvey's The Rest of the Story is not NEWS. Why do they need to carry this in drive-time? Also, the news promos BZ is running are very demeaning and poor productions (question: what is Rawanda, who is OJ...no thanks, just coffee). The top of the hour ID ("pumping out 50 thousand watts of power...") also sounds like a small market station.

John G.

If you check you'll probably find that BCTV is a network and it
does have a "real" Canadian I.D. The same thing happens on the East
Coast with ATV (which is affliated with CTV). They always identify
themselves as ATV but each of the stations do have calls letters
following the Canadian form.

The CBC have a special agreement with a South American country
(Brazil? Chile?) to use part of the CBxx set of calls. This is why all
CBC radio and tv stations have calls of that nature. No other
broadcaster in Canada is allowed calls in this range.

I grew up in Tacoma, WA, where our local edition of TV Guide listed
several Canadian stations from Vancouver and Victoria. BCTV on channel
8 was listed as either CHAN-TV or CHEK-TV (one was in Vancouver, the
other was channel 6 in Victoria, and I can't remember which set of
calls went with which station--it's been a lot of years)...
If you need to know which set of call letters is currently correct,
just call someone who lives on the other side of the border--odds are
the Western Washington Edition of TV Guide still shows their call
letters

I believe that the legal callsign for the BCTV station in
Vancouver is CHAN

>And, correct me if I'm wrong (it's been a while since I looked up
>anything like this), but most CBC stations use callsigns like CBUT
>(Vancouver) or CBLT (Toronto) or CBMT (Montreal), etc. Again, Canada
>doesn't have allocations for calls beginning with "CB" (at least, the

>
Most of the CBC stations still use callsigns that begin with CB,
which in fact is assigned to Chile. They are seldom used on
the air in the CBC radio operations however (and in the TV operations
for that matter).

In most markets in Canada, the CBC calls go like this:
Take Calgary for an example:

CBC Radio has call CBR
CBC Stereo has call CBR-FM
CBC TV has call CBRT
CBC French radio has call CBRF
CBC French TV has call CBRFT

There are many exceptions to this system however. In Toronto,
the English stations (radio and TV) are CBL, CBL-FM and CBLT.
The French TV station is CBLFT however the French radio stations
are CJBC and CJBC-FM. Strange thing about this is that CJBC was
orginally CBY. Go figure. CBY is now used for a station in
Newfoundland (Corner Brook?).

Calls (legal) and frequencies for all CBC radio stations
(all four networks) are available from the CBC www server:
http://radioworks.cbc.ca/

2832. Dublin's FM104-New Q's over future

Newsgroup: rec.radio.broadcasting
Date: 1995-04-14 00:00:00 UTC
From: 91361516@vax1.dcu.ie
Message-ID: <3mln0s$s4l@vixen.cso.uiuc.edu>
Source record: 32890

UNCONFIRMED rumours in Dublin broadcasting circles indicate that all may not be well at FM 104, by far the more imaginative of the Irish capitals two main commercial radio stations.

Although the station reported its first ever profit for the year ending June 1994, recent JNLR listenership surveys have once again exposed its weakness compared to its dominant commercial rival Classic Hits 98 FM. Despite frequent format changes of various degrees of significance, FM 104's market presence is still not what it should be, and there are fears that the avenues open to it are steadily becoming more limited.

Since coming on air in July 1989 as Capital Radio, the station has moved from CHR to rock as Rock 104 (April 1991) to its present "Superstars of the 80's and 90's" since May 1992.

Staff turnover has been fairly frequent, with the high profile breakfast show, The Rude Awakening, an attempt at a controversial zoo format being unceremoniously axed in late 1994. In its earlier days (1993) the show had united the formidable talents of long time Dublin radio personality Scott Williams with controversial journalist Jonathan Philbin Bowman.

The one steady strand in the station's schedule has been the late night Chris Barry Phone Show which has dominated the night time market in Dublin since 1991. However even that programme has seen an incredibly frequent turnover of producers. The current producer is formidable Canadian, Peter Vamos.

If rumours surrounding FM 104's demise have any foundation in truth, it's loss would be a significant one for radio in Dublin, not least because its newsroom currently provides a networked news service to the majority of Ireland's provincial local radio stations.

Barry Hennessy,
Dublin.

We're a CHR station in Orlando (WXXL) and we just run liners that give out the E*Mail address. We received a bunch at first, but it has slowed. They come to one computer, and we print out the ideas, suggestions, whatever and distribute them to the right department to answer. Usually, the comments we get don't require us to write more than a line or 2 back. It takes a little time, but it is one more way that we are able to say that we listen to our customers.

2837. KHJ Jocks Update

Newsgroup: rec.radio.broadcasting
Date: 1995-04-14 00:00:00 UTC
From: mhtv3@aztec.asu.edu
Message-ID: <3mln10$s4r@vixen.cso.uiuc.edu>
Source record: 32895

Reply-To: mhtv3@aztec.asu.edu

Here's what our informal "where are they now" survey of the 1965-1969
era KHJ jocks has turned up:

Robert W. Morgan: Mornings at KRTH, Los Angeles
Roger Christian: ?
Gary Mack: WSB, Atlanta
The Real Don Steele: Afternoons at KRTH, Los Angeles
Dave Diamond: College professor(exact unknown)
Bobby Tripp: Rumored dead
Johnny Williams: Living in Hawaii
Sam Riddle: TV Producer(Star Search, others)
Charlie Tuna: Mornings, KIK-FM, Orange County, California
Frank Terry KSAN, San Francisco
Humble Harve ?(last heard KRLA)
Bill Wade ?(last heard, running broadcast workshop in Tucson)

We'll have an update on the 1970-74 jocks, and a "where are they now"
for the jocks from 1975 until the station went country(1980?) in a
few days. Thanks to everyone who's participating!

: schedule for the station and when are they on the air? After 5 AM this
: morning, they just weren't there. Any help is appreciated.

WEll, Mike, thanks for confirming my reception of KUSA here in Seattle. :)

I finally heard them early a.m. on 4/12. But I don't know that I'd go
with the "classic rock" tag. I heard an odd mixture of stuff that seemed
to be in the form of a countdown. I came in at #34 around 1:05am PDT.
Heard Melissa Etheridge, cranberries, Roy Orbison's "You Got It"
performed by someone else, maybe Celine Dion.

Anyway, quite a few jingle IDs and references to "all digital."
Reception improved tremedously when the next door neighboor shut off his
light dimmer. ;) And yeah, they were gone at 0202PDT. I didn't even hear
what constituted a normal sign-off. And as for the rest of the
countdown, well...

I'd been trying to hear them for several nights. From what I could tell,
they weren't even on Sunday night. So much for "broadcasting continuously
from the NAB..."

OK, you folks coming back from NAB: you've heard the USA Digital DAB demo, and some of you no doubt rode the Eureka buses at NAB '91.

Do the USA Digital systems work as well as the Eureka one did in '91? I've heard people claiming that no IBOC FM system can reject multipath as well as a broadband COFDM system like Eureka. I've also heard others say that while this is true theoretically, there's no practical difference between IBOC and COFDM in terms of multipath rejection.

So who's right? And does the USA Digital AM system really sound as good as a CD? And how much time delay is introduced by all the DSP's?

Source record: 32903

Rresponding to Steve's post in Airwaves 1264 on border FM stations:

XETRA-FM, 91.1 100kw, antenna on Mt. San Antionio Tijuana
XHTZ 90.3, 50kw, antenna on Mt. San Antionio, Tijuana
XHRM 92.5 50kw, antenna on Mt. San Antionio, Tijuana

XETRA-FM - or 91X - throws a good signal. The stick is about 1500 feet; and open water north west to Lost Angeles. that can explain some of the reception to the north. Plus, southern California's terrian is good for FM dxing. In my office on the non-com band, I can get splatter from two stations on the same channel, KUSC, KPFK, and KCRW in addition to KPBS, KSDS, and KSBR. I believe the FCC had good reason to limit the ERP to 50kw in southern California. Of course, there are some grandfathers: KPFK, and KBIG, which have above the 100kw ERP.

I don't believe the Mexico government will allow a super FM signal to be built -- a.k.a. like the station in Michigan at 300kw ERP. There was an agreement this year -- and it was published in Radio World. I cannot site the date, but that would have been in January or February when it was published. It involves power and antenna height limits near the border on both sides. [Can someone help with an old Radio World or the FCC announcement?] One station taking advantage of this is KKOS Carlsbad. She is slated to move from 95.9 to 95.7 this summer and can increase ERP to 25kw.

2847. Why is the music that radio stations play so dull???

Newsgroup: rec.radio.broadcasting
Date: 1995-04-14 00:00:00 UTC
From: Tom Desmond <wsu@mimi.itg.ti.com>
Message-ID: <3mln17$s5d@vixen.cso.uiuc.edu>
Source record: 32905

I have been getting increasingly frustrated with the music availabe in the Dallas-Ft Worth area on supposedly "music intensive" stations--it has become very dull and conservative. And from the articles (and station playlists) that appear in Radio & Records, it appears that the problems with Dallas music radio are not unique.

When I was in High School (late 1970's in Tacoma, WA), it was not unusual to listen to the FM KVI or KYYX (both Top 40 stations) out of Seattle, and hear a current dance song followed by an old rock song from the Kinks. By the early 80's, the stations had changed (Seattle's primary Top 40 station was now KBLE-FM, "The New 93", which has since evolved into Rythmic CHR KUBE-FM), but the wild swings in musical style remained. And on an adult contemporary station that I listened to, new wave music from the likes of the Fixx and Motels coexisted with old 60's pop music (this station was an affiliate of SMN, carrying the "StarStation" format).

Now, I listen to Dallas radio, where the local "Arrow" station proudly proclaims "YOU KNOW EVERY SONG!", and Hot AC Mix 102.9 has only added three or four new songs to their playlist in the last two months. There is no station around here where you can get exposed to a variety of styles of pop music. Instead, everyone has become ultra-niched, restricting their playlists to the point where the songs played on any given station blur together and sound the same. The results are less than compelling, to put it politely.

I know that the arguments within the industry are that the listeners don't want more variety--if you try to give it to them, they'll just change stations. The reality, I suspect, is that a lot of the button pushing occurs not because of too much variety, but rather because the listeners are getting board with the tired music that they're being fed. Comments by program directors (especially of AC stations) that appear in trade publications support my view, I believe. These comments always seem to boil down to "...of course the music is the most important part of our station, but since it sounds the same as KXXX, the most important part of our station is what we put between the songs."

I've seen this basic comment probably about 40 times in the last 2 1/2 years, and no one seems to get the hint. If the music isn't enough to keep the audience, you need to be playing a more interesting selection of music. If you also put compelling material between these songs, you will have a truly great radio station. You might also end up with a music station that people actually listen to, as opposed to something that people put on at a low volume in the background, and then pay no attention to.

It would be interesting to see people's comments on this from within the industry--maybe we can get a good debate started here that will cause some folks to think about what's happening to the music on radio,

instead of just following the trends...

> despite the fact that it may perform well in call out research.

Speaking strictly as a listener (in the Kansas City market), most "hit" songs get played so frequently that you're burnt out on them long before you ever get a chance to decide to buy them or not.

That's one of the reasons I've been enjoying KKCJ's "smooth jazz" so much. The playlist is made up largely of stuff that the other K.C. stations wouldn't touch with a pair of oven mitts. They started out with the advantage of a low burnout factor; whether they can maintain that kind of variety is another matter.

Another thing KKCJ has going for it: lots of instrumentals. I've felt for a long time that the state of the art in pop vocals is in a sharp decline. Everybody wants to sing like Whitney; everybody wants their song to be the next show-stopping pop anthem; everybody seems to be singing and overacting at the same time, as if they were in the finals on Star Search. In that context, instrumentals are very refreshing.

Sounds like what you want is the Eventide VR240 digital logger. It can record over 500 hours of audio, divided among up to 24 channels, on a single DAT datagrade tape cassette. "Dead air time" on any line is not recorded. A telephone line interface is available. Lots of public safety organizations record all their incoming 911 calls on this unit, stockbrokers record telephone buy and sell orders and some radio stations use it to log all their programming (as well as competitors.) Eventide's phone number is 201-641-1200

Here's a 3-30-95 transcription of an "underwriting announcement" on KMOJ-Minneapolis, a station that has been airing commercials for at least 8 years. It's an agency production, fully produced:

Get ready for the Riverview Supper Club, and this time it's for ladies only! That's right, ladies, the Riverview Supper Club will come alive with Houston's hottest male dancers!

[music]

Yeah, that's right ladies, they're gonna freak it to all your favorite jams! We'll even feature some of your favorites that you had a taste of last month, like Horseman and Hollywood!

[music]

That's right, they're gonna break it all the way down to the flooooor! Also come out and see Furious Leader, Chili, Black Stallion [sfx]...Rico and Crybaby. [sfx]

That's right, Horseman Productions and Phat Comedy are back Thursday, March 30th at the Riverview Supper Club! Get there early, show starts 8pm! That's right, ladies, grab all your friends because group rates are available. For more information call 521-7676! The hottest male dancers in Houston are coming to the Riverview Supper Club Thursday, March 30th. Remember ladies, this night is for yooooooouuuuuuu.

KMOJ currently has at least three similar spots running for two restaurants and a concert.

>The following two announcements were airchecked from KJHK(FM)<
Interesting to see the 2/95 KJHK-Lawrence, KS ads; KJHK violations from 1988 and 1989 are included in an FCC mailing highlighting enforcement action resulting from "advertising" by noncommercial stations!

Limbaugh put out a list of every station with the time that it was carried about a year ago. Not much of that list has changed. From looking at it, most stations carry it live. Probably at least 60%. The rest carry it on tape delay in the afternoon. There were 2 stations that carry it on an overnight only basis, but they are duopolies of stations that carry the show during the day and they essentially amount to the overnight re-broadcast that many of his stations do anyway.

The best and also hardest place to start is the Code of Federal Regulations.Get ahold of CFR Title 47 parts 0 to 19 and CFR Title 47 parts 70 to 90.

Although technical the CFR's are the broadcasters bible. Go to your local library and ask to see the section holding the CFR's and look for Title 47 Parts 70 to 90, start there and run threw that, if you decide to pursue the issue further then run threw Title 47 parts 2,5,13,15,17. Have fun, and good luck in your endevor.

There's alot more to it than that, but I have given you a place to start.

IA>Just wondering: what are the ERPs of Mexican FMs? (91X,Z90, etc.)
IA>Are they in the 50-100 kW range like the Class B and C FMs in
IA>the USA are, or are they 500kW monsters? And, realistically, is
IA>there any REAL obstacle to one of the border stations powering
IA>up, boosting its tower and throwing a city-grade signal into the
IA>L.A. market? Or, using the same system, a station in Sonora
IA>blowing into Tuscon and/or Phoenix?
IA>4.3 miles from the Canadian border,

Scott,
It's been attempted for years. It's never been successful, though.
None of the high-powered signals are good enough in Los Angeles to
qualify as locals. 91X is 100kw. I don't know the calls today, but there
used to be XHIS and XHERS ("His and Hers") in Tijuana. XHIS was 250kw.

The obstacle is the Mexican government. They got burned in the past
by the religious quacks selling prayer shawls, plastic Jesus' and goat
gland cancer cures. There are also border treaties that restrict power
levels along the border.

It depends on the rotation of the moon, but the Mexican government
would prefer that the border stations serve their Mexican communities.

2860. Unionized Radio Sales Staffs

Newsgroup: rec.radio.broadcasting
Date: 1995-04-14 00:00:00 UTC
From: jgallagh@interserv.com
Message-ID: <3mln1i$s6e@vixen.cso.uiuc.edu>
Source record: 32918

A recent post of mine discussed the need for radio announcers to form unions to protect their positions from indiscriminate firings by irrational owners.

My position being that announcers get fired for no reason and owners should not be allowed to get away with this (court suits, oh no, I hope not).

A few people e-mailed me and discussion ensued on how many radio stations' sales staffs are unionized, and what union represents them.

In the old days when I started in radio, the only Boston sales staff that was unionized was WBCN.

It did not seem to be a particularly strong union for the salesmen or saleswomen.

I am not advocating unions for salespeople as their worth can fairly readily be determined by their production levels. But I am curious as to how many stations sales staffs are organized?

A guy I know who sells radio in Boston informed me the other day that his commissions were being cut back, arbitrarily, as the owners felt he was earning too much money. He was not too happy but felt he could do nothing about it.

One of my businesses (non-broadcast related) had a real big year last year so every quarter, I gave my key salesmen bonuses of $ 10,000 each ! (not a misprint). One salesman earned $ 700,000 (again, not a misprint). Did I cut him back because he earned too much? No, just the opposite.

How many times as this happened in radio?

John Gallagher/Boston

2861. The need for Unions in radio

Newsgroup: rec.radio.broadcasting
Date: 1995-04-14 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <3mln1j$s6f@vixen.cso.uiuc.edu>
Source record: 32919

IJ>Although I am very active in Republican Politics here in Mass., I am
IJ>strongly of the opinion that there is still a place for unions (organized
IJ>labor) in certain industries, like the radio industry.

John,
That's like being a little bit pregnant. I see people at IBM being
fired. Also at ABC, CBS, NBC, GM, Chrysler, Brokerage firms, etc.

Broadcasting is no different. Other than people expecting that
they'll have their jobs no matter what. I don't see why broadcasting
should be set aside as the one industry that owes people employment.
That's hardly a proper conservative principle.

IJ>Radio is a bizarre field and although I have been out of radio for more
IJ>than a decade, I look around and see people in their 40's and 50's who
IJ>are unemployed...often fired for no reason at all.

I've seen people in their 20's and 30's fired "for no reason at
all." Don't they deserve the same protection? No one gets fired "for no
reason at all." The boss always has a reason. The employee may not like
it, or agree with it, but it's a reason.

There's nothing more useless than an employee who knows he can't be
fired. The civil service mentality prevails when that happens and job
performance degrades to minimal levels. I get far more enthusiasm,
adaptation and productive work out of my non-union employees than the
union ones. When something needs to be done, the non-union guys do it.
The union guys check the contract and consult with union bosses before
agreeing to do it. Union employees are the best justification for
automation I've ever seen.

IJ>We all know there is little job security in radio, but it is a bit ridiculou
IJ>when people are fire indiscriminately...at some GM's whim.

Why? Doesn't a guarantee of a job qualify as employee welfare? There
are no guarantees in life, anywhere.

IJ>Compounding the problem of arbitrary firings is the trend towards
IJ>syndication. Remember, for every station picking up a feed of Rush or
IJ>Stern, or anyone, that's one less on-air job for someone locally.

Again, broadcasting is a business. If the difference between profit
and loss is a reduction in staff it needs to be treated the same as any
other industry. I'm alway amused by personalities who moan about the
horrors of syndication. Those same personalities are on the phone to me
asking about how they can syndicate. It's bad when the other guy does
it, but OK if they do it. So much for conservative principles.

IJ>I own several different businesses (non broadcast) employing over 200
IJ>people and I bet I haven't fired more than 2 or 3 people in the past five
IJ>years. In radio, I have seen entire staffs fired with little or no
IJ>severance.

I've fired fewer than 2 or 3 people in a 30+ year career. As I
recall, IBM fired tens of thousands of people. Where's the indignation?
How many employees have quit for no reason? Doesn't an employee have an
obligation to the employer? If the boss can't fire someone, then no one
can quit. It's only fair.

IJ>The only solution for this b.s. is unionization among the air-staff and some
IJ>sort of contract that provides for job security if the job is being done. I
IJ>have seen too many lives ruined because of irrational behavior on the
IJ>part of the GM or owner (or PD).

If the air staff is unionized and the ratings go into the toilet,
what option would the station have? They can't replace the talent, so
they go bankrupt. The bottom line is that there is no job security.
Never has been. Never will be.

IJ>It turned out very good for me getting out of radio as I grew several
IJ>businesses into multi million dollar enterprises. But I loved the business
IJ>as a kid (listening to WRKO the big 68) and it's unfortunate that I had to
IJ>seek my fortune outside the industry.

I'm happy that you have multi million dollar enterprises. I'll bet
that you'd fire everyone if those multi millions stopped flowing in. Do
you honestly feel your employees have the right to demand that you
support them? If your business falls on hard times, the employees are
going to blame bad management and claim they shouldn't have to suffer.

IJ>It might be interesting to see about court suits in some of these cases
IJ>where people have been canned due to no fault of their own. Just the
IJ>other day I heard from a very talented announcer in Boston who is facing
IJ>foreclosure after being fired following a format change.

Let's see: suppose we have a classical music announcer and the
station goes hard rock (WNCN, New York, for example). Should GAF have
kept the classical announcer (very talented) on the payroll when they
have no more use for a classical announcer?

Doesn't the employee have an obligation to himself to make his own
way in life? The trend is no longer toward your father's example of one
job per lifetime. To survive in the future we'll all have to adapt to
what the market needs, not become victims of employers.

Your comments hardly sound like a Republican's. They sound more
socialistic and, God forbid, "liberal." Rich

>We all know there is little job security in radio, but it is a bit ridiculouse
>when people are fire indiscriminately...at some GM's whim.

>The other day I heard of an FM in greater Boston who fired a chunk of their
>staff in one swoop. A female newsperson friend was recently canned
>after ten years at the same station (I guess they grew tired of her voice).

I was hired by WBOS/WUNR (Boston) in September 1980 as assistant chief engineer, promoted to chief engineer in December, 1981, and left two years later to move to California. When I left I was the fifth most senior employee (out of 30-odd); during that time I saw five different WBOS program directors: Ron Robin (AC), Jack O'Brien, Clark Smidt, and Maxanne Sartori (AOR), and Dean James (country) who was PD when I left. The new PD's inevitably blew out the old jocks and brought in new ones, and a new sales manager appeared with each new format.

The rationale for firing each generation of jocks was always that the listeners would forever associate them with the "old" WBOS, not the new sound that the incoming PD was trying to establish. I came away with the impression that working in radio was somewhat like being on a major-league ball team with the PD acting as the manager.

I pity the poor PD; he always gets blamed for anything bad that happens. One guy I worked with got canned because of a lightning hit on the antenna that took the station off the air for three days in the middle of spring book.

There are islands in this world of chaos where people are treated fairly and tend to stick around for a while. We have two announcers at WCRB that have been with us since 1948 when thwe station first went on the air.

Very well said! This is true of unions in general... we *all*, regardless of the industry in which we work, owe the 40 hour work week, vacations, health benefits, severance pay, and retirement benefits to those who fought and *died* (remember Haymarket) for the right to bargain collectively. Thank you for a very well written and right-on-target post.

And if not for AFTRA, imagine how much you would have to pay for your health insurance!

WZRD - Chicago, a member of the Pacifica Radio Network, The National Federation of Community Broadcasters, and the SubGenius Radio Network, is proud to announce our new Free Form Web.

Our site is filled with information about many of the types of music we play on WZRD, as well as radio-related links, politics, writings about The Fair Use Doctrine, pirate radio and more, and the creme de la weird.

The Wizard Web hopes to offer the internet community the same depth of musical knowledge, political insight, and unrestricted creativity that we have beamed to our local audience for over 20 years.

This site is not aimed merely at our those within our listening range; rather, we wish to offer all the resources of our unique radio station to anyone brave and open-minded to visit our web. You don't have to live in Chicago to be a Wizard in spirit.

If you're looking for an alternative to alternative radio, come check out our home page and tell us what you would like to see on the Wizard Free Form Web:

http://www.mcs.net/~koppout/wzrd.html

Mr. Wizard

WZRD - Chicago 88.3 FM -- THE WIZARD -- Free Form Radio for over 20 Years

KUSA is an expermental radio station set up by USA Digital for feild tests of its In-Band-On-Channel (IBOC) digital audio broadcasting system.

USA Digital is transmitting with 10 KW of analog AM and simultaneously 13 dB below the conventional AM is a digital audio broadcast.

The station was set up to provide a demonstration for the NAB convention and to perform field testing of the system.

In the weeks leading up to the convention and next week USA Digital personnel and its consultants will be making measurements on the system.

USA Digital Radio's IBOC system is delivering 15 KHz stereo at 96 dB SNR to the 1.2 mV/m contour.

>So THATS what I was hearing..... :)

I heard it on Sunday morning, April 9th, at about 4:00 while driving north from Fresno, CA- it was coming in *very* clearly. They were playing what sounded like a country song. I was waiting for an ID, but instead heard a few seconds of dead air where an ID might have been inserted, as if they were repeating a satellite service for test purposes or something.

: I may be missing something. But what is the point of KUSA? What are they
: trying to demonstrate? The new expanded AM band? A new form of
: transmission?

KUSA demonstrated an All digital MW station that was AM compatiable. The
station operated at 10Kw AM with a digital transmission on the same
channel. There were budd trips around Las Vegas demonstrating the
improved S/N, imporved Bandwidth and Seperation. It is truley quite a
feat of Engineering.

It's in the Extended AM band because there was room for it there.

Rob Landry (umar@tiac.net) wrote:

: OK, you folks coming back from NAB: you've heard the USA Digital DAB demo,
: and some of you no doubt rode the Eureka buses at NAB '91.

: Do the USA Digital systems work as well as the Eureka one did in '91? I've
: heard people claiming that no IBOC FM system can reject multipath as well as
: a broadband COFDM system like Eureka. I've also heard others say that while
: this is true theoretically, there's no practical difference between IBOC and
: COFDM in terms of multipath rejection.

Well the Eureka system did handle Multipath better. The reason for IBOC
is to keep from having to fight for another band from radio broadcasters
to use. We are curentley the largest users of spectrum.

: So who's right? And does the USA Digital AM system really sound as good as
: a CD? And how much time delay is introduced by all the DSP's?

Well not really, the massive compression adds some distortion to the
signal. I am not sure what hte level of compression is but is a lot. I
would not try this on delicate music such as Classical and other
intrmentals, like Jazz or New Age. The result would not be plesent to
listen to. The were airing classical but is had a smeared quality that I
was not sure what the IBOC AM or the Low Data Rate ISDN phone lines. Oh
by the way there were commiting a big sin here MPEG-II and MUSICAM were
mixed in the transmission of audio and you could tell it.

FWIW, That's my Opinion,...., every body's got one.

Doc Searls (searls@batnet.com) wrote:

: Data: the AM was broadcast over "KUSA," a station set up just for this
: purpose at 1660 with 10kw, tranmitting from an old AM station's site about
: 5 miles out of town; and the FM was broadcast over KUNV at 91.5, which is
: 15kw at 1100 feet above average terrain -- a mountaintop site outside of
: town.

FWIW, IMHO,

USA In-band Digital is supposed to be transparent, the FM digital was clearley audiable, it was on 91.7 and was quite strong on the Pontiac Rental car's FM radio. KUSA was quite impressive but I want to hear it under sky wave inteference and through a tough directional like a 10 to 12 tower with deep nulls. If this is going to live we need to test it in real world conditions. 10Kw Non D at 5 miles is not real world. What about 250w at 5 to 20 miles. That's what AM radio is all about.

No, because it has no future.

Matsushita effectively pulled the plug on DCC earlier this year when they
curtailed new product development and stopped manufacturing vital
assemblies. This month they dropped the other shoe by announcing MiniDisc
products to ship this fall in Japan.

Dear Tom,
In your post you mentioned:
> I have been getting increasingly frustrated with the music availabe
in the Dallas-Ft Worth area on supposedly "music intensive" stations--
it has become very dull and conservative.

I don't know what Dallas AC radio is like -- or Dallas country radio
either. More people are listening to country today though, than any other
format. We play 70% new stuff on our station, and add lp cuts and new
tunes every week. Perhaps that is going on in Dallas too. You also said:
>If the music isn't enough to keep the audience, you need to be playing a
more interesting selection of music. If you also put compelling material
between these songs, you will have a truly great radio station. You might
also end up with a
music station that people actually listen to, as opposed to something
that people put on at a low volume in the background, and then pay no
attention to.

You are exactly right. It would work -- it has in the past. When all the
signals get real tight with their tunes, and someone like you gets a good
signal and plays the right mix of songs -- listeners come in droves.
Then !!! a whole ton of stations will copy what you are doing, it will
become the boring standard, and you'll have to leap out in front again.
Timing is the key.

John Dakins

Good points all...now, why...

I've worked in radio for 23 years and it keeps getting more fragmented and specialized for a variety of reasons.

Back in the 70s, you had a handful of big-rated, mainly AM radio stations. FM started cooking big time in the late 70s in most markets (later and earlier in some). As the advertising pie (read 25-54 year old listeners) started to get divided by more viable outlets, a need grew for more direct positioning of your station for a target audience. The mandate for most stations then and now was to get as many 25-54 females as possible, specifically for music stations. Male listeners tend to go more toward rock when younger and news/talk stations as they get older. So you have to please those targeted 25-54 year old female listeners. Some stations position more strongly to the younger or older end of the demo depending on their own strengths and weaknesses.

Research is a BIG factor in all this. Auditorium music testing, focus groups, phone call-out are the tools used, with an added effort to match demos, etc. that show up in Arbitron ratings books.

Then came the 80s with mergers and all kinds of leveraged buy-outs. Bankers got into running radio stations and groups, especially those that got over-extended with debt. Most bankers don't understand music or radio, but they do understand numbers from research and business plans. To get more money to operate, you have to have a plan showing reliable projections, and the only way to get those is to do research.

Because research indicates that much of the new music out there can't be tolerated by older female listeners, many stations are playing it safe with the songs they say they do like. There's too much money on the line so you can't really take big chances. Minor victories are the most you can hope for. After all radio is a business, not just show business.

The only way this will ever change is with the debut of a music trend that older listeners appreciate (don't bet on it) or somebody with deep personal pockets and a grand vision, not dependent on bankers or stockholders gets into the biz again and has huge success.

I worked for Golden West when they owned "the FM-KVI" later KPLZ and that was a different time and company. Chances could be taken 'cuz the owner was Gene Autry and if you could present a strong plan to the corporate bosses, you could do great things. I worked at WTWR(Tower 92FM)here in Detroit at about that time and we were probably the only Oldies station in America that had an active music library of over

three-thousand songs! That would never happen in this day and age.
You could never have that autonomy again with things the way they are.
(I should also say that Golden West didn't take huge chances here...the
salaries were pretty low.)

Kevin

Hi all!
I'm news director at WXJM-FM, the James Madison University student-run radio station, in Harrisonburg, VA. While our format is (you guessed it) college-rock type music, we have a solid news commitment, delivering five daily newscasts M-F along with several hours a week of debate- and issues-oriented informational programming. Enough boring stuff. Here's my big $5 question:

What do you think the best way would be for us to acquire sound on national and international stories? I'm racking my brain over a low-cost (there's ONE catch) method. We're open to just about anything that doesn't require a satellite, as that would be out of our budgetary limits. We have excellent computer capabilities, with a couple people around here who reeeaaally know their stuff, and the equipment to back it up. For starters, I'd be happy with a phone-feed system. I just need some guidance in the form of a clue as to where to begin to look, who to call, etc.

We're currently running AP NewsDesk, and I'm dying to add SOME sort of sound to what all too often is a string of 3 or 4 :20-second stories read with no real sound whatsoever. We have contemplated running a wire from CNN and/or Headline News on our TV, but I wonder how legal that can be. Any help anyone can provide would be greatly appreciated by me, along with I'm sure any other college station along the "Airwaves" line...

Thanks much!
Scott Gilbert

>there any REAL obstacle to one of the border stations powering
>up, boosting its tower and throwing a city-grade signal into the
>L.A. market? Or, using the same system, a station in Sonora
>blowing into Tuscon and/or Phoenix?

In Arizona, there's a problem Southern California doesn't have...terrain.
The closest city to Phoenix in Mexico would be the border town of
Sonoita...about 160 air miles...with the Ajo, Batamote, Sauceda, Sand
Tank, Maricopa and Estrella mountain ranges all in between.
Tucson is much closer to the border...Nogales, Sonora is about 65
miles away...but it's far from a flat, clean shot...and since Tucson
is less than 400,000 metro population, it probably wouldn't make economic
sense.
L.A., with open water due to the curve of the coastline would be
easy...but remember, just being on and being loud doesn't guarantee
you an audience. 48kw in Pasadena will kick the dickens out of
500kw in Rosarito Beach if the 48kw comes with a $1 million promotional
budget.

>audience.

I've been in radio management and I've been a member of AFTRA in a Right-to-Work state. The most astute observation about radio unionization I've heard came from a labor relations lawyer who specialized in busting unions. He said "any radio station that ends up unionized probably deserves it." Unions are too much trouble to organize unless station management is so bad it makes all the fear and loathing of an election and the late night phone calls and the threats and counterthreats worthwhile.

>
You are right, of course, but there are those of us who have been in radio
long enough to remember the days when the sales department actually
regarded teh on-air product as valuable and even *listened* to it
occasionally! I have been primarily in talk where I never cease to be
amazed at the number of sales folks who have not the slightest clue what
is being broadcast on their own station because they are "air-checking to
see what spots the competition has on." Sure. Most of them are in their
20s and 30s and prefer other formats so rather than develop a knowledge of
the personalities and how they think, they wander off to "sell time" and
don't do it very well.
I worked for a station in Cinci in which the sales manager was quoted more
than once as saying "Talk radio can't be sold." She forgot to add: "...by
me."
Radio sales used to concern product. Ratings are not product. Ratings are
a very inaccurate reflection of 1) signal 2) programming 3) promotion 4)
effort 5) spirit of a station as reflected by the on-air product. Radio
sales are now mostly about a narrow interpretation of numbers, often by
people who have no interest in the product and who will tell you "talent
doesn't matter. Talent is only just another unit."

Yes he can!

The station where I work, WCRB, has an opening for an Account Executive. We are just coming off the best sales year in the station's history. We've got a new program director, Mario Mazza (ex-WNCN New York) and are committed to making classical king in Boston.

Ours is a station that treats its people very well; ask anyone who works here.

If your friend, or anyone reading this post, is interested in working with us he should call Bernie Toole, local sales manager, at (617) 736-9565.

This happened here too. You can neve over pay a commisioned sales person. In fact you can under pay them. If there are really top performers then they need the bonus to show that they are apreciated.

The problem lies in getting these sales people to share their secrets with the others on the sales staff that need tips to boost their sales.

Shoot our 5 sales people only take home about $55,000/month in Commissions. I would like to see more money for them but the sales are just not there, yet...

Okay, Rich, your post does two things: it delineates "us (conservatives)" and "them (liberals)"...and you imply that it is a bad thing to be a "God forbid, 'liberal'".

Your post also suggests that conservative principles mean that people can be fired at will and it should be that way...protecting a person's livelihood is "God forbid, 'liberal'".

Thank you for giving me a reason to feel good about being a liberal today.

From: stellastar@aol.com
Message-ID: <3mpbf4$97n@vixen.cso.uiuc.edu>
Source record: 32833

Reply-To: stellastar@aol.com (StellaStar)

WCCO-AM, the legendary radio "Good Neighbor" in the Twin Cities of Minneapolis-St Paul, has named a new manager to replace interim manager Anna Sokusky. (She returns to NY, where she's CBS radio's VP in charge of AM stations).
James Gustafson, 48, replaces Rand Gottlieb, controversial manager who left in haste three months ago. Many of Gottleib's changes to attract younger listeners alienated the traditionally strong 55-plus audience that had kept 'CCO at legendary ratings status (30-plus shares) for so many years. That listener base had eroded, but it began to evaporate with stunning speed lately, and WCCO actually lost its #1 status in the market in the past year or so.
Gustafson has served as VP and GM of KLBJ-AM/FM and KHHT-FM, owned by Lady Bird Johnson family in Austin, KZSN AM/FM in Wichita KS, KFDI-AM/FM, also Wichita, and sales manager at WHO-AM/Des Moines.
The Twin Cities WCCO-AM is considered a flagship of CBS radio properties.

2900. WZRD Free Form Web

WZRD - Chicago, a member of the Pacifica Radio Network, The National Federation of Community Broadcasters, and the SubGenius Radio Network, is proud to announce our new Free Form Web.

Our site is filled with information about many of the types of music we play on WZRD, as well as radio-related links, politics, writings about The Fair Use Doctrine, pirate radio and more, and the creme de la weird.

The Wizard Web hopes to offer the internet community the same depth of musical knowledge, political insight, and unrestricted creativity that we have beamed to our local audience for over 20 years.

This site is not aimed merely at those within our listening range; rather, we wish to offer all the resources of our unique radio station to anyone brave and open-minded to visit our web. You don't have to live in Chicago to be a Wizard in spirit.

If you're looking for an alternative to alternative radio, come check out our home page and tell us what you would like to see on the Wizard Free Form Web:

http://www.mcs.net/~koppout/wzrd.html

* WBZ's Brudnoy back in the hospital

WBZ's popular night-time(7pm-12a) talkshow host David Brudnoy
was admitted to Mass General Hosptial on Tuesday(4/11) afternoon
after suffering from acute heart failure resulting from AIDS
complications. Doctors expect Brudnoy to fully recover from this
latest episode in his battle with this very uncertain disease.
Doctors also believe that Brudnoy's hospital visits will become
more frequent in the future...

There's talk that Brudnoy's shift would be cut from 5 to 3 hours
in order to reduce his workload when he returns to the air
within 2-3 weeks(April 24th?).

The best fill-in talkshow host in Boston, Steve Leveille is doing
7p-12a until David returns...

* New boss at WEEI? :

Since the departure of Bev Tilden to take a corporate marketing
position within ARS, all-sports WEEI AM 850 has been looking
to find a new program director. Reportedly, the choice has been
narrowed down to 4 candidates. Out of the four, longtime
NYC's WFAN producer Bob Gelb has the inside track. Gelb currently
produces one of the best, IMHO, sports or otherwise radio talkshows
around -- 'Mike Francessa and Chris "The Mad Dog" Russo"(1-6pm) on
WFAN AM 660...Gelb or whoever lands the PD spot at WEEI will
have his/her hands full. WEEI's ratings have actually dipped since
August 29th(1994) move from 5KW at 590 to 50KW at 850. Only
Imus' morning show has actually saw an improvement but everything
else on that sad sports station is falling apart quite radidly...
It would actually help if they'd start talking about *sports* and
not *hot dogs* or *toll collectors*...

* Pats radio fever grips New England...

Infinity's AOR WBCN 104.1FM which will be the new NFL's Patriots
flagship for the next three years has lined-up one of the biggest
regional networks in the history of local sports franchises...The
Patriots will be heard on 41 stations across New England...WBZ 1030
had 30 in the last year of broadcasting Patriots football...

* Comings and Goings :

- Joe Green, WBZ's longtime traffic chopper reporter retired
from the Boston airwaves on March 31. Nobody will forget his
outstanding service to the Boston commuters over the years

and his part in one of the funniest TV spots ever created --
Dave Maynard's WBZ's Morning Team in 70s/80s...Another familiar
traffic voice, Malcom Alter is the new voice in the 'BZ chopper...

- AOR WAAF 107.3FM in Worcester has a new PM-drive team of
"Anthony and Opie". They've imported from Long Island's WBAB 102.3FM
to replace Liz Wilde who departed for Chicago's talker
WLUP-FM in March. Speaking of 'AAF, they've launched a mega
TV ad campaign a couple weeks ago : "The only station in Boston
that really rocks!" declares the ad. WAAF, indeed, promotes
itself as the *Boston* station!...Enough said..:-)

-Mark

2908. Buffalo/Toronto Radio Watch(4/14)

Reply-To: ag365@freenet.buffalo.edu (Carl K. Gorney)

Up & down the dial in the #40 market:

*Steve Mortenson is now in a tug-of-war between WYRK(106.5;country)and WNUC (107.7;also at 105.3 & 107.3;new country)-but not over his services. Mortenson,according to Tony Violanti's story in today's Buffalo News,left WYRK on Feb.16 and arrived at 'NUC on Mar.1 to join fellow ex-'YRKer Carol Williams in AM drive. But,wait. That's when the fun starts.
WYRK says Mortenson violated a 6-month non-compete clause in his contract by moving to 'NUC. WNUC owner John Casicani says that Mortenson was taken off the air temporarily thanks to a Mar.15 court injunction. But,Steve returned less than 2 weeks later-Mar.27-when a state court issued a stay of the injunction until an appeal is heard in May.
Also,'YRK's owners,American Radio Systems,have filed a $1.5 million lawsuit against WNUC,as well as suing Mortenson for legal damages.
Casciani says that the contract with that clause was signed while WYRK was owned by Stoner Broadcasting,which later became ARS(and _not_ changing ownership as Violanti states). However,WYRK lawyer Paul Perlman said that it didn't matter because the contract included "all successors" or new owners.

*On the Heidi Kramer case:Kevin Hosey weighed in with his thoughts on it in the Apr.3 Nightlife. He was annoyed that the broadcast media kept the story quiet,noting,"Like it or not,this is legitimate news,and big news;and it's embarassing and insulting that the local stations have not seen fit to report on this." Hosey compared it to a police department's engaging in a coverup,and the brouhaha that'd ensue,adding,"The silence stinks of covering up an embarrassing situtaion and broadcasters protecting one of their own;if it happened to a print journalist,people would have a right to know,and you can bet that broadcast outlets would be jumping all over it." True,but I do remember when a former WGR news reporter,Pat Brogan,was arrested on DWI charges and broadcast outlets gave it a good deal of coverage.

*WWKB's Sunday show on unions,Prospering in America,is now syndicating the shows to stations in the Empire State. Recently,it added Albany's WQBK-AM. It plans to syndicate to New York City,Rochester,Syracuse and other cities in the near future. The show,hosted by Tom Hopkins(head of the International Union of Operating Engineers Local 19)and Alex Blair(of Cornell Univ.'s labor school),has been on 'KB for over 2 years.

*Lydia Kulbida,music director at WBFO(88.7 FM),is leaving at the end of June. Kulbida,at 'BFO for 3 years,is relocating for family reasons.

*Latest rumor on format switches:WWWS(1400),currently a business/talk station,may switch to urban contemporary music.

*Wayne Mack's talk show,"Public Opinion",will jump from 3WS to WWKB next Sunday(Apr.23),airing at 11am.

*Tony Violanti,by the way,noted that WGR was on the World Wide Web in today's column. Of course,we knew about it over a week in advance.....

TTYL...

2909. North SD County Report: 4.14.95

Newsgroup: rec.radio.broadcasting
Date: 1995-04-15 00:00:00 UTC
From: Chris Carmichael <CCHRIS@cei.mhs.compuserve.com>
Message-ID: <3mpbde$930@vixen.cso.uiuc.edu>
Source record: 32926

Here's what's happening in the 55th market:

Part time D.J., and full time car salesman Robert Wright evidently had too much time on his hands. The weekend KSON AM/FM disk jockey who goes by the name of Bob Kelly, made friends with a 16-year-old girl, and got her to pose nude. This didn't go over with her parents, and the law to good. He's now sitting at San Diego County Jail and will see the judge today. KFMB-TV had an exclusive on this; and had an interview with the victims mother. She found some photos on the daughter's bedroom and called police. The authorities tapped the phone, and when Wright called the girl, he was trapped.

Wright is married and has children. There hasn't been any comment from KSON, except for the standard, "A local disk jockey has been arrested . . . . "

On the heels of the announcement that XETRA-AM/Noble Broadcasting is building seven towers in Rosarita Beach, the corporation is buying KWNK 670, Sima Valley. The station [which is 5kw/1kw DA1] has been simulcasting XETRA AM for two years -- complete with Mexico I.D.s! [Something I don't understand here: I know that FM has ERP, but does AM? Conflicting information from Nobel has XETRA at 50kw, and press announcements at 100kw -- with an AM ERP. I've also read the same for KCBS San Fran that she pumps 200kw south because of ERP. Can an engineer explain this -- in understandable English?? Thanks!]

KOGO [600, 5kw DA1] entry into 'Hot Talk' one year ago promised another outlet for San Diego. What has happened since then? When they first switched from music to talk, there were three local live shows for an eight hour block. George Weber disappeared in January, Dave Dawson stayed in Kansas City, and now it's program director Peter Weissbach as the only show that's live during the week. The mornings after Imus is either G.Gordon Liddy, followed by Ollie North -- or the O.J. Simpson trial. [As one cross-country poster told me: they should change the call letters to K-FLN: all felons, all the time!][Thanks Bob!]

The talk show circuit on other stations -- most notable on KFMB has improved, gotten stronger -- and has received better ratings. KOGO has increase -- but not as much as expected. They have gone from a null to a high of 2.0 -- which is good for one year. But I'm burnt on listening to syndicated programming from the east, and the views of these hosts. It starts to blur because a majority of them are right, Right, RIGHT!!! [Damn the torpedoes, full speed ahead!]

Bottom line: if it's local live radio for San Diego, it's 760 KFMB with Stacy Taylor and Ted Leitner. Plus Mark Larson on KPRZ San Marcos [former KFMBer]; and Roger Hedgecock on KSDO. Syndication may be cheap, but, in my view, not effective.

XETRA-FM's morning show with Howard Stern didn't raise any objection from the local Mexico audience after the shock-jock raised kaos with his bit on the slaying of Latino singer Selana. Stern, who apologized in espanol, has been in the market for about three months now. [I was flipping TV channels, and the Stern apology was run on Univsion -- with a Spanish announcer speaking over Stern speaking in Spanish. I don't speak espanol too good, but I thought he did a good job.]

Ok kids, Carl's Diner is having a special this weekend! For every request of the refreshed, AM-direction corrected log, you'll receive free via e.mail, his famous curly fries! Just e.mail me at the above address!

Thanks and Hoppy Easter!

I think the "Arrow" format can work in the right locations and if it's done correctly. However, I think "correctly" is defined by the region surrounding the station. Each station will probably do this format a little different than the others. I think it's a mistake to simply take a Classic Rock format and repackage it as a "Rock 'N' Roll Oldies" station. It'll take more than that to succeed.

Source record: 32928

Arrow, in my eyes, was good intentions gone bad. In Detroit 93.9 FM CKMR (I think those were the calls) might have worked had it done a harder job trying to make itself stick out on the dial. It had an especially tough time since it was right next to a classic rock station (WCSX, 94.7 FM) which had been on the dial for years, about 1988 or so, and had a reputation for playing a wide variety of music with a quality presentation. Besides, there was one confirmed oldies station that played much of 93.9's music, a couple of rock stations mired in "dinosaur rock," and other stations in the market that played a lot of arrow-type music. 93.9 didn't have a chance, and now it's AAA, thank goodness!

Bill Balance was on Saturday mornings on KRCI-FM 92.7 Catalina Island - which is now off the air.
Then he went to KGRB-AM 900 Industry (San Gabriel Valley) - where he might still be????

Check out the LA Radio Guide Monthly Magazine, which ran a cover story on Bill a couple of months back.

I think that ARS-owned WEEI-850 sportsradio did a few really not-so-bright things:

1. They took Dick Lutsk's drive-time show away from him (after the WEEI overrun of WHDH) and gave it to Ted Serandis. Ted seems like a nice guy, but I'm underwhelmed with his overall style, and the overemphasis on basketball is more than a little wearing.

2. They're going to cut back on the number of sports writers who do guest shots. BAD, BAD MOVE. I'd rather they cut back on the number of CALLERS. The writers serve, IMHO, as a welcome and articulate balance to the talk host's point of view. To me, the best possible sports radio talk is a show with an anchor and more than one writer there. More often than not, they'll all disagree with each other, and the conversations will be rather lively. WRKO's original foray into sports talk back in 1982 or so (with Bill O'Connell) was just this format. It was great. WBZ's Calling All Sports is like this. Their 4-hour Patriots Pregame show was similarly set up, and was a blast. A sports talk show consisting of a host and a progression of callers is dull, dull, dull. You need at least three opinions to get things really moving.

3. They continue to run Imus. I know he brings in the listeners, but I never liked his variety of bathroom humor when I was in high school (where it was available in abundance), and I don't like it now. If I turn to a station that is ostensibly SPORTS radio, I expect them to be talking or carrying SPORTS. At all times. Period. No exceptions. No bathroom humor. WBZ gets my morning drive ear-time. And it often gets my afternoon ear-time as well, unless someone else -- anyone -- is guest-hosting for Eddie Andelman.

And as far as WRKO is concerned, four words:

BRING BACK GENE BURNS.

>
> -------------------------
> Rumors are rampant that Whitley-Claprood are about to be jettisoned

> although no-one knows who or what will replace them (probably
> something syndicated no doubt to cut costs).

And of course they won't bring Gene back because he'll cost too much.
[The little matter of him winning his time slot consistently during his
stay here will likely be conveniently forgotten.]

> Note 2: Would somebody please tell WBZ (newsradio) that Paul
> Harvey's The Rest of the Story is not NEWS. Why do they need to
> carry this in drive-time? Also, the news promos BZ is running are very
> demeaning and poor productions (question: what is Rawanda, who is
> OJ...no thanks, just coffee). The top of the hour ID ("pumping out 50
> thousand watts of power...") also sounds like a small market station.

Harvey himself admits it at the top of the piece: "Hello, this is Paul
Harvey. (pause) You know what the news is. (pause) And in a minute,
you'll know The Rest of the Story." If not that, they'd fill it with some
other fluff, like Neil Chayette Looking at the Law, which they air at
18:55, or Peter Jenning's Journal, which they air(ed) at 16:55.

The news promos -- especially the "what is Rwanda" one -- are ridiculous.
While they don't make me lunge for the station buttons the way the Better
Home Heat Council's FUD-filled oil-is-better-than-gas ads do, they are
hard to take.

The top-of-the-hour ID is pretentious.

>Grim Reaper. Who the hell's crazy idea was it to take two outstanding
>announcers like Loren and Wally and have them play cowbody
>music?

I guess that means they've raised enough cash for Wally's brain
surgery. :-)
(this was one of 'CLB's spoof Tv spots asking people to listen to
the morning show because Wally needed an operation).

But seriously, what about two Boston veterans like Adams and Doyle
at WBCS 96.9FM spinning hee-haw tunes with even less audience share than
Loren and Wally over at WCLB 105.7?..

Personally, if 105.7 goes I still dont see any big rating improvements
for 96.9. Boston is just not a country town -- I guess both stations
are finally starting to get the message. About time...

>carry this in drive-time? Also, the news promos BZ is running are very

Just heard some sad news; WBZ's nighttime talker
David Brudnoy was reported hospitalized again earlier this
week, with heart trouble related to his ongoing battle with
AIDS.
The good news is, there's every expectation that he'll
recover from this one and return to the air again shortly...
but he may soon trim back his hours to a 3-hour nightly
gig, according to some reports.
Whether you agree or disagree with him on any par-
ticular issue, you have to admire Brudnoy for his intel-
ligent, dignified approach to talk. It's a refreshing differ-
ence from what you get in most talk radio in most markets
these days. If he ever does have to leave the air perman-
ently, it'll be a big loss, he'll be missed. Too bad more
hosts and more stations don't use him as a role model.

I'm surprised no one has yet mentioned the "V" call signs still in use in Newfoundland. Are they still the Canadian call-sign anomaly? Are VOAR and VOCM still operating under those calls? Are there any others?

I realize they were grandfathered in when Newfoundland became part of Canada in the 1940's. I guess I'm just surprised they are still recognized.

I've seen this before in trade magazines, and thought it might be interesting to see what Airwavers have to say.
Pick your dream air staff - $$$ is no object. Who would you select?
Here's mine for a musicradio station:
5:30-9a - Imus In The Morning
9a-12n - Dick Purtan
12n-3p - Larry Lujack
3-6p - Dan Ingram
6-10p - Cousin Bruce Morrow
10p-2a - George Michael
2-5:30a - Big Jay Sorensen

Weekends - Casey Kasem, Mr. Music Norm N. Nite, Robert W. Morgan, Dan Taylor, Dick Heatherton, & Bob Shannon, and Me (on holidays and overnights).

Talkradio
5a-10a - Rambling with Gambling (John A.)
10a-2p - Rush Limbaugh
2-6p - John & Ken (From KFI-LA & I used to work with them)
6-10p - Sportstalk with Marv Albert (use to at WNBC in the late 60's-early 70's)
10p-12a - Bruce Williams
12-2a - Dr. Ruth
2a-5a - Larry King

News Department - Bryon McGregor, Peter Roberts, Judy DeAngelis, Jon Belmont, Harley Carnes & Gary Nunn
Weekends - Sally Jesse Raphel, Long John Nebel, Barry Gray, Michael Jackson

Who's next????

>
>On a related note the local Cable System has started Promoting an "New
>Emergency Broadcast System". It seem that since under the EAS rules the
>Cable TV systems has to comply with the local Emergency rules they are
>turing it into a "New Service" Even though it's required by the FCC.
>

In this area, the cable systems are well ahead of the FCC.

First a little background:
Here in West Virginia's "Chemical Valley" people know better than to ignore EBS tones, test or not. At the dupoply where I work we need to blow EBS for chemical explosions and leaks far too frequently (several times a year). With 230,000 people living withink five miles of a chemical facility, evacuation is not possible, so the emergency services (FEMA, I guess) have come up with a "shelter-in-place" alternative. Very similar to the 1950's duck-and-cover-- the goal is to find the innermost room in your building, seal yourself in and kiss your butt goodbye.

Here's the problem:
The radio market is Metro Charleston. The television market is Charleston-Huntington-Ashland. only one station is licensed to Charleston. The others are in Huntington with news offices in Charleston.
A couple of months ago we blew EBS for a chemical leak (we're the primary). And the system worked very well onthe radio side: all the stations picked up the audio and rebroadcast the message without problem (BTW: Yes, it's very strange to hear your voice recorded on the competing news station).
When the EBS got to Huntington, the local radio stations ignored it-- just as they should have, since Huntington is in a completely different emergency planning zone, and not anywhere near the danger.
But one of the television stations only has EBS decoding equipment in their Huntington offices, not in Charleston. With the Huntington radio stations not transmitting EBS, that television station remained blissfully unaware that anything was wrong because they failed to install EBS decoders in Charleston. Fortunately the other television stations did think to place EBS monitors in their Charleston offices.

Here's the point:
People who listened to the radio got the message. People who were watching Charleston television stations got the message. People who were watching the Huntington television station did not. I won't stand on a soapbox about television stations that spread themselves too thin.

Here's what happened:
We now have a cable intercept system. When Emergency Services signals for an EBS, relays in the head-ends of the local cable systems switch programming

on all channels to the emergency announcement. Even if a station is off the air, as long as the television is on, you'll be alerted.

I'm told it's pretty slick, though I haven't seen it myself, since when EBS goes off I'm generally making announcements, or donning a gas mask to go to the scene (isn't radio news grand). But the public seems happier with the cable intercept than they are with television newsroom reports. I can understand their feelings, since every second you can stay ahead of a plume is important, the information comes directly from the Emergency Services coordinator, and not as second-hand information. Also there's no delay while equipment is gathered and the set is prepped, etc... In fact, the television station can't even override the signal. It's just something that happens. Bottom line: I feel better having cable companies working in the emergency alert system. If I'm watching A&E, I won't know if Channel 8 is telling me not to breathe. But with the cable intercept, I know it's time to hold my breath before it's too late.

HOME PAGE -- Cruising the Information Superhighway

Saturdays 5-7pm (est) on the Omega Radio Network
(Telstar 302, Ch 21, 5.8 audio)

Host: Glen L. Roberts

Format: Two hour live program focused on getting the most out of the
Information Superhighway. Down to earth technical information.

How you can be involved:

* Listen if you have a home satellite dish.

* Talk to your local AM/FM station about carrying our program. It's available
for free to them.

* Send us email with your questions, cool stuff on the internet.

* Tell us who you think would be a good guest.

* Let us know if you have something that should be published as a booklet
about the Information Superhighway (you can make some money here).

* Advertise your net/computer related product or service.

* Join us on IRC channel #homepage during the show.

Many stations were pleased when the ruling came down that they could add "other locations" after their legal ID, which also helps (they feel) disguise their suburban or outstate location: you don't have to fudge the ID for metro listeners, if you can add their Big City to the end of your identification. Example: "W***, MooTown, Indianapolis, and the world!" It invites the imagination to create rather far-reaching ID's, but nobody says you can't say "You're tuned to 1280 K***, Frankfort, Memphis, New York!" Long as that legal Xmttr site is the first town named, you can get creative after that...
Any opinions on what, if any limits there are to this creative ID'ing?

>It has been my (extensive) experience that stations which place their
>legal ID's at :45 or :50 and/or between spots are 'wannabe' stations,
>licensed to suburban locations <snip>

Two other situations I commonly hear are: (1) A station wants to deemphasize its calls in favor of a slogan or positioner, especially when the calls don't resemble the slogan, or (2) The station simulcasts on an AM station, and doesn't want to draw attention to it.

My vote for most creative way to hide actual city of license goes to the Eaton, OH station that ID'd as (calls), Eaton Dayton Alive.

Stations that bury their id's at the :45 or :50 are pretty lame. Of course the FCC requires that stations put id's as close to the top of the hour that the programming will allow, but If you can't find a place any closer to the hour, than 15 minutes either way from the hour, you're pretty lazy! If worried about location in a municipality or hiding an image, promo/legal id's can be produced out of house for a minimum of money or a trade. Thus you can be legal and get a strong image out. Id's placed as carelessly as mentioned above is not only asking for a FCC notice, it bugs the heck out of me!

I host a twice-monthly computer talk show. It is on WNIS 850 AM,
Norfolk, VA. It is on the second and fourth Tuesdays at 7:00 PM. If there
are five Tuesdays in a month, it is also broadcast on the fifth.
It is sponsored by ComputerVisions, Inc., Virginia Beach. We have guests
from all of the major industry players. Last month was Intel and
Microsoft, this month will be Novell. I have had APC, NEC, Compaq, IBM,
and local guests.

2934. Radio Contests - Dallas/FortWorth Edition * DJRON

Newsgroup: rec.radio.broadcasting
Date: 1995-04-16 00:00:00 UTC
From: Marq Kaplan <marqkpln@connect.net>
Message-ID: <3mrm1b$mm8@vixen.cso.uiuc.edu>
Source record: 32751

Well, let's start a new thread! I've not seen a whole lotta discussion
re: Radio Contests and Promotions. I for one find them interesting,
and what the heck, you may win something! So to get things started,
here's a start on the DFW edition of "Radio Contests"

Let's start with KISS FM's (KHKS - Denton/Dallas) current
promo...it's the Kiss Fm Free Money Promo. Here's how it works,
they give out a 1-800 number for you to register to win. When you
call it, a voice mail asks you to state your name, where you live,
and your birthday. Then, all you have to do is listen for your
name, and you call in within 30 minutes of the announcement (usually
at 7:10AM Thursday morning for the big weekly winner - $10,000 - 20,000)
KSCS FM - #1 COUNTRY is doin' the birthday game. Yawn....
if they call out your birthday you call them and win $5,000.
Guess what...be listening Thursday mornings for your b-day. This
coming Thursday, they will be giving away $10,000.
KVIL FM (Highland Park/Dallas) Adult AC is doing the song
of the day. Listen at 7:10 in the morning for the song of the day
and when you hear it, call in and win $1,000.
92.5 KZPS Dallas' Best (but not the only) Classic Rock will
give you $20,000 if they don't play 20 songs in a row. They failed
to play 20 recently and paid off to the lucky listener. If you
call in, be prepared to tell them exactly how many songs they did play.
Speaking of classic rock...our very own Arrow 97.9 KRRW will
pre-register you to listen for your name and call in to win $1,000.
(If they didn't spend so much on Billboards they could probably give
you more for your name.)
If you KLUV your oldies you can play their promotion which
has been going on for sometime now (a year or so). Be the 9th caller
and your name gets registered to win a trip to wherever they want to
send you. They probably give it away on Thursday morning at 7:10
or 7:20.
Finally on this post....MIX102.9 (the station that hasn't
added a new song to their playlist in a few months) will call out
a letter in the A-Z alphabet, if that letter is in your name (first,
middle, last, or maiden or your grandparents' fathers etc...) be the
_____th caller and you win $35,000 this Thursday morning at
7:20AM . Daily giveaways award $1,000.
For Spanish/American listeners, please tune in to one or
the 3 or 4 KICK FM's for their current contest.

Source record: 32752

>Pick your dream air staff - $$$ is no object. Who would you select?

for my talk radio station, I would have:

6-10am Don Imus
10a-1p Rush Limbaugh
1p-4p Jay Severn's show ("Talk PM"?) - formerly gene burns' show
4-5p local talk
5-8p Bruce Williams
8p-12m Tom Leykis (via tape delay)
12m-3a Jim Bohanon
3a-3:30a America in the Morning (Mutual Brd's 1/2 hour morning prg)
3:30a-6a Local talk/news/weather

ABC Information Network to provide the top of hour/bottom of hour
news. Local news staff for local news.

Albuquerque Dukes baseball/Univ of New Mexico sports that would
pre-empt some shows on some days. Might take those pre-empted shows
and play them on weekends just to make sure listeners get to hear
the shows that were pre-empted.

On weekends:

CBS Radio Sports/Mutual Radio Sports live sporting events

Manfra's Weekend sports reports

talk show replays/airing of pre-empted shows due to local sports
broadcasts during the weekdays

Bruce Williams' 3 hours on Saturday and Sunday in time slots where
it won't interfere with CBS/Mutual live sports events

Dukes baseball/Univ of New Mexico sports events

Robert Smathers (NEW ADDRESS!! roberts@nmia.com) Albuquerque, NM

: I've seen this before in trade magazines, and thought it might be interesting
: to see what Airwavers have to say.
: Pick your dream air staff - $$$ is no object. Who would you select?

Here's mine for an almost all-satilite talk station:

6-10 AM Howard Stern
10-12 Noon G. Gordon Liddy
12-3 PM Rush Limbaugh
3-7 PM Don and Mike
7-11 PM Greaseman
11-6 AM Some type of hot live, local programming

Weekends: On Computers, Click and Clack (from NPR), Sports By-Line USA,
other sports programming including local events and talk regarding them.

What does everyone think?

Geez, Tripp...now I know why duopolies were invented(ha!). I'd need two or three stations...but here goes with only one(with shortened airshifts to fit more in)per format:

Musicradio(CHR or oldies):

6-9AM: Dr. Don Rose
9AM-11AM: Larry Lujack
11AM-1PM: Big Tom Parker
1PM-3PM: Jack Armstrong
3PM-6PM: The Real Don Steele
6PM-8PM: Bill Lee
8PM-10PM: Supersnake
10PM-12M: Wolfman Jack
12M-3AM: The Slim One
3AM-6AM: Humble Harve

Weekends: Charlie Tuna, Bobby Ocean, Chuck Buell, Eric Chase, Marvelous Mark Mc Kay, Dancin Mark Hanson, Hollywood Hamilton, Don Sainte-Johnn, Beau Weaver, Dave Sholin, Steve Goddard, Shotgun Tom Kelly, Casey Kasem.

Adult Standards:

6-10AM: Robert W. Morgan
10AM-2PM: Geoff Edwards
2PM-6PM: Gary Owens
6PM-10PM: Larry McKay
10PM-2AM: Johnny Magnus
2AM-6AM: Rachael Donohue

(I know, KMPC did it already, but never with this lineup)

Talkradio:
5-9AM: Ken and Barkley
9AM-Noon: Rush Limbaugh
Noon-3PM: Michael Jackson
3PM-7PM: Ronn Owens
7PM-12Mid:Stephanie Miller

12M-5AM: Larry King

Our EBS Montior has not worked for some time now (we have been using a radio tuned to the proper station with the speaker always on at the control point...this is supposedly legal because we are a Class D station).

The station will be off the air from June->September because we are moving to a temporary location because the builing is being renovated...since we will not be operating at all when the EAS because active, will we have to have a modified receiver in place...

Our current EBS Montior is fairly shot...doesn't recognize tones...and we have no $$$ for a new one...and it would be pointless to buy a new monitor, modify it, then buy another new monitor the following year (besides being pointless...it'd be impossible because of our very small buget).

IF>> I see you're on AOL. Unless you can manage to get a free promotional
IF>>account from them . . .

IF>It'd probably be worth your time to look into this. WEXP trades out our
IF>account with AOL at pretty reasonable terms.

I guess it's all relative. I believe they require a daily mention. If you attach any value to your inventory, the trade is way off balance. If the AOL account costs $9.95 a month and, say, $75 in useage charges over the minimum, I would be giving them $55,000 per month ($250 per mention x 20 days x 10 mentions per day + 20 weekend mentions per month) in air time for an account worth $84.95.

Assuming each of my shows were to use it that would mean 10 mentions per weekday ($50,000/mo.) and 5 mentions per weekend ($5,000/mo.).

Since I have finite inventory and sell mentions to advertisers, it's not a good deal for me. I could take that $55,000 a month and use it for advertising and reach more people in a single ad than AOL has customers.

Youse guys are great to chat with, but you're too expensive per head.

>disguise their suburban or outstate location: you don't have to fudge the
>ID for metro listeners, if you can add their Big City to the end of your
>identification.

True, but honest-to-goodness big city stations do it too...
for example, KGO..San Francisco-Oakland-San Jose. When you're in
one market with two or three individual cities with strong
community identities, it can come in handy.

> not only asking for a FCC notice, it bugs the heck out of me!

One of the larger commercial station here in Philly puts their ID at
:50...I know someone interning on the Engineering staff at this station
and I asked him to ask someone over there why they put the ID at :50...and
the reply was because they have never gotten in trouble with the
Commission...and that they plan it so they are always playing a song at
the top of the hour...

Now after reading these posts on IDs I understand why the put it at
:50...their licnse is NOT for Philadlephia, it is for a suburb...and if I
remember correctly, they put Philadelphia right wafter they state their
city of license (burrying their ID I guess).

Now, I listened more closely...just about all the time, they have a
commercial brreak at the top of the hour....AND they play a
promo...therefor they have a definate break in programming at the top of
the hour.

If caught...what would happen to this station?

The old "Apple 96" in Opportunity/Spokane WA did their legal ID's
as "KKPL, oppurtunity for the Inland Empire", which I thought was a
pretty good way of hiding their actual city of license. (For those
not from Eastern Washington, the Inland Empire is an area comprising
most of Eastern Washington, the Idaho Panhandle, and portions of
northeast Oregon and Northwest Montana, with Spokane as the business
and media center for the region)

Source record: 32767

Sure, finances and research play a large part in how radio has evolved...but why do perceptuals and/or strategics continue to show the same results all over the country?

It's simple....it's reality!!

The most important thing to understand is that people have lives! When we were young, music and radio played a much larger role in our lives than they do now...or *can* now! Now, we have real lives! Knowing every song in the top 40 is no longer a priority...most people I know have trouble identifying the top *4*!! Friends and I had a conversation last night that started with a friend saying, "I saw the Billboard list in the paper and looked at it for the first time in a long time...I knew *none* of the top 10 in any of the formats!" My response: "I understand...I think I know two!"

Current music has headed off in directions that those 25 or 30 and up have difficulty following. Couple that with the normal business (busy-ness) of life and you get the AC chart...songs that really make it stay around for 6-12 months! And it's reality! A station that I was at 8 years ago reached its highest ratings ever playing currents every 4.5 hours for up to seven months!

"People having real lives and more important mental pursuits" + "music off in wierd and/or extreme directions" = your "boring radio!"

But there may be "hope" <g>! Look at the growth of AA and AAA....

Brian Kelly / Dayton, OH

> Please show us the way!!!
Mike,

It was certainly not my intention to suggest that Dallas (or any other market) radio stations play only what I consider to be "Good Music", nor did I mean to suggest that stations should go out on the limb with nothing but new (and unfamiliar) music.

It was my intention to suggest that compelling radio requires taking some chances, and being willing to go out on a limb occasionally. When I hear "well researched radio", I tend to find the results somewhat dull, and I suspect that I am not alone. Remember, if CBS-TV had followed the results of its audience research, "All In The Family" would never have been broadcast--the research results were very negative! I suspect that the lesson in this applies to radio as well as TV

Use your on-campus resources: you may not be able to get the voice of a network announcer reading a national/world story, but who cares? You have the words, and your announcers can read the lead, followed by comments from a professor who can offer in-depth analysis.
This is obvious in the case of things like politics, economics and medicine...and you will find as you build a source-list that the physics professor can give good tape on meteorology or earthquakes, or an Extension Health specialist can produce a nice quote on the latest cancer study, and many of them have sources of their own, personal connections that can produce better analysis of news events than you could get from a network audio source.
Make some calls to other college stations, or even commercial ones, with whom you can swap tape over the phone: offer a well-produced voicer on a local company restructuring or spot news, and they may reciprocate, plus you're making career connections for your reporters' futures after college.
Evaluate your listenership: do they really pine for another sound-bite of Judge Ito's latest ruling, or would they thank you for enterprising a story on what the Contract With America will mean for local road repairs?
Good news directors can do a lot with a PHD's analysis of trends and events, and the great majority of college profs love the opportunity to be asked for their expertise. You're sitting on a gold mine.

>as to where to begin to look, who to call, etc.

This won't be quite what you're looking for, but it's what I did in a
similar situation.

I was news director at the University of Southern California student
radio station for a year and a half. The USC News Service (the school's
PR office) put out every year what it called the "Experts Directory",
which listed school faculty by their area of expertise, ranging from
foreign nations to law enforcement to science. The idea for the
university is to get "USC professor so and so says ..." in the local (and
national) media as much as possible. We used it to get a "reaction
soundbite" on a national or international story, thus also making it a
"campus" story. Contact your school's PR office and see if they have a
smiliar directory.

No, it's not Bill Clinton talking, but it's a soundbite. And it will also
build station PR with school faculty.

Unfortunately, I think that there are some smoldering timbers
over at WNIS. The PD does the morning drive, and he butted heads with
Pat over the last couple of years. But I have heard of stranger
things in radio. Pat is a survivor and will not be out of the scene for
long. I'n not sure of the status of his weekly spot on WAVY-TV. I assume
that they are separate, and he will continue it for a time.

2960. How many Stns carry Rush, and *how?

Newsgroup: rec.radio.broadcasting
Date: 1995-04-16 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <3mrm24$moe@vixen.cso.uiuc.edu>
Source record: 32777

ID>I'm curious specifically about Limbaugh's show, but I think it's
ID>generically interesting as well.

ID>Rush has claimed to be carried on over 600 stations. My question is:
ID>What are the numbers for stations that

ID>a) Carry the show live
ID>b) play a recording of the show during "normal" business/working hours
ID>c) re-broadcast the show in the dead waste and middle of the night

Most stations carry Rush live. Those that delay him usually delay the show by an hour or so to carry it closer to afternoon drive. Many stations rerun the show overnights and on weekend "Best of ..." schedules.

I know of no stations foolish enough to run the show in the dead of night without a midday clearance. There are so many stations in each market that would take the show that the network wouldn't have to allow a useless overnight clearance.

Rush is, simply, the 800 pound gorilla that sits anywhere he wants.

Rich

Source record: 32778

IM>I finally saw the commercial the other night. I thought it was great.
IM>He/they poked some fun at Rush about always being "right" and then he eats
IM>the pizza wrong. Nothing offensive at all. Ya poor lefties out here need
IM>to lighten up and learn how to laugh; you're starting to sound like the
IM>Don Wildmons of the world who get offended at every little thing....

Mark,
I'm afraid it isn't the "lefties" who have been complaining to me.
It's the dittoheads who think he's besmirched his "rightness" and
lowered himself by doing the commercial.

I think the spot is funny and find nothing wrong with him doing it.
But, then again, I'm a Libertarian and we believe in freedom.

Don't forget: the Not-so-reverend Donald "Wildman" Wildmon is a
Republican. Freedom is an anathema to him. Same for Pat Robertson, Jimmy
Swaggart, Jerry Fallwell, Gary Bruce, Randall Terry, et al.

You know, the folks who will have cabinet positions in the next
Republican administration.

IZ>>From a purely comedic standpoint, I DON'T THINK RUSH LIMBAUGH IS 'FUNNY' !

IZ>[Moderator's Note: Mr Limbaugh's 'humor quotient' has been on the
IZ>decline for quite some time. In the beginning he was funny, and that
IZ>made him popular. Now, the few jokes he does use are much akin to
IZ>'laughing at the cripples'. I agree that these things are not funny.
IZ>He has become very predictible too. Sad, because he was an
IZ>entertaining fellow. Bill]

Bill,
In my opinion there were two very important "incidents" in Rush's network career. The first was the "Pat Sajak Incident" where Rush suddenly realized that listeners took him seriously and he cut out the meaner parts of the show. The numbers went up!

The second was the "Lincoln Bedroom Incident." After that he became a mouthpiece for the Republican Party. He was now on the inside. One of them. A president suddenly took him seriously and carried his luggage.

The numbers began to slide a bit.

I'll bet that, if he got back to being the "Old Rush," he soar once again. The man can be very funny. Right now, I find the show very predictable. Much like a soap opera: I can miss it for a couple of months and be sure I won't miss a thing. Republicans are Godly. Democrats are unGodly. Nothing new.

Been there. Done that.

Back in the late '50s I went to a school (that no longer exists) the California Institute of Radio and Television (on the GI Bill). The colurse was one year, five days a week...either days or night.....Two days were spent on technical in order to get a 1st Phone...two days were spent on radio station announcing and operation and one day on TV studio and control room. About 95% of the graduates found jobs. I did rather well in radio and then TV until I moved into print some years ago.The school's reputation was the factor that brought many stations to hire its students for their first jobs.

...Mike Cook asks...

>Does anyone know where Scott Farell (Sports Radio Personality) is?
>He was recently in Atlanta on 680 the FAN. Please e-mail me if you
>can help. Thanks.

He is now on KNBR 68 "THE Sports Leader" in San Francisco from
10PM until 1:00AM. I believe that he is also syndicated on several
other station around the country.

Sport Channel or ESPN parks a camera in the KNBR studio so cable
subscribers can watch Farell flip out on the radio, they call it
"Farell-O-Vision"

Farell is one of the more entertaining people in Bay Area radio!

Matt.

II>the air by Howard. The current battle involves a rather large group
II>of angry Hispanics who are going to do everything possible to have
II>Howard Stern removed from the airwaves. For what? For playing some
II>of Selena's music during a news story about her murder and additionally
II>dropping one gunshot sound effect into the mix. The Hispanics want
II>him removed for what they are calling an 'indecent and obscene act.'

That's not the story I heard. It appears he also ridiculed Hispanics and
their music.

Not to worry. He not only won't be removed, but the publicity will
enhance the ratings. There's just some promotion you can't buy at any
price. Angry protesters outside a building are better than any ad
campaign, and far, far cheaper.

II>A small percent of The Howard Stern Show is bathroom humor. The man is a
II>brilliant entertainer and interviewer. He is quick witted and
II>interesting.
II>Some of he best comics in the world consider Howard Stern a genius. You
II>may not enjoy his style and material, but the numbers prove that most do.

You won't get an argument from me. I'm just tired of superlatively
absolute pronouncements about "genius." "Never before in the history of
humanity has there been a greater, more influential, groundbreaking,
cutting-edge performer than this man."

There have been many. There are many. There will be many.

IP>By way of fairness, Rich, it should be noted that you're in
IP>competition with him, not only with WOR itself but providing
IP>syndicated talk programming of a very different stripe. That doesn't
IP>make your opinion any less valuable or relevant, but for the benefit
IP>of those who aren't aware...

Actually, I am not in competition with Howard Stern. My network doesn't feed programming in morning drive. I'm actually in a position to recommend both Howard and Don Imus to my affiliates who want morning shows. I often recommend him.

IP>For what it's worth, I think Howard HAS broken ground, that he is a
IP>terrific satirist, and I'd prefer his show to the type of shows that
IP>you produce... but there's plenty of room for both, and no reason not
IP>to support the right of both to speak freely. No need to flush
IP>anything away...

My point was that we tend to attribute "groundbreaking" status to whoever is hot at the moment. That leaves folks who really do groundbreaking work out in the cold. I found Lenny Bruce to have broken ground well before Howard. I found Mort Sahl to have broken gound as a satirist well before Howard.

Howard is very, very good at what he does, but it's been done before.

You're also taking my comments as a slam against Howard. They're not. Howard's show is not offered on a barter basis. To make barter work you have to have 80% coverage of the country. Howard's show is difficult to clear simply because it's (a) so expensive and (b) fed in morning drive where most stations make the most money and don't want to give inventory or reduce the number of spots carried for a network show.

Content is also a problem in all but the largest markets.

I don't compete with Howard in the same way I don't compete with Limbaugh. I offer 100% counter programming in those dayparts. I can't imagine any network stupid enough to program political talk against Limbaugh and expect to survive. In fact, the Limbaugh folks and I often swap leads. How many stations drop the last 2 hours of Liddy to carry Limbaugh? Most of them. It's like playing chicken with Orient Express.

Rich
Director - WOR Radio Network

2969. Wanted: Good, but inexpensive traffic program

Newsgroup: rec.radio.broadcasting
Date: 1995-04-16 00:00:00 UTC

radio traffic software

--
George J. Molnar Madison Broadcasting
================ ====================
Amateur Packet: KF2T @ N0QCU.#NECO.CO.USA.NA
Internet: gmolnar@nexus.interealm.com

Hello!
I'm looking for an INEXPENSIVE, but reasonably full-featured traffic program
for Windows or DOS. It doesn't have to be the world's most exciting or
advance program, but should allow my traffic people to enter spots, keep
a log, and print the basic reports (avails, monthly summaries, salesman
totals, etc).
Most of the commercial programs out there are way to expensive for us -
a group of stations in SMALL markets. I'd like to get every station on
with the same software, if for no other reason than my peace of mind.
Thanks!
Geo

2970. Unionize the Listeners!

Newsgroup: rec.radio.broadcasting

From: jcrose@tiac.net
Message-ID: <3mrm2d$mp4@vixen.cso.uiuc.edu>
Source record: 32787

Guerilla Productions (the tv promo syndication arm of Steve Stockman's excellent Custom Productions) has a very funny --and copyrighted-- campaign about paying each listener a share of the dj's salary.

Further, lots of stations offer a big-bucks guarantee to the listener that they'll play ten -- not nine, or eleven -- songs between commercial breaks.

Why not go all the way?

If we're going to unionize the jocks so they can't be fired when the format flips, and we're going to unionize the sales reps so they can't be fired if the market dies, it seems only logical that we should unionize the listeners:

Members will be guaranteed --

* they'll keep on hearing their favorite songs no matter how the format changes

* all contest results will be based on seniority

* health insurance that covers losing your breakfast over insipid am-team talk

* number of furniture-dealer ads will be rigidly controlled

* two weeks vacation a year, where they're given a stack of CDs and a player so they can program their own.

2971. VOA's Bethany OH site and Cuba

Newsgroup: rec.radio.broadcasting
Date: 1995-04-16 00:00:00 UTC
From: jpodonel@unity.ncsu.edu
Message-ID: <3mrm2e$mp7@vixen.cso.uiuc.edu>
Source record: 32788

[fyi]

Late last fall, the Voice of America closed down the Bethany OH site
in a cost cutting move. The site, near Cincinatti, had been active
since the 40's, and I believe was owned by Crosley prior to that time,
not sure of the timing of the ownership change to VOA.

Bethany was shut in November '94 I believe. Ironically, on the day
of shut down, the site staff received an urgent phone call from VOA HQ
asking them to stay on the air until the Radio Marti feed had concluded;
as it was, Bethany was set to close during that feed. This proved to
be prophetic.

Bethany was quickly dismantled [transmitters and audio control],
and the transmitters were sent to the new Sri Lanka relay station for
use there.

Within these last two weeks, VOA has begun executing a plan to add
antenna/transmitter capability to it's Greenville NC relay. Reason:
when Radio Marti was shifted from Bethany to Greenville, the
signal delivery to Cuba was weaker--Greenville's antennas are designed
for longer hops, and it is too close to Cuba, so the signal's intensity
misses the island.

Greenville will get 'high angle of attack' antennas, which will
compensate for its close proximity [from a propagation planning standpoint]
to Cuba.

As I understand it, Bethany was well maintained, and obviously had
good equipment, or it would not have been shipped to a NEW relay site
in Sri Lanka. So this story could be one of government not knowing
what the left hand is doing, while the right hand acts.

Regards,
J.

2972. Re: WCCO gets new GM

So Stella...
Is there any info on who Mr. Gustafson will install as
program director to replace Jim Ashbery?
And, since a number of rumors have circulated con-
cerning an air staff shakeup (especially in middays and
afternoon drive, where KSTP has made some inroads),
who may be on the bubble or on the way out?
I've been following this situation not only because 'CCO
is a major force in full service talk radio...but because of
an acquaintance with a couple of the key players in the
controversial slide of 'CCO. Gottlieb previously had some
success in turning CHR station WBBF-AM in Rochester
into a talker (although it switched to a nostalgia format
after both he and several key air staffers moved on, and
two other players---us and WHAM---entered the talk battle
to stay). And Ashbery was our PD at WHEN in Syracuse
20 years ago; that was his first major success in program-
ming a news-intensive, full service personality station. He
later had a successful run at WSB in Atlanta, which is
still using a lot of the same lineup he put together a few
years ago.
Any thoughts as to why their changes flopped this
time? Some folks working for the competition have told me
they even think the next PD will go back to a full-service
format including soft AC music...like the 'CCO of a decade
ago. Are they just blowing smoke, or thinking wishfully?
Or is that change actually being contemplated? Inquiring
minds want to know...

Bob Smith, middays WXXI-AM 1370 Rochester NY

Well, if Z-100 does move I hope that they do take some time and build out the facility correctly. I personally happen to know a little about the current one. Why, because I built it.

The original owner, Malrite Communications, literally threw the station together. Scott Shannon and I laid out the current studio in 10 minutes. Unfortunately the main control was already built out as far as the walls were concerned, AND we were already on the air.

It is amazing to me that they are still in the same control room. That really says a lot about their technical staff. David Reaves and Steve Pepe are two of the best engineers going!!!!

While a move is probably in their best interest, it will be a little sad for me, as I have many great memories of that facility.

From: jcassara@cris.com
Message-ID: <3mrm2h$mph@vixen.cso.uiuc.edu>
Source record: 32791

610 WIOD in Miami, Florida has been experiencing some programming changes lately. The overnight playing of The Don and Mike show, along with The Best of Neil Rogers has been canned in favor of Dr. Laura (12-2AM) and The Gary Burbank Show (2-5AM) -- both on tape delay. Weekend morning host Larry Justice is being replaced with the return of Chris Baker (time ?).

For the Don and Mike fans in Miami, the boys will return to the market within 2-3 weeks. According to Don Geronimo, the deal has just been completed. It is rumored that BIG 106 will air the show live.

> What's the story??

I wasn't aware of the WSUN calls anwhere but the original, but this seems to be a quick and dirty way to get some attention with a familiar set of calls. WSRZ being a rare exception to that rule. Usually the new station is a pale imitation of the original. About 10 years ago the legendary WMEX calls were resurrected on a different frequency in Boston to launch an oldies format. Of course, it was as bland as any FM oldies station, no hint of the "soul" of the original, and with a signal even worse than the original, was doomed to fail. Are the WYNF calls really considered that legendary? They were AOR maybe 10 years at the most, and the last couple years they were pretty far down in the pack.

2977. Chicago radio watch: 4-15-95

Newsgroup: rec.radio.broadcasting
Date: 1995-04-16 00:00:00 UTC
From: JJB92@aol.com
Message-ID: <3mrm13$mlh@vixen.cso.uiuc.edu>
Source record: 32841

Welcome back to....

Ed Schwartz is returning to the air after an extended abscence caused by serious medical problems. "Chicago" Eddie as he was known during stints on WGN and WIND will hold court from 2-5 am on WLUP-FM (97.9) Tuesday through Saturday.

Phyllis Levy, former host at WKQX and WLS, returns to the airwaves at Boston's WRKO. Phyllis, a registered sex therapist, had hosted a call in show on KQX and LS regarding sex related topics. Although the show will be on WRKO initially, syndication is a possibility. The move reunites John Gehron, Chief Operating Officer at RKO with Phyllis. Her new show airs nightly for 2 hours.

Jay Mariotti, formerly of WMVP, has resurfaced with the One on One Sports network. Jay teams up with his producer at MVP, Mark Gentzkow. Mariotti, who lost his column at the Chicago Sun Times, won't have a Chicago outlet for the daily 9-11 am show. The show will have 160 affiliates nationwide however.

Clark Weber, long time personality at WLS, WIND and most recently WJJD, has resurfaced at WAIT-AM (850) with a talk show from 7:30-9:30 on Fridays.

Arrivals and departures......

Peter Brown, a little known blowhard from ESPN's weekend sports programming has been brought in at WMVP. Brown will broadcast daily from 4-7 pm. Pete is the stations third attempt at the afternoon drive since going to the sports talk format. Rival WSCR dominated the battle between the sports talkers during the fall book when it doubled MVP's anemic 1.0 share. Pete, who vowed to "turn around Chicago around", will continue his weekend gig at MVP. Good idea, Pete. The over/under line for his life in the city should be about 14 months.

In conjunction with the move, Norm Van Lier and Lance McAlister move to the 1-4 pm slot. They will team up with Jim Kozimor. Three hosts in the studio? Let's see how long that lasts.

Allan Stag is out at WCKG. Allan, who had been handling the afternoon drive at the dinosaur rocker, quit rather than accept a switch to nights and a paycut. Allan was quoted as saying the move was "more than anyone could tolerate". Most listeners have long had that reaction to the music selection at the station.

Scott Childers, traffic reporter at Metro Traffic, has landed a job weekends on WPNT-FM (100.3)

Mike Greenberg, lead reporter at WSCR-AM (820), is leaving for a job at cable television station CLTV-(Chicago Land Television). "Greeny" as he was known at "The Score", will be a sports anchor and reporter at CLTV.

Rich Ackerman, formerly of WSCR, has landed weekends at newsradio WBBM-AM (780).

Change is in the air.....

As noted by Jay Marvin in a post earlier this week, WLS-FM (94.7) has become the second station in the market to cover the O.J. Simpson trail gavel to gavel. Jay switches from his afternoon spot to evenings. Turi Ryder, who had been handling the evening spot, will handle trial breaks and "instant" analysis of the festivities.

WDND-DM (105.5) is now WYKT-The Cat. The station now features classic rock with a deejay line-up of: Bob Mackay, Marielle Salas, Rick Ferguson and Mick Oliver.

Promos.....

Dean Richards is now the Production Manager at WGN. Dean continues his Sunday afternoon gabfest and staff announcing at GN.

John Calhoun is now the Music Director at oldies WJMK-FM (104.3). John had been a weekend and fill-in jay at the station.

Note: If Arbitron ratings are released this week, I will post results as soon as possible.

sbweaver@freenet.vancouver.bc.ca (Scott B. Weaver) wrote:

In Vancouver, we have a TV station who goes by "BCTV"
(it's our CTV affiliate). But, if you look in any
international radio callsign book, you'll notice that
Canada doesn't have any allocations for callsigns
beginning with "B".

You're right. "BCTV" is not a "real" call sign.

(I believe we have CF-CK, VA, VE, VO, VY, and some
X- calls, but not "B".)

Canada also has CY and CZ, as I recall.

And, correct me if I'm wrong (it's been a while since
I looked up anything like this), but most CBC stations
use callsigns like CBUT (Vancouver) or CBLT (Toronto)
or CBMT (Montreal), etc. Again, Canada doesn't have
allocations for calls beginning with "CB" (at least,
the last time I checked, which was admittedly several
years ago and things may have changed). What's up with
that?

Technically, CB... calls belong to Chile. According to some material
I got from the Department of Communications (now Industry Canada) when
I was studying for my Canadian ham radio licence, there is an interna-
tional agreement of some kind whereby CBC stations are permitted to
use CB... calls. I don't have any other info about this agreement.
Other commercial broadcast stations in Canada are assigned calls begin-
ning with CF or CH-CK -- except for a couple of radio stations in New-
foundland which have been permitted to keep their original VO... calls.

BTW, in spite of assertions that all Canadian broadcast stations are
required to ID themselves with their call letters every hour, I've
observed numerous cases where this is not done. CBC radio and TV
stations apparently =never= use their call letters; Ontario's "Global"
TV network (a Toronto station with repeaters all over the province)
ID's itself as CIII only at signoff; and radio stations frequently
seem to "ID" themselves only via their nicknames, such as "Oldies Ten
Ninety" (CKKW, 1090 kHz, Kitchener/Waterloo) and "Six Eighty News"
(CFTR, 680 kHz, Toronto).

>Newfoundland. Are they still the Canadian call-sign anomaly? Are VOAR
>and VOCM still operating under those calls? Are there any others?
>
>I realize they were grandfathered in when Newfoundland became part of
>Canada in the 1940's. I guess I'm just surprised they are still
>recognized.

I am not sure that VOAR is still around, but VOCM is still using
those call letters, and another St. John's station is VOWR. The
CBC station in St. John's was orginally VONF but the call was
changed in 1949 when Newfoundland joined Canada. Ham radio callsigns
in Newfoundland all begin with VO1 or VO2.

Incidently, not all stations in the rest of Canada have calls beginning
with the letter C. Some low power FM (and possibly TV) rebroadcasting
stations (these would be called translators in the U.S.) have calls
Vyxxxx, where y is a letter and xxxx in a four digit number.

Shortwave stations in Canada at one time had calls VE9yy (yy = two
letters, i.e. VE9GW in Toronto but they now all use four letter calls
beginning with a C.

Dear Andy,
Good Topic (and timely too). In DFW we are fortunate to
receive on local AM 1190 24hrs KGBS. Evenings from something like
10p - 2a or so, they originate INTERNET AMERICA or INTERNET AT NIGHT.
(I do hope that's the real name, if not, it's close.) They have an
entertaining host, and there is so much great Internet Info that
comes out of that little speaker, that it can make your head spin
at times! The other night I won a copy of OS2 WARP for my computer.
Check satellite listings for this station, as I believe they operate
an uplink.
Hey Tony, if you read this hello to you and all of your
listeners and thanks again for the OS2 WARP!
AM 570 - KLIF does a program on the weekends all about
computers. Not sure of title or times, but you can get it from
them.

My ops manager and I are having a feud...

With the addition of a new jingle package, I have formatted our jocks to NEVER talk without music under them (except in mornings). Into the stopsets, there is a talk bed, for songs that end cold into songs that start cold there are "talkup jingles" with a bed in front of the sing, the
PSA's out of the stopsets have a bed for them.

He says if there's no "reason" for the bed, it sounds "amateurish". I say it helps maintain momentum, keeps the jocks from rambling beyond the length of the bed and if the listener isn't paying strict attention and hears music, he's less likely to punch then all of a sudden hearing dry voice.

I'd like to hear your CHR station's experience with this...

Chuck is still syndicated on the People's Radio Network, some 295 stations strong. It's interesting to note that Chuck was listed as one of the 25 most influential (or some such) talk hosts in the nation by Michael Harrison of Talkers magazine. Chuck himself is on around 260 stations as well as around 50 tv stations that carry a half-hour daily strip.

Or if you have a home satellite dish, you can catch the program on Catcom C-1, Transponder 2, 7.5 mhz wideband audio.

As for the Sun Radio Network, it basically committed suicide when they dropped from full time to half-time. About 50 affiliates (I was one of them) went away, and today I would speculate they're well below a hundred...

"Point of View" on WNUA-FM (95.5 FM, Chicago) often features interviews with people involved with computers and on-line communications.

Among those we've interviewed featured in the last couple of years: William "CyberSpace" Gibson; Michael Crichton (excerpts from a speech in Chicago); Joshua Quittner and Michelle Slatalla (_Masters of Deception_); J.C. Herz (_Surfing on the Internet_); Andy and Tina Rathbone (_[*.*] for Dummies_)

Further afield, we've hosted sf author Greg Bear and _Hitchhiker's Guide_ author Douglas Adams (who writes frequently about his computer adventures).

Still to come--in the can, and likely to air within the next month--an interview with Cliff Stoll (_Silicon Snake Oil_).

"Point of View" airs each Sunday at 8:30 a.m. (Central Time) on WNUA 95.5 FM.

Run, do not walk to your local U.S. Gov't. bookstore and buy a copy of Title 47 of the Code of Federal Regulations ($115) tune to part 73 subpart G and read your obligations to the EBS/EAS under the code. You may have a couple of outs, but then again not. I don't think that your complying with the rules as you are currently operating, but I'm too lazy at the moment to check my copy of the CFR.

My advise to you.... Pick up a used TFT 760 and modify it for EAS compliance. It's easy, only a couple of caps and resistors to change the timing. I have a TFT 886 and I can't wait to modify it.

I've used 760's with tuners that didn't work and used external radios to feed the decoder. These worked very well.

Good luck on your QUEST!

From: robert573@dallas.relay.ucm.org
Message-ID: <3muevc$eg0@vixen.cso.uiuc.edu>
Source record: 32720

Well, I just got through reading the postings in Airwaves under this topic... and now here's my $0.02 cents worth.

So and so says that "people have lives, and don't NEED radio / music anymore". I disagree.... Music is a VERY large part of my life, it's the RADIO I don't need anymore. Despite the fact that I love working for radio, I hardly listen to it anymore.

But I don't think it's fair to cut down radio, because they are trying to format for one sound. What I think ISN'T fair, is to say that ONE format supposedly dominates to a demographic group in any given location.

I don't care what the Arbitron ratings say.... there are TOO MANY Country formated stations in Dallas. We have 4 on the FM band, and a countless number of them on the AM band.

The rest of the FM dial in Dallas consists of "one" CHR, "one" AC, "one" Hot AC, "one" classical station, "one" AOR station, "two" classic rockers, and "one" alternative, and "one" new age / jazz station.

So my question is.... where is some competition for all those "one" stations??? Dallas really needs at least two stations for every format.

Country may be one of the most popular formats, but "4" FM country stations in "one" major city.... that's ridiculous!!!

I don't listen to country... my co-workers don't listen to country, my parents don't listen to country, my friends don't listen to country... or they do, because there is "no other choice".

And another thing about music... in general. Most of all the music that comes out these days... sounds exactly the same! Country today is progressive, which could fit quite nicely on hot AC. The CHR acts of the 90's are either rap, or R&B. KEGL, which promised to remain CHR, is now more like Q102... which is probably as far as you can get from CHR. And then there was that format that syndicated from Dallas, called "Z-rock" which lost the Dallas affiliate to a Spanish Language format.

I think some major format "housecleaning" is needed in Dallas. But what I really think, is that the recording artists need to stop copying the other "New Kid On The Block", and be more original! I want to know where the 90's versions of the 80's artists like Bruce Springsteen, Glass Tiger, Starship, or U2 are? Where are the 90's versions of the 80's artists like Eddie Rabbit, Southern Pacific, The Judds, or Dolly Parton? And how about the 90's version of the 60's Beatles??? Where is it???

Where's the 90's version of The Rolling Stones, The Doors, America, Crosby Stills and Nash, Fleetwood Mac... etc etc etc?

I can understand exactly why someone who has not been in touch with music for awhile, can look at a countdown chart of today and say "who the heck is that?"

Also, don't blame a radio station for not adding anything new to rotation in the past few months. There may not be anything "new" coming out that fits their format....! As I recall, Spring is generally a slow period of the year, for new music....

: What do you think the best way would be for us to acquire sound on national
: and international stories?

Two suggestions:

1) Call C-SPAN. They will allow use of their material generally for
credit. You can also try CNN, but I would be less than optimistic.

2) I'm surprised that no one else has suggested this one...shortwave
radio! BBC World Service is usually very easy to get along with, and I
have used material from them as well as Radio Moscow, Radio Nederland
(holland), and others with just an attribution credit...

Now Shortwave isn't the highest fidelity in the world, nor is it totally
free, (Probably $200-300 for a receiver and antenna) but it usually works!

From: robert573@dallas.relay.ucm.org
Message-ID: <3muevn$ei6@vixen.cso.uiuc.edu>
Source record: 32725

At 7:33 PM CDT on April 13, 1995, the folks in Alpine, Texas
experienced a tremor...

It was an estimaed 5.6 quake on the Richter Scale. The
epicenter was about 20 miles East-Southeast of Alpine, Texas.
Alpine is not a densly populated location. It's about 300 - 400
miles to the east of the Dallas / Ft. Worth, Texas area.

Aftershocks were reportedly felt in Dallas / Ft. Worth and SanAntonio.

No injuries were reported as of the time I submitted this to Airwaves.

I have a few questions:

1. How many Radio / TV stations are in that region, if any at all?
2. Did any stations talk about this, especially stations in the
D/FW area? (the radio station I work for, did mention it, we felt
our listeners would be interested in hearing about it)
3. When is the last time Texas had an earthquake, prior to this one?
Where was it located, what was the magnitude, and how much damage
and injuries/deaths resulted?
4. If and when Earthquake prediction becomes a more reality, would it
constitude EAS activity? (I would assume it would, as a local
emergency).

thanks!

Hi! My name is Cathy Campbell and I am a senior electronic media major at the University of Northern Iowa. I am doing a research project on digital audio radio and/or radio broadcast data systems. I was surfing the net and came upon your page. I'm not sure how to get any info from your Internet Radio Journal (that's what peaked my interest initially) so I'm asking if anyone/everyone could send me any available info you might have on this subject. This could include anything on SmartRadio,etc... I sent an e-mail to William Pfeiffer and he suggested that I post to you and ask for your help. Anyway, any info you could send me ASAP would be greatly appreciated!! Thanks for any assistance you can give. Please send replies to me at CAMPBEC4014@Cobra.UNI.Edu. Thank you for your help!!!

Arbitron counts everyone, but doesn't publish numbers for non-commercial
broadcaster. There is a service which takes the numbers and breaks them
down for non-coms. If Sacto is like many other metros, those stations
probably rate rather well.

IC>Part time D.J., and full time car salesman Robert Wright evidently
IC>had too much time on his hands. The weekend KSON AM/FM disk jockey who
IC>goes by the name of Bob Kelly, made friends with a 16-year-old girl, and go
IC>her to pose nude. This didn't go over with her parents, and the law toogoo
IC>good

Chris,
I've always warned people that listening to country music can be
dangerous. :-)

IC>KWNK 670, Sima Valley. The station [which is 5kw/1kw DA1] has been
IC>simulcasting XETRA AM for two years -- complete with Mexico I.D.s!
IC>[Something I don't understand here: I know that FM has ERP, but does
IC>AM? Conflicting information from Nobel has XETRA at 50kw, and press
IC>announcements at 100kw -- with an AM ERP. I've also read the same
IC>for KCBS San Fran that she pumps 200kw south because of ERP. Can an
IC>engineer explain this -- in understandable English?? Thanks!]

AM has ERP, but it's not used as much as FM as a measurement. If you
pump 50kw into a non-directional array the signal strength will be
almost uniform around the antenna. With a directional array, that 50kw
is pulled in from the sides (depending on the pattern) and that "side"
power is now emitted in the remaining directions. A signal strength
reading will show more signal in the main lobe than it would, at that
point, in a non-directional array. Think of it as a balloon. The more
you squeeze the sides, the bigger the other ends get.

IC>The talk show circuit on other stations -- most notable on KFMB has
IC>improved, gotten stronger -- and has received better ratings. KOGO
IC>has increase -- but not as much as expected. They have gone from a
IC>null to a high of 2.0 -- which is good for one year. But I'm burnt
IC>on listening to syndicated programming from the east, and the views
IC>of these hosts. It starts to blur because a majority of them are
IC>right, Right, RIGHT!!! [Damn the torpedoes, full speed ahead!]

IC>Bottom line: if it's local live radio for San Diego, it's 760 KFMB
IC>with Stacy Taylor and Ted Leitner. Plus Mark Larson on KPRZ San
IC>Marcos [former KFMBer]; and Roger Hedgecock on KSDO. Syndication may
IC>be cheap, but, in my view, not effective.

Then the argument should be one of variety, not where they are or
here they come from. EFM, Rush Limbaugh's syndicator, would certainly
take issue with your comment on it's effectiveness. Good programming is
good programming, regardless of its source.

If the location of its production were really an issue, Television would be an abysmal failure. In most markets, most of what's broadcast comes from somewhere else.

Frankly, I can't see why Stacy Taylor, Ted Leitner or Roger Hedgecock bashing Bill Clinton has any local value whatsoever. Other than a change in voice, the message is the same.

I think that's as elusive as the good five-cent cigar used to be.

I have tried several of the least expensive programs and, while they all seem to do a reasonable job, they all seem to be full of built-in potholes.

The software provider hooks you with an inexpensive program, as far as purchase price is concerned, then builds in code that shuts the system down if your traffic director hits a wrong key. You have to call them for "support" for which they bill you on a monthly/quarterly basis forever. The correction is usually something simple like "hit the F3 key", and everything goes back to normal. They build in these problems, keep the info out of the documentation, and charge you forever.

Good luck, though, and if you ever find software without the built in residuals I'd like to hear about it.

Grant

IJ>> That's hardly a proper conservative principle.
RW>[snip]
RW> asking about how they can syndicate. It's bad when the other guy does
RW> it, but OK if they do it. So much for conservative principles.
IJ>[snip]
RW> Your comments hardly sound like a Republican's. They sound more
RW> socialistic and, God forbid, "liberal." Rich

IJ>Okay, Rich, your post does two things: it delineates "us (conservatives)"
IJ>and "them (liberals)"...and you imply that it is a bad thing to be a
IJ>"God forbid, 'liberal'".

IJ>Your post also suggests that conservative principles mean that people
IJ>can be fired at will and it should be that way...protecting a person's
IJ>livelihood is "God forbid, 'liberal'".

IJ>Thank you for giving me a reason to feel good about being a liberal
IJ>today.

Ed,
It's clear you didn't read my sarcasm. In my opinion, a "Liberal" is anyone one disagrees with. It no longer has any real meaning. Folks use it as a pejorative term without attaching a specific meaning to it.

It's another of our absolutist approaches. Either you're a Conservative, or you must be a Liberal. As a Libertarian who wants the government out of my pants I'm often accused of being a "liberal" because I don't want to see Pat Robertson, Randall Terry and Jimmy Swaggart running my government. To me, having "family values" doesn't mean I have to hate anyone who doesn't match some preacher's template.

It isn't the government's job to proptect your livelihood. They may specify things like severence requirements, but not tell an employer he must keep you on the payroll. If they do that it becomes employee welfare that's just as bad as corporate welfare and welfare welfare.

As most people, I'm Liberal on some things and Conservative on others. Mostly I want the government to do more for me than it does to me. Just remember the feeling you had the last time you received a letter from "the Government." Relive that moment of fear to understand what I mean. These are supposed to be your servants.

Some governmental idiot recently answered a tax question by saying "after all, we let you keep 70% of what you make." Nice of them, since I did the work to earn it.

IJ>I've been in radio management and I've been a member of AFTRA in a
IJ>Right-to-Work state. The most astute observation about radio unionization
IJ>I've heard came from a labor relations lawyer who specialized in busting
IJ>unions. He said "any radio station that ends up unionized probably deserves
IJ>it." Unions are too much trouble to organize unless station management is s
IJ>bad it makes all the fear and loathing of an election and the late night
IJ>phone calls and the threats and counterthreats worthwhile.

JP,
That's it, in a nutshell. Bad management attracts unions. I've seen
cases where bad management was replaced by good and the staff threw the
union out. They didn't feel an adversarial relationship was needed.

I watched a major network negotiate an engineering contract. The
union folks were so far behind the times that they didn't understand
what non-linear editing was. They gave away the union's jurisdiction
over it. Then they realized that that's how most production is done.

Bad unions and bad management were made for each other.

Rich

I agree. I have been in several businesses; among them was a telephone answering service with 19 employees. While the big guys across town were trying to unionize I noted that a union rep met with some of our crew. The verdict: my company paid better and had a health plan -- things not even covered in the union negotiations with the big boys across town. I'm convinced that the only reason unions exist is because they HAVE to. I was involved in a bitter attempt to unionize Williams Sonoma (the gourmet cookware mail order house). It was not fun, it was not a laugh, it was a damned tough experience which lasted for nearly 3 months -- and we STILL got doublecrossed by management and lost anyhow. My sympathies go out to anyone needing to organize a station.

3022. Rock-99 [SPFLD Mo.] now "The Buzzard"

Newsgroup: rec.radio.broadcasting
Date: 1995-04-17 00:00:00 UTC
From: rrb@clm.aiss.uiuc.edu
Message-ID: <3mueto$eag@vixen.cso.uiuc.edu>
Source record: 32794

[Springfield Missouri] Heritage rocker KWTO-FM [98.7 100kw - 600']
just unveiled the beginnings of their new format called 'The Buzzard".
They have been playing very loud, aggressive grunge rock since dumping
their (IMHO) great acoustic-album-alternative format this Spring. I
had heard rumors of a country format on KWTO, as well as AC (neither
are needed in this market). However today kicked off the new format,
"The Buzzard". They are a duopoly of KWTO-AM(talk) and FM, KTXR (FM).

Their interim positioner is "Rock-99 - The Buzzard" and the format is,
I guess, classic rock. When I tuned in today and heard "Whatever
gets you though the night" By Lennon, I was prepared to say "Great,
another stupid regurgitation of well-worn-out hits of the sixties and
seventies..." But as I listened, I discovered that while it surely is
classic rock, it is NOT just the same old songs. Here is a classic
rock format which is not stuck on the same worn-out stale garbage that
populates most stations of its genre'.

They are going into the albums for songs which are easily recognized
but are unheard or little heard on most C/R outlets. Plus something
else which I have missed since the glory days of progressive radio...
segues. They seque cuts with some regard for the titles, subject
and musical flow. This is something I have not heard (with the
exception of KPIG) for a Looooooong time. That, coupled with the
playlist of songs that are not as worn-out, yet are familiar, makes
this new format sound very interesting.... presuming that they are not
just doing this to attract listeners to the new format.

Which brings me to another point. Why do stations do that? I mean if
they offer an interesting playlist of 'flashback' tracks (songs that
you have not heard for a while that instantly rivet you back to a
time and place) in the beginning, to "attract" listeners, why do so
many stations then revert back to the SOS (same old songs) later,
after they are established? If they feel that the initial format of
'interesting flashback songs' is attractive, why not stick with it?
If they feel that such under-worn tunes are *not* attractive, then why
do it to begin with?

Anyway, back to the Buzzard.

While I would much prefer a return to the intelligent
acoustic/progressive format they were doing previous to March 1995
when they went grunge) I can see this new format as a breath of fresh
air in the classic rock world. Hell, I even heard "White Bird" by
"It's A Beautiful Day", segue'd masterfully into 'White Rabbit' and
then 'White Room'. Ok, maybe it sounds hokey by 90's standards, but
it was nice to hear.

BIG PROBLEM THOUGH....

Hey Guys... You aint playing head-banging grunge anymore... Ya Gotta
turn those damned composite clippers down!!!! I mean the distortion
is unbearable. Some processing is fine, but these guys are compressed
and clipped more than WLS in 1972! Geez, this is the age of CD's, we
are not listening on a 5 tube table radio with a 4" speaker. Get with
the program and turn the stuff down to, say 20% distortion, OK?
On my Sony stereo in my truck, the clipping was so bad (even on
acoustic numbers like White Bird) that I almost couldn't deal with it.
If the sound stays like this, people are not gonna listen for long,
thats for sure. Sounded like an over-driven digital Optimod to me.
REEEEEAAALLL Bad. I know there is at least one KWTO employee reading
this digest :).

So lets see if the new "Buzzard" (what a positioner) can keep up the
level of quality or if we are gonna be treated to a few weeks of this
followed by the usual C/R crap later on. BTW, we now have ...

KWTO - Classic Rock (The Buzzard)
KZBE - Classic Hits (B-95)
WXUS - Classic Rock (US-97)
KOSP - 60's Oldies (The *new* Oldies 105.1, now there is a strange positioner)

How much can one small market stand?

Other rockers include...

* KTOZ - Commercial Alternative (Channel Z)
* KLTQ - Light Rock

One CHR

* KHTO (called KHOT except during legal ID)

Four country signals

* KTTS - Full service/Country
* KGMY - Young, Hot Country (My Country) (Simulcast on 1400 - AM)
* KTTS(AM) More traditional country

One AC

* KGBX (duopoly with KGMY AM/FM)

One CCM

* KADI (Pure Radio)

Three EZ...

* KTXR (The Gentle Giant) Duopoly with KWTO AM/FM
* KZPD (The Gentle Beat) Rimshot class-A lots of Big Band/Standards
* KTOZ-AM (Unforgettable station) Big Bands through Beatles

1 NPR

* KSMU (has full-power repeater in Branson and two translators elsewhere)

* William Pfeiffer
* Moderator/Editor rec.radio.broadcasting/AIRWAVES

From: Chris Carmichael <CCHRIS@cei.mhs.compuserve.com>
Message-ID: <3muetr$eao@vixen.cso.uiuc.edu>
Source record: 32796

Here's what's happening in the 55th market:

Part time D.J., and full time car salesman Robert Wright evidently had too much time on his hands. The weekend KSON AM/FM disk jockey who goes by the name of Bob Kelly, made friends with a 16-year-old girl, and got her to pose nude. This didn't go over with her parents, and the law to good. He's now sitting at San Diego County Jail and will see the judge today. KFMB-TV had an exclusive on this; and had an interview with the victims mother. She found some photos on the daughter's bedroom and called police. The authorities tapped the phone, and when Wright called the girl, he was trapped.

Wright is married and has children. There hasn't been any comment from KSON, except for the standard, "A local disk jockey has been arrested . . . . "

On the heels of the announcement that XETRA-AM/Noble Broadcasting is building seven towers in Rosarita Beach, the corporation is buying KWNK 670, Sima Valley. The station [which is 5kw/1kw DA1] has been simulcasting XETRA AM for two years -- complete with Mexico I.D.s! [Something I don't understand here: I know that FM has ERP, but does AM? Conflicting information from Nobel has XETRA at 50kw, and press announcements at 100kw -- with an AM ERP. I've also read the same for KCBS San Fran that she pumps 200kw south because of ERP. Can an engineer explain this -- in understandable English?? Thanks!]

KOGO [600, 5kw DA1] entry into 'Hot Talk' one year ago promised another outlet for San Diego. What has happened since then? When they first switched from music to talk, there were three local live shows for an eight hour block. George Weber disappeared in January, Dave Dawson stayed in Kansas City, and now it's program director Peter Weissbach as the only show that's live during the week. The mornings after Imus is either G.Gordon Liddy, followed by Ollie North -- or the O.J. Simpson trial. [As one cross-country poster told me: they should change the call letters to K-FLN: all felons, all the time!][Thanks Bob!]

The talk show circuit on other stations -- most notable on KFMB has improved, gotten stronger -- and has received better ratings. KOGO has increase -- but not as much as expected. They have gone from a null to a high of 2.0 -- which is good for one year. But I'm burnt on listening to syndicated programming from the east, and the views of these hosts. It starts to blur because a majority of them are right, Right, RIGHT!!! [Damn the torpedoes, full speed ahead!]

Bottom line: if it's local live radio for San Diego, it's 760 KFMB with Stacy Taylor and Ted Leitner. Plus Mark Larson on KPRZ San Marcos [former KFMBer]; and Roger Hedgecock on KSDO. Syndication may be cheap, but, in my view, not effective.

XETRA-FM's morning show with Howard Stern didn't raise any objection from the local Mexico audience after the shock-jock raised kaos with his bit on the slaying of Latino singer Selana. Stern, who apologized in espanol, has been in the market for about three months now. [I was flipping TV channels, and the Stern apology was run on Univsion -- with a Spanish announcer speaking over Stern speaking in Spanish. I don't speak espanol too good, but I thought he did a good job.]

Ok kids, Carl's Diner is having a special this weekend! For every request of the refreshed, AM-direction corrected log, you'll receive free via e.mail, his famous curly fries! Just e.mail me at the above address!

Does anyone have the following information on lite jazz CD 101.9 in NYC:

1. Where is the tower located? Are they on the Empire State, World Trade, other?

2. What is the power and pattern the station is using?

Thanks,
Jason Hardiman - Not exactly in radio, but not too far out either.

Jack, check out the GE Superradio, available at KMart and other outlets
for around $45.00. A big portable that is considered the best radio on
the market for AM DXing, even though it has a slide rule dial rather than
a digital frequency selector.

: Run, do not walk to your local U.S. Gov't. bookstore and buy a copy of
: Title 47 of the Code of Federal Regulations ($115) tune to part 73
: subpart G and read your obligations to the EBS/EAS under the code. You
: may have a couple of outs, but then again not. I don't think that your
: complying with the rules as you are currently operating, but I'm too lazy
: at the moment to check my copy of the CFR.

: My advise to you.... Pick up a used TFT 760 and modify it for EAS
: compliance. It's easy, only a couple of caps and resistors to change the
: timing. I have a TFT 886 and I can't wait to modify it.

Well you could withdraw for participating in the EBS system....

Listening to the CPCS Station will fulfill the EBS requirments, you
are allowed to have a human listening to the radio in place of an
automatic alarm device. Just remember to log all EBS test Received.

However you have to have a good EBS encoder. Assuming that you are a
participating EBS Station. Class D stations can be exmpted from the
Encoder Requimenst. Check 74.901 through 74.962 of the FCC Rules for the
compleate rundown..

I would not bother with a TFT 760, It's good money after bad. Even with
the unit you will be throwing it away next year when EAS comes on line.

Just put the money in the budget for a new TFT 911. That's the New EAS
box from TFT. It will operate in the current EBS mode and is fully
compliant with the EAS requirments of 1996.

Previously, Jim Grey <jimgrey@iquest.net> said:
>My vote for most creative way to hide actual city of license goes to the
>Eaton, OH station that ID'd as (calls), Eaton Dayton Alive.

Actually, for the last year or two, WGTZ-FM 92.9 (Eaton OH), has been
IDing as "WGTZ Eaton Dayton and Springfield Alive <crunch, crunch, crunch>".
Personally, I think it's funny. I love the "Eatin' Dayton..." play on words.
I also love the "crunch crunch" sound effect. Surprisingly, WGTZ covers the
Dayton/Springfield market well! It also reaches down into Cincinnati and
into Northern Kentucky, too. If I remember correctly, "Z93" even shows
decently in the Cincinnati ratings!
Back to the original subject... There's the other situation in Northern
Michigan of WKPK-FM 106.7, a 100kw station from the center of the northern
lower peninsula. usually they ID as"WKPK Gaylord, Charlevoix, Petoskey, Trav-
erse City." Often they add an additional dozen to 15 other area towns. It
goes on and on and on, ending with "...and all of Northern Michigan." I per-
sonally think it's funny. In this instance, there isn't a central city in
the "market". They're not trying to be a rimshot because there's nowhere to
rimshot into! (BTW, WKPK "The Peak" is a CHR, so this kind of funny stuff
fits.) Just my $.02...

3036. KWK and WWWK in the Late 70s in St. Louis

Newsgroup: rec.radio.broadcasting
Date: 1995-04-18 00:00:00 UTC
From: transvox@interstate.net
Message-ID: <3n10tv$e66@vixen.cso.uiuc.edu>
Source record: 32608

To follow up on some recent discussions in AIRWAVES,
I did some checking this weekend in back issues of Broadcasting,
regarding the reactivation of KWK(AM) in St. Louis in the late 1970s.

>From an advertisement on the back cover of the Sept. 10, 1979 issue:

| ST. LOUIS' #1 MUSIC STATION IN ONE BOOK!
|
| Last November we returned to the airwaves a part of St. Louis radio
| history with KWK-AM. In March we added WWWK-FM. By Apr/May we were
| making history. The KWK combination was the number one music station
| in St. Louis with a 9.2 share.

In other words, KWK(AM) came back on in November 1978; with WWWK(FM)
added to the combo in March 1979. The Feb. 12, 1979 issue contains
the following entry in the listing of ownership changes:

} WGNU-FM Granite City, Ill. (106.5 mHz, 50 kW) -- Broadcast Bureau
} granted assignment of license from Charles H. Norman, who wishes to
} devote his full attention to WGNU(AM), to Doubleday Broadcasting Co.
} for $250,000. Buyer is wholly owned subsidiary of Doubleday & Co.,
} New York publishing Co....

I cannot, however, precisely date the change to the WWWK call letters,
nor can I date the change to KWK-FM. Still, there is this item in the
Aug. 6, 1979 issue:

: WGNU-FM Granite City, Ill. -- Double [sic] Broadcasting Co., Inc. has
: appealed FCC's June 22 action denying application for assignment of
: call letters KWK-FM to recently acquired station WGNU-FM Granite City.
: Appeal was filed with U.S. Court of Appeals for District of Columbia
: Court. Ann. July 24.

I never *could* find any entries with the outcome of this action. However,
the calls KWK-FM were in the 1983 Broadcasting Yearbook and not in 1982;
indicating the change occurred sometime during 1982.

Nor could I find a specific authorization of the WWWK call letters!
Perhaps they were an interim measure (after all, under the rules of the
day, the calls *did* have to change; Chuck Norman kept the WGNU(AM) calls,
where they are to this day) not subject to the usual procedures of that
time.

To contrast, the approval of WZEN(FM)'s new call letters appeared in the
January 22, 1979 issue. Laclede Radio, owner of St. Louis' KATZ(AM), bought
WOKZ-FM in Alton, Illinois and changed it to a disco/adult contemporary
format on New Year's Day 1979. Laclede evidently did not want to pursue

the call letter issue.

After Doubleday won its case, WZEN(FM) applied for and obtained the KATZ-FM call letters. The station is now known as KNJZ(FM).

3038. REMLER BROADCASTING MICROPHONE QUERY

Newsgroup: rec.radio.broadcasting
Date: 1995-04-18 00:00:00 UTC
From: issrzl@ucop.edu
Message-ID: <3n10u4$e6f@vixen.cso.uiuc.edu>
Source record: 32610

I would appreciate hearing from anyone who has information available on the REMLER line of studio condenser microphones manufactured during the late 1920s and early 1930s.

On Friday, I managed to acquire such a device, which is best described as a rather long nickel-plated cylinder (a little more than 1 foot in length and 3" in diameter)) on top of which is mounted the actual pick-up element in a half-spherical metal and plastic housing. The mic element housing detaches from the body of the microphone, which basically houses two vacuum tubes and several stages of condensers.

This cylinder plugs into a bottom housing and attaches to an adjustable stand which is supported by a three-footed base. From the outer appearance, I would guess that the microphone is from the very early 1930s. The two tubes inside the housing were, I believe, # 849.

It was purchased from a local Baptist Church in which KSFO used to do remote broadcasts long ago.

Your help would be greatly appreciated, thanks!

From: rock93kbat@aol.com
Message-ID: <3n10ua$e6u@vixen.cso.uiuc.edu>
Source record: 32615

Reply-To: rock93kbat@aol.com (Rock93kbat)

I had an idea that I want to explore; see if it would be possible given today's technology. Since there are tuners made for PCs now, couldn't a station run their frequency over a BBS or through the on-line services? Then, couldn't someone dail up to listen in?

To take it a step further, couldn't stations have their own on-line area on
the service of their choice (such as The Loop's on AOL) with the audio running through the service and right into the user's PC?

Never mind, for now, the implications in terms of revenue and how this might
impact the future of radio as we know it. Do we have the technology to do this? How far away can it be?

Thoughts?

Several of my clients use Traffic and Billing software from "The Management". It's pretty basic - works OK. Nothing very fancy. Support is almost adequate.

One low to moderately priced system I can recommend is DARTS from DataCount in Opelika, Alabama. They are really terrific people with a system that works quite well. Enough flexibility to handle most small and medium market stations.

We use it at Delta Radio, Inc. in Mississippi. We have 2 stations on the air now with 3 more by the end of the year.

From: jgallagh@interserv.com
Message-ID: <3n10uh$e7g@vixen.cso.uiuc.edu>
Source record: 32621

In discussing the need for unions in radio to prevent indiscriminate firings, the comparison was made with IBM.

IBM didn't "fire" thousands of people.

They laid off thousands of people...who were NOT replaced.

I'm talking about canning broadcast announcers and replacing them with (frequently) younger people who are paid less.

If a major market station sells for say $ 15 million, I see nothing wrong with the FCC demanding that say 10% of the sales amount be set aside for severance pay to those fired because of the new ownership and/or format change.

Radio is one of the few businesses where people are terminated for no cause on their part--and then replaced with others who do the same thing.

I have no problem with a station that lays people off if the position is permanently eliminated.

John Gallagher/Boston

For a radio salesperson to jump from a rock format to a classical music format, is probably too much to ask.

WCRB in Boston is a very good station (I listen to it myself, but when I read the newspaper !), but selling that station is a totally different animal than presenting a rock station which reaches 18-34 year olds.

I believe to be an effective radio sales person, you have to enjoy and listen to the format. I don't think anyone can really "sell" anything they don't truly believe in.

The classical listener is a very small segment of the market, albeit a very affluent one. You can't sell numbers of people, you must sell the income and preferences of the audience. I hate to say this but it is more of an "insitutional" sell.

We used to have a saying on WAAF years ago....anyone who places "institutional" advertising, should be "institutionalized". (only kidding)

3053. WMRQ on the air in Hartford

Newsgroup: rec.radio.broadcasting
Date: 1995-04-18 00:00:00 UTC
From: BTROTTA@ix.netcom.com
Message-ID: <3n10us$e8i@vixen.cso.uiuc.edu>
Source record: 32625

At 2 p.m. today, WMRQ finally went on the air with real live people instead of board-ops and lots and lots of pre-recorded bumpers.

The station had been identifying itself as The New 104 during their five month transition from the old STAR format and WYSR call letters to their new Modern Rock format. They are now calling themselves Radio 104.

There was a brief recorded announcement that began ``WMRQ is on the air...'' and thanked listeners for putting up with them for the last five months and encouraged them to continue calling their input line. (as of 2 months ago they supposedly had received more then 25,000 calls]

The first song......surprise.....Radio Free Europe by REM. A little obvious, IMHO. Personally I would have gone for the lesser known, but no less appropriate song by Peter Gabriel, On The Air, preferably the version off of Plays Live.

I didn't catch the first DJ's name, but he flubbed his first break when he started the music bumper he was supposed to talk over and then forgot to turn on his mike for about 15 seconds. Not an auspicious start.

They didn't appear to give him any more room to hang himself after that because they had two 45-minute sweeps in a row and the only time he came on was to run through the songs he had just played.

Hopefully things will get better from here.

Written April 17, 1995

After the Eleven Days of Polka last month on KKCJ(FM), things have quieted down considerably. Everyone's in position for the spring ratings period. Among notable recent developments:

* Independence sports-talk daytimer KCTE(AM) has dropped its affiliation with "The Team" satellite service, based near Washington, D.C. "The Team" essentially relayed WTEM(AM) Bethesda, Maryland, and that presented some conflicts, according to KCTE GM Steve Dinkel. He told the Kansas City Star that he felt "The Team" couldn't serve both a Washington audience interested in the Redskins or Bullets and a national audience interested in other teams. Instead, KCTE has joined the "One-to-One Network" based in Chicago for some programming. KCTE has also begun a local sports talk show in afternoon drive time.

* The merger of KFKF(FM) and KBEQ-AM/FM, along with the resulting spinoff and format change of KKCJ(FM), left all but one of the "CJ 106.5" jocks jobless, with one overnighter offered a position at KFKF. Meantime, KKCJ morning driver Kelly Urich has resurfaced on contemporary hit radio. He's doing evenings on KMXV(FM).

* In central Missouri, Jefferson City regional-coverage AM KLIK has begun simulcasting on recently purchased KZMO(FM), licensed to California. KZMO has a construction permit to increase its power to C2 status (50,000-watts). Market observers expect KZMO to serve the Jefferson City market, in an effort to cut into the audience share of the number-one station in the market, KCLR(FM), licensed to Boonville but based in Columbia.

* KZMO's former AM partner has returned to the air after a six-month hiatus. KREL(AM) began broadcasting earlier this month, with a traditional country format. The station also relays the Satellite Music Network's "Real Country" format on a part-time basis.

* Columbia oldies CD jukebox KOQL(FM) has entered into a joint sales agreement with locally-based duopoly KFRU(AM)/KPLA(FM)/KBXR(FM). KOQL sales employees are now based at the KFRU facilities. KFRU assists KOQL with sales-related functions. KOQL continues to operate its studios at a separate site in downtown Columbia.

* Based on some extensive listening, I have recategorized the format of KBXR on the Mid-Missouri Radio Page (URL: http://www.interstate.net/~transvox/coudial.html). I am now classifying it as "modern/alternative," because of a playlist with 70 to 80 per cent of its tuneage in common with modern rock playlists. KBXR still plays some blues and album-rock selections, but modern

rock predominates.

* The disadvantages of relying on TV meteorologists for radio weather coverage: KFRU and KPLA had to wait nearly 15 minutes for a report from KOMU-TV weathercaster Randy Wright in the midst of a severe hailstorm in the city of Columbia Sunday (Apr. 16). The storm hit right at 10 pm while Wright was busy with his on-air TV duties during Channel 8's 10 pm newscast. KFRU tried to fill in with National Weather Service bulletins; KPLA just waited.

* Better weather coverage was available from Moberly's KRES(FM) and Mexico's KWWR(FM). While these stations create a great deal of hype about their severe weather coverage--scheduling them as one might schedule election reports-- they maintain their own weather radar set-ups and their announcers provided detailed descriptions of storm movements. KRES also encouraged listeners to call in with reports of hail damage and rainfall amounts.

* The movement of the syndicated "Modern Rock Live" call-in interview show from Monday to Sunday has displaced two of the best locally produced programs I have heard on modern-rock radio. In St. Louis, KPNT's "New Music Sunday" with British import Les Aaron (playing lots of British imports) has been cut back two hours. In Lawrence, Kansas, KLZR's ambient "Nocturnal Transmission" has been pushed back to an 11 pm time slot.

Greetings,

I work for a company that is hoping to interest National
and Regional radio talk shows in a political issue as
a potential feature. I have some colorful spokespeople
who are willing to discuss it, and I am wondering if there
are any radio talk show hosts or producers who could
give me advice about how you make selections of features
for your shows.

Thank you very much for your advice and consideration.

PLEASE DO NOT RESPOND HERE.

I am looking for voices (male, female, character, impersonation, etc.) for
image liners, promos, and general voiceover work for TV stations.

You must have:

1 - good copy interpretation;
2 - access to a fax machine and professional recording equipment.

You must be able to

3 - work on a commission basis; and
4 - guarantee same-day turnaround.

If you would like more information, contact me before May 1 at:
ghudson@gate.net

or snail-mail me at: Grant Hudson
The Voice

Reply-To: ai227@detroit.freenet.org (Terry Carr)

Got a thinker.

We are a Michigan station on the border of Canada and we've been quite confused over the technicalities of remotes (from Canada to U.S.).

Right now all of our remotes are done via dial-up phone lines. From what I have been told, the CRTC will not allow us to own and operate a MARTI in Canada. We can only do transmission by phone. Supposedly it is illegal for us to use ANY wireless transmission in Canada.

The question now is... Does this apply to Cellular phone? We were told Cellular transmission is ok (seems to be wireless?). Does the law extend to FM two-way radios? If our Canadian AND U.S. offices seperately applied for a two-way license, would it be legal? And then how about Digital RPU's on the 915 MHz band (like Quick Link) where they are not regulated by the FCC or CRTC (if I'm correct).

I know we can use ISDN, but it is not as quick access and portable as I would like.

If any border stations or others have any suggestions, I would love to hear them. Even if they seem far-fetched.

Thanks,

I am a HUGE fan of Top 40 radio. There are very few Programmers left
who truly understand the Top 40/CHR presentation. They either don't
get it, or they're AC PD's masquerading as CHR PD's. I firmly
believe that music beda and talk-up jingles don't mix. Music beds
are much better on a dance leaning CHR and talk-up jingles are better
for mainstream CHR's. Here in Milwaukee, WKTI (Hot AC) uses dancish
music beds at night. Oh yeah and they sound great coming out of an
Amy Grant song. Now they've added some classic hits to the mix and
you can imagine how the beds sound coming out of a Boston record.

Also, throw out the two-punch jingles. They're for ameteurs!! If
jocks can't do the weather in 15 seconds or hit a post at the top of
the hour, tell 'em McDonalds is hiring.

3061. Q: What time is Dick Bartley's show

Newsgroup: rec.radio.broadcasting
Date: 1995-04-18 00:00:00 UTC
From: rkarlqu@scd.hp.com
Message-ID: <3n10t7$e43@vixen.cso.uiuc.edu>
Source record: 32743

Here in the SF Bay Area, we hear Dick Bartley's radio show on Saturday night from 7 to midnite. I suspect we are getting part of the show on tape delay. Can anyone tell me the actual time the show is produced? If it were live here on the west coast, it would have to be produced from 10 PM to 3 AM New York time (Dick does the show from NYC). That doesn't sound very likely. Previous incarnations of various Bartley shows started as early as 4PM on the west coast.

A very well-thought-out and literate post. I don't know what position you hold in the radio industry, but there's one thing you should have learned by now.

RADIO IS A BUSINESS!

There would not be four FM country stations in Dallas if they could not get decent numbers or make decent dollars. Numbers and dollars! Usually one produces the other... but not always.

Look at the old "beautiful music" stations... LOTS of numbers, but not very saleable because they were all 55+. How many banks and funeral homes ARE there?

Same problem with CHR... how many soft drinks, nightclubs and pimple creams are there? Most of the BIG radio advertisers want 35-49 women, because it has been determined they hold the purse strings for most family purchases. Country is a women's format Simple as that.

Of course there's a stigma that goes with every format... CHR is teeny-boppers, AOR is head-bangers, Country is hicks, etc. Creative sales staffs armed with good numbers can overcome this. But many agencies look beyond the DEMOgraphics to the PSYCHOgraphics... what are the *lifestyles* of those faceless statistics? And how do they translate to using whatever product I have to sell?

My wife tells me that since we got married, she can't ever listen to radio the same way. I've taken all the mystique out of it for her. She now knows about "power gold" and "quarter hours". Guess that's why the unenculturated still think DJ's bring their own records to work.

It's business thaang... try to understand!

> Tiger, Starship, or U2 are?

This is a subject which has been debated many times over....CHR is not establishing "core artists" anymore...

BTW - I would NOT out Starship or Glass Tiger in the same category as Springsteen on U2. How about other artists who actually had more then 2 hits? John Mellencamp, Billy Joel, Duran Duran et al all seem to fit more into the "big stars of the 80's" category then Starship or Glass Tiger.....

3068. Buffalo radio history

Newsgroup: rec.radio.broadcasting
Date: 1995-04-19 00:00:00 UTC
From: bfowoz@ubvms.cc.buffalo.edu
Message-ID: <3n3pjn$5j8@vixen.cso.uiuc.edu>
Source record: 32626
Cross-posted to: rec.radio.broadcasting,alt.culture.ny-upstate

A couple of years ago, WEBR-AM in Buffalo changed its call letters to match its TV and FM partners, WNED. It was the end of an era, as WEBR had been on the air since 1925. They then moved to a brand new building in Buffalo, leaving behind a lot of interesting things at their old building. The new owner of the old studio is a florist, and he has no use for any of the radio things left behind...neither did WNED. The florist called us at WBFO, and invited us to take away whatever we wanted. So Bill Raffel and I from 'BFO made a few trips down there in the past couple of weeks, and brought back lots of stuff. Bill is a former WEBR staffer who lost his job during the WEBR/WNED changeover. I'm just a junk collector who's a broadcaster by trade. Unfortunately we weren't the first ones to go through the place, but we did find a few hundred reels of tape, lots of old carts, and even some 16-inch transcription LPs that had old WEBR sign ons,sign offs, commercials, and more, from as late as 1970! Plus a van load of LPs, which will go toward the WBFO Vinyl Madness record sale fundraiser this fall (we are a public station, after all! So was WEBR, since 1976).

Bill was happy to find an archive of news tapes, I was ecstatic to find a series of local almanacs from as far back as 1933, published annually by the Buffalo Evening News! There's a great section in the 1941 issue, detailing the Havana treaty frequency shifts, and alist of all stations on the air in the USA at that time, with their old and new frequencies. Plus, a lot of detail about Buffalo's first TV and FM stations, which were both owned by the Buffalo Evening News (WBEN). There are radio station lists, AM and FM, for Buffalo that were published for each year (through 1974, the last year of the News almanacs).

A few items of interest:

WBEN-FM signed on Nov 11 1946, at 92.1 mHz, moved shortly thereafer to 106.5mHz, and stayed there until moving to its present 102.5 mHz in 1958 (it's now WMJQ)

Buffalo powerhouse WKBW dedicated its new 50kW transmitter Oct 10 1941, a few weeks before making it operational

There was almost a WKBW-FM...apparently a construction permit was issued for the station at 107.3 FM in 1948, as well as WGR-FM at 93.7. There would be a WGR-FM, but not until Sep 14 1959, at 96.9 mHz. I suppose there could be an argument for WKBW-FM at WKSE, but WKSE traces itself back to WHLD-FM in Niagara Falls in 1946, and was bought by KB's owners (Price?) in the 1980s.

WNED-TV, Channel 17 in Buffalo, signed on in 1959, but it wasn't the first station on 17. WBUF-TV was licensed to NBC, and operated in Buffalo from

Sep 21 1955 to Sep 30 1958

In Sep 1936, the Buffalo Evening News bought WEBR, in addition to already owning WBEN. Duopolies are nothing new! I think that WGR and WKBW were owned by the same company for a while too, Buffalo Broadcasting Corporation, around that time. Strangely, no dates of non-Buffalo Evening News stations in their almanacs! :-)

There's a lot of great stuff in those books, not just radio related. Now i want the complete set. The News started publishing them in 1933, continued through 1974, with no books for 1943-46 due to the war. I'm missing 1935, 1938, 1939, 1940, 1948, 1951, 1952, 1954, 1956, 1957, 1960, 1962, 1966, 1972 and 1973, and I have duplicates of 1961, 1964, 1967 and 1969 available for trade.

OK, I know, some rambling here. I hope you had fun reading it!

> Thanks in advance

Well, in the Boston area, the Bruins this year are consigned to stations with only enough watts to emit a dull glow at night -- WBNW-590AM (Bloomberg [sp?] Business Radio, and 1200AM WKOX.

Next year you might have a better chance -- they'll be on WBZ-AM 1030, the 50KW clear-channel which can normally be heard in 38 states. I'm sure if the sunspots are right it might do some E-skip to California....

You might do better to aim a BUD satellite antenna (Big Ugly Dish) at the satellite that carries NESN [New England Sports Network, the TV home-game cable Bruins carrier] or the one that carries/will carry the radio feed to the affiliates. No, I don't know which ones those are - perhaps someone else here might be able to help.

Just my two cents,

John Francini

: is 1 hour later than Eastern time). I digress.

Confirmed. Call letters, frequency and city/area of licence at least once every hour. Extra info can be included as long as the above three items are there. (Sorry, I don't have a copy of the various broadcasting and radio acts in front of me, but it's pretty close.) With the proliferation of hourly satellite newsfeeds, most stations ID either just before the top of the hour (say at 59:30) or at the end of the news (usually 3 to 5 minutes after the hour). As for repeater ID's it seems that the hourly ID requirements don't apply -- one station in town has five repeaters and usually only mentions the originating station and their most listened to repeater. Any Canadians working for stations with repeaters able to clear this one up?

> to FM two-way radios? If our Canadian AND U.S. offices seperately applied
> for a two-way license, would it be legal? And then how about Digital RPU's
> on the 915 MHz band (like Quick Link) where they are not regulated by the FCC
A Marti-type transmitter cannot be carted back and forth across the
border. I don't know about the 900meg stuff. The cell phone is OK.
But, so far, we are talking only the technical side of things.

I know there used to be regulations regarding programming origination.
You might want to check the legality of cross-border remotes from a
programming standpoint.

3073. Re: CD 101 - NYC

WQCD 101.9 (CD 101) broadcasts from the Empire State building with an output of 6000 watts and an omnidirectional signal. Most of the NYC commercial FM stations are on the Empire State Building (with the exception of WPAT 93.1 and WYNY 103.5 which use the World Trade Center) and share ONE broadcasting antenna which is located AROUND the top spire of the building. This new antenna was just recently installed this past year, the old antenna dated back to the early 1960's I believe. I've noted stronger signals from the antenna in the extreme fringe areas (110 miles away) in the Catskills.

In reference to the continuing thread on "All The Dull Music Radio Plays"..... Maybe it's because of all the Dull Consultants radio has turned too. If PDs and GMs would program from the heart and enjoy this business for what it could be again, our listeners would WANT us to be part of their lives more than ever. We need more management leaders willing to take some chances to achieve great things. We need less owners willing to be happy with a small, target demo, nitpicky slice of the pie that will bring some limited income. Everyone is so afraid of programming a GREAT station for the masses because they're afraid they'll lose their tiny little homestead. Screw the homestead: explore the Frontier.
RADIO is poised to capitalize on the MASS-APPEAL format again. We just need a few good men and women willing to walk the walk and talk the talk. Let's stop segmenting ourselves into oblivion.

For anyone who followed the Nitecaps in the '70s... Herb Jepko, the "father" of the Nitecap show, died here in Salt Lake City on March 31. He was 64 years old. Herb was one of the first people to run a successful nationwide talk show. Even though it ran in the overnight time slot and his audience consisted mostly of truckers and retired people, he had quite a following.

Those of us who worked with Herb will miss him. He gave us lots of good memories (and stories we would never be able to tell over the air).

Elaine Jones (worked at KSL radio, originating station of Nitecaps, in mid 70s, now at Gentner Communications, also in SLC)

[Bill- I tried to reply personally, but my mail was bounced back to me,
so I decided to post this here to clear up anything...]

Concerning burying IDs and WGTZ-FM 92.9 Eaton OH in particular...

On Wed, 19 Apr 1995 07:55:35 Bradlee Beer <Brad_Beer@dayton.said.com> said:
>WGTZ's transmitter is in Brookville, OH; which is about as far from Eaton as
>it is from Dayton. I personally am against the practice of trying to hide a
>broadcaster's legal ID. WGTZ is only attempting to serve the Dayton market,
>and does no more than any other Dayton station in serving Eaton, OH.

With my post I wasn't trying to indicate how much I like/dislike the
practice of "hiding" IDs or rimshotting larger markets. In a perfect
broadcasting world, a station licensed to Dayton, Kettering, etc. would
broadcast a CHR format and WGTZ could better serve the people of Eaton and
Preble County. However, ours is not a perfect world, hence rimshotters,
simulcasting stations, buried IDs, and the like.
What I was trying to indicate was that I thought WGTZs ID showed a
lot of ingenuity. In a world where that is in decline, any small bit of
ingenuity is welcome, even with humourous radio station IDs. Also, which I
guess would be a main point here, whomever wishes to find out the call
letters and city of license of a particular radio station would likely
already know when and where to find them. Personally, I listen from :49 to
about :05, since I know that's where it will be. I just wanted to clarify my-
self. Thanks for your time...

What rocket scientist of a PD or consultant came up with the bright idea of burying a station's call letters and city of license in the :50 stopset? It's almost as if stations are ashamed of them.

Why not showcase your call letters? Just think of the diary keepers who listen to your station but might be confused about what to enter? What about a business that would like to inquire about spending $$$ on your station, but can't find you in the phone book because he blinked while your big-balled station voice was whispering "WJRK, Barftown?" Call letters, while they may be awkward to some, can mean an extra share point or two (and maybe a few bucks) to the stations who use them properly.

I'll be glad to share how we do it with anyone interested.

As I pointed out when I posted the rules...after your calls (with the option
of inserting the frequency and licensee here) comes the city of license.

Once that's out of your mouth, you can add any other city you wish.

I heard a tape of a CHR in Indiana that did a legal that went on for a couple
of minutes...

laser shots..Clevland, Gotham City, San Francisco, Sacramento, Loosss
Annnggeelleesss, Las Vegas, Phoenix, Miami, Detroit City, Buffalo, and
HELLLLLLL.

Pretty funny stuff. And, since it follows the true city of license, it's
legal.

I had thought that KUSA's transmissions were slated to end after the NAB convention on 4/14. After that, I was sad to hear that the station was broadcasting no more. I kept checking to see if the station was still on, but in vain. Now, on 4/18, I tried the 1660 spot from San Diego around 7 PM and again at 9:15 PM and KUSA was back on the air and broadcasting strong. What gives? I though the station was over!

Nearly every major station licensed in Los Angeles is grandfathered at powers that equate to greater than 50kw @ 500' -- the Class B limit for most of Southern California and other metro areas, such as Chicago and New York. Only KPCC, KCRW, KFSG and KROQ are "down" at or below the limit.

For many years, the 101.9 in Glendale (which has had many call letters) struggled with its non-grandfathered limit. When it was KUTE and KMPC, it radiated from Mt. Wilson with just 690 watts, which (by the FCC's rules) is the equivalent at 2780' of 50000 watts at 500'. This is similar to what KPCC 89.3 enjoys today with 600 watts at 2980'. Eventually the station got a break and now radiates 2400 watts at 2790' as KCSA.

Other non-grandfathered stations have also received breaks in the last few years. The three stations that radiated from Flint Peak in Glendale -- KPWR, KUSC and KKLA -- all moved up to Mt. Wilson with powers similar to the rest of the group up there.

So the FCC's power limits are a lock on a coop from which all the chickens have flown -- at least in the L.A. area. San Diego and the Inland Empire are other matters.

Height and vantage are just about everything on FM. Check out KCBS-FM on 93.1. They have by far the highest antenna, and it reaches places that are shadowed even to other stations on Mt. Wilson. I'd take KCBS-FM's 28500 watts at 3497 feet any day over KPFK's 112,000 watts at 2831 feet, even though KPFK's combination of height and watts makes it ("technically") the biggest FM station in the U.S.

I should mention that all these heights are "above average terrain," which is measured in 8 directions, from 2 to 10 miles from the transmitter. It's not elevation above sea level.

Actually, I'm responding to Chris #1 here. (Where is Bud Collier when you need him?)

There is an international agreement between Mexico and los Estados Unidos de Norteamerica regarding FM allotments (including height and ERP). Affected areas in the U.S. are within 199 miles or 320 kilometers of the border. One might reasonably assume that the same distance holds south of the border. Heights and ERPs of Mexican stations within that area are reported to the FCC (by the Mexican government).
(Cf. 47 CFR 73.207 (3))

Farther south, I am not aware of any restrictions. Many areas of Mexico are mountainous, and so, really, what's the point of high power that's expensive in a poor country when a station can instead put its stick on a high mountain and get reasonable coverage with moderate power?

>Tiger.....

I have a number of times suggested, somewhat facetiously, that the
next new wave in radio formats would probably be eighties nostalgia.
Sad thing is, I'd probably listen to it, too... We're already seeing
some hint of this with VH-1 and a number of radio stations running
regularly scheduled eighties programs (when in Providence I liked
WBRU's ``Retro Lunch''). I would hope that this station would play
Starship and Glass Tiger in addition to John ``Cougar'' Mellencamp and
Billy Joel. (I would actually prefer something more like ``deep cuts
from the albums containing the top-40 hits of the eighties'' rather
than ``yesterday's CHR playlists on today's radio stations''.)

Perhaps when Westinghouse decides which Boston FM they want to buy
they can try it.... :-)

==========Steve Whitt, 4/18/95==========

I am currently working on the archives of the UK radio club, the Medium wave Circle. I would like to be able to date an undated document from the early-mid 1960s. To do this I need to apply some detective work on New York City callsigns.

If anyone can tell me when WRCA New York 660kHz became WNBC or when WMGM New York 1050kHz became WHN then I'll be able to date this archive document a bit more accurately

Can any radio historians help.

Many thanks
Steve Whitt
Editor Medium wave News

The callsigns of the stations in question are a bit more complex than your note would lead one to believe.

WNBC began life as WEAF, the AT&T station, in the early 1920's. AT&T sold the station to NBC in 1926 when it became the flagship station of the new NBC radio network. It retained the WEAF call letters until the late 1940's when all three network affiliates in New York changed their callsigns to reflect network ownership (WEAF became WNBC, WJZ became WABC and WABC became WCBS). For a brief couple of years in the 1950's, WNBC chanced to WRCA to reflect corporate ownership, but reverted back to WNBC. It retained those call letters until it went off the air in the late 1980's.

WHN began life under those call letters in the mid 1920's. The station was purchased by M-G-M shortly after the end of World War II. The callsign WMGM was first used for the FM affiliate,but were later adapted by the AM side. M-G-M sold the station in the mid 1960's and the station reverted back to the WHN callsign until it was sold again, adopted a sports format and took the callsign WFAN. When the abovementioned WNBC went off the air, WFAN moved to WNBC's frequency of 660. The Eugene V. Debs Memorial Station, (WEVD) moved from FM to AM and took over WFAN's abandonded 1050 spot.

There is a service just announced last week called "RealAudio" that says its able to transmit real-time audio (including radio broadcasts) over the Internet. ABC Radio, for one has linked up with them as a partner. They have a WWW page; I'll post it when I can find it -- maybe someone out there has it or has visited the site?

Seems like this service would be great for folks in far away places to stay in touch with their favorite radio stations and shows (like me in Louisville, who pines for Stern, Imus, and WFAN!).

Nice idea but way different frequency response. Typically digital
sampling is supposed to be at least twice the frequency of the audio
signal. This would mean that an FM station's optimum frequency response
of 15kHz would require a sampling rate of 30k bytes per second or
roughly 30 kilobaud. Typical modems today run at 14.4 kb. But that's
just the audio freqency. The *carrier* frequency of an FM station would
be maybe 99.1 MHz or 99,100 kHz, requiring a sampling rate of 198,000
kbytes or roughly 198,000 kbaud -- or 198,000,000 baud. That's mighty
fast. No known telephone wire can handle that kind of bandpass.

> Since there are tuners made for PCs now, couldn't a station
> run their frequency over a BBS or through the on-line
> services? Then, couldn't someone dail up to listen in?

Two separate technologies. One's a tuner, the other is delivery of digitized audio with some modicum of fidelity via dial up lines.

Everyone in radio should be aware of RealAudio. If you're not, *get* aware now. For those of you that have web browsers, use the following URL:

http://www.prognet.com/

You can sign up to beta test there too.

For those of you without, it's an offering from Progressive Networks in Seattle, that allows play back (with CD-type fast forward and rewind controls) of proprietary format digitized audio via the World Wide Web. Sound quality is great AM, without the static.

Get this: an hour's sound file is only 3.6 megs. That's 1k per second bandwidth....very minor. And their encoder can encode and playback as fast as you feed it audio.

Sound too good to be true? Think it's not gonna happen? ABC and NPR are already providing program content: in ABC's case, *all* the newscasts right off Transponder 23 on Satcom C-5.

BTW...us, too. :)

Adam Curry (ex of MTV, now running On Ramp and metaverse.com) offers real-time interviews...you can hear them in real time even via a modem... there's one with Carlos Santana...you have to download the software, requires signing a nondisclosure agreement and some other stuff as it's beta software... I haven't done this yet, but I know it exists. I imagine the technology is similar to what you're asking about...

The www address is: http://metaverse.com/index.html
you can navigate easily from there.

There's a broadcasting "school" out in California that's run by Jimmy Petulla. He's been in the business for 20-some years I believe, and started this school a few years ago.
You get signed up with him, and in return you receive a huge book crammed with assignments (commercial, sports, news broadcasts, etc..).
You pick whatever local stations in your area you'd like to go to, and Jim himself calls each one up to see if he can get you in.
When he finds one, you have an interview with the station's program director, and if that goes well, then the PD becomes your tutor. You work one-on-one with him in this radio course for 4-6 months.
I managed to get in with Mike Kelly on Arrow 94.7 here in Wash., DC a few weeks ago, and it's been great fun!! (Mike says he teaches 20 times more than the course teaches, so I'm getting everything in one shot!)
At the end of the course after graduating, you receive an FCC Broadcasting License, and seven (7) years of Job Placement
Assistance (That is, if you haven't already been offered a job at the station you're working at).
It's a wonderful set-up, and I'm very glad to have found it.
For anyone interested in it, give this number a call. It's toll-free, lasts about 5 minutes, and tells you everything you need to know.
1-800-858-4241
If he asks where you heard of them from, tell him Henry Herman sent ya!

Rick really wasn't fired, he was layed off with the other talk hosts
when the station changed format to AP News prior to its sale. Last I
heard, Rick is still in Seattle looking for a talk job.

I think Top 40 radio is all about momentum and flow, I'm all for talking up beds but it seems silly to stop the music (unless it's a stopset) so the jock can talk up a bed and nail the post on the jingle.

Also I disagree with Rob Olsen, two punch jingles are the best. He is right, they should be able to do the weather in 15 seconds but what if it's sunny and 75 for the next week, sorry it won't and shouldn't take 15 seconds to say that. Heck read it now! It takes about 2 seconds!

From: guruyou@aol.com
Message-ID: <3n3pl6$5qi@vixen.cso.uiuc.edu>
Source record: 32654

Another station to change to the "smooth" jazz format is the formar KDIL 106.7 FM in San Antonio. About 4 weeks ago they changed to KCJZ "smooth jazz" and played the debut tapes for about 3 weeks.

Last week they sent me a sampler tape of about ten minutes of audio sound bites of their format. Sade, George Benson, Kenny G, Hiroshima, et al. Elevator Jazz, I call it. I'm not impressed. Coltrane? I don't think so. Not here anyway.

The change WAS an improvement from the "country with an attitude" format.

If there's one thing we don't need in SA is another C&W station.

Hi JP,

With duopoly and other cost-cutting (read survival) tactics being used, AFTRA is being reconsidered by a whole new generation of workers who are seeing their profession decimated by bad business judgements made in the late '80s. The fatalistic game of "hot potato" played by most investors in the broadcast media has much to do with the devastation of the broadcast workforce, that's announcers, engineers and account executives.

Management knows that people are expensive. Wise management knows that they are worth it.

About the 4/13 quake between Alpine and Marathon TX...

> I have a few questions:
>
> 1. How many Radio / TV stations are in that region, if any at all?

Alpine only has KVLF-1240 and KALP-92.7. There are no TV stations other than translators of the Midland/Odessa stations. The nearest other radio stations would probably be from Pecos (KIUN-1400, KPTX-98.3) and Fort Stockton (KFST-860/94.3). If I recall, Alpine had a TV station a long time ago - KVLF-TV-12. I believe it was a satellite of then KMOM-9 Monahans-Odessa (now KWES-TV Odessa).

> 2. Did any stations talk about this, especially stations in the
> D/FW area? (the radio station I work for, did mention it, we felt

> and injuries/deaths resulted?
I believe the last one of that size was 60 years ago estimated around a 6.0.

IJ>In discussing the need for unions in radio to prevent indiscriminate firings
IJ>the comparison was made with IBM.

IJ>IBM didn't "fire" thousands of people.

IJ>They laid off thousands of people...who were NOT replaced.

John,
I'm sure the folks IBM laid off are relieved to know they weren't
fired. I can't see how it affects their household budgets any
differently, but I'll accept your semantics.

IJ>I'm talking about canning broadcast announcers and replacing
IJ>them with (frequently) younger people who are paid less.

Supposing those younger announcers are better, more talented, more
aware of contemporary issues and sound more "alive?" Should the station
be forced to keep someone on the payroll who's living in the past? How
many announcers bemoan the loss of "the past" and refuse to pay
attention to contemporary music? I know quite a few of them. They're
good people, but they're glued stuck in the 50's. My network operates in
the 90's. I need people who do the same.

IJ>If a major market station sells for say $ 15 million, I see nothing wrong
IJ>with the FCC demanding that say 10% of the sales amount be set
IJ>aside for severance pay to those fired because of the new
IJ>ownership and/or format change.

I see everything wrong with that! It's another government mandate
that defeats its own purpose. That 10% is going to come out of staffing
and programming.

How about a government rule that forces you to set aside 10% of the
selling price of your house to cover the losses of the kid who mows the
lawn, the gardner, the pool man, etc. After all, they're victims of
your insensitive act of selling the house. They did nothing wrong. It
reminds me of the line in "Fiddler on the Roof" where the beggar says
"so you had a bad year. Why should I suffer."

IJ>I have no problem with a station that lays people off if the position is
IJ>permanently eliminated.

Fine. There are some mighty fine automation systems out there.
You're allowing me to waddle through a loophole. All I have to do is
permanently eliminate people and I get off scott free. Over the long
term, the automation will cost me far less than a staff of real people.

With a good automation system and a few part-time contract announcers, I can make a station sound as live as the live ones and save a bundle.

Every time you add another government enforced EEO-type rule you further destroy the industry. At that point, we hire people by quota rather than talent. Our stations are bloated with ineffective employees who know you won't dare fire them, no matter how bad they perform. So, you hire someone else to cover for the EEO body, who can barely spell his name, because you need someone who can write a complete sentence.

The bottom line is that no employer owes you a living. The world doesn't owe you a living. The only person who can control your destiny is you. That's why I'm always prepared to lose a job, for whatever reason, and go on from there. To me, there's nothing more frightening than getting sucked into a guaranteed, secure job. It means I'll never advance. I'll never learn. Mostly because I wouldn't have to. I want the freedom to move on to something more interesting when the opportunity arises.

Rich

I have to agree unions would be worth a try.

I spent 20 years in the business working at some really good stations. Many times I saw very talented people being let go due to silly power struggles or mismanagement. It had nothing to do with job performance.

Many times it had to do with a change in ownership. The station I'm thinking of was doing quite well, however the new owners were going to "fine tune" the format and make it even better. A talented 7 year "veteran" of the station was let go on the wim of a consultant who said just because he had a deep voice he sounded too old.

The talent these days has very little control over the creative aspects of the station, except for maybe the commercials. Most read liner cards and play from a computer generated playlist. The last station I worked for we had one time per hour where we could do a SHORT non scripted bit. I don't think you can hold the talent accountable for the ratings in this case.

As for the engineers, many of the truly good ones have disappeared. Why would anyone want to be on call 24 hours/7 days for substandard wages when they can make more with less grief and get more respect elsewhere? It's starting to show too. There are fewer engineers today who really understand the complex directional antenna systems out there. Also in just about any market there is a station that sounds distorted and just awful.

As for sales, I have seen inexperienced people hired for minimal commision who are trained by the sales manager. They work for a little while bring in a couple of accounts and leave because they are tired of the verbal beating they are taking from the sales manager.

Still.... I miss radio...the way it used to be.

You are absolutley right about idiots who don't belong in this business screwing it up in the late 80's. In fact there are a lot still owning stations today. However, AFTRA is quickly becoming a lame union. There are a lot of duopolies, LMA's and sales; and that's become a harsh reality. It doesn't matter if it's a closed shop or not, when your station changes because of one of the above factors, AFTRA can't do a damn thing about it. If you're out, you're out. Maybe the union can negotiate a couple of extra weeks of severance, but that's it. And if you haven't earned the AFTRA minimum to qualify for benefits, you're screwed! They'll take your dues okay, but if you're unemployed, don't look for AFTRA's open arms.

I've learned that to be in this business, you have to love it with a passion because you know that you are cannon fodder. I mean you may have to put your whole life in the hands of a complete moron who just happens to have money.

I do know that union or not, good talent will always be paid well. The "Loop" in Chicago is an AFTRA shop and everyone there is paid way above union minimum. What does AFTRA do for Jonathan Brandmeier, Danny Bonaduce, Steve Dahl or Kevin Matthews. These guys totally waste their money on dues. The fortunate thing for them is, they probably don't even know the cash is missing.

Source record: 32555

Some info on the DJ's that have been hired so far at WMRQ:

2 p.m. to 7 p.m. -- Race Bannon, formerly of WBOS Boston

7 p.m. to Midnight -- Gina Crash, formerly of WHFS in Washington

Jason Steinberg is the promotion director and is also working on-air, though I'm not sure which shift.

Bannon seems to be under orders to keep the banter to a minimum because he hardly ever talks. Lots of bumpers, but you rarely hear him.

Crash has been allowed a little more lattitude. She's on the air every couple of songs doing promos for upcoming events (ie the station is simulcasting MTV Unplugged all this week) and doing song intros.

Station promos seem to indicate this minimal use of the DJ's will continue.....``the most modern rock anywhere and just a few words from our DJs.''

Has anyone else had experience with this minimalist approach to DJ banter? And has it worked?

Seems to me people listen to a station for the personalities as much, if not more than the music they play. Proof in this market was when local morning shock jock Sebastian switched from rocker WCCC to 70s station WZMX and ZMX's ratings went through the roof and CCC's took a dive.

Tune in KSRO at 1350AM, out of Santa Rosa, between 4 and 6 PM. I believe Jerry is also carried on KSTE on 650AM out of the Sacramento market, but not at the same time period. KSTE has the better signal, by day at least, into San Francisco; but you'll still get KSRO if you have a decent radio.

I also believe KSCO on 1080AM in Santa Cruz carries him, live. But I don't know.

3113. Re: Buffalo radio history

Newsgroup: rec.radio.broadcasting
Date: 1995-04-20 00:00:00 UTC
From: talk1370@aol.com
Message-ID: <3n67up$i8h@vixen.cso.uiuc.edu>
Source record: 32664

Hi Mark...
A couple of questions from an old Buffalo radio news veteran (ex-WKBW 1977-78, ex-WBEN 1978-81);
WBEN, as it turns out, has a longer history than it even admits to. We always claimed September 8, 1930 as a sign-on date, and back in 1980 (when I was researching it for our observation of the station's golden anniversary) I found what appeared to be a confirming article in the Buffalo Evening News. Actually it was a huge section of the paper filled with self-promotion, proclaiming WBEN's sign-on as an event as massive as V-J Day. This was clearly, according to the paper, a brand new station.
Guess what? It was actually nothing more than the acquisition of an existing station, complete with CBS Network affiliation. ABC-TV Washington technician Xen Scott, who also researches the history of radio stations across the US, dug into the FCC files on WBEN at my request. He found it had actually begun life in 1922 as WMAK, owned by Norton Laboratories, Inc. (which I believe is still in business as a scientific research and engineering firm serving Western NY industry). After the usual frequency shuffling all stations went through in the 1920s, it settled about 1925 at 900 kHz with 1000 watts from a transmitter on Shawnee Road near North Tonawanda. (That site was still in use by Buffalo Marine Radio, along with two of the old supporting towers for the longwire antenna, as late as 1981, and still may be in use now.) It was one of the original CBS affiliates in 1927-28.
WMAK was sold to a separate broadcasting company called Radio Station WMAK, Inc. in the late 1920s. They apparently ran into some financial trouble, sold off the facility on 900 kHz to the Buffalo Evening News on June 25, 1930 and re-opened on 1040 kHz, in hopes of getting a clear channel authorization. WMAK went under about a year later and was deleted. Meanwhile the 900 kHz frequency was temporarily dark until the September 8 signon date, when the News's studio facilities at the Statler Hilton were ready. They fired up the North Tonawanda site again, this time as an NBC affiliate (which they were on the radio side until the early 1980s when they went back to CBS). WBEN hasn't missed a broadcast day since. (It moved to 930 and to its Grand Island transmitter site in March of 1941, with its current antenna complex and 5000 watts around the clock.)
WBEN, as of 1980, still had just about every piece of paperwork ever generated by either itself or by the FCC

from September 1930 onward, most of it kept at the Grand Island site. They probably still have most of that stuff. But they have NOTHING left from the WMAK days, and in fact, not even the old-timers knew or remembered anything prior to the date that WBEN now calls its birthday. (And we still had a few folks on staff as late as 1978 who'd been with WBEN since before World War II.) I don't know why they don't claim a 1922 sign-on date, since the lineage back through the old WMAK is clear, the license and facilities were purchased directly even if they were briefly dark through the summer of 1930. If they did that, they MIGHT actually be as old or older than WGR, which has always claimed to be the first and oldest station in all of Western NY (including both Buffalo and Rochester). It's not unheard of for a station to renounce its past. We trace our own sign-on date to July 2, 1984, even though a predecessor facility dates back to 1936, because that predecessor had, frankly, a negative image in the community. But I know of no such problem involving WBEN and its predecessor WMAK.

Not by international treaty, however. Chile or Colombia or whichever government has CB* in fact complained some years ago about Canada's use of CB*. Subsequently, the CBC began identifying stations as "CBC Vancouver", etc., and not using call letters at all (their privilege, since callsigns aren't required). Incidentally, what shortwave stations are you referring to as using CB* calls? I've never heard any.

You might double check that cell phone thing. As far as I know it is NOT ok to light up a cell phone in any kind of aircraft. Simple reason: at 2000'agl you could probably light up every cell site in a small city!

Dan,

I side with you. I've even heard Modern Rock stations that otherwise sound rather un-CHR doing this. I program a Rock station, and I employ talk-up beds for several occasions, mostly contests. I believe it keeps a sense of continuity going in addition to the benefits you detailed.

When executed well, I think it actually sounds more professional. It appears that much thought and planning went into even that little bit of jock talk. I think that's a good perception to encourage.

I cannot begin to tell you how many two punch train wrecks I've heard on radio stations. The jingle out never falls on a natural break in the music, or it's off-beat or whatever. Weather Jingles shouldn't be more than 15 seconds long; with maybe 8-10 seconds of music to talk over. So what if it's Sunny and 75 for the next week. True talents can make a mundane forecast into something that's entertaining. I grew up listening to WLS in Chicago. They never did this two-punch wuss stuff.

Plus not giving a jock a certain time limit can be dangerous. Yes, I've heard jocks ramble on to the point of running out of bed. Then after finishing up the forecast dry for 5 seconds, he hits the jingle out.

I guess it's just a difference in philosophy.

Rob Olson

OK, all the Drearm Announcing staffs seem to be West Coast oriented. So here's the vote on the Northeast part of the country (stations listed for each jock were where I think they sounded best...not necessarily where they are today).

6a-9a: Harry Harrison (WABC) and Tom Doyle (WAAF)
Newsman: Gary Lapierre (WBZ)

9a-noon: Bill Garcia (WBZ and WAAB)
newsman: Robert Stevens (WRKO)

Noon-3pm: Johnny Williams (WRKO)
newsman: John Masters (WRKO)

3p-6p: Dan Ingram (WABC)
newsman: Bob Hart (WABC)

6p-9p: Juicy Brucey Bradley (WBZ)
newsman: Dave Newman (WEEI newsradio)

9p-midnight: Arnie Woo Woo Ginsburg (WMEX)
newsman: Pat Parsons (WCBS)

All night: Larry Glick (WBZ)

honorable mentions: Cuzzin Brucie (WABC), Ron Lundy (WABC), Dick Pleasants (WBZ), Joey Collins (WAAB), Bob Bryor (WORC), Jess Cain (WHDH), Dave Maynard (WBZ), Jerry Butler (WRKO), JJ Jeffries (WRKO), Doug Walker (WRKO and WAAB), Loren and Wally (WVBF), Harvey Wharfield (WVBF), Jeff Howlett (WOCB-Cape Cod), Chris Kane (WAAF), Scott Wainwright aka Mark Parenteau from WBCN on WORC, JJ Wright (WRKO, now Kiss 108), Bobby Mitchell Frank Kingston Smith (sounded better on the Big 68 than MusicRadio 77), Shadoe Stevens, Bud Thaves WPRO, Ernest Andrews WROR, Vernon with a V on 66 WNBC.

Gee, did I miss anyone?

3120. DX Test - HCJB Ecuador

Newsgroup: rec.radio.broadcasting
Date: 1995-04-20 00:00:00 UTC
From: Jean Burnell <jburnell@kean.ucs.mun.ca>
Message-ID: <3n67v2$i98@vixen.cso.uiuc.edu>
Source record: 32671

Reply-To: jburnell@kean.ucs.mun.ca

Hello and greetings from Quito:

As you may hear on "The Latest Catch" today, we will be running the next 690 kHz DX test program on SATURDAY MAY 13 from 0600-0630 UTC. (That would be late on Friday the 12th if your time zone is UTC-7 or more.) This will coincide with a number of mediumwave DXpeditions taking place that same weekend.

I don't want to give away the contents of the test program but let's just say if you hear us, you'll probably know it :-) The program will be bilingual (Spanish/English), have unique music and plenty of piercing code.

This time, we will be using HCJB's mediumwave standby transmitter which is located in Pifo, the same site at which our shortwave transmitters are located. The output power of the standby transmitter is 25 kw. Although this is half the official output of the regular 690 transmitter on Mount Pichincha, we believe there is a greater chance of DXers hearing this because of the better grounding situation out at Pifo.

If you hear the test, or something you suspect as being the test, do write us please! The address for reports is:

690 DX Test
c/o Frequency Management
HCJB
Casilla 17-17-691
Quito
Ecuador

or via e-mail: rmcvicar@mhs.hcjb.com.ec
or FAX: +593 2 447 263

An IRC with your report would be appreciated to help with postage costs. Tapes are welcome but regrettably cannot be returned.

If you can't wait to let us know you heard it, I'll be at HCJB during the test and you can call me at this touch-tone number: +593 2 466 612. Wait for the dial tone, then punch extension 441. I'll try to record your call and use it on DX Partyline.

Please do pass this message on to other bulletin boards, groups and friends who may be interested. This particular note has been

copied to everyone whose address I have that might even be
remotely interested in such a test :-)

Best of luck in hearing the test!

73 and God bless,

Rich

First, the 70's domain of "CHR", playing all the top hits no matter what
genre, has been taken over by TV...MTV, MuchMusic, whatever. Radio's role
in that area is finished, it's now frgmeanted.

As for today's formats, innovators have always bred imitators.
Alternative, Current-based AOR and AAA/Progressive are the most
interesting stations on the dial these days. The music established by
these trendsetters will become the familiar music you'll hear 10 years
from now on the mindless "90's nostalgia" stations. By then. I'm sure
I'll be listening to whatever is setting the trend for its day, and
hopefully radio in general will be a bit more innovative than the dreck
we're getting now.

At the rate some of these "greatest hits of the 70s" stations are going (i.e.: slipping ratings)...you probably won't have to wait long.

> I would hope that this station would play
> Starship and Glass Tiger in addition to John "Cougar'' Mellencamp and

Don't expect it! While the artists you named would certainly be part of the "80s gold" format, it will be a rare exception for any gold format to play "deep cuts." But let's hope some of these station owners learn from a quick burn on "70s gold" and broaden the playlist for an "80s" format. (There are a lot of "hits" from the 80s - or any decade for that matter - to be played) I know of a few program directors who wouldn't mind that idea at all!

The CHR station in our market (Midland/Odessa, TX) owns Fridays with their "Flashback Fridays" - hits of the early-80s sprinkled throughout the day. We're talking really cool stuff. Everything from Go-Go's and Police, to one-hit-wonders like The Vapors, Re-flex, Lips Inc, etc... I program the Rock competition...and I even listen!

A local club even abandoned Disco Night for "Wayback Wednesday" using the same music! The next Arrow will shoot straight through the early 80s, and it is very predictable as the Nostalgia Wave follows the aging population.

3124. Fox and ABC in St. Louis

Newsgroup: rec.radio.broadcasting
Date: 1995-04-20 00:00:00 UTC
From: transvox@interstate.net
Message-ID: <3n67va$i9r@vixen.cso.uiuc.edu>
Source record: 32675

This primarily is a TV item, but there is some relevance to radio. There also seems to be no other good home for this type of item (rec.arts.tv just doesn't seem to fit).

The St. Louis Journalism Review reports in its April issue that KTVI(TV) and KDNL-TV are to swap ABC and Fox affiliations August 7. New World Communications is buying KTVI, an ABC affiliate on channel 2. A firm date for the affiliation change can't be set until the Federal Communications Commission approves the KTVI purchase. The present Fox affiliate, KDNL on channel 30, plans to add newscasts when it becomes an ABC affiliate, according to the SJR.

In Missouri's other major market, Kansas City, New World purchased WDAF-TV (channel 4) Sept. 9, 1994 and flipped affiliations from NBC to Fox the following Monday, Sept. 12. NBC landed on KSHB-TV, channel 41. The big winner in the confusion that followed was independent KSMO-TV, channel 62.

The Kansas City sale broke up the market's last radio-TV combination, with WDAF(AM) and KYYS-FM remaining in the Citicasters chain. The radio stations will be moving their studios from the longtime Signal Hill site of WDAF-TV to offices in Manor Square, a converted bakery, late this summer. This is the same location vacated by KCMO-AM/FM after Bonneville, the owner of KMBZ(AM)/KLTH(FM) purchased the KCMO stations and moved them out to KMBZ's Westwood, Kansas site, just across the state line from the Country Club Plaza district.

KDNL-TV is owned by River City Broadcasting Partnership, which also owns modern-rocker KPNT(FM) and leases album-alternative WVRV(FM) in St. Louis. Another SJR item indicated that WVRV may be moving its transmitter to the old KCFM(FM) site in the Central West End of St. Louis city in an effort to remedy persistent signal problems.
